THE FLORISTS' EXCHANGE

We are a straight shoot and aim to grow into a vigorous plant

A WEEKLY MEDIUM OF INTERCHANGE FOR FLORISTS, NURSERYMEN, SEEDSMEN AND THE TRADE IN GENERAL

Vol. XV. No. 1 NEW YORK, JANUARY 3, 1903 One Dollar Per Year

G E Stone Jan 03 Hatch Expt Sta

Here Is Another Bargain in Bulbs for Easter Forcing.

All the Paper White Grandiflora, Horsfieldi, Emperor, Empress, and double-nosed Von Sion Narcissus offered in last week's issue **ARE ALL SOLD.** We could have sold them two or three times over. People know a good thing when they see it. We offer below some other good stock at equally low prices. If you can use any of the bulbs offered, let us have order without delay, before we are sold out.

Now that the holidays are past, Florists are looking forward to Easter, which comes late this Spring—April 12th, so that there is plenty of time to get any of the stock here offered in bloom by that time. Bulbous stock is selling for good prices on account of the scarcity of other flowers—due to the high price of coal—and as bulbs can be grown in a low temperature, they will make money for you.

Everything offered is in first-class shape, and are **GREAT BARGAINS AT THESE REDUCED PRICES. Send for complete list of surplus bulbs, which we are closing out at equally low prices.** When ordering please refer to this special offer.

SMALL SIZED NAMED HYACINTHS.

This is wonderfully fine stock for the price. The bulbs are of large size—12-15 cm. in circumference—and are splendid for Easter forcing, either for cutting or growing in pans. Nothing is more readily salable. Although the price is low, the bulbs are first-class. They will throw almost as good flowers as the larger and higher-priced bulbs. If you have never flowered them, try a thousand or two. You will be pleased with the results. They cannot fail to make money for you.

The following pink varieties **at only $1.50 per 100; $12.00 per 1000** (worth $16.00 per 1000), viz.: Baron van Tuyll, Gen. Pelissier, Gertrude, Gigantea, Rob. Steiger, Solfatara.

The following blue varieties **at only $1.50 per 100; $12.00 per 1000** (worth $16.00 per 1000), viz.: Grand Maitre, King of the Blues, La Peyrouse, Chas. Dickens, Blondin, Czar Peter; also Tamerlan (yellow).

The following white varieties at **only $2.00 per 100; $16.00 per 1000** (worth $22.00 per 1000), viz.: Baroness van Tuyll, Grandeur a Merveille, Blanchard, L'Innocence, Mme. Van der Hoop, Paix de l'Europe.

FINE NAMED HYACINTHS Single and Double.

We offer also a limited stock of the following varieties in first-sized bulbs, $3.00 per 100; $25.00 per 1000 (worth $35.00 per 1000), La Peyrouse, Regulus, Tamerlan, Grand Lilas La Pluie d'Or, Gen. Pelissier, Grandeur a Merveille, Bloksberg, Bouquet Tendre, Czar Nicholas, Crown Prince of Sweden, Flevo, Garrick, Groottorst, Gen. Antinck, King of Wurtemburg, La Tour d'Auvergne, LaVirginite, Lord Anson, Lord Raglan, Othello, Prince of Orange, Prince of Saxe-Weimar, Princess Royal.

HYACINTHS **In Separate Colors, Single and Double.** We still have a few of these left, which we offer as long as unsold at **$2.50 a 100; $20.00 a 1000** (worth $26 a 1000).

WHITE ROMAN HYACINTHS.

We still have a few cases of fine 12-15 centermeter bulbs, which we offer as long as unsold at **$15.00 per 1000** (worth $25.00 per 1000).

NARCISSUS These prices will speak for themselves: Von Sion, double extra sized bulbs, per 1000, $7.50; Trumpet Major, Single Von Sion, per 1000, $6.00; Princeps, Poeticus Ornatus, Barri Conspicuus, per 1000, $5.00; Incomparable Stella, Incomparable fl. pl., Alba Plena Odorata, per 1000, $4.00; Poeticus, Single Sweet-scented Jonquil, per 1000, $2.00; Golden Spur, Silver Phœnix, Grandis Maximus, per 1000, $15.00.

TULIPS.

Single and Double.

Most of the varieties here offered are among the very best forcing varieties, especially for late or Easter forcing. La Reine, Rachel Ruisch, Rosamundi Huykman, Bizard Verdict, Couleur Ponceau, La Candeur, Yellow Rose, Lady Grandison, Duke of York, Rose Blanche, Count Leicester, per 1000, $5.00; Cottage Maid, Joost van Vondel, Brutus, Pæony Red, per 1000, $6.00; Tournesoll, red and yellow, Gloria Solis, Le Blason, Rosine, per 1000, $7.00; Pottebakker white, Duc van Tholl scarlet, Standard Royal Silver, per 1000, $7.50; Rose Grisdelin, Belle Alliance, Mariage de ma Fille, per 1000, $10.00; Proserpine, Mon Tresor, Couleur Cardinal, per 1000, $12.00; Joost van Vondel, white, Rose Luisante, per 1000, $20.00.

CALLAS We have a few hundred of these, which can be gotten in fine shape for Easter. Extra sized bulbs, 1¼ to 1⅝ inches in diameter, $3.00 per 100, worth $5.00 per 100; Selected bulbs, 1⅝ to 1¾ inches in diameter, $4.00 per 100, worth $6.00 per 100.

MOTTO:—"High Grade Quality, first, last and all the time." My patrons will find me true to my motto.

I recommend my new firm to the kind consideration and patronage of the Trade, and any orders entrusted to me will be filled with the utmost care and fidelity. In case my representative misses you during the traveling season, write for catalogue with special quotations. Buy the best at honest market prices. Yours respectfully, **CHAS. F. MEYER.**

Buyers of

AZALEAS and PALMS

Attention!

PLEASE NOTE THAT THE CELEBRATED COMMERCIAL NURSERIES

AD. D'HAENE CO. Ltd., GHENT, BELGIUM

Have appointed me their **sole** representative in the United States and Canada for the sale of their products in

Azaleas, Araucarias, Palms and Miscellaneous Plants

Extensive plantations and new houses have lately been added to the Nurseries and a large stock, **unsurpassed in perfection of growth**, is offered to the trade this season at reasonable prices.

The greatest care is devoted to the cultivation of **AZALEAS** and **PALMS** and buyers can rely upon receiving well-grown and shapely plants.

For Spring Delivery Growers having room in their greenhouses during the idle Summer months, when no artificial heat is required, will find it to their advantage to import young plants of **Palms, Araucarias, Citrus, Ficus, Etc.** in the Spring, as such young plants can be had at a low figure and will grow rapidly into money making fine salable plants for Fall.

My representative will call upon you during the selling season. If you should unfortunately be missed, write for catalogue. I shall be delighted to receive your order. **Your** turn to be delighted will come when you receive the goods. Yours respectfully,

SEED TRADE REPORT

AMERICAN SEED TRADE ASSOCIATION.

Walter P. Stokes, Philadelphia, President; C. N. Page, Des Moines, Iowa, Vice-President; C. S. Burge, Toledo, Ohio, Second Vice-President; S. F. Willard, Wethersfield, Conn., Secretary and Treasurer; A. N. Clark, Milford, Conn., Assistant Secretary.

PHILADELPHIA, PA.—J. A. Smith, formerly with the Walter Mott Seed Co., of Jamestown, N. Y., is now with Henry F. Michell.

NEBRASKA SEED CROPS.—The vine seed crop in these parts was mostly an entire failure, caused by insects and unfavorable weather. Most of the growers have not got stock seed for next season's planting; a few have carried over stocks from 1900. Those that have supplies of the standard varieties and novelties will surely be in it. The shortage of crops will benefit the mail trade and legitimate dealers, as grocerymen and country store dealers cannot get stock to cut prices. Seeds are invariably sold through the West by grocery and hardware dealers, at one-half catalogue prices, by the ounce and quart. Sweet corn is a very short crop; not over twenty per cent. of good seed of Evergreen, Country Gentleman, Early Minnesota, Cory or Crosby will be saved. From twenty acres of Hubbard squash planted, not one pound of 'seed matured; other growers in this section report the same sort of failures. Growers will have to get better prices, or there will be a very small acreage planted in 1903. The growing of alfalfa in this country is bringing in many kinds of insects that are destroying the seed crops. We have a worm similar to the corn worm that is destructive to the fruit of tomatoes; entire crops of these being destroyed by it. Cucumber seed is selling readily at 75c. to $1.00 per pound, wholesale. G.

Notes from Holland.

A repetition of the severe weather experienced last month, but this time lasting longer and being more intense, put a sudden stop not only to all outside work, but the unusually strong wind blowing made the severe frost penetrate much deeper into the ground than under ordinary circumstances, and the result will no doubt prove to be very painful as soon as the present mild weather has sufficiently thawed out things to allow of a thorough investigation. In the bulb districts very little of the fields had their winter covering on, and in many places the frost got into the ground so deep at once that the covering could not save the bulbs any more, and in many instances such bulbs as iris and gladioli have suffered considerably, and it is even very likely that the so-called hardy bulbs have suffered on account of the fierce blowing and icy wind of the first days. Planting operations have all come to a full stop, and as many thousands of bulbs have to be planted yet, the growers are anxiously looking out for a few days of mild weather to complete operations. Fortunately the present indications are in their favor, and if the rain continues for two days more the ground will be in working condition again.

Reports from various districts where large quantities of sugar beet and potatoes for the factories are grown state serious losses by the severe frost, and such as had not been lifted yet are considered a complete loss. Owing to the cold Summer, lifting of all products was much delayed, and more than usual was still in the ground when the frost came.—Horticultural Trade Journal.

BRIEFS FOR BUSY FLORISTS.

ROSES.—The propagating of new stock for next season's work is in order now, and whenever a batch of cuttings is available they should be put in the sand.

CARNATIONS.—The taking of cuttings of carnations also is in order, and one cannot be too careful in their selection. Taking cuttings from weak or unhealthy plants means only a perpetuation of delicate stock, and should be avoided. Be sure to take only healthy cuttings.

TULIPS AND DAFFODILS.—These can be forced now, and have fairly good stems to the flowers, though they are never very good when tried before the new year comes in. Place them where they will have a good bottom heat, and be away from the light, so as to make the stems stretch out. As soon as the leaves begin to unfold, light must be admitted gradually, as it is harmful to have them in the shade too long.

HYDRANGEAS.—If the early-flowering plants have not yet been put on the benches, this had better be done during the coming week. If the pots are filled with roots, the plants should have another potting. Those that were lifted from outdoors and potted in the Fall will not, however, need potting again at this time.

ALTERNANTHERAS.—The stock plants of these need some attention at this time, and must be got into a good light position, where they can grow stocky, and produce good cuttings.

SEEDS.—A few things may be sown now, such as gloxinia, verbena, lobelia and centaurea.

NURSERY DEPARTMENT

AMERICAN ASSOCIATION OF NURSERYMEN

Charles A. Ilgenfritz, Monroe Mich., President; D. S. Lake, Shenandoah, Ia., Vice-President; George C. Seager, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., Treasurer.

WEST CHESTER, PA.—Hoopes Bro. & Thomas have begun the erection of another packing shed.

Fred'k W. Kelsey, of New York, president of the New England Society of Orange, N. J., presided at the annual dinner of the Society, held in Orange on December 22. In the assembly were Governor Franklin Murphy, Thomas A. Edison and Congressman Fowler. Ex-Attorney-General Griggs and President Woodrow Wilson of Princeton University were among the speakers.

Morton's Arboretum.

Arbor lodge, the home so long occupied by J. Sterling Morton, with an ample tract of land surrounding, has been dedicated as an arboretum in honor of the founder of Arbor lodge. Mr. Morton's sons have set aside a fund to maintain the arboretum, and create a paradise of trees as their father desired it should be. The States of Nebraska and Iowa should take a special pride in this botanical collection, which will be to their inhabitants what Prof. Charles H. Sargent's creation, Arnold's Arboretum, is to all New England. But while the home of J. Sterling Morton was in Nebraska, he will always be thought of as a national character. Many States are purposing to send specimen trees from their native forests, to be planted at Arbor lodge as historic memorial trees.

Espalier Fruit Trees.

Many nurserymen in the past have had inquiries for espalier fruit trees—something hardly obtainable in this country. The call comes in a measure from the fact of there being so many European gardeners in the midst of us, all of whom have been accustomed to having these trees in gardens at home. But more than this, there are good reasons why these trees should be employed here. Many division lines in gardens are made now with shrubs, or bushes of no particular relation to a fruit or vegetable garden. The privet is often so used. The espalier fruit trees would be much better employed instead, as they are utilized in Europe. Nurserymen, as well as their customers, could quickly form these trees. Many a peach, cherry, apple, pear and other fruits could be selected, flat-shaped, with branches from near the ground up, and, set to a wire trellis for a year or two, would be "broken in" for espalier purposes. When once started in this shape it is not difficult to keep them progressing in the same direction. In many city yards, where shade from trees is not desirable, these would be sought for if their merits were explained. There seems room for nurserymen to keep a stock of espalier trees.

Getting Stock in Shape.

The winter months are by no means idle ones to the nurserymen who have large blocks of trees. There is plenty of work to be done in getting into good shape the many trees not in the best possible condition for selling. There is pruning that can be done to good advantage in Summer, and some which is much better done in Winter. Many trees are much better let grow as they will through the Summer. The more leaves, the stronger the tree becomes, and many a branch which is not where it is wanted helps the tree through the Summer, but should be cut away when Winter comes. Take the common Carolina poplar as an example. Suppose it to be a young tree of six to eight feet in height, just commencing to make some side shoots. The shoots may appear in June, all along the stem. Cut these off from a dozen trees and leave them on another dozen, and at the end of the year you will be satisfied what to do another season. The dozen on which the shoots were let grow will be many times better than the others. The main shoots will be twice the circumference of the others. This holds good in the case of all young trees. Let them grow nearly as they will the first Summer or two, excepting to see that the main shoot is straight. Then it is that the Winter pruning will come in, for then will be the time, and not before, for trimimng off these side shoots. Taking the poplar again as an illustration, as it is nearly altogether desired for street planting, low branches are not required. Near cities, where tree boxes or some protection of the kind from horses and boys is necessary, these trees are not desired branched lower than about six to seven feet. Trim up to this height. All other trees for use in the same way require the same kind of pruning. Where the object is to form lawn trees the branches will be permitted to remain lower, say, to four feet from the ground. This pruning should be started early in Winter, taking advantage of suitable days. Men with suitable boots and clothes do not mind the snow on the ground; when the wind is not blowing they can work and keep warm the greater part of the day.

Besides the pruning in the manner described, there are many other reasons for pruning through a block. A tree may have limbs out of place, the cutting off, or cutting out of which would make such tree worth more to a customer. The pruner, if a man of judgment and conversant with the wants of the trade, will hardly pass a tree, or shrub, in a row that will not have the knife used on it to advantage. One who has to do with the selling of stock is a good party to oversee its pruning. He knows what customers ask and can see at once where a few cuts with the knife will make the tree more valuable. Pruning is one of the most important parts of a nurseryman's work.

Elaeagnus Simoni.

Shrubs that flower in late Autumn are particularly desirable, especially when the season is so favorable to outdoor enjoyment as the present one is. I am led to these remarks by admiring to-day several bushes of the Elæagnus Simoni in full flower, a state they have been in for over a month past. The flowers are white—not a clear white—arranged along the stems, and are delicately and pleasingly scented. The shrub itself is an evergreen, just hardy with us, but it would probably need a sheltered place further north. The persistent leaves hide the flowers to some degree, but not to a serious extent. It is not a rampant grower, such as many of the elæagnus are, but forms a shrub of fair size, and good proportions.

Lavender.

The common lavender is a plant quite hardy in any save a greatly exposed situation in Winter, in this vicinity. It is a plant which when potted, to make transplanting easy, sells freely. Everyone almost wants a pot of lavender. Many of those who see and purchase a plant tell how they have tried time and again to get one from seed, without success. It is an easy subject to increase, striking readily from cuttings. One or two plants grown on indoors and propagated from wood give a nice lot of young plants in a short time.

The California Privet as a Defensive Hedge Plant.

J. H. Crane, of Tennessee, asks whether I can say of the California privet that it is a good defensive hedge plant, fit to enclose his vegetable and fruit garden. In the sense in which the question is meant, I have no hesitation in saying this privet is a good defensive plant. It is not supposed that large animals are at large near such a garden. If they are, such a hedge would not resist a horse or a cow or a hog, but it could be made so bushy that a dog, cat or fowl would not find it easy to get through it. When set about nine inches apart, in a single row, and cut down well at the start and for the few years following, a dense hedge is formed, with lots of small twigs, showing no weak places for the entry of the animals named. Those who may wish to make the hedge still more impenetrable will set a double row of plants, the plants a foot apart in the rows and set alternately, so that between the two rows there is a plant every six inches.

In this vicinity there are many such hedges, thick and dense from the ground up; and it is within everyone's power to have a hedge of this nature if but proper pruning be performed at first, as already advised.

In the North, in sheltered places, especially when in hedge form where one plant protects the other, this privet is evergreen. Only where severe freezing and high winds catch it is it deciduous.

Tree Tomato and Tree Currant.

A correspondent in South Africa writes to enquire if I can give him seeds of tree tomato and tree currant, which, he says, are offered in the catalogue of a New York seedsman. Seeds sent him, he states, have failed to germinate. Neither of these is known to me, though I think I have heard the name "tree currant" applied to the wild ribes of Utah, sometimes called Utah currant, and only as fit to be called currant as is the Ribes floridum of our shrubberies, to which it is closely allied. What we know, and what is meant by tomato can hardly exist as a tree form. The common tomato could scarcely be made into a tree, even if where no frost occurred, and its life continued for several years. If it could be, what advantage would it have over the other? I have advised my correspondent, that if the common tomato and common currant do well with him to rest content; that even if the tree forms he seeks exist, it is doubtful if they would prove of any value to him, compared with the others.

Fruit Trees for Ornamental Planting.

Mr. George McNaughton, writing of what has appeared in these columns from time to time concerning ornamental trees, suggests that more use might be made of fruit trees than is now done, a statement with which I quite agree. There are some trees, the presence of the fruit of which on a lawn would be objectionable; but, on the other hand, there are many sorts not liable to this objection, and even if fallen fruit is undesirable, some of the most prominent of ornamental trees now planted, such as the horse chestnut, the oak, the hickory, and others, cover the ground beneath them with their nuts and shells.

In the vicinity of Philadelphia there are numbers of large mazzard cherry trees, the product of birds dropping stones of cultivated ones in the first place. Some of these trees, originally in wild places, are now on estates which have enclosed them. When these trees are in flower, in Spring, there is no ornamental tree approaches them in beauty. There is no more seed under such trees than under the half of others now planted; and should the fruit not be wanted, birds will be grateful for it. Not everyone would care for an apple or a pear tree in a prominent place on a lawn, but, where unobjectionable, many of them have very handsome foliage and flowers.

Not a month ago I planted an Elkhorn cherry tree to make shade for my kitchen door. This and all the sweet cherries constitute excellent shade trees.

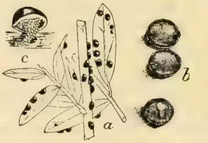
Brown Scale on Palms.

The brown scale attacking palms and other greenhouse plants is the so-called hemispherical scale (Lecanium hemisphæricum Targ). This scale insect is distinctively a greenhouse pest, although it often occurs in subtropical countries out-of-doors on citrus and other trees, rarely, however, in injurious numbers. This insect has been carried all over the world on plants. In color it ranges from the light brown of the young to a dark brown, changing to reddish in the old scale. The adult scale is hemispherical in shape, perfectly smooth and shining; and this, with its color, readily distinguishes it from allied species. A figure of this scale insect drawn from a sprig of olive grown in the department greenhouse is given on page 276 of "The Scale Insect and Mite Enemies of Citrus Trees."



Hemispherical scale (*Lecanium hemisphæricum*); *a*, characteristic group of adult scales on olive—natural size: *b*. three female scales—considerably enlarged; *c*, scale lifted from leaf, showing mass of eggs (original).—Dept. of Agriculture, Washington.

The remedy for this pest on greenhouse plants is in fumigation with hydrocyanic-acid gas where this is feasible. For a few plants, or where fumigation is not advisable, the infested plants may be thoroughly washed with kerosene emulsion, 10 per cent. dilution, or even with a strong soap wash made by dissolving soap in water at the rate of half a pound to a pound to the gallon, the weaker wash being for more tender plants. This application should be repeated as often as necessary. Two applications ought to effect a pretty complete riddance.

Hydrangea Hortensia nivalis is figured in the December 20 issue of The Gardeners' Chronicle. Plants shown by Bull & Sons, Chelsea, at a recent meeting of the Royal Horticultural Society, of London, had leaves with a margin three-quarters of an inch wide of a deep green tint surrounding an irregular central patch of creamy white. The plant is said to be an effective greenhouse subject.

A. T. De La Mare, President.

Canadian Christmas Reports

MONTREAL.—The weather conditions on the day before Christmas were not such as to call for much enthusiasm although they might easily have been worse. The temperature was quite low enough to make the delivery of plants extremely risky. The average temperature for the day was about 10 above zero. As far as I have been able to learn, every florist suffered some loss through plants being frozen during delivery, but I have heard of no very serious trouble. In this connection the remarks of one of the florists is worth repeating. He said: "I have had several complaints of freezing this year, as usual, and I notice again that the majority of these complaints come from houses in the immediate vicinity. I make a practice, whenever possible, of personally examining the complaints, and in the great majority of cases I find that the trouble is with the buyers themselves. The principal cause is entire failure to water the plant; the consequence is that it soon droops, and 'frozen' is the verdict. Leaving the plants near an open window is another source of trouble. When this has been done, one side is usually badly frozen, while the other is practically unharmed. When we are in fault I replace the specimen immediately, and tender an apology. In this way we rarely lose a customer." This seems to fit the condition exactly. I made several inquiries at different firms, and nearly all the complaints were found to be in places where it would seem an impossibility that the plants should suffer damage; while others went several times as far without harm.

As in former years, the plant trade was the feature, and of the various popular things, azaleas stood first, with a preference for the colored varieties. The most popular price for these would be from: $2.50 to $5.00. Probably the most plants were sold at $3.00 to $3.50. There was a demand for larger specimens, but it was limited. Very few azaleas were left over, as the supply was short. The plants generally were below the average. Poinsettias in pans were next in favor; the most popular size in these sold at $2.00; dwarf plants, or shallow pans made up with plants grown in small pots, with good foliage, had the preference. Gloire de Lorraine begonia came next, and many were sold. Some very good plants were to be seen, and the public did not seem to be quite so much afraid of them this year as formerly. Here, again, $1.50 to $2.00 was the popular price. Cyclamen were much better and more numerous than in former years; plants that retailed for $1.00 to $1.75 sold well. Solanums were very plentiful and good, immense numbers were sold, and many were left unsold. This line is being much overdone. Very good plants could be bought for 50c to $1.00. Primulas were also plentiful, but the quality was generally very indifferent; about 50c. was the average price obtained. Lily of the valley was good and in better supply than usual, it sold slowly. Roman hyacinths were as numerous as ever, they moved quickest when the choicest of other lines was disposed of.

No new plants of merit were seen. There was this year a decided revival of the sale of decorative plants, such as palms and ferns, but this I put to the scarcity of really good flowering plants of the popular varieties. A few mixed flowering plants in baskets were seen; these sold readily. It would seem that more of these could be disposed of. Immense quantities of inferior holly were sold cheaply by different trades, hence the florists' business seemed to be confined to a few good customers, who desired a superior article. Mistletoe was very scarce.

The cut flower trade was one of surprises, the chief of which was the comparatively large demand for fine American Beauty roses, and the lack of demand for violets. It is probable that more than double the quantity of really fine American Beauty roses were sold here this Christmas than ever before. The price asked, and readily obtained for the highest grade of flowers, was $2.00 each, although $1.25 to $1.50 were the figures at which most flowers were sold. Liberty was exceedingly scarce, but much in demand. Bride and Bridesmaid were in smaller supply than formerly; these, when with stiff stems, fetched $4.00 to $5.00; a few went to $6.00; but the majority sold at $3.00 to $4.00. Supplies of the smaller varieties, such as Perle des Jardins, Sunset, etc., were limited; $3.00 to $4.00 was their limit price. In carnations, red kinds were the most popular, and the scarcest; $1.50 to $2.00 were the prices obtained. Mrs. Thomas W. Lawson came next in popular favor, and sold out at $1.50 to $2.00. For other varieties, $1.00 to $1.50 were the ruling rates. As before noticed, violets were a surprise. Formerly there has been no trouble in selling all the good flowers that could be obtained at Christmas. This year, owing to the very dark Fall, they were much scarcer than usual, and the price much higher. Even with the smaller supply, many were left over. Some attribute the lack of demand to the prices asked. They claim that the retail trade here won't pay $1.25 to $1.50 for a bunch of 25 violets, and unless the wholesale prices drop soon, the violet trade will suffer a severe check. Valley sold fairly well, as did mignonette, when good. Roman hyacinths and Paper White narcissus were, as usual, a drug. B.

OTTAWA.—Business during Christmas week was good, the weather not too cold to make delivery a risky undertaking. The trade was way ahead of former years, both in cut flowers and plants. Money seemed to be plentiful, and people willing to spend it. As usual, the demand increased for good-priced plants. The buying, or ordering, began earlier than usual, which was an advantage.

C. Scrim had an extra store for the sale of plants only, keeping his own store for cut flowers. He made a great showing of plant baskets, well decorated, and they all sold early at big prices; he also had a grand display of heaths in six and seven-inch pots, and, at last, the public bought them. The limited number of Begonia Gloire de Lorraine went the first day. Poinsettias, palms, primroses, cyclamen and azaleas sold well, and nothing but a few palms were left. Cut flowers sold out before night. R. Wright reports a large increase of business over last year. His specialty was cyclamen, of which he had 1,000 very fine plants, and they sold well at good prices. He reports disposing of a large batch of araucarias, which were prettily trimmed with scarlet ribbon. A feature of his cut flower trade was his American Beauty roses, of which he had a fine lot. He even sent one shipment of 50 to Toronto at $1.00 each. Graham Brothers report trade 50 per cent. ahead of last year. They had a grand lot of poinsettias, all of which sold. Azaleas, palms and primroses were cleaned out. In cut flowers they had a grand lot of chrysanthemums and violets and, like the others, a nice cut of carnations.

The price of plants was considerably higher than last year, and no one objected. Azaleas sold at from $1.50 to $5.00; poinsettias, 75c. and $1.00; primroses, 35c.; cyclamen, 50c. to $1.00; Jerusalem cherries, of which Scrim had a large stock, went at 50c. to $1.00; heath, 75c. to $1.50, palms, dracænas, araucarias, etc., at good prices. If anything went back, it was bulbous stock.

In cut flowers the supply was large, but not large enough, as was shown by the way in which people were running from one store to the other in the evening, you may say, begging for flowers, and finally were obliged to content themselves with a shop-worn plant. Carnations brought 75c. to $1.50, very few going below $1.00, Mrs. Lawson realizing $1.50. Roses were the least plentiful, and sold at from $2.00 to $3.50; American Beauty at $1.00 each. Violets were fairly plentiful, and realized $2.00 to $4.00. Chrysanthemums, of which there was a grand lot, brought from $2.00 to $3.00, mostly going at the latter figure; and W. H. Chadwick, H. W. Rieman and Golden Wedding were worth it. Lily of the valley and bulbous stock all went, and fetched fair prices.

The trade in green material was brisk, holly, with most, being sold out early.

Features of the trade were: The rush made for baskets of plants, Jerusalem cherries and Gloire de Lorraine begonias; the increased demand for plants decorated with ribbon and fancy paper pot-covers, as exemplified by Wright's cyclamen and araucarias, the usefulness of chrysanthemums at Christmas, as the demand for good ones seemed unlimited, the desire of the public for a better class and higher-priced plant, the good-natured way in which our patrons accept the high but legitimate prices of cut flowers. E.

HAMILTON.—On Tuesday, December 23, some of the market growers made a display on the Central Market; it was pretty chilly for their stock but not freezing and a good deal of cheap material was disposed of. The day before Christmas there was a light snow fall giving everything the proper seasonable aspect. Business was very brisk, considerably better than last year; in fact, the general opinion seems to be that there was an increase in the volume of trade of about 15 per cent. There was a clean-up of everything salable; flowers were picked and picked till nothing at all was left. What few chrysanthemums were left were decidedly slow until the day before Christmas, when they were all picked up. A weakening in the popularity of plants was looked for, but the demand was increased.

C. Mason is no longer in the business, and his usual fine lot of Chinese primroses was really missed.

Azaleas were all sold, even to plants with but two or three open flowers. Begonia Gloire de Lorraine was hardly in evidence, there was a very poor supply on hand.

I noticed no effort on the part of the storemen in the way of decorating plants with ribbons or Porto Rico matting. The sale of palms, araucarias and other plants without flowers could without doubt be very largely increased and proportionately better prices obtained if tastefully prepared. All kinds of green and holly wreaths are paid but little attention to by the storemen; a large demand would quickly be found for such goods if it were catered to. Almost all the holly and wreathing that comes to town now is handled by the department stores, or given away by the grocers. Here is work for the Florists' Club.

The weather was at no time too cold for the safe delivery of goods, and the Christmas trade was the largest and best that has been experienced here yet.

There is a pinch for all kinds of coal; even soft coal is getting scarce. Some dealers are selling in half ton lots only, and some of the growers are considerably bothered.

J. H. Stevens, representing J. A. Simmers, was making acquaintance with the trade last week. BEAVER.

LONDON.—Now that the rush is over we can size up the situation, and reflect on the possibilities and probabilities for future operations. At every holiday season some lessons are taught which, if heeded and put to practical use, are of most essential benefit. Again it has been demonstrated that there is an almost unlimited demand for first-class flowering plants, as well as cut blooms, and to those who keep in mind that it is quality, rather than quantity, that is sought, so will their bank account swell, with their ability to keep at the top and to meet the ever increasing demand for an A1 article.

On nearly all plants and cut flowers offered there was an advance of a satisfactory percentage over prices obtained last year, while the total increase in business would average about 30 per cent. The weather, up to noon on Wednesday, was all that could be asked for; then a snowstorm set in and made it very disagreeable. At night it turned cold, and a few losses from plants frozen while delivering are reported.

The wreck on the Grand Trunk Railroad when 28 were killed and over 30 badly injured, happened only a few miles west of London, and cast a gloom over the city Saturday and Sunday.

There has been a large amount of funeral work of late, and with the short condition of the market it has been difficult to meet the demand. G.

FREDERICKTON, N. B.—The weather during the past holidays being seasonable, trade in cut flowers was good, especially in carnations and smilax. These were of fine quality, and there was an extra large stock of them, which met all demands. Sales were better than last year's, carnations brought 75c. a dozen, smilax, 25c. per string five feet in length. The next best selling stock was roses, Bride, Bridesmaid and Perle des Jardins bringing $2.00 per dozen, a few sold for $1.50. Of violets, lily of the valley and Paper White narcissus there was but a limited quantity sold; freesia realized 50c per dozen.

In plants, azaleas, Begonia Gloire de Lorraine, cyclamen, white Roman hyacinths in pans, and poinsettias were offered. Of these, cyclamen sold best. Potted primroses also went well; the Chinese and P. obconica at 25c. each. Poinsettias were much admired for church decorations, and sold for 50c. each. For decorative plants there was scarcely any call. Holly is increasing in demand each year, and quick sales are made. Very little mistletoe was used. A dinner decoration, and funeral work, helped to make us extra busy. Altogether, Christmas trade was quite satisfactory; stock was better, and prices somewhat higher.

J. BEBBINGTON & SON

Canadian Cut Flower Prices.

MONTREAL.—American Beauty, fancy special, sold at $100.00 to $125.00; extra, $75.00 to $90.00; No. 1, $50.00; Bride and Bridesmaid, $15.00; Golden Gate, $15.00; Liberty, $15.00; Meteor, $15.00; Perle des Jardins, $10.00 to $15.00; carnations, white and pink, $8.00; red, $12.00; hyacinths, $3.00; lily of the valley, $4.00 to $5.00; pansies, $3.00; smilax, $20.00 to $25.00; violets, $2.00 to $2.50.

HAMILTON, ONT.—Bride and Bridesmaid, $10.00 to $12.00; Liberty, [illegible] to $15.00; Perle des Jardins, $10.00 to $12.00; carnations, inferior grades, $2.00 to $3.00; standard varieties, $4.00; adiantum, $1.00 to $2.00; callas, $10.00 to $15.00; smilax, $15.00 to $20.00; violets, $2.00 to $2.50. The market is decidedly slow since the holidays. New Year's trade was as usual light except for cut stock, and in this line the general shortness prevented much activity. There is a likelihood of prices remaining about the same for some weeks unless some very fine weather comes this way. BEAVER.

LONDON, ONT.—Bride and Bridesmaid, $10.00 to $15.00; Golden Gate, $10.00 to $15.00; carnations, standard varieties, $4.00 to $6.00; fancy, $8.00; chrysanthemums, $15.00; hyacinths, $4.00; lily of the valley, $3.00 to $4.00; smilax, $15.00; violets, $2.00; begonia Gloire de Lorraine, $75.00 to $100.00; azaleas, $9.00 to $12.00 per dozen; cyclamen, $5.00 to $10.00 per dozen.

Roses are improving but the supply is still short. Carnations are of good quality, but short in supply; violets, very short.

COLEUS. Rooted Cuttings of the ten best, brightest and fancy sorts, including Verschaffeltii, Golden Bedder and Victoria, 50c. per 100 by mail, postage paid; $4.25 per 1000 by express. Cash with order. **ATLANTIC COAST NURSERIES,** Office, 606 4th Ave., **Asbury Park, N. J.**

Let me estimate on your orders, and please state how many of each variety will be wanted and when they are to be delivered.

ALBERT M. HERR, Lancaster, Pa.

GOVERNOR LOWNDES

Color, pure White.

Size, 3 to 3½ inches in diameter.

Calyx, spreading at the top, making it practically non-bursting.

Form, the lower or guard petals stand out straight, retaining the full size of bloom. Petals slightly serrated and beautifully arranged, forcing a full rounded center.

Odor is very sweet and particularly pleasing.

Stem, 19 inches to 2½ feet during the season, and always strong enough to carry the large flower erect

Habit, strong and vigorous; thrives well and grows rapidly. Transplants readily and comes into bloom early, and is not a cropper. It will stand closer planting than most varieties.

Productiveness, extremely free flowering. More productive than any other large white. A profitable and high-grade commercial variety.

Price, $2.50 per doz.; $12.00 per 100; $100 per 1000.
50 at 100 rate; 500 at 1000 rate.

The death is announced of M. Millardet at the age of sixty-four years. He was a Professor in the Faculty of Science at Bordeaux, France, and was the first to bring the now well-known fungicide Bordeaux mixture into notice.

Dr. Prior, the author of the "Popular Names of British Plants," and other valuable works, died December 8 last in his ninety-fourth year.

Scarcity of Coal in New Jersey.

The difficulty of procuring coal is being felt by many of the growers in the vicinity of Summit, Chatham, etc. Gates Bros., Summit, had to close up all their houses except six. This means a whole year's labor and expense lost. Others are hardly able to keep the frost out, and if more coal is not forthcoming very shortly the loss will be very severe on a great many men throughout this entire section.

INO.

Let Us Have Free Entry Coal.

As the Winter advances it is very evident that serious damage and loss will accrue to many in this trade through the prevailing inadequate supply of fuel; in fact, reports have already reached us that several greenhouse men have been compelled to partially or wholly suspend operations owing to inability to secure the needed heating material, or to pay the grossly exaggerated price in so many cases demanded.

Isolated action on the part of those suffering from precarious supplies is not as likely to bring relief as might united action on the part of the club or society to which the sufferer belongs.

We are confronted with a situation calling for leaders and for aggressive action. Carloads of coal might be obtained direct from the mines where tons cannot be bought locally. The florists' clubs and associations even at this late hour could and should take this matter up on behalf of members exposed to risk of grave disaster.

Relief is not likely soon to ensue as coal will be short until next June at earliest, but meantime should our florists' societies, national and others, remain quiescent under the circumstances? A committee on the subject was appointed at the Asheville Convention of the S. A. F. O. H. "to consult with the Executive Committee . . . and then to take such action as in their wisdom may seem proper in the premises." That was nearly five months ago; and so far as is known, no attempt of any kind has been made to strike for relief. Surely the efforts of the S. A. F. should not be limited to speech-making. The cause even then seemed urgent enough for immediate effort, and the perfect quietude of the Executive Committee and the committee in question seems inexplicable. It may have been thought that any endeavor of whatsoever kind would prove but futile; yet a body of determined men with a righteous cause can accomplish much, and it is worth while letting the world know how heavily the coal condition sits upon us, and that we have an association or associations alert to our interests when circumstances arise that threaten ruin to so many of our own friends and coworkers.

Another cause for discomfiture is that the "coal situation" is being advanced as a reason for non-payment of bills. Unscrupulous men may not fail to advance this as a reason for withholding money due; yet, from many, this cry will be perfectly justified.

The isolated location, too, of many of our growers is against their speedy relief, and intensifies their trouble. Now has a crucial time arrived where our affiliated trade bodies could work together for good. And, irrespective of parties and politics, we want free entry coal.

Subscribers and correspondents are requested to keep The Florists' Exchange promptly informed as to those compelled to suspend operations from lack of coal in order that all may know how widespread is the derangement of business. Several cases have already been reported, more appear in this issue, and scores of establishments not yet recorded are in daily danger of having to close up.

Copyright for a New Rose Refused.

The New York Times, in its editorial column for Friday, January 2. 1903, comments as follows: "The Patent Office has done itself credit by refusing to issue a copyright for a new flower, if it be a new flower, under the name of the "Roosevelt rose," when it appears that that is not the name of the inventor and patentee, but of the President of the United States, when it does not appear that the rightful wearer of the name, whose position and popularity have undoubtedly caused the patentee to give it that name, has given his consent to such use of his name. Without such consent, the Patent Office holds, the use of the name is an impertinence to which it will not lend official sanction.

"Without question this decision is in the interest of decency and civilization. But in this State, it seems, there is nothing to prevent any inventor or any dealer from making any use he chooses of the names, or even of the representations, either of public characters or of private characters, which he thinks will promote the sale of his wares."

The Express Companies.

Editor Florists' Exchange:

There is a simultaneous kick from all sections of the country against the exorbitant express charges of cut flowers. All the florists and gardeners in the country should unite to fight a united monopoly, and fight for retaliation for a parcels post similar to that of Great Britain. Let every one interested in the growing or buying of flowers make a two-cent kick by mail every month to their Congressman and Senator. If everybody would do that, perhaps the politicians who want to continue in Washington will eventually give some consideration to the feasibility of establishing a parcels post, as well as to the Post check currency. Every week I have a small sum to send somewhere, and it puts me to considerable inconvenience at times to make a trip to town to buy a post-office order.

These are vital questions to the general trade, and all should make it a point to unite and agitate this express business all the time.

VIRGINIAN.

Editor Florists' Exchange:

The action of the express companies in increasing the rate on cut flowers 50 per cent. calls for a vigorous protest. A meeting of a number of New York and New Jersey growers was held recently in New York City to consider as to the best method of protesting against this arbitrary and unjust advance. Cut flowers have always been classed at first-class, for which consignors have always paid the highest rates. This makes the action of the companies especially outrageous and imposes altogether too much of a burden on the trade. It would seem that the managers of the express companies have acted without due consideration, and it is believed that if the florists of the country will wake up and vigorously and unitedly protest against this action, the old rates will shortly be restored. It is thought that the best way to accomplish results will be for every interested party—grower, retailer and commission man—to write at once to the superintendent of his express company, protesting against the advanced rate. Every Florists' club in the country should, at its next meeting, pass strong resolutions condemning the advance and requesting that the old rate be restored. Copies of these resolutions should be sent at once to the superintendents of the various express companies and to John N. May, 55 and 57 West 26th street, New York City. Individuals should also mail protests to Mr. May as well as to the companies. In this way a mass of protests can be gathered together that will be used where they will have the most force.

This is a matter of importance to the trade. The increase in rates will cost the florists of the country many thousands of dollars annually. Don't delay. Write the protests at once and mail them as requested.

It should be remembered that almost all growers deliver their goods at the railroad stations and, in many cases, load them on the cars, saving the company the cost of collecting and handling at the point of shipment. This business is regular, every day in the year, and, it would seem, should have an especially low rate, instead of the outrageously high figure which rules at present.

G. W. H.

Editor Florists' Exchange:

Just a word about your note regarding express rates. All of the increased rates, but those on "cut flowers," have been repealed. Why? Because the shippers made a determined and united "kick." Let the florists profit by this.

A. A. YOUNG, JR.

Carnation Enchantress.

Editor Florists' Exchange:

We notice in your issue of December 20 that you state, "The J. D. Thompson Carnation Co. state that they have sold, up to date, 50,000 rooted cuttings of Enchantress; and the stock has given much satisfaction to purchasers." This is an error, and we wish you would correct same to read: "They have delivered up to date," as our sales are over 275,000, and our limit 400,000 from 18,000 plants to work with.

J. D. THOMPSON CARNATION CO.

Elmer D. Smith, Chrysanthemist.

The Evening News, of Detroit, Mich., contains an appreciative article on the subject of Elmer D. Smith, of Adrian, Mich., and his work among chrysanthemums. A portrait of Mr. Smith, and an illustration of the variety F. J. Taggart accompany the article. This successful grower is styled by the Evening News the "Chrysanthemum King;" and the following bit of interesting history is furnished: "While yet a young man, he is a veteran in the ranks of the florists. As a freckle-faced boy in his teens, Smith used to watch the boys of the Adrian College football team go by the greenhouses with their chrysanthemum hair waving in the breeze. Perhaps that gave him visions of propagating chrysanthemums—at any rate he immediately got the proper gait. His advancement in that field has been gradual but sure. The active hybridizing of chrysanthemums began in dead earnest in 1888. The first seedlings from the Smith greenhouses were exhibited for premiums in 1890. As far as the number of new varieties goes, he has been excelled—but never in the quality. The fruits of Elmer Smith's untiring efforts have been exhibited in all the large cities of the country in the last dozen years. He has competed both East and West in all the big flower shows, and has always bagged a whole lot of money and gold medals. The largest three premiums that have been awarded seedlings in this country have been awarded Mr. Smith. The first was in Cincinnati, for 'Niveus,' $150 cash, and a $50 gold medal. The second was last year in Kansas City for 'Convention Hall,' $200 cash. The present year for the new variety, 'F. J. Taggart,' he received $150 and a gold medal at Kansas City. His products are shipped all over the globe. Shipments of plants to Australia, New Zealand and European countries are a very common occurrence.

"For several years Mr. Smith was secretary of the Chrysanthemum Society of America. He is associated in business with his sturdy father, Nathan Smith, who, although accounted a silent partner, and nearing his ninetieth year, takes a lively interest in the fame of his son."

Chrysanthemum Society of America

Editor Florists' Exchange:

Acting according to the new rule passed at the recent meeting of the C. S. A., held in Chicago, we deemed it advisable to withhold the scores of sports which were exhibited before the committees, with the exception of Yellow Eaton, as the owners of that variety have complied with said rule, it having been exhibited before three committees.

EDWIN LONSDALE,
Secretary.

Obituary

J. S. Murray.

J. S. Murray, the oldest and pioneer florist of Montreal, died Wednesday last after a long illness. About two years ago he was taken with a stroke of paralysis, and another stroke took him off. The sympathy of all in the trade will be with his daughter, who has so long and ably managed his business. Deceased was 69 years of age.

C. W. McConahy.

Charles Wesley McConahy, of Van Wert, O., died suddenly of heart disease November 21 last. He had been in the florist business a little more than two years and was very successful. He was thirty-five years of age and leaves a widow, parents, brother and sisters, and a host of friends to mourn their loss. He was a member of the M. E. Church, of the Knights of Pythias, and of the Royal Arcanum.

Damaged Ficus Leaves.

The leaves of Ficus elastica, received from J. C. (Ontario), show very distinctly the effects of a severe attack of thrips, the rusty excrescences on the under side of some of the leaves being due to the exudation of the sap from the punctures made by the insects.

The punctures of the thrips will often cause a sufficient flow of sap to form a tiny globule on the under side of a ficus leaf, and especially when the plants are growing freely and the sap is in full flow. The insects are, or have been, very plentiful on the plants in question, and prompt and vigorous measures will be needed to eradicate them.

The best remedy for this pest is nicotine vapor, and one of the most convenient methods to apply this vapor is by fumigating with "Aphis Punk," this preparation seldom injuring plants in any way, unless it is used in unreasonable quantities.

But several fumigations may be required in order to entirely rid the plants of these troublesome insects, for many of the insects may drop to the ground when the vapor strikes them, but will afterward crawl up again and renew their feeding upon the leaves; a full-grown thrips being one of the most difficult of ordinary greenhouse pests to kill.

Fumigating with tobacco stems would also answer for this case, but more of it would be required than of the "Aphis Punk," and there would also be more risk of doing injury to some of the plants in the house than there would be from using the above-mentioned preparation. W. H. TAPLIN.

New York.

A happy and prosperous New Year to all, and may the year 1903 prove the best and busiest we ever had!

News Jottings.

The coal question continues a very serious one in this vicinity, and some owners of large establishments have had to close up a few of their houses on account of the short fuel supply.

John H. Taylor, Bayside, L. I., has closed three houses, as also has C. W. Ward, of Queens.

Word comes from Newark, N. J., that a florist of that place had to use an undertaker's wagon for delivering flowers at Christmas, owing to the scarcity of suitable vehicles. While delivering flowers at one residence, where the lady had been ill for some time, the men were asked by pedestrians, if Mrs. ——— was dead. On being informed that the wagon was used for delivering florist's stock, one person remarked, "I'd rather have my flowers delivered in a coal wagon, especially on Christmas eve; that outfit would make me superstitious."

The Pennsylvania Railroad Company has begun the erection of extensive greenhouses at South Elizabeth, N. J., for the supplying of bedding plants, flowers, etc., for the company's stations between New York and Pittsburg. The houses, and land adjoining, to be used for nursery purposes, will cover about twenty acres, all under the charge of Professor Gertanne. It is the intention of the company to plant shade trees along the sides of the tracks between Elizabeth and Philadelphia.

Chas. F. Meyer, late of the firm of Hagemann & Meyer, announces in a very pretty booklet, that he has opened an office at 19 Barclay street, as wholesale importer of bulbs, plants and nursery stock. Mr. Meyer also states that he is the sole representative, for the United States and Canada, of Ad. D'Haene Co., Limited, Ghent, Belgium, growers of azaleas, palms and miscellaneous plants.

The new book on the carnation by C. W. Ward, which is to be published shortly, contains much valuable information, and will no doubt find a ready sale among carnation growers, professional and otherwise. Every phase of the carnation plant's life is fully treated upon in a practical manner and the raising of carnations, from cuttings, or from seeds, and growing them successfully, will be much simplified to the grower who will follow Mr. Ward's instructions. In addition to cultural methods, that are explained thoroughly, there is a complete history of the carnation, lists of varieties, and full instructions for the grower who would do his own crossing to bring forth new varieties. The book will fill a long felt want, and will be appreciated by all lovers of the Divine Flower, and they are legion.

Walter F. Sheridan has been receiving some high grade carnations from the Chicago Carnation Co., of Joliet, Ill.

Mr. Fuerstenburg, proprietor of the Floral Exchange growing establishment, Edgely, Pa., was in the city this week. He contemplates adding about 100,000 feet of glass to his range during the coming year.

There is much vigorous protesting against the advance in the express rates, but there has been no reduction of these so far.

L. M. Noe, Madison, N. J., has put a wagon in commission between his establishment and New York, for the conveyance of all his empty boxes.

The Brooklyn Horticultural Society will hold a meeting in Germania Hall, 120-122 Schermerhorn street, Brooklyn, on Monday evening, January 5, 1903, at 7.30 o'clock. It is expected that Secretary of The American Carnation Society Albert H. Herr will be present at the meeting, and every member should be in attendance.

One of John I. Raynor's growers is using hyacinth foliage as a setting to bunches of lily of the valley. This is quite a new departure in tying up flowers for this market.

The many friends of the Bogart family, retail florists of Sixth avenue, will learn with regret of the death of their father, Abram Elbert Bogart, who passed away at the residence of his son, 108 W. 116th street, on Sunday last, aged eighty-three years. Interment was in Cypress Hills cemetery, on Tuesday, December 30.

George C. Perkins, of Jackson and Perkins Co., Newark, N. Y., was in town on Monday.

The weather was all that could be desired on New Year's Day, and all cut flowers cleared out fairly well, with no advance in prices. Most of the commission houses closed at about 1 o'clock.

J. H. Troy, of the Rosary, went South on a short business trip on Friday evening.

The sixteenth annual dinner of the New York Florists' Club will be held at the St. Denis Hotel, Broadway and Eleventh street, on Saturday evening, January 31, 1903, at 7.30 o'clock. The tickets are $5.00 each, and a good time is promised by the dinner committee. Any member of the club who would like to donate flowers for the table on that occasion will confer a favor by so doing. Packages should be sent, prepaid, in care of Secretary Young, 51 West 28th street.

The school of practical agriculture and horticulture formerly at Briarcliff Manor, near Scarborough, N. Y., moved January 1 to Poughkeepsie, N. Y. A farm of 400 acres has been purchased near the city. The school will take up the culture of the Newtown pippin and choice and old varieties of apples much neglected and difficult to obtain.

To Mr. Reed, of Reed & Keller, much praise is due for his foresight, as well as the introduction of new ideas and paying novelties for the trade. In the face of many discouraging comments of various New York City and other eastern florists, Mr. Reed began the manufacture of Christmas bells, made of crepe paper and plushine, early last Summer, to supplant the time-honored immortelle bell. The western trade immediately saw the value of the novelty, and placed enormous orders; the result has been wonderful. All could have used more, if obtainable. The New York florists were caught napping, and at the eleventh hour were rushing pell mell, offering all sorts of inducements for these bells, but of no avail. This certainly must have been encouraging to Mr. Reed.

The family of George Goldner, traveling representative of Reed & Keller, has been on the sick list, including Mr. and Mrs. Goldner. All are now convalescing

Chicago.

The News.

From reports the Cut Flower Growers' Association will be ready for business about January 3, 1903

Julius A. Schnapp, formerly with E. Wienhoeber, has taken a situation with the Spot Cash Store's floral department, of Joliet, formerly held by Chas. E. Siegk, who has gone into business for himself at 224 Jefferson street, having rented part of the store of Lantrey & Leek there.

Mrs. Abbott, sister of the late Walter Heffron, died Saturday night and was buried Tuesday. The family has the sympathy of the trade in its sad bereavement.

Visitor: Chas. Knopf, representative of the E. T. Grave Co., Richmond, Ind.

ROBERT JOHNSTONE.

FIRMS WHO ARE BUILDING.

NEW HAVEN, CONN.—Doughty & Co. are erecting a greenhouse, 14x30 feet.

KEARNEY, NEB.—The Green Seed & Plant Co. is building opposite the U. P. R. R. parks, corner of Second avenue and Railroad street, four houses, each 12 x 60 feet, and a potting shed, 12 x 50 feet.

FIRES.

BALTIMORE, MD.—The greenhouses of Benjamin Stevens were slightly damaged by fire on the evening of December 23.

NEW HAVEN, CONN.—On December 29 fire damaged the stock and greenhouses of A. J. Thompson to the extent of $150 00.

CHANGES IN BUSINESS.

WAUWATOSA, WIS.—Alexander Klokner, formerly of Milwaukee, is now located at his greenhouses here.

* Messrs Nathan Smith & Son state in explanation of the two seedlings exhibited by them this season by the name of Ethelyn, that the one examined at Cincinnati has been discarded owing to its inclination to drop its petals, and that name has been given to the one exhibited at Chicago.

** Sports. At the executive session of the C. S. A., held in Chicago, a new rule, which takes effect during the present season, was passed as follows: "That all sports from existing varieties be submitted to three out of the five committees, the average of the three scores to regulate title to certificate."

† Reported to be a sport from Christmas Gift, but believed to be Invincible, certificated in 1895.

Average score of Yellow Eaton, 88⅔.

EDWIN LONSDALE, Secretary.

Plant Depredations and Plant Culture.

It is the purpose of this paper to emphasize the apparent relation between plants and their foes, and to point out a condition that seems to be natural law governing to a greater or less extent their relationship.

Our knowledge of plant diseases and insect enemies is ever increasing and nature seems to be so unbalanced that new depredations ever continue to alarm us. Should it not be an insect on the one hand it may be a plant disease or a dreaded weed on the other.

To strike at the root of my philosophy, is it not possible that much, if not very much, of our depredations have come about and will continue to do so from want of proper plant environment or culture? This idea may not be an entirely new one, but it appeals to me in a so much broader sense than I have ever heard it expressed, that I have desired to bring it before this association.

There exists a general underlying law in plant culture, which, it seems to me, is associated with plant life and is understood by men who have a love for, and sympathy with, plant life. This law is not easily explained in words or on paper. Who are our successful plant growers? Are they our scientific men versed in botany, entomology, mycology, etc.? I dare say, generally speaking, they are not.

The men largely who are making the greatest success to-day are men who know comparatively little about these classified sciences. That these men know the plants with which they have to do, however, from the standpoint of individuality, their likes and dislikes, adaptations, sympathies and instincts, if I may be permitted to use these terms, there can be little question.

To my mind the differences between the scientist and the practical man are their points of view. The tendency of the practical man is to consider the plant as a whole with a certain definite aim in view. His knowledge of the plant in its various stages of development is keen; he detects any slight troubles and many times he anticipates depredations, taking the proper steps to obviate them. The tendency of the scientific student is to specialize too much and it is not to be wondered at. If he is a botanist, entomologist, plant pathologist, etc., in passing through a greenhouse, garden or over a farm those points only appear to him that are of interest in his specialty. The scientist, if that word can be allowed in this sense, views the depredations of weeds, insects or diseases as present probably because the seed was adulterated, the disease prevails because Bordeaux mixture was not applied, or the insects were not treated with the proper insecticide, etc. The practical man recalls from his experience perhaps that here is an exact case wherein one has made a mistake in an improper rotation, too much or too little fertilizer, too early or too late planting, if a field crop; or an equal number of mistaken practices of watering, ventilating, smudging, improper mixture of soils, etc., if under glass. In other words, the practical man looks at plant depredations as incidentals, and in most cases as only a part of the whole for success, while the scientific man considers them as of paramount importance. Much good often comes from scientific study, but its application is liable to be general rather than specific.

It is thought that this explains largely why practical growers are slow to adopt and use much information that is recommended about insecticides, fungicides, etc., until its value has actually been demonstrated. While many still assert that they believe in spraying in spite of such comparatively slight results, yet on the other hand they continue to omit its use. In the class of men I refer to are many times our most successful commercial growers, and I have been troubled at times to explain why some of these men are as successful where no fungicides or insecticides are used, as others who depend upon them.

Is it not a fact that those men who are the most negligent about their general knowledge of plant culture have the greatest trouble from depredations of all kinds? I believe our best men will bear me out in saying that wherever we find practical, successful husbandmen we also find the minimum trouble from plant depredations.

There seem to exist between plant life and its parasites general laws, which, if more fully understood, would be most valuable many times toward desirable results. The fact that many men are, comparatively speaking, never troubled with certain plant troubles while others who may start with the same plants will be, goes to show that environment of the plant has very much to do with it. The plant pathologist and entomologist from the standpoint of economic plant growth need very much the knowledge of plant culture as well as a knowledge of fungicides and insecticides.

It occurs to the writer that it may be that certain plant troubles might be classified as liable to occur only under certain conditions, and that this classification would mean more to growers than a remedy for treating the particular disease or insect when it has made its appearance.

VIEW OF CHRISTMAS DISPLAY OF ALEX. McCONNELL, FIFTH AVENUE, NEW YORK.

A man that has won great fame as a carnation specialist, and who has made thousands of dollars originating new varieties, claims that rust, while it is a disease of the plant, occurs from want of knowledge of carnation culture, and where a man understands his business, remedies for most of these diseases are not needed. Where experiments were carried on in this line last Winter we were able to verify his conclusions.

A certain authentic work has this to say about carnation rust, "Produces gray blisters upon the leaves, the spots finally rupturing and showing the rusty discoloration of the spores." Preventives—"Careful picking and burning of the infected parts is one of the surest preventives of further attacks. Spray with Bordeaux mixture."

A grower this past Winter found that where careful watering was resorted to on one bed there was no rust, but on another lot, under exactly the same conditions, excepting the watering, rust was very prevalent. When the plants are allowed to dry out thoroughly before night in Winter conditions, rust was little troublesome and the reverse seems to be true. Watering carnations to almost any extent during late Spring or Summer never seems to hurt them, simply because it is thought they dry out, thus finding agreeable conditions.

Many growers have much trouble with the carnation from the bursting of the calyx, which renders the blossom unsalable unless the flower is wired to keep it in shape. Experiments with these same plants revealed the fact in most cases that insufficient plant food at the right time was the cause almost without exception. It was suggested that the trouble was due to the propagation of weakened stock, but even stocks of this condition were revived and this trouble readily overcome by a careful feeding of the plants by a practical grower. The ever administered Bordeaux mixture was used in these same experiments and with some benefit, but for a practical and economic solution of the troubles it was considered of little worth. At a meeting of the American Florists' Association a few years since, one of the large growers discussed the advisability of soil sterilization and explained his method. Although it was thorough and seemed to meet a required need, as shown by the results under his conditions, others who were perfectly familiar with his conditions, and who had used from exactly the same stock of plants, were equally as successful without such sterilization and claimed it an unnecessary expense.

Rose growers, it is believed, do not attribute diseases as due to the presence of the spores alone, but to unfavorable environment. A noted American Beauty grower, who has charge of the largest plant in the world, tells me that he considers diseases as due to mistaken culture rather than to devouring enemies.

I have had college graduates who could identify insects, recite on insecticides perfectly, but found it practically impossible to combat red spider, etc., without practically destroying the value of the plants themselves. Another man with little knowledge of entomology or insects, but thoroughly understanding plant culture, has grown the same plants under exactly similar conditions, and I have failed to even find red spider present. If plants are neglected through crowding, over or under watering, too much or too little ventilated, given extremes of temperature, insufficient plant food, neglected breeding, etc., of course one will have trouble, and simple remedies, although under other conditions they might be efficacious, are here utterly useless. I might enumerate further examples, but hope I have sufficiently emphasized the idea that we cannot know too much about plant culture.

The statement is often made that the reason we have so many depredations on plants under glass is that the conditions that favor plant growth also favor these plant troubles. I am inclined to think this statement untrue and that we have so many depredations under glass simply because we do not yet understand what the true culture of the plant is.

I might enumerate further examples, but hope I have sufficiently emphasized the idea that a knowledge of plant culture is of utmost importance as a basis for success.

It is believed that there are underlying laws which if properly complied with might, to some extent at least, assist very materially in overcoming plant diseases.

This law is evident when we study into the causes for and trouble that comes from obnoxious weeds, and it is only through a better knowledge of culture of crops that success results.

The same law seems to govern insect depredations to a greater or less extent. Neglect and improper handling of plants are accompanied by a multiplication of insect pests, while improved culture tends to eliminate them.

Just how far plants of different kinds will or will not evince the law of self-preservation under proper treatment, is a subject that is worthy of much study at least.

A knowledge of plant pathology, entomology, botany, etc., is always to be recommended, but equally so, for the benefit of the results to be derived from plants, is a knowledge of ideal plant environment which is nothing other than culture.—Professor F. Wm. Rane, Durham, N. H., before the Society for the Promotion of Agricultural Science.

Review of the Market

NEW YORK.—Business in cut flowers has been of a very slow nature since Christmas, and the usual practice of making Christmas prices hold good until New Year's Day has not been possible this time. We have been informed on reliable authority that there has been a general reduction made on the bills for the top grade American Beauty roses, and for violets that were delivered during the Christmas rush; and this fact will, no doubt, tend to make the general average returns somewhat below our last week's quotations, so far as these two grades of flowers are concerned.

With the exception of American Beauty, roses have not been at all plentiful this week, and it has probably been just as well, as there has been very little demand, and prices have taken a decided tumble. On Wednesday the market assumed a more healthy aspect, and there was a good call for the shorter grades, Nos. 1 and 2 clearing out in good shape. Specials only brought 20c., however, in spite of their not being very numerous. American Beauty are very abundant, and so far as a fixed price goes, there is no such thing; from 40c. to 50c. each seems to be about the average figure, though there are some that have gone at 30c., and a few have been billed at 75c. each.

Violets have been coming in spasmodically, and prices are no longer inflated, though the limited supply makes it possible to keep them up to a fairly good figure.

Carnations are in fair supply, and, like all other products, have suffered a general decline in value.

Cattleya Percivaliana is a very difficult subject to get rid of these days, now that there is a supply of C. Trianæ.

Jonquils and tulips have appeared on this market, but there is no particular call for them as yet. Lily of the valley is plentiful, as are also Roman hyacinths and Paper White narcissus.

Mignonette of superfine quality, so far as size goes, is coming in regularly, and is one of the good things to handle. Lilies continue to sell fairly well; but sweet peas have gone down a little in value. There are a few bunches of nasturtiums and stocks on the market for the first time this season.

TORONTO.—Once more we have to record a very successful Christmas season for Toronto florists. The weather in the early part of the week was favorable for business—bright and fine, and not much frost. The demand for plants was very good, and large numbers of palms and ferns, as well as flowering plants, were sold; also of azaleas, cyclamen, poinsettias and primulas and a great number of Begonia Gloire de Lorraine. The latter, however, did not go as freely as in former years; it did not look worth the money asked for it. Pans of Roman hyacinths also sold cheaply; there were but few tulips offered, and they were not particularly good. Everything in cut flowers went before the night of the 25th. Roses were scarce, and but few of the dealers received all they had ordered. Carnations were more plentiful, but when the roses were disposed of, carnations went quickly; they sold at retail at from 75c. to $3.00 per dozen. Lily of the valley was fairly plentiful. Roman hyacinths and Paper White narcissus, early in the day, were in over-supply, but worked off all right later. Violets were scarce, and moved along quickly. Callas and Harrisii lilies, while not very plentiful, did not sell quickly, they being generally the last flowers to be seen in the windows. Cypripediums and mignonette were fairly plentiful, and generally sold well.

Immense quantities of holly were sold; every grower and general dealer appeared to have boxes of it, but all seemed to be worked off. Large numbers of holly wreaths, tied with ribbon, were sold. Tidy had a fine window of bells made of scarlet immortelles, and holly, tied with red ribbon. They sold as fast as his men could make them up. Club moss wreathing sold very freely, but such large quantities were on hand that it did not quite clear up. From what I have so far been able to learn, the trade must have been nearly 50 per cent. better than ever before. T. M.

BOSTON.—Christmas trade this year proved very satisfactory to all concerned. The increase in the plant trade noted in past years was continued, but with little or no ill effects on the sale of cut-flowers, which was enormous, and, in many cases, at better figures than ever before have been realized. The plant market was well supplied with products in first-class shape, but the same conditions did not obtain in cut flower lines. Never before was more held-back "salted" stock shipped to this market than on Tuesday and Wednesday; and such stock met with the same disastrous results as have been reported at past holidays. Quantities were unfit for use, and at a time when even fair stock was in the greatest demand.

Roses were in very good supply, though the superior grade and extras and fancies were not over-plentiful, except in white kinds, of which a few were carried over. There were quantities of inferior stock, both white and bleached-out colored sorts, for which it was impossible to find a market. Everything good brought satisfactory figures, and sold out clean, except as noted above. Fancy American Beauty and Queen of Edgely reached $18.00 per dozen, with No. 1 and extra at $12.00 and $15.00; from these figures the cuts were graded down to $9.00, $6.00, $4.00, $3.00 and $2.00 per dozen, the latter price being rock bottom for the smallest size. Liberty, of special grade, came next for high figures; $6.00 per dozen was reached for a limited supply; the medium and No. 1 at $3.00 and $4.00, respectively, and smaller ones at $1.50, $2.00 and $2.50. Special Bride, Bridesmaid and Souvenir du President Carnot reached $30.00 per 100, outside figure, though the latter variety was not in heavy supply. Bride were aided by Bridesmaid to make the figure named. The demand favoring the latter variety; the growers would only supply them on condition that the buyer take Bride also, else it would have been utterly impossible to dispose of the large supply of the white roses.

Window Display at Christmas of A. Warendorff, Broadway, New York.

In carnations, more than in roses, was the "pickled" stock evident. Good flowers cleaned out well at very good prices. Ordinary varieties made $4.00 per 100, the best of such kinds $5.00; and fancy stock $6.00 and $8.00. Novelties ran from $8.00 up to $15.00. The latter price was obtained for special Fair Maid, and was the highest figure for carnations in this market. There was, however, much of the stock which showed signs of going to sleep on arrival, and such was disposed of at $1.00, $1.50 and $2.00 per 100, when the same stock two or three days earlier might have realized just as good figures as did fresh stock of corresponding grades on Wednesday. Red carnations were most in demand, and, with the bright pink ones, sold out well. The white varieties did not clean out quite so well.

Violets, which had been scarce right along, came in in goodly numbers on the day or two days before Christmas, but values had been boosted up pretty well beforehand, and it was not difficult to maintain them. Prices ranged from $1.00 to $2.00 per 100, though in some special cases $2.50 is reported. Lily of the valley was in good supply at usual figures, and Roman hyacinths and Paper White narcissus being in good supply also, met with no advance in values. Jonquils sold out well at $5.00 and $6.00 per 100. Lilies were of very good quality, and in quite fair supply, selling at $2.00 per dozen. Callas, which were not so plentiful, brought $1.50 and $2.00, and cleaned up well.

Cut poinsettias were in fair supply and of fine quality, selling at $5.00 to $6.00 per dozen for the best.

The market was overloaded with poor holly, which had to be cleaned out at low prices, ranging from $3.25 a case three days before Christmas, down to $1.00, and for whatever figure it would bring on Wednesday. The really good stock, such as is in demand with florists, was very plentiful, also, but the sale of it was hurt somewhat by the quantities of poor material and the remarkably low prices quoted on the latter. First-grade stock was held at $4.00, and even $4.50 per case at the outset, but as it increased in quantity, prices were dropped to $3.00 and even $2.50 was accepted for some which arrived too late to be disposed of at the better prices. Mistletoe and other greens sold out pretty well, at quite good prices. Laurel wreaths were not so plentiful as usual, and made better prices; from $2.00 to $3.00 a dozen was obtained for about the same stock that formerly brought $1.50, $1.75 and $2.00 per dozen.

Plant growers all report heavy sales, and were well cleaned out. Medium to large-size azaleas ran short.

Since Christmas, and up to Monday of this week, the market has been rather bare. By Monday, stock began to appear a little more regularly, though up to the present writing the shipments have not reached normal proportions. The exceptional prices obtained last week have not been maintained, though good figures have prevailed throughout. Carnations fetch $3.00 to $5.00, with fancies at $6.00. Bride, Bridesmaid and Liberty roses have dropped about a dollar a dozen right through the list. Violets, which are not at all plentiful, continue at high values, $1.00 to $2.00 per 100 being easily realized. Lilies fetch $10.00 to $12.50 per 100, and callas about the same figures. Lily of the valley is at usual figures. F. J. N.

CINCINNATI, O.—Christmas is over, and is one long to be remembered as the best ever experienced by the retail and wholesale florists of this city. The supply was good in all lines, but much more could have been sold if obtainable. The stock, taken as a whole, was good; pickled goods were in evidence here, but not to any great extent. But the stock shipped in was a sorry sight; some of it could be lifted out of the box and some could not. The percentage of seconds and thirds was very large in roses, but all sold; of course, not at top notch figures, but for all it was worth, and even more. Carnations were scarce, and in great demand. Violets, also, were scarce. Bulbous stock did not move at all, except lily of the valley. Not until the supply of all other flowers was exhausted, could we sell Roman hyacinths and narcissus; then, we were obliged to drop the price to move them. Julius Baer reports trade never better, fully fifty per cent. ahead of any year since he has been in business. He delivered over seven hundred packages for Christmas. George Magrie says he lost a diamond ring when making up holly wreaths, which will cut down the profits somewhat unless he can find it. H. D. Edwards, Newport, Ky., reports trade never better. He came near to being held up Wednesday at midnight. He was busy getting out his orders when two men walked into the store, pretending to be intoxicated. He had his suspicions, and immediately telephoned the police station, when the gentlemen beat a hasty retreat. J. T. Conger, Hartwell, O., had no complaint to offer; Louis Pfeiffer's Sons report business away ahead of last year's; Hardesty & Co., the finest yet, they had a great demand for carnations and blooming plants, more so than for roses, although they sold out. The Rosebank Co. is absolutely satisfied. Huntsman & Co. could have done more. Chas. J. Jones, of the Walnut Hills Floral Bazaar, reports the greatest business in his experience. Fred Gear could not wait on all his customers, the demand was so great. A. Sunderbruch's Sons, The Hoffmeister Floral Co., and several others have the same kind of a report to make. There was nothing new in the plant line. A cold wave struck the city pretty hard Wednesday night, and it took careful wrapping to keep flowers from freezing when delivering Christmas morning.
E. G. GILLETT.

MILWAUKEE.—In summing up the Christmas business, it does not look as if the volume will total much over last year's. The principal reason of this was the shortage of stock. The weather was dark and cloudy continually, and roses were the principal sufferers. Bridesmaid looked pale and pickled, although fresh cut. Most all roses were inclined to be weak-stemmed. Carnations helped out wonderfully, and more of these could have been sold at the last moment; but dealers had little left over advance orders. Violets were extremely scarce; $1.00 per bunch was about the average retail price. American Beauty roses were not over-plentiful, but those in the market were choice, and sold at good figures. Roman hyacinths and Paper White narcissus were plentiful, as is usually the case at Christmas. Stevia sold well, and was generously used to fill up boxes.

In blooming plants, azaleas were leaders, with cyclamen a close second. Well-grown Begonia Gloire de Lorraine sold on sight. Palms, Boston ferns and fancy fern dishes, filled, found ready sale. Of holly and greens there was an oversupply, and the commission men were unloading these at ridiculously low prices; nearly all grocers handled these materials at low figures, which made inroads into the florists' receipts. Scarlet immortelle bells were principally used in window decorating by the downtown florists. The thermometer dropped to zero the day before Christmas, making deliveries somewhat difficult. C. C. P.

KALAMAZOO, MICH.—Had the weather been favorable, Christmas trade would have increased over last year's; as it was, it about equaled that of last Christmas, with prices somewhat higher. Roses generally were a short crop, and violets still more so. Carnations, however, were the popular flowers, and were in good supply, as were pot plants and Christmas greens, bulb stock, etc. Reports vary somewhat on the trade in pot plants and greens, these going well with some and not so well with others. Probably the weather accounted for this, as nearly a blizzard raged all day long on the 24th and most of Christmas day. Serious complaint is made about worthless stock being shipped here from a Chicago wholesale grower, causing considerable loss, besides the annoyance (why do these houses take orders when they know they can't fill them). Prices ranged, retail: roses, $2.50 to $3.00 per dozen a few went cheaper; carnations, common, 50 cents per dozen; medium, 75 cents; while selected ones sold for $1.00 to $1.50 per dozen, violets, 30 cents per dozen; bulb stock, 50 to 75 cents per dozen; pot plants, at the usual prices, while wholesale flowers were quoted at Chicago rates. S. B.

ALBANY, N. Y. The Christmas trade in this city was extremely lively. The stock of flowers was quite limited, but there was enough to supply the demand, prices being prohibitive to all but the wealthy. No money could be made by retailers from flowers purchased from commission dealers, so the general public contented themselves with buying holly, Christmas trees and plants. Of these, immense quantities were sold. It would seem as if now every home must have some such token as evidence of the season. The question naturally arises, that if this great demand for trees and holly continues—and who can doubt but that it will?—what will be the result as regards the supply from our native woods? Surely there is a limit, and how soon will that limit be reached? Designs of red immortelles were also in considerable evidence, and met with ready sale. As the supply of cut flowers must always be limited at Christmas, and prices always rule high, it behooves the retailers to bear in mind the trade in the articles specified above, to exercise the inventive faculty in preparing novelties in these lines, and to have a large assortment in readiness for this trade, which is surely come to stay. In plants, anything good sold. There is a fine market for ardisias and poinsettias, when well done. The difficulty is to obtain plants which are well done. Solanums and Christmas peppers are too easily injured to be recommended to particular customers. W.

ELMIRA, N. Y. Reports are satisfactory as to demand roses and violets were rather scarce. There were more carnations than usual of prime quality. Poinsettias sold well. There was a good market for Christmas greens. Berried plants and poinsettias in pans were preferred in the plant line. Prices were somewhat in advance of last year's. The 50 per cent. additional express gouge occasioned a good deal of indignant protest from out-of-town customers. It cannot help but prove a set-back to the florist's business—and there will be no margins for growers at the present prices of coal. In our section, miles of soft coal are side-tracked for railroad speculation. The railroad monopoly is the most greedy trust of all.
GROVE P. RAWSON.

PITTSFIELD, MASS.—Christmas prices for cut flowers ruled about the same as last year, carnations being most in demand. In plants, palms, ferns and cyclamen were the best sellers, but with a diminished demand from that of last year. The amount of business done was about the same as in the year previous.
JOHN WHITE.

ST. PAUL.—Christmas, 1902, is a matter of history now, a fact for which I believe every florist in the Northwest is truly thankful. We read of the increase in trade each season in other places, which comes around with such surprising regularity of 10, 25 or 50 per cent. that we sometimes wonder where it will stop. Either sales ten years ago were surprisingly small or else some in the trade are surprisingly large—**prevaricators.** From our viewpoint we think trade held its own, or increased a little over last year's in dollars and cents. Fifty days of clouds and darkness brought the cut down to the minimum. Roses especially were off crop and off quality. Red sorts were more plentiful than Bride and Bridesmaid. American Beauty were in brisk demand, while good blooms were very scarce. Some pickled stock, from Chicago, fell to pieces on opening the boxes, and was worthless. When; oh, when will the pickling process be abandoned! Carnations were more plentiful than roses and sold more readily. Violets were scarce, but of good quality. Lily of the valley, Roman hyacinths and Paper White narcissus were in good call and sold out clean. Retail prices ranged as follows: American Beauty $8.00 to $20.00 per dozen; other roses $2.50 to $5.00. Carnations, $1.00 to $3.00, the bulk of the stock going at $1.50 and $2.00; violets $4.00 per 100; lily of the valley $1.00 per dozen, Roman hyacinths and narcissus 75c.

There was quite a stock of good plants which sold at fair prices and would have done much better had the weather been more favorable. Azaleas, cinerarias, poinsettias, cyclamen and primroses were the principal plants, with a few peppers and oranges in fruit for variety. Ribbons, baskets, crepe and matting were somewhat in evidence, and assisted in the sale of plants, or at any rate helped to bring a good price. Greens were abundant, of good quality, and sold well. Holly came in after the first cold snap, was unfrozen, well berried and bright, and, in general, much better than for several years past. Lycopodium wreathing was not used by the larger stores as freely as in years gone by. Mistletoe seems growing in favor each season and is packed and shipped in much better shape than a few years back. We noticed one shipment packed in hay in barrels, which came through in elegant shape, and was very fine.

Wednesday the wind veered to the northwest, the mercury dropped to zero and below and the cold wind cut to the marrow, making deliveries very bad and difficult. Quite a good many plants and flowers were reported frozen, and some dinner tables had no bouquets on account of delayed deliveries.

The country trade was the best on record. But here the cold also got in its deadly work, and delayed and frozen shipments were quite common. Claims aggregating hundreds of dollars have been filed against express companies for delayed and frozen shipments. Halm & Olsen lost a large number of poinsettias from frost. Christ. Bussjager lost two dozen palms in a church. L. L. May received several delayed shipments Friday morning after the trade was all past.

Arnold Ringier, of Chicago, was a recent caller. VERITAS.

CLEVELAND.—The volume of business done at Christmas this year surpassed all previous records. The supply of cut flowers was rather limited and but few orders were filled in full. Stock, with few exceptions, was very good and the pickled grade was less in evidence than in former years. The plantsmen who prepared and pushed their stock should have reasons to be thankful; because of cut flowers being so scarce people took to plants and as a result most lines of blooming and other decorative stock were sold out. Begonia Gloire de Lorraine seems to be a disappointment in this city, as there are enormous quantities still on hand. This plant, while a beautiful thing, does not take here on account of the price. Holly and all Christmas greens had a great sale and the prices remained firm to the last. Wreaths of immortelles for cemetery use sold equally as well as in former years, and trade as a whole seems to have surpassed any week this season.

Prices seem to be on the upward move and the quotations herewith are from today, December 31, 1902: Roses, teas, $8.00 to $12.00; carnations, good, $3.00 to $4.00; selects, $5.00 to $7.00; violets $1.50 to $2.00; lily of the valley, $4.00; Roman hyacinths, $2.00 and $3.00; narcissus, $3.00; adiantum, $1.00 to $1.50; smilax, $15.00; lilies, $15.00; poinsettias, $35.00 to $40.00; common ferns, $1.50 per thousand; galax, $1.00 per thousand.

G. W. S.

BUFFALO.—A demand for flowers quite beyond the supply has been the prevailing condition of late, even at prices some decided points above what has usually been known at this time. This refers to good grade stock, all of which has gone at unusual value. An active demand has existed between Christmas and New Year's, influenced somewhat by calls for funeral uses. All the greens that were generally offered, poor grades included, were disposed of, no complaint of any "left over" stocks being heard.

VIDI.

INDIANAPOLIS, IND.—Christmas business was beyond that of all other years from almost every standpoint. Prices were exceptionally good and never before were such high values obtained for stock, either at wholesale or retail. Customers did not seem to care much about the price, if the flowers suited in quality. Roses, as was almost everything else, were in great demand. Bridesmaid and Bride sold at $1.50 to $2.00 wholesale, and $2.00 to $4.00 per dozen retail. Liberty went soaring skyward at $3.00 to $5.00 per dozen wholesale and $5.00 to $7.50 per dozen, retail. Golden Gate sold well at $2.00 to $3.00 per dozen retail. Some good flowers of Ivory went at $3.00 to $4.00 per dozen retail. American Beauty sold beyond all expectations, bringing $2.50 to $12.00 per dozen wholesale, $3.00 to $24.00 retail were the prevailing prices, although the greatest demand was for those which sold at $9.00 and $12.00 per dozen. Every dealer in the city sold out his stock of carnations, the popular price being $1.00 per dozen, although some select ones were disposed of at $1.50 per dozen; $4.00 to $7.00 per hundred was the wholesale price for them. Red carnations, of course, went first, then pink, and, after some time, the white.

Many poinsettias were sold, the large majority of them bringing $3.00 to $6.00 per dozen.

Poinsettia plants with three to six flowers to a pot, and a red cover to match the flowers, were readily sold at prices ranging from $1.50 to $1.00 for the plant.

The supply of violets lacked a great deal of being equal to the demand. Thousands more could have been disposed of. They were bought mostly in 100 lots at the rate of $1.00 per 100. Nearly all of the violets sold were home-grown double ones, and the result was very satisfactory. A fancy violet box or hamper was invariably asked for. As early as Wednesday noon, nearly all of the retailers had sold out their supply of violets.

Some lily of the valley sold at $1.00 per dozen; other cut flowers at the following prices: Roman hyacinths, 75c. per dozen; daisies, 25c. per dozen; narcissus, 75c. per dozen; tulips, 75c. per dozen; stevia, 25c. per dozen. A few chrysanthemums brought $2.00 to $4.00 per dozen. The latter flowers were not extra, but were readily disposed of. There were a few sweet peas on the market; 50c. per bunch of twenty-five was obtained for them.

One noticeable feature was that there were fewer boxes of mixed cut flowers left to the discretion of the florist than in former years; customers picked one or two kinds and colors of flowers and were particular to have those kinds selected.

Quite a few boxwood and other prepared wreaths were sold at prices ranging from 50c. to $5.00. One of the cemetery florists sold nothing but green boxwood wreaths and a very large number of them could be seen on the graves after Christmas.

The plant trade, also, was larger than ever before. Begonia Gloire de Lorraine sold by the hundred at prices ranging from 50c. up to $10.00, a fine specimen in a pot bringing the latter price. With nearly every plant sold was a cover, ranging in price from 25c. to $1.00, nothing more expensive than that being wanted.

Quite a few cyclamens were in bloom; $1.50 to $5.00 according to size and color were the range in prices. The pink and variegated sorts sold better and commanded a better price than the red or white. Some fine specimens of cyclamen were to be seen at several of the florists; but these plants did not sell as well as the begonia or azalea, though quite a lot of $1.00, $1.50 and $2.00 plants were disposed of.

Primulas were numerous at 35c. to 75c. "Just the thing to sell to old ladies" one clerk remarked. The plants last longer and are the cheapest things in the store. Pots of spring flowers, i. e., tulips, daffodils, hyacinths and narcissus, sold at from 50c. to $1.00 and went readily because of their price. Small Begonia Gloire de Lorraine plants in 2-inch and 3-inch pots, with a neat little cover of wood matting, were readily sold. They were cheap, pretty and neat. Palms and other foliage plants held their own, many a jardiniere being bought to be filled with some lasting house plant. The usual number of ferneries and dishes which had been bought elsewhere were filled at the customary prices.

Of course, the large hampers and baskets of flowers which had served to beautify the store were sold. The price obtained for them was $2.50 to $7.50. The more experienced customers preferred choice cut flowers, or a specimen plant. The florists were too busy to bother with green material to any extent. Many customers were referred to the streetman and the seed houses. Of course, when a good customer cared to pay an extra price, his wreaths, etc., were made to order. This was found to be more satisfactory than carrying a large quantity of made-up material, as in former years. I. B.

ST. ALBANS, VT.—Christmas trade was as good as in other years. Stock was in short supply, and the wholesale prices away up. Everything we had in cut flowers sold out clean. There was a good demand for holly and greens as well as for palms and ferns. The only trouble we have here is with the coal situation; we are fighting hard to keep our stock from freezing, by burning green wood. Wishing you a happy New Year, and more coal. H. BRYANT.

CHICAGO.—The market for the past week has been rather active on account of the large shipping trade. American Beauty roses are quoted at $12.00 per dozen for extra fancy stock. Bride and Bridesmaid, $6.00 to $15.00 per hundred, while a few extras went a shade higher. Liberty is selling at from $6.00 to $35.00 per 100, the latter for extra select stock; Perle des Jardins, $6.00 to $12.00; Meteor, at $6.00 to $18.00; Sunrise, $6.00 to $15.00; Mme. Abel Chatenay, $6.00 to $20.00; Ivory, $6.00 to $20.00 per 100. Carnations are in fairly good supply, with everything closed out in the colored line. White varieties are not moving so freely, and are quoted at from $2.00 to $10.00 per 100; the latter price also for extra fancy Prosperity, while Harlowarden has been bringing $15.00 per 100. Violets are quite a scarce article in this market, and have been bringing from $1.50 to $3.00 per 100. Harrisii lilies realize $2.50 per dozen. Roman hyacinths and Paper White narcissus were quite in evidence, and did not move very freely at $2.00 to $4.00 per 100. Lily of the valley did not move so well as might have been expected; it is quoted at from $3.00 to $5.00 per 100. Quite a lot of sweet peas were in the market, and realized $1.50 per 100; bouvardia, $2.50 per 100; stevia, $1.50 to $2.50 per 100; poinsettias, $2.50 to $7.50 per dozen; mignonette, $4.00 to $8.00 per 100; Asparagus plumosus, $50 to $75 per 100; Asparagus Sprengeri, $2.00 to $3.50; smilax, $12.50 to $15.00 per 100. A few myosotis brought $4.00 per 100. White stocks were in, being quoted at $4.00 per 100. Some belated chrysanthemums were in evidence, selling at from $2.00 to $5.00 per dozen.

The trade at Christmas from all accounts from the principal wholesalers was very satisfactory as far as the total sales were concerned, but the quality was lacking in most all grades. Bridesmaid were the worst, being off color and very soft and unsatisfactory for shipping. No doubt lots of complaints will be received by the commission men on account of the soft condition of stock shipped from this market; but as there has been no sunshine since before Thanksgiving, stock could not be otherwise. Taken as a whole, the Christmas business has far exceeded anything done heretofore, and the wholesalers report that their sales were all the way up to 100 per cent better than those of a year ago. Shipping trade has been immense this year, with prices about the same as a year ago. The top notch reached by American Beauty roses was $15.00 per dozen wholesale; but the most of the stock was sold for $12.00 per dozen for extra fancy, with enough at least to supply all demands of the other kinds. Liberty was the scarcest article and sales of it are recorded as high as $6.00 per dozen for extra fancy stock. Bride were in abundance and were hard to move at any satisfactory price, except extra fancy which sold well. All other roses were in good supply and went at a good price. Carnations were in fair supply with a shortage of red, which will always be the case, as it does not pay the grower to have a large percentage of this color at any other time of the year. White flowers were greatly in evidence; in fact, an over-supply, whereas if the stock had been shipped in on Saturday and Sunday the growers would have realized exceedingly high prices for it, it being impossible to supply the demand for white stock at that time. The same was true of bulbous stock. Quite a large supply of this material was carried over from Christmas; those and white roses and carnations were all that were to be seen on the counters on Christmas noon; in fact, a goodly number of the wholesalers were ready to close at 11.00 o'clock on that day, everything being cleaned up. Violets were in good supply with not enough to meet the demands; almost every order had to be curtailed. The quality was fairly good, still some exceedingly poor stock was received. The best realized $3.00 per hundred and were quickly taken by the local trade at that price. Lily of the valley was practically a drug on the market and hard to move.

Numerous kicks are to be heard in regard to pickled stock; but I have an idea that the weather has been more to blame than the growers for so much soft and sleepy stock being thrown on the market.

At present, trade is fairly active with Christmas prices prevailing.

There was enough Christmas greens and goods of that class to meet all demands, with quite a lot carried over by the South Water street commission men, who are going in heavier every year into these goods, supplying the grocery stores in the suburbs with them. Holly from that quarter was peddled about the city a day or two before Christmas and sold at from $1.00 to $1.75 per case, where the week previous it was selling for $3.50 per case. More red berries and holly berries were handled in this market than ever before, the retailers using these in basket work in connection with ferns.

R. J.

PHILADELPHIA.—There has been a good amount of business done in cut flowers this week, rather more than was anticipated after the Christmas rush, and all stock has cleaned up well excepting carnations.

American Beauty roses are selling at from $7.00 to $9.00 per dozen for the best grades, $10.00 is asked for some, but they must be extra choice to bring that price. Bride and Bridesmaid are not in sufficient supply in choice flowers to fill all demands. The commission houses have had heavy shipping orders on these roses for several days. Choice tea roses are selling at $10.00 to $12.00 per 100. Liberty has had very good sale; and an increased demand is noticed for Golden Gate. Sunrise is also seen more and is a pretty flower as used in mixed bunches. Queen of Edgely is selling at $9.00 and $10.00 per dozen for the best, the latter price being difficult to get. Choice carnations are bringing $6.00 per 100, down to as low as 75c. per 100. This week the $4.00 to $6.00 stock is going very well, but lower grades rather slow. Double violets are in good demand, the supply is rather better. Prices are $1.50 per 100. Bulbous stock sells slow outside of a few choice daffodils. Lily of the valley is in good demand. DAVID RUST

WALTHAM, MASS.—Christmas business was very good, better than last year's. The coal situation made stock scarce and prices consequently higher. Carnations realized from $6.00 to $12.00 per 100, white flowers selling best. Roses reached from $6.00 to $18.00 per 100; violets, $2.50 to $4.00; lilies, $1.50 per dozen. In plants, azaleas sold well, as did other potted stock.

The Italian fruit dealers handled most of the holly and other greens.

W. F. WARREN.

BRATTLEBORO, VT.—Christmas trade was good in flowering plants such as cyclemen, primroses, hyacinths, narcissus and violets in pots. In cut flowers carnations sold well at higher prices, but were very scarce; violets also sold well. Roses went only in small quantity and hyacinths and narcissus went well. Holly and other green, also palms and all decorative plants did not sell as well as flowering plants.

D. McGILLIVRAY.

KNOXVILLE, TENN.—Retail prices at Christmas were about the same as last year; sales 25 per cent. better. The supply was plentiful, but all cleaned up. Bulbous flowers sold fairly well. Plant sales for all classes were better. Buyers paid Christmas prices more freely than formerly. C. W. CROUCH.

(*Further reports of Christmas Trade will appear in next week's issue.*)

Christmas Store Front Decorations

Our skilled and perserving photographer exhausted every effort as well as, finally, his patience, through snowstorm, rain, and wind, and at all hours of daylight, in the endeavor to take some of the magnificent retail florist store fronts of the metropolis as decorated for Christmas, the plate glass front negativing his work in every instance. We thank the firms who so heartily assisted, and regret we have been unable to show our readers generally the artistic work which along certain of our streets attracts the undisguised admiration of thousands of our citizens.

Retail Stores.

Most of the stores have been quite busy all week; every day has brought a large number of balls, dinners, luncheons, etc., so that flowering plants and cut flowers have been in good demand. Graham had four large ball decorations this week; every one of these affairs has numerous dinners preceding it. The same applies to grand opera on Tuesday night. Then there are a great many visitors from distant cities here for the holidays; they are being entertained all around. Christmas business from the retailers' point of view appears to have been very good; all seem to have done an increased trade. In summing up, or striking an average as it were, there was a much smaller percentage of large-priced sales; the bulk of business done was of sales from $4.00 to $10.00. Large hollies, bougainvilleas, azaleas, etc., that were marked $15.00 to $25.00 went very slow; in fact, many were left over. The same remark applies to cut flowers. Several stores report smaller sales on American Beauty roses, but an increase in those for flowers that did not cost so much. Three stores, all of whom do a high-class business, say that many of their large buyers bought less; in one case the reason was thought to be the slump in railroad and other stocks during the past three weeks and trouble in the Lake Superior Company, in which many in this city are interested. The stores all report having received splendid treatment from the local rose growers as to the quality of stock sold them. Of course, some complain about prices, but let the grower, retailer and buyer settle that.

Flower Market.

Business continues to improve at the market and all those selling their products there are well satisfied. So far, all flowers are cleaning up well every day. The latest addition as a stall-holder is Wm. A. Walton, Oxford, Chester County, Pa., a carnation grower. In talking with him on Tuesday he is much gratified at the way his flowers are selling, and is only sorry that he cannot bring in twice as many.

Manager Meehan reports daily demands for double violets, and is looking for a few consignors in this line.

Bayersdorfer & Co. will occupy their space next week with florists' supplies. Leo. Niessen has all kinds of wrapping paper, wire designs, paper boxes, etc., on sale, so that every week makes the market more complete.

Robert Crawford, Jr., says he has had six busy weeks of very profitable business. He certainly has a very handsome store now. Changes and additions have been made for several years past, and every detail seems right. The neighborhood in which he is located is worthy of such a store, as if the blue book is consulted a vast amount of wealth can be found in the two or three blocks around him.

Horace T. Dumont has made quite a reputation as a fire fighter. His father woke him at 3.30 a.m. Monday, as there was a strong smell of smoke in the house; but it was an hour later before any fire was located. Then it was found in a partition between the kitchen and dining room. Fully $1,000 worth of furniture and carpets were ruined before it was subdued.

Florists' Club.

Next Tuesday is meeting night. All growers of new carnations are invited to send some flowers. There will be a smoker, with plenty of good cheer, so that a large attendance is expected. Let everyone do his best to make the first meeting of the new year a good one; come even if you cannot stay long.

DAVID RUST.

Cleveland.

Jottings.

The week before Christmas marked the opening of a new flower store on one of the principal streets of our city. The new firm will be known as Westman & Gust. The store is located on Euclid avenue near the corner of Huntington, and on the opening day presented a very neat appearance, the fixtures and interior being of white and gold, with some green worked in places to advantage.

This city seems to be in the heart of cold and severe weather; for almost two weeks has the snow been falling and in that time we have seen the sun but once, and only for a short time at that. This has a telling effect on flowers of all kinds and, I dare say, stock has never been so scarce as at the present time, consequently prices have reached the highest point ever known. The outlook for a New Year's demand is very bright and by the time this letter is in print no doubt all will be rejoicing over the business done.

A Happy and most Prosperous new year is the best word from your correspondent.

G. W. S.

Indianapolis, Ind.

Notes.

A large number of spruce trees in tubs, which had decorated the front of Bertermann Bros., and which had been a white elephant as far as the sale of them was concerned, were sold at Christmas Eve. The supply of cut Christmas trees in the city had been exhausted and Bertermann accommodatingly sawed off his trees at accommodating prices.

A. Wiegand & Sons report a fine business. High-priced stock sold readily with them.

Market business was good, although a number of the florists sold nearly everything at wholesale.

John Heidenreich had a nice collection of azaleas, begonias and bulbous plants which brought good prices.

John Rieman reports a good business, but complained of the prevailing wholesale prices, which were, in many cases, exorbitant.

Wm. Billingsley had the most prosperous Christmas business of his experience.

Although the Christmas trade was exceptionally good, business at the present time is not up to the standard of former years.

I. B.

FREDONIA, N. Y.—Fire threatened the building of the Roesch Nursery & Feed Company Christmas afternoon. It started in the office of the company, and was seen from the residence of Mr. Roesch, nearby, from which a fire alarm was turned in. The department responded, but the efforts of the neighbors had subdued the flames before the firemen reached the scene. The loss was nominal.

Boston.

The Week's News.

At the retail stores a very satisfactory Christmas trade has been done. All report very heavy plant sales, but cases where such increased at the expense of the demand for cut-flowers are rare. Gloire de Lorraine begonias, poinsettias and ardisias did not clean out as well as usual, and, as has been the rule, white flowering plants did not sell fast. Colored azaleas, cyclamen, primroses and Jerusalem cherries went well, and English hollies exceptionally so, the majority of them this season being well shaped and well berried plants. There was little call for plants in baskets or those decorated with ribbons.

Among cut-flowers, all colored things sold well. White roses moved about as slow as anything, for, unlike the grower, the retail dealer cannot insist on a customer, who wants Bridesmaid taking some Bride with them. Violets, though not so numerous as in other years, did not sell quite so well; no doubt buyers were afraid of the high prices which some "enterprising" dealer probably gave to a newspaper reporter, who published a weird story of the fabulous figures, prices and immense profits which florists were deriving from the sale of violets at Christmas. Good carnations, even at the figures to which they ran, sold out very well, and here it was easier to dispose of white ones in mixed lots, which are more popular in the case of carnations than for roses.

The cottage on William W. Edgar's new place at Waverly was burned Friday night.

Geo. A. Sutherland's last shipment of holly included some of the best cases that have been opened in Boston in many years, and it seems a pity that such fine material did not arrive earlier in the week.

R. & J. Farquhar's new rose, The Farquhar, is now ready for the market, and will be sent out April 1. This rose originated with Jackson Dawson, is a cross of Rosa Wichuraiana and Crimson Rambler, and should prove a grand companion to this latter rose. The novelty was the result of more than four hundred crossings. This rose was purchased by Messrs. Farquhar, and was exhibited by them at Horticultural Hall last Spring.

The regular meeting of the Massachusetts Horticultural Society will be held Saturday. The compromise committe will report a new constitution at this meeting.

A number of the employees at the Waban Rose Conservatories have organized a club for the support of the baseball team during next season. Bob Dunn, the captain of last year's team, was chairman. They organized as "The Waban Rose Field Club," with the following officers: Arthur Turner, president; Henry Goldrick, vice-president; A. Parker Montgomery, treasurer, and Andrew R. Kennedy, secretary. It is proposed to open the baseball season on April 19, and another successful season is confidently looked forward to.

The greenhouses of F. W. Fletcher, at Auburndale, were frozen solid on the night of December 27. The temperature outside was below zero, and the only available fuel green wood and hard coal dust. Expected supplies of coal came next day—too late to save the two houses of carnations, two of violets, and three of palms, ferns, azaleas and miscellaneous stock. Mr. Fletcher has met with heavy losses from fire and flood during the past year, and will discontinue business for the present.

F. J. NORTON.

Providence, R. I.

News Notes.

A. Rennie was "long" on holly, and reports no profit. There was too much cheap stock in the open market and he was obliged to carry over quite a few cases of high-priced holly.

T. J. Johnston and O'Connor report good holiday business although the latter had too many dinner parties to allow him to hold anything back for Christmas.

Alexander Miller has lost his wife and baby. The entire trade unite in expressions of sympathy.

The Florists' Club holds its annual banquet at the next meeting, Thursday, January 8. Full particulars will be mailed to all in the trade. This is one of the few events of the year when the florists meet on neutral ground, and proceed to enjoy the good things of life.

C. S. M.

New Haven, Conn.

The New Haven County Horticultural Society held its last meeting of the year on December 16. Since the society was reorganized two years ago it has had an uphill fight, but the future looks brighter. There is a nice little sum in the treasury. Mr. Thompson, of West Haven, consented to read a paper on carnations next month. The election of officers will take place at the meeting to be held January 6.

Max E. Kraus had to close up his greenhouses, being unable to secure coal. The boys stand ready to help him all they can to restock when he opens up again. The coal question has been a hard one to deal with, but this is the first freeze that has happened here.

Orange, N. J.

Floricultural aspects are bright and promising here. Local trade began much earlier than last year, and has kept up without a break to the present time, handicapped as we have been by the coal famine, yet fortunate in a supply of hard wood. Some weeks ago John N. May was on his two hundredth cord. Some of our men have drawn off the water from their boilers and given up in disgust, but more have made the best of the situation, and received their reward in the way in which the public has cheerfully paid the necessarily increased prices. Carnations reached $2.00 per dozen last week, and orchids, to the retailer ,were 75c. each.

Popkin & Collins have been busy with cut flowers, and many made-up pieces. John McGowan made about equal sales of potted plants and flowers. Read makes an attractive window with his primroses. Linum trigynum, the yellow flax of India, has found a ready sale, probably because of its attractive appearance in the window, the clear yellow contrasting so pleasantly with the primroses and cyclamen. Emil Decker has had this plant, and reports its ready sale. His business shows an increase over last year.

Bernard Kuhn, at M. J. Lyons', shows a variety of rose blooms and carnations. Ethel Crocker has not made the yield he anticipated. He is getting some good cuts from Norway.

There is a new tenant where Roper & Harvey were last year—Perry S. Watson. He has secured James Greer, formerly of Madison. There are four houses of roses here—three of Bridesmaid and one of Bride. The cut from these one day last week was 800 blooms, one house of Bridesmaid yielding 177 flowers. The plants were put in the bench last July, from two-inch pots; they show fine, clean foliage, and while the pipes were coated after the usual method, Mr. Watson lays the satisfactory results to the regular dusting of lime and sulphur. Benjamin Fenner apparently has not commenced to cut yet. The Jap, two blocks below, has sold his glass, and is making up baskets and fern balls for the trade.

At South Orange, Bradbury has a store on South Orange avenue, besides the houses some distance from town. There is a tendency around here for the growers to seek a home market for their stock in addition to their regular commissions. Theo. Holicek, after a busy Summer in landscape work, has an attractive stock of potted plants and flowers.

At W. A. Manda's a clean sweep has been made of many benches. The popular taste again this season demanding bright colors, 1,500 Dracæna terminalis were sold in New York alone. Relying on this, Mr. Manda is in hopes of introducing Ruellia macrantha in place of the azalea next season, and has a large stock. The plant is rapid in growth, bright and effective in color, and easy of cultivation, being of softer wood. Among the wonders of his collection of orchids is a Lælia anceps four feet in diameter, which, when in bloom, a month hence, will be worthy a visit. The plant has 32 spikes.

At East Orange, Kershaw Clegg has opened a store at 587 Main street, returning to his houses on Valley road, West Orange, formerly rented by Henry Good, who is confining himself to his houses near the Rosedale cemetery. Clegg has made sales of Christmas greens, and his poinsettias formed an attractive window amid these, and palms.

Massman speaks of an increased sale of fine flowers, particularly the finer carnations, and some orchids.

Among the growers, George Atkinson, at Llewellyn Park, and the Willowmead greenhouses, speak of good sales this season. Atkinson continues to rent the additional houses on the Northfield road.

J. B. D.

Kalamazoo, Mich.

Jottings Here and There.

The weather must have considerably curtailed the casual trade, a severe snowstorm setting in about 3 a. m. on the 24th, and lasting over Christmas. This made deliveries hard, and entailed much extra work in getting out orders. Outside the florists' supplies, there did not appear to be much holly and green in evidence; and I did not notice the elaborate Christmas displays of holiday goods among our merchants, as is usual here. The advanced express rates cause indignation here, as elsewhere, most of us thinking we had enough to contend with already; what with the bad weather and high prices for coal.

Garrett Van Bochove took unto himself a wife last week, and has the congratulations of the trade. He is the senior member of the firm of Van Bochove & Bro. The firm reports good business this Fall.

Mr. Cook, of the Central Nursery Co., has a seedling carnation of good size and habit, which will prove a good thing if it carries out its promise. So I think the Van Bochove's have, if I remember rightly, and a big one, too.

The Dunkley Floral Co. was fortunate to get a nice batch of poinsettias in for Christmas, which sold well. This firm also cut well of carnations, as, in fact, did we all. I think the general cut of flowers averaged a little better than usual all round, from what I hear.

S. B.

Ithaca, N. Y.

Henry Bool has been awarded first prize by the Women's Club of Ithaca, for the best-kept lawn and garden. The Sunday Herald, of Syracuse, pictures Mr. Bool's grounds, before and after completion. They are certainly a credit to him, and should be productive of increased business in this line.

Syracuse, N. Y.

Florists here have had a very hard row to hoe through the Fall months, as August, September, October and November were unusually warm, and forced roses and carnations too much. Since then the shortage and high price of fuel, and the continued dull weather, have caused a shortage of stock all around. Business has been very good owing to the many large funeral orders and social functions.

Superintendent of Parks D. A. Campbell has been seriously ill with congestion of the lungs. He is now on the road to recovery.

Henry Morris has been confined to the house by illness for the past week.

H. Y.

SYRACUSE, N. Y.—The Christmas demand was greater this year than last, with higher prices prevailing. There were practically no flowering plants in the market save primulas and cinerarias. Palms and Boston ferns sold well, with the latter in the lead. In cut flowers, of course, carnations led at an average of $1.50 per dozen, with $2.00 to $2.50 for specials. Bride and Bridesmaid roses sold at $3.00 on an average, but some selected stock went as high as $6.00. American Beauty sold at $1.00 to $2.00 each; Meteor, $4.00; a dozen; lily of the valley, $1.25; Roman hyacinths, $1.00; Paper White narcissus, $1.00. L. E. MARQUISEE.

AUBURN, N. Y.—Christmas business was very good. Carnations sold at retail at 75c. to $1.50; roses at $1.50 to $2.00 per dozen; American Beauty, $4.00 to $5.00 each. In plants, peppers and poinsettias were in demand; and holly and other seasonable stock sold satisfactorily.

BINGHAMTON, N. Y.—Prices at Christmas were as follows: American Beauty roses, $5.00 to $12.00 per dozen, on orders only; tea roses, $1.50 to $3.00 per dozen, all sold; carnations, 80c. to $1.50 per dozen, all sold. Violets were scarce and of poor quality, bringing $1.00 to $3.00 per 100. Lily of the valley was not in large supply at $3.00 to $4.00. Roman hyacinths were all disposed of at $4.00 per 100. Holly and pine, in wreaths and bulk, all sold. Plants, blooming and foliage, were in fair supply, and sold freely at moderate figures. On the whole, trade showed an advance of about one-third over last year's. J. B. TULLY.

Substitutes for Coal.

Prof. Charles L. Norton, Assistant Professor of Heat Measurements at the Massachusetts Institute of Technology, makes public the results of his experiments on the heat values of different substitutes for coal. A British thermal unit is the heat required to heat one pound of water one degree Fahrenheit. Following is Prof. Norton's table:

	Heat Units per Pound.
Anthracite	15,000 to 16,000
Bituminous coal	14,000 to 15,000
Coke	10,000 to 14,000
Hardwood	8,000 to 9,000
Charcoal	12,000
Peat	10,000
Coal peat briquettes	10,000 to 13,000
Kerosene	20,000 to 25,000
Gasoline	20,000 to 25,000
Boston gas	650 per cubic foot

This gives a basis for an estimate of the cost of an equal amount of heat obtained from each of the fuels:

	Heat Units for One Cent.
Coal, $12 per ton	23,000
Wood, $10 per cord	27,000
Oil, 12 cents per gallon	12,000
Coke, $10 per ton	24,000
Gas, $1 per 1,000 cubic feet	6.500

—New York Times.

NASHVILLE, TENN.—Trade opened brisk on Monday before Christmas and the rush continued until after Christmas. Joy & Son had quite a supply of 10-inch pans of Begonia Gloire de Lorraine, maidenhair fern and Asparagus plumosus, which sold readily at from $1.50 to $2.50. Hyacinths in pans went at from $1.00 to $2.00. Azaleas sold well, bringing $2.00 to $10.00. American Beauty roses went at from $5.00 to $12.00 for the best; Bride and Bridesmaid at $2.00, $2.50 to $3.00 per dozen. Prosperity and Mrs. Thomas W. Lawson carnations brought from $1.50 to $2.00 per dozen; other varieties, 75c. to $1.00 and $1.50. Violets went well at $2.00 per hundred. All in all, trade has been brisker than in any previous year.

A WEEKLY MEDIUM OF INTERCHANGE FOR FLORISTS, NURSERYMEN, SEEDSMEN AND THE TRADE IN GENERAL

Vol. XV. No. 2 NEW YORK, JANUARY 10, 1903 One Dollar Per Year

C E Stone '03 Hatch Expt Sta

Here Is Another Bargain in Bulbs for Easter Forcing.

All the Paper White Grandiflora, Horsfieldi, Emperor, Empress, and double nosed Von Sion Narcissus offered in last week's issue **ARE ALL SOLD.** We could have sold them two or three times over. People know a good thing when they see it. We offer below some other good stock at equally low prices. If you ca [illegible] of the bulbs offered, let us have order without delay, before we are sold out.

Now t[illegible] days are past, Florists are looking forward to Easter, which comes late this Spring April 12th, so that there is plenty of time to get any of the stock here offered in bloom by that time. Bulbous stock is [illegible]ing for good prices on account of the scarcity of other flowers due to the high price of coal—and as bulbs can be grown in a low temperature, they will make money for you.

Everything offered is in first class shape, and are **GREAT BARGAINS AT THESE REDUCED PRICES. Send for complete list of surplus bulbs, which we are closing out at equally low prices.** When ordering please refer to this special offer.

SMALL SIZED NAMED HYACINTHS.

This is wonderfully fine stock for the price. The bulbs are of large size 12-15 cm. in circumference—and are splendid for Easter forcing, either for cutting or growing in pans. Nothing is more readily salable. Although the price is low, the bulbs are first-class. They will throw almost as good flowers as the larger and higher-priced bulbs. If you have never flowered them, try a thousand or two. You will be pleased with the results. They cannot fail to make money for you.

The following pink varieties **at only $1.50 per 100; $12.00 per 1000** (worth $16.00 per 1000), viz.: Baron van Tuyll, Gen. Pelissier, Gertrude, Gigantea, Rob. Steiger, Solfatara.

The following blue varieties **at only $1.50 per 100; $12.00 per 1000** (worth $16.00 per 1000), viz.: Grand Maitre, King of the Blues, La Peyrouse, Chas. Dickens, Blondin, Czar Peter; also Tamerlan [illegible]low.

he following white varieties at **only $2.00 per 00; $16.00 per 1000** (worth $22.00 per 1000), viz.: Baroness van Tuyll, Grandeur a Merveille, Blanchard, L'Innocence, Mme. Van der Hoop, Paix de l'Europe.

FINE NAMED HYACINTHS Single and Double.

We offer also a limited stock of the following varieties in first-sized bulbs, $3.00 per 100; $25.00 per 1000 (worth $35.00 per 1000): La Peyrouse, Regulus, Tamerlan, Grand Lilas, La Pluie d'Or, Gen. Pelissier, Grandeur a Merveille, Bloksberg, Bouquet Tendre, Czar Nicholas, Crown Prince of Sweden, Flevo, Garrick, Grootvorst, Gen. Antinck, King of Wurtemburg, La Tour d'Auvergne, La Virginite, Lord Anson, Lord Raglan, Othello, Prince of Orange, Prince of Saxe-Weimar, Princess Royal.

HYACINTHS In Separate Colors, Single and Double. We still have a few of these left, which we offer as long as unsold at **$2.50 a 100; $20.00 a 1000** (worth $26 a 1000).

WHITE ROMAN HYACINTHS.

We still have a few cases of fine 12-15 centimeter bulbs, which we offer as long as unsold at **$15.00 per 1000** (worth $25.00 per 1000).

NARCISSUS

These prices will speak for themselves: Trumpet Major, Single Von Sion, per 1000, $6.00. Princeps, Poeticus Ornatus, Barri Conspicuus, per 1000, $5.00. Silver Phoenix, Grandis Maximus, per 1000, $15.00.

TULIPS.

Single and Double.

Most of the varieties here offered are among the very best forcing varieties, especially for late or Easter forcing: Rachel Ruisch, Rosamundi Huykman, Bizard Verdict, Couleur Ponceau, La Candeur, Yellow Rose, Lady Grandison, Duke of York, Rose Blanche, Count Leicester, per 1000, $5.00; Cottage Maid, Joost van Vondel, Brutus, Paeony Red, per 1000, $6.00; Tournesol red and yellow, Gloria Solis, Le Blason, Rosine, per 1000, $7.00; Pottebakker white, Duc van Tholl scarlet, Standard Royal Silver, per 1000, $7.50; Rose Grisdelin, Belle Alliance, Mariage de ma Fille, per 1000, $10.00; Proserpine, per 1000, $12.00; Joost van Vondel white, Rose Luisante, per 1000, $20.00.

CALLAS

We have a few hundreds of these, which can be gotten in fine shape for Easter. Extra sized bulbs, 1¼ to 1½ inches in diameter, $3.00 per 100, worth $5.00 per 100; Selected bulbs, 1½ to 1¾ inches in diameter, $4.00 per 100, worth $6.00 per 100.

SEED TRADE REPORT

AMERICAN SEED TRADE ASSOCIATION

Walter P. Stokes, Philadelphia President; C. N. Page, Des Moines, Iowa, Vice-President; C. S. Burge, Toledo, Ohio, Second Vice-President; S. F. Willard, Wethersfield, Conn., Secretary and Treasurer; A. N. Clark, Milford, Conn., Assistant Secretary.

NEWPORT, R. I.—F. L. Ziegler is a young beginner in the seed business here. He would like to receive catalogues from seedsmen who issue same.

MANITOWOC, WIS.—The Manitowoc Seed Company has been incorporated with a capital stock of $20,000. Incorporators: Albert Guttmann, Geo. L. Born and G. E. Aller.

MANITOWOC, WIS.—On January 3 fire at the establishment of the Madson Seed Company caused a panic among the fifty girls employed, but all escaped from the building uninjured. The fire was caused by gas explosion and less than $100 damage was done.

BARTELDES & CO., DENVER, COL., are distributing a handy article as an advertisement in the form of a 15-inch rule, bearing the motto, "Western seeds for Western planters," with the firm's address on one side and on the reverse a table showing the amount of seed of different crops necessary for an acre and the number of pounds to the bushel.

European Notes.

It is with a feeling of absolute relief that we pen the last notes of 1902. Throughout they have been gloomy in the extreme; but just as the old gossips find a positive pleasure in saying "I told you so" when you wake up with a bad headache after a good dinner, so the scribe now writing feels a melancholy satisfaction in saying that every gloomy prediction put forth in this column during the year just closing has been fulfilled to the very letter, and the end is not yet reached.

But, sir, "let the dead past bury its dead;" we have to deal with the materials of a perpetual resurrection. One grain of the wheat we handle will in a marvelously short space of time cover the earth with golden fields of waving corn. It is ours to send far and wide the messengers of hope; may it be ours to see their full fruition in the years to come.

EUROPEAN SEEDS.

Novelties in Sweet Peas for 1903

Henry Eckford has kept his secret so well that not until his catalogue was actually published was it known what the trade might find therein. The following comprise the list:

DOROTHY ECKFORD, the new white. In addition to its pureness, it is a grand giant flower, also robust in growth and stem, with no tendency whatever to tinge or go pink; the plant is very short jointed, and grows an enormous mass of bloom.

KING EDWARD VII. is a very lovely intense bright crimson self, with a slightly hooded yet prominent standard; a true giant-flowered variety, with strong stems and growth, with no inclination to burn in the sun; a fine decorative and show variety, much brighter than either Mars or Salopian.

AGNES JOHNSTON, a bright rose-pink standard, shaded cream, wings cream, slightly flushed with the same bright rose-pink as the standard; a broad, fully-expanded flower, of good size and splendid substance; a strong growth and constitution.

MRS. WALTER WRIGHT, a fine giant-flowered variety with large standard and wings, the former slightly hooded, yet broad and deep, the wings being jauntily curled at the apex, and extending about half-way down; in color the standards are a beautiful shade of mauve, clear and bright, while the wings are a bright cœrulean blue slightly shaded with the mauve color of the standard; a most attractive flower; grand for decorative work, and also for exhibition.

Dorothy Eckford and King Edward VII. are the best of the bunch, the former is especially fine. Its curious history was fully given by me in my reports of the exhibition of the National Sweet Pea Society.

As regards that magnificent novelty, Countess Spencer, it is very doubtful if it will ever be seen again, as Mr. Cole, the raiser, has practically lost the stock, owing to the bad weather of the past season.

S. B. DICKS, F. R. H. S.

J. C. Vaughan on Seedsmen's Catalogues.

In the "Seed and Nursery Number" of Agricultural Advertising, for December, 1902, appears the following interview with J. C. Vaughan, of Chicago, on the subject of seedsmen's catalogues:

"Do you think, then," he was asked, "that it is good policy, aside from any moral principle involved, to exaggerate the merits of products offered in the catalogues of the seedsmen and nurserymen?"

"Well," was the reply, "that is not a very easy question to answer. A good many things are involved. It is a fact, of course, that all seedsmen and nurserymen are given to exaggeration in their catalogues, and as there are always reasons for anything that is done continually by any class of men, so there are reasons here.

"These catalogues are not merely sober matters of business. Perhaps they ought to be. I am not deciding that. I am, as I said, only stating what is the fact, or trying to, at least. These catalogues are made largely for farmers, and the Winter evenings on the farm are long and usually there is little doing. The farmer and his family, as other people, must have some relaxation. The seed and nursery catalogues furnish them some entertainment. They like to read them. Interest is added to them by the exaggeration, by the descriptions of the wonderful plants and flowers and vegetables and fruits offered. My belief is that there is no question of deception here. The farmer is not a fool. He knows that every variety of every class described is not good. He understands this perfectly. He is not deceived."

"You think, then, Mr. Vaughan, that it is good business policy to humor this quality in human nature which delights in reading exaggerated descriptions of things?"

"No, I do not say it is good policy; I only say that the maker of the catalogue does, as a matter of fact, pursue this method for the reason stated. He takes human nature as it is. It is the custom. The catalogues pay, and the same policy is pursued year after year. I am not disposed to enter the region of speculation and ask whether some other method would be better; neither am I justifying the practice of exaggeration on moral grounds, further than to repeat that there is little, if any, deception actually worked. There is a pretty good understading between the reader and the seedsman. As a piece of literature the catalogue would not be so entertaining if it were devoted to a sober statement of facts, though it is conceivable that it might bring more and doubtless should bring better business."

AMERICAN ASSOCIATION OF NURSERYMEN
Charles A. Ilgenfritz, Monroe, Mich., President; D. S. Lake, Shenandoah, Ia., Vice-President; George C. Seager, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., Treasurer.

BOBBINK & ATKINS, Rutherford, N. J., make a specialty of trained fruit trees.

ROCHESTER, N. Y.—The veteran nurseryman George Ellwanger, of Ellwanger & Barry, celebrated his 86th birthday on December 2 last.

The committee on legislation of the American Association of Nurserymen, of which C. L. Watrous, of Des Moines, Ia., is chairman, went to Washington this week to further the passing of inspection bill (H. R. 10,999) providing for uniform rules to govern inter-State shipments of nursery stock.

The Western New York Horticultural Society will hold its annual meeting in Colonial Hall, Rochester, N. Y., on Wednesday and Thursday, January 28 and 29. A most interesting program has, as usual, been prepared. Wm. C. Barry is president of the society and John Hall, secretary.

SACRAMENTO, CAL.—The W. M. Jenks Nursery Company has been incorporated; the capital stock is $5,000. Directors: W. M. Jenks, Mary E. Jenks and W. F. Renfro, of Sacramento, and Nancy J. Lewis and Hayward Reed, of Broderick, Yolo County.

GENEVA, N. Y.—Wm. Smith, of the firm of W. & T. Smith, nurserymen, met with a serious injury on New Year's Day as a result of a runaway. A team of horses attached to a sleigh ran Mr. Smith down. He sustained a compound fracture of the nose, several abrasions on the face, and both legs were badly bruised. Mr. Smith is 85 years of age.

Pines in Pots for Christmas.

The growing demand for plants in pots for festival occasions, such as Christmas and Easter, a demand which seems apparent in all large cities, suggests the thought that there are several kinds of pines which would be most useful in that way. Already pines are represented on the occasions referred to in the way of branches, mainly of the Pinus palustris of the South. These branches find some sale, but if living plants, in pots, how much greater would be the demand! As the branches come to us now they are in lengths of about three feet. A plant in a pot, the same height, or four feet, would make a useful decorative subject at any time, and would certainly be in demand for holidays. To have plants that would thrive, they would need to be grown on in pots, as this, like many other pines, does not transplant well when it has been undisturbed for some time. Pinehurst Nurseries advertise small ones, I see, but they would need to be larger to be serviceable in the way suggested. The very long, soft needles are what recommend this pine. Among northern sorts P. resinosa, called Norway pine, singularly, approaches P. palustris nearer than any other; but it is not the equal of its southern brother. It is a beautiful pine, however, the needles soft and drooping and of good length. When it comes to a question of hardiness, the northern one, P. resinosa, leads, of course. It may be said to be hardy anywhere. Just how far the southern pine, P. palustris, may be considered hardy I do not know. Two young plants of it stood two Winters in Germantown, in good order, but eventually died out from causes other than cold. They did not seem to be at home, not having a thrifty look at any time. Probably a sandy soil would have suited them better than the loam they were in.

I really believe that this southern pine would be in demand, were it obtainable as a well-established pot plant.

Deciduous Holly and Christmas Greens.

A short time ago attention was called to the deciduous holly, Prinos verticillatus, as a probable good selling plant for Christmas were it grown on in a pot. It comes to mind again at the present time from seeing the large use made of the berries of this holly by the makers of wreaths and festoons for Christmas. A few days before Christmas, passing along Market street, Philadelphia, where vendors of Christmas greens had largely congregated, I noticed that nearly all the holly wreaths had bunches of the prinos set here and there instead of the real holly berries. One vendor, who wished to dispose of some wreaths to me, assured me that his were better than others offered, because his contained real holly berries. He did not know how near he was to the truth. Probably he thought it no holly at all.

Being deciduous, this plant is without leaves this late in the season, but, as I suggested before, if grown in pots under cover it is probable the foliage would still persist at Christmas time.

Besides the holly wreaths, the kalmia, ground pine, galax, hemlock and balsam fir had been put to use in some way, but, of course, holly is the first selected. Much of the holly is of poor quality, having but few berries. The fact is, that the woods of all the adjacent States have been so denuded of it that the home supply is about over. There was some fine material on the street the last day before Christmas, said to have come to the Philadelphia Wholesale Flower Market from South Carolina—too late to be profitably disposed of. It was fine, alongside of the other stock.

The Christmas trees were mainly of the balsam fir, with some black spruce among them. As a rule, the stock was good. The balsam is preferred by those who know the difference, possessing a nicer odor than either the black or the white spruce. What forests of these trees must be destroyed to furnish the country with Christmas materials!

The Scarlet Clematis.

The scarlet clematis, though a native of our own country, being wild in Texas, is not nearly as common in cultivation as others no more worthy. It is quite hardy in Pennsylvania, inasmuch as to spring up every year, behaving as a herbaceous plant. Whether this is what it does at home, I do not know; at any rate it does so here, but is none the less desirable where a tall vine is not required. The flowers, in shape, are what gardeners know as tubular. They are smaller at the base and narrower at the apex, with slightly recurved sepals. Strong two-year-old plants will make a growth of three to four feet, and when well established will, after a few years, make an annual growth of eight to ten feet. There are so very few hardy vines producing rich scarlet flowers that this alone calls for the use of the clematis in question. There are a few old established plants in gardens about Philadelphia which attract much attention when in flower. The writer well remembers his delight when viewing this unique flower for the first time.

Winter Pruning of Shrubs and Trees.

So much has been said of the proper pruning of shrubs that the admonition to look well to the preservation of the young shoots of the past season is hardly necessary. Nursery hands and those employed by florists are often detailed to prune some customer's shrubs, and it is well to see that the party sent to do the work understands just what should be done. Those who have shrubs to sell do not want the bulk of their stock to flower. A shrub becomes of good size in a short time if not permitted to flower. In nurseries where this is well understood, the flowers are not permitted to expand on shrubs which are desired to be of good size quickly. Shrubs not wanted for Spring sales, but looked on as promising for Fall trade, may be cut back closely and to their advantage. The cut off shoots are just what are wanted for making into cuttings; and a shrub cut down in Winter will make a most vigorous growth next season. This is a matter too often overlooked by pruners—that Winter pruning tends to make tall, strong growth, while that of Summer leads to bushiness. One or two strong shoots take the place of the one cut off in Winter; a half dozen or more succeed the one topped when in a growing state.

This is to be remembered when any pruning is in hand, indoor or out. The one who has a hedge to render bushy cuts it when in full growth, not once, but twice in a season. Evergreens treated in a similar way become very dense; even a straggling pine can be made into a thick bushy one by Summer pruning.

There is a certain naturalness to evergreens and trees of all sorts which should not be totally altered by pruning. An occasional customer wants a sheared evergreen, but the great majority of folk like to have the various natural characters represented on their grounds. It is to aid perfection where some defect exists that the pruner's knife is called into play; at least, it should not be used to destroy beauty.

JOSEPH MEEHAN.

Renovating Central Park, N. Y.

An expert commission, consisting of Dr. N. L. Britton, Director of the New York Botanical Gardens; Dr. B. E. Fernow, of the New York State College of Forestry, Cornell University; J. A. Pettigrew, Superintendent of the Department of Parks of Boston, and Samuel Parsons, Jr., Landscape Architect of the Department of Parks of New York City, has made an inspection of Central Park, New York, with a view to furnishing some recommendations relative to its improvement, and makes the following suggestions:

1. A thorough thinning out of all surplus, diseased, unsightly, and crowded trees, including those on the sidewalks of Fifth and Eighth avenues and on the Mall.
2. The removal of short-lived trees and those not suitable for city conditions, such as poplars, hemlocks, pines, spruces, and retinosporas. Conifers cannot endure the smoky air of dense cities. The amount of California privet should be very much reduced.
3. The careful and competent pruning of trees and the removal of dead limbs, and especially the proper protection of cut surfaces to avoid rot.
4. A clearing out of all trees, shrubs, and herbaceous plantations in open glades and from bays in the foliage lines; also the removal of all incongruous planted material which disturbs the harmony of the landscape.
5. Allow fallen leaves to remain in shrubberies and woodlands, the spread of those raked from ornamental grounds over the woodlands; cover thick deposits of them with a sprinkling of loam mixed with a little lime to assist decomposition, to prevent liability to fire, and at the same time to produce invaluable leaf mold.
6. The regular application of manure and commercial fertilizers to the groves, plantations, and lawns, and the addition of top soil in certain limited areas in which the rock comes close to the surface, where new shrub planting is to be done, and in some of the existing dilapidated shrubberies; on the Mall, the application of four inches of manure mixed with potash, to be spaded in.
7. Plant and thicken border plantations where necessary, using for this purpose such trees as English elms, oaks, gingkos, plane trees, lindens, and sweet gums.
8. Improve the margins of woodlands by appropriate planting of such native shrubs and small trees as thorns, dogwoods, viburnums, red-buds, shadbush, and witch hazel. The fruits of many of these are very attractive in the Fall, and serve as food for numerous song birds.
9. Modify or reconstruct the shrubberies; many require replanting, after first thoroughly preparing the ground.
10. The construction of a system of water distribution for the irrigation of lawns and newly planted grounds.

The commission comments adversely on the crowded condition of the trees and shrubs in the park, adding: "So general is the damage to the trees from overcrowding that a perfect specimen can rarely be found." The result of the report will be that the Park Commissioner will ask the Board of Estimate to issue $50,000 of bonds to begin the work of renovating the Park and for a further sum of $50,000 for cleaning the lakes.

Cryptomerias in Japan.

The groves of cryptomerias around Nikko are marvelous. I note that this plant is hardy in New York State. What a grand thing for ornamental forest planting it would be. Curious that in the boughs of these giants, 200 or more feet high, grow thousands upon thousands of the fern (Davallia bullata) which is used in fern balls. Deep shade and ample atmospheric moisture no doubt keep them alive.

BUSINESS OPPORTUNITIES

SALARY of $1,200 with $3,000 cash investment, open to a gentleman of good address and education. National Florists' Board of Trade, New York.

FOR SALE—Sago palm leaf manufactory and flower business. Best and cheapest methods. German. Together or singly. Immediately. Cheap. Address B. H., care Florists' Exchange.

FOR SALE—6,000 sq. ft. of glass, two new houses, well stocked with carnations, roses, bedding plants, etc. Fifty miles from Cincinnati. Fine retail trade. Will sell at a bargain. Particulars later. Address B. L., care Florists' Exchange.

FOR LEASE, rent or sale, exceedingly cheap. All or part of four steam heated greenhouses, together with stable and dwelling if desired; also large lot suitable for nurseries; in city limits near World's Fair site. Hermann, R. E. Co., 1127 Chestnut St., St. Louis, Mo.

FOR SALE—12,000 feet of glass, almost new and well stocked. Four acres of land, with dwelling house and stables in excellent condition. Near city of 60,000 inhabitants in central New York. Good market; no other greenhouses near. Rare opportunity for a first-class grower to own a beautiful home. Ill health reason for selling. If wishing to buy, address at once, B. G., care Florists' Exchange.

A GROWER, desirably located, having conducted a most profitable business for some time, is now obliged to refuse good orders on account of lack of capital. Parties desiring to become jointly interested in a well-paying business that will yield excellent returns on an investment are requested to correspond with the National Florists' Board of Trade, New York.

FOR SALE—Old established florist business, 4⅛ acres of ground, 10 greenhouses, cold frames, 7-room house, barn, etc. Large cemetery opposite. Thirty minutes from New York City. Trolley cars pass place; 36 years in present location. Entire property and business. Large field for wholesale and retail trade. Call and inspect, or address Mrs. C. M. Hutchinson, Elizabeth, N. J.

FOR SALE—Rose establishment of the latest pattern, situated in a city of 100,000 inhabitants, one-half hour's ride from New York City by three railroads. Wholesale and retail trade in an abundance; 12,000 sq. ft. of glass; iron framed rose houses; steam heated automatically; fully equipped with the latest appliances. Boiler rooms, fire-proof, with extra boiler for steam pump; automatic steel boilers of the latest pattern. Sheds, 150 ft. in length. Two acres of land near two fine trolleys and ten minutes' walk from the center of the city. Water supply by city water, well in boiler room, tank in greenhouse or stream outside. Coal easy to get and plenty of it. Apply to A. Q., care Florists' Exchange.

Canadian News

C. H. A. Executive Meeting.

Some of the more progressive spirits of the C. H. A. Executive Committee have been agitating for a business meeting in Toronto during January, and had a requisition signed by more than the required number for such a meeting. On second thoughts, however, and much consideration, it was found that owing to the members of the committee being so widely distributed over the country, the expense would be too great, as another meeting would certainly have to be held early in the Spring. The Toronto Gardeners' & Florists' Association and Horticultural Society will hold their annual carnation show early in March, and most probably a meeting will be called at the same time, thus enabling the members to "kill two birds with one stone." It is hoped that all the members will attend at that time, as there will be much business of great importance to arrange.

A. H. EWING.

Woodstock, Ont.

Montreal.

Club Notes.

The regular meeting Monday night was, as usual, very well attended, and the committee had some excellent material on hand to make the evening interesting. Two papers were read, one of growing lily of the valley for forcing purposes, by Julian Lucke, and the other on exhibition chrysanthemums, by George A. Robinson.

It was decided to hold a carnation exhibition on March 2. All growers of new varieties will be invited to send specimens.

The committee was instructed to proceed at once in the formation of a schedule for the chrysanthemum show to be held next Fall. In this schedule an effort will be made to secure much more variety in chrysanthemums than has been the case in former years.

Arrangements are completed for the annual dinner, which will be held in the club room on Monday evening, January 19.

The club was informed that in order to secure a grant from the Provincial Government the chrysanthemum show schedule must include vegetables.

A resolution of condolence to the family of the late John S. Murray was passed, and ordered sent. The gathering of the craft at the obsequies on Friday last was a notable one. The floral tributes were numerous and very beautiful. They included a very fine wreath from the Florists and Gardeners' Club and some nice pieces from individual members of the trade. B.

Hamilton, Ont.

Weather remains moderate, with very little sunshine however. Business is decidedly slow except in the matter of shipments to outside points, which line continues fairly brisk presumably on account of mild weather. Very few cut flowers are coming in except carnations. Just at present the city is depending to a great extent upon outside growers.

At R. Potter's I saw a good retail stock of plants. He has a central location and his stock is of good quality.

At Dave McLeod's and Walter Holt's I noticed good stocks of carnations and callas, also much small stock for Spring trade.

At Webster Bros. the Spring rush is evidently on. The stocks of geraniums, coleus, roses and various bedding plants are very large and complete and are looking well. The firm is preparing for an unusually large Spring trade. Several shipments of nice bushy Deutzia gracilis were being made; they seemed excellent stock for forcing. The shipper at this establishment says that very few of the packages sent out during the cold weather fail to reach their destination in good order. The Canadian transportation companies are, he says, very intelligent in the handling of perishable stock. This is encouraging as packages for some sections, British Columbia in particular, have to pass through very cold portions of the country.

The early vegetable business is demoralized around here on account of scarcity of fuel.

John Cranston & Son, proprietors of the Wentworth Pottery, find this season opening with a brisk demand for flower pots.

Visitors: Adam Dunn, of Galt. He reports coal as very scarce. E. D. Campbell, of Midland, says there is no scarcity of wood with him, but prices have advanced.

THE CANADIAN MARKET

OTTAWA.—Holiday trade is over and everyone is satisfied. The increased demand for plants at the holidays is a sure guarantee that everything grown in the space devoted to plants is sure to sell. The demand for plants and flowers between Christmas and New Year's was very good, and the cut-flower trade at New Year's could not be supplied. Prices kept up and all stocks were scarce. The flower most in demand during the holidays was the carnation and the increased call for American Beauty roses, even at top prices, was most noticeable. There did not seem to be quite as much of a rush for violets as in former years, the price having something to do with that, and the fact that there was not a large enough supply to warrant the florist in pushing their sale. E.

TORONTO.—Business during the past week has been satisfactory, with considerable funeral work. There was a fairly good trade done for New Year's. Plant sales have fallen off. Roses, carnations and violets are coming in freely and of good quality. American Beauty are rather scarce; Roman hyacinths and Paper White narcissus are very plentiful and cheap.

The weather has been fine and warm, which is a great blessing to a good many of us, as fuel is by no means plentiful, soft coal being about the only thing obtainable in anything like regular supply, and it is expensive and, generally, very wet. T. M.

MONTREAL.—New Year's trade was of a decidedly satisfactory character, and both plants and cut flowers enjoyed a measure of popular favor. No doubt a good deal of the increase was due to the ideal weather conditions prevailing. In plants, there was an increase in the sale of palms, ferns, etc. This demand comes from the French-Canadian portion of our residents, who make the New Year the occasion of the giving of presents instead of Christmas. In flowering plants, it was noticed that the call was for moderate-priced specimens almost exclusively; very few plants that were valued higher than $2.00 were sold. In cut flowers there was not by any means the demand for American Beauty roses that there was at Christmas. Violets are still lacking in activity, but the lowering of the price begins to show extended sales. Carnations were undoubtedly the favorites, and the call for whites was decidedly more pronounced than at Christmas.

The general tone of the retail trade is optimisitc, and if the wholesalers will meet the retail men in prices there should be no cause to complain of poor business for some time to come. B.

Canadian Cut Flower Prices.

TORONTO.—American Beauty, fancy special, $50.00 to $60.00; extra, $30.00 to $35.00; No. 1, $25.00 to $30.00; culls and ordinary, $8.00 to $10.00; Bride and Bridesmaid, extra, $12.00 to $15.00; No. 1, $8.00 to $12.00; No. 2, $3.00 to $6.00. Cusin, $3.00 to $12.00; Liberty, $4.00 to $15.00; Meteor, $4.00 to $12.00; Mrs. Pierpont Morgan, $4.00 to $12.00; Perle des Jardins, $3.00 to $10.00; Sunrise, $3.00 to $10.00; cypripediums, $15.00; carnations, inferior, all colors, $1.50 to $2.00; standard varieties, $2.00 to $5.00; fancy, $6.00 to $8.00; adiantum, 75c. to $1.00; asparagus, $20.00 to $75.00; callas, $8.00 to $10.00; daffodils, $3.00 to $4.00; daisies, 50c. to $1.00; galax leaves, 10c. to 15c.; hyacinths, $2.00 to $3.00; lily of the valley, $1.50 to $4.00; mignonette, $2.00 to $6.00; narcissus, $1.50 to $3.00; smilax, $25.00; tulips, single, $2.00 to $3.00, violets, 75c. to $2.00.

Forcing Tomatoes.

Professor Beal, of the University of Illinois Agricultural Experiment Station, Urbana, Ill., has issued a serviceable bulletin (No. 81) on this subject. He says:

"The rapidly growing cities of Illinois offer an increasing market for forced vegetables. The demand for forced tomatoes in most of our large cities begins as soon as the frost has destroyed the out door crop and lasts until February, when the Florida crop usually appears in the market. To supply the market during this period the grower must have a light, tightly constructed house in which a high temperature can be maintained in the coldest weather. Considerable skill is necessary for the successful management of the crop owing to the peculiar difficulties in growing tomatoes at this season of the year. The tomato is a sun-loving plant and during the short days with periods of cloudiness it is sometimes a problem to obtain a good setting of fruit.

"From the above reasons it will be seen why tomatoes must bring from twenty to fifty cents a pound in order to pay a profit to the grower. If tomatoes can be profitably grown at the lower figure given they can be sold in any city that supports a florist business. Few people can resist the temptation to purchase fruit or vegetables that are in the market out of season. If these prove to be as palatable as the naturally ripened product the demand increases even at what at first would seem to be an exorbitant price.

"Fortunately, the demand for forced tomatoes does not cease upon the appearance of the Southern product in the market. The forced tomato is far superior to the shipped tomato both in appearance and quality, it being necessary for the latter to be picked green and ripened in transit. Therefore the home product sells for a higher price. As the weather becomes warmer the price decreases and the demand increases. The grower is able to meet the decreasing price because less and less artificial heat is needed to ripen the crop. Many times otherwise idle houses can be used for the Spring crop.

"The expense of caring for tomato plants, while small, is light, as they are then in pots and require little room. After transplanting into the benches, the aim should be to get fruit as soon as possible, as the plants are occupying valuable space. If the plants have not been properly checked before transplanting into rich soil they make a splendid growth, sometimes producing little fruit, but usually the crop is simply delayed. Many growers secure no return for ninety or a hundred days after benching their plants, when half that time is all that is necessary. The expense of heating the house for the extra time is quite an item for the grower's consideration.

"Tomatoes may be planted among carnations in the Spring and when the Easter rush is over given the entire space with a thorough dressing of fertilizer. Tomatoes for the Spring crop are grown after lettuce, radishes, and similar crops. As little heat is required, such houses, if of sufficient height to train plants, are well suited to the purpose."

Full directions as to fertilizers, planting, temperature, watering, training, pollination, etc., are provided. Professor Beal states his first tomatoes were sold in March, 1901, at 20c. a pound. The next Winter the price was set at 30c. a pound during January and February, reducing it to 20c. on March 1, with greater demand than the season before. Following is the summary of his experiments:

By checking the plants it is possible to secure fruit in fifty days from benching.

To secure fruit by Thanksgiving day the seed must be sown by July 20 and the plants benched not later than October 1.

Pollen is not discharged during cloudy weather and advantage must be taken of short periods of sunshine to pollinate by hand. Since the product is most valuable it will pay the grower to pollinate by hand regularly between December 1 and March 1. The advantages are a larger number of fruits set and larger, more uniform fruits.

A careful selection of varieties for the Midwinter crop is requisite for the greatest success. Those varieties developed under forcing house conditions like Best of All and Lorillard give the best results.

Eclipse gave the largest yields both for the Winter and Spring crops of 1902. It is not quite so early as Best of All but it produced the smoothest and most solid fruits.

The yield of Yellow Prince was decidedly inferior to that of the Combination grown under similar conditions.

Plants trained to single stems gave a much greater yield per square foot of bench than those trained to three stems, the yield of the former being one and one-fifth pounds against four-fifths of a pound for the latter.

The average yield for the season 1901-1902 including both the Winter and Spring crop, was from two to nearly two and one-half pounds per square foot of bench, or from seven to almost nine pounds per stem.

GOVERNOR LOWNDES

Color, pure White.

Size, 3 to 3½ inches in diameter.

Calyx, spreading at the top, making it practically non-bursting.

Form, the lower or guard petals stand out straight, retaining the full size of bloom. Petals slightly serrated and beautifully arranged, forcing a full rounded center.

Odor is very sweet and particularly pleasing.

Stem, 19 inches to 2½ feet during the season, and always strong enough to carry the large flower erect

Habit, strong and vigorous; thrives well and grows rapidly. Transplants readily and comes into bloom early, and is not a cropper. It will stand closer planting than most varieties.

Productiveness, extremely free flowering. More productive than any other large white. A profitable and high-grade commercial variety.

Price, $2.50 per doz.; $12.00 per 100; $100 per 1000.
50 at 100 rate; 500 at 1000 rate.

The Worcester County (Mass.) Horticultural Society has issued a program for the meetings for discussion during the Winter season, 1903.

American Agriculturist celebrates its sixtieth anniversary by the issuance of a special edition, containing comprehensive accounts of the progress and development of agricultural and horticultural interests in America during the period the publication has been in existence.

When every child in our public schools has been taught, through the "nature-study" course, how to grow plants from seeds and cuttings, how to care for the plants, to harvest the seed, cross-fertilization, and other methods of the greenhouse, the florist should lack nothing in the way of material from which to draw possible satisfactory help, as well as additions to the ranks of the industry.

THIS WEEK'S SUPPLEMENT.

Magnolia Conspicua.

There is no magnolia more admired than M. conspicua, which is commonly known as the Chinese white magnolia, and formerly went almost entirely under the name of The Yulan; in old botanies it will be found under the head of Magnolia Yulan. It is one of the most admired of all the genus, both because of its pure white flowers and its early blooming qualities, for of all the well-known species it is the first to flower, save the little bush, one M. stellata, which precedes it. Just look at the illustration presented with this issue and then you will not be surprised that the magnolia pictured holds such a prominent place in the regard of all tree lovers! Notice the height of the tree—thirty-five feet—how it towers alongside the dwelling, the thousands of flowers on it. And how early in the season it is, there being no leaves on the tree, nor on any other tree shown. What a prize to have on one's ground!

The tree illustrated is on the property of Mrs. B. B. Knight, Providence, R. I. One can well believe it is the admiration and delight of all who see it. That it is quite at home is evident, both from its thrifty appearance and from the fact that it is but a tree forty years planted. Truly we congratulate the owner on possessing such a handsome tree.

We do not know how it may be elsewhere, but in Philadelphia this species rarely perfects seeds. Seed pods form, but fall off when about half matured. For this reason, young trees of it are not in any abundance in nurseries, as propagation is from layers—a slow way of getting up a large stock, but a sure way of increasing them, as the young shoots, layered in June, root nicely by the time Autumn arrives, though it is really better to leave them undisturbed for two seasons, when finely rooted plants result.

The M. Soulangeana, another early flowering kind, supposed to be a hybrid between M. conspicua and the purple one, M. obovata, differing from M. conspicua, seeds freely, and in this way many seedlings are produced; but, as with other hybrids, there are variations in character of these seedlings though most of them keep pretty close to the parent, M. Soulangeana, in color of flower.

We have mentioned in former notes on these early blooming magnolias, that with us the flowers are apt to open too early in the Spring, subjecting themselves to being caught by late frosts. This may not occur in New England, but if it does it would be found, by planting the tree on the east or north side of a house, the flowers open several days later than when on the south or west side, and, in many cases, this saves them.

Florists who have calls for a few shrubs would find, as nurserymen do, that the keeping of a few plants in pots is quite profitable. Not only can they be planted at any season, but being in pots secures all the roots, and is a guarantee of the success of transplanting. JOSEPH MEEHAN.

BOOKS RECEIVED.

GINSENG. **Its cultivation, harvesting, marketing and market value, with a short account of its history and botany.** Revised, greatly enlarged and brought down to date. Illustrated, 144 pages, 5x7 inches. Cloth. Price, postpaid, 50 cents. Orange Judd Company, New York.

The impetus given to the American ginseng industry, through the appearance of the first edition of this book, has been almost phenomenal. Ginseng growing has made such rapid strides and the demand for information has increased so greatly that a second and extended edition has become necessary. The information contained in the present volume, which is nearly three times as large as the first, has been culled from a large mass of material and is, decidedly, the best that has appeared since ginseng culture first attracted attention in America. Every detail bearing upon successful ginseng growing is fully and minutely elaborated; and the author is confident that ginseng culture will grow in proportion to the application of intelligence to it. To any one intending to embark into this industry this book must prove invaluable.

That "Peony Association of the S. A. F."

We had hoped and expected that ere this the President of the Society of American Florists and Ornamental Horticulturists would have taken steps to publicly announce the annulment of the action of the "Peony Committee," recently appointed by him, in so far as that action makes the S. A. F. O. H. a party to an arrangement which has neither been agreed to nor sanctioned by the general Society, and which is a direct violation of the Society's constitution and by-laws. This step on the part of the president is all the more imperative since the so-called "Peony Association of the S. A. F." is soliciting members for itself, and holding out as an inducement to join that association free membership in the Society of American Florists. With no ratification by the National Society of this extraordinary offer, it will readily be seen that great harm will ensue to the S. A. F. O. H., through the promulgation and institution of a premature and unwarranted proceeding of this character. The interests and welfare of the S. A. F. O. H., as well as the preservation of the rights of all of the members, demand that immediate and peremptory measures be taken by the president to safeguard the Society against the damaging results of an unwise and unconstitutional action of one of its committees.

The dignity, self-respect and integrity of the S. A. F. O. H. are assailed, when membership in our national body is thrown in as a "sop" to promote the popularity of a specific plant or family of plants. Not only that, but should the S. A. F. O. H. lend itself to such an ignominious act, it does so at the expense and commercial hurt of those of its members who have not a scintilla of interest in the peony, and whose business would be militated against by the extra effort put forth by the National Society in behalf of that plant.

The province of the S. A. F. O. H. is to further the interests of each and all of its members as far as in its power lies, to do the greatest good to the greatest number. It violates its constitutional prerogative when it unduly aids one branch of the industry it represents at the expense of all other branches of that industry.

If the nomenclature of the peony is in an entangled condition—and it undoubtedly is—the S. A. F. O. H. has a nomenclature committee to straighten it out; or, if such committee be incompetent in the premises, one or more "peony experts" can be called in, and assistance will, no doubt, be freely forthcoming.

The S. A. F. O. H. cannot for its own best welfare allow membership in it to be cheapened to the extent of being given away gratis. For that reason, and others alluded to, its president should exercise his authority by at once discharging the committee whose evident want of judgment has plunged the S. A. F. O. H. into unnecessary and uncalled for complications, declaring the action of that committee in toto null and void, and appointing men to take up the work whose good sense will guide them in operating within the terms of the resolution referring to the peony, as the Society willed that resolution should be carried out by its vote at the Asheville convention.

The Carnation League of America has been formed with Lewis G. Reynolds, of Dayton, O., as the moving spirit.

"The league will be a permanent organization," said Mr. Reynolds, "with plans for enrolling all members. The present plan is that no fee be attached to the league. Funds for the promulgation of the movement and for its establishment have been provided."

The league's name was suggested by the fact that the carnation was Mr. McKinley's favorite flower. Women will be enrolled in the league the same as men, and each member will wear a carnation on the anniversary of Mr. McKinley's death.

Society of American Florists and Ornamental Horticulturists.

President Burton has appointed Messrs. Geo. C. Watson, Philadelphia, and R. F. Tesson, St. Louis, members of the Executive Board, to serve for a term of three years, beginning January 1, 1903.

To Discuss Express Rates.

In compliance with an appeal from local members of the Society and by and with the advice and consent of President Burton, a meeting of flower shippers and others directly affected is called at 9 o'clock a. m. Saturday, January 17, at the American House, Boston, to consider the unwarranted and oppressive advance in express charges upon cut flower shipments and to take such action in the premises, under the auspices of the National Society, as may be necessary for the protection of the cut flower industry. All flower growers and dealers are cordially invited, whether or not members of the S. A. F.

WM. J. STEWART, Secretary.

St. Louis Exposition, 1904.

Under the classification of trees, shrubs, ornamental plants, flowers, etc., there will be installed in the horticulture palace and on the grounds of the Universal Exposition of St. Louis, in 1904, displays, as follows:

TREES, SHRUBS, ORNAMENTAL PLANTS AND FLOWERS.

Ornamental standard trees, seedlings or grafted.

Ornamental shrubs, deciduous or evergreen.

Plants for the park or for the garden.

Herbaceous plants, grown in open ground; dahlias, chrysanthemums, etc.

Masses and baskets of flowers.

Bouquets of natural flowers.

PLANTS OF THE CONSERVATORY,

Specimens of culture used in different countries, for use or for ornament.

Forced culture of vegetables and fruits; specimens of products.

Specimens and varieties, cultivated for ornament; plants from houses of moderate temperature; plants from hot houses.

SEEDS AND PLANTS FOR GARDENS AND NURSERIES.

Collections of seed of vegetables, plants and trees.

Young trees, seedlings or grafted.

Plants and flowers, grown for perfumes or extracts.

GARDEN APPLIANCES AND METHODS.

Tools for gardeners and nurserymen; spades, picks, hoes, lawn mowers, garden rollers. Tools for pruning, grafting, gathering, packing and transporting produce; pruning and grafting knives, ladders. Watering apparatus.

Apparatus and objects for ornamenting gardens; vases, pots, chairs, seats, fountains, labels, etc.

Glass houses and their accessories; heating apparatus, mattings, etc.

Aquariums, ferneries, etc., for use in dwellings.

Landscape architecture; plans, drawings, models, books, pictures, etc.

SPACE AND POWER FREE OF CHARGE.

There will be no charge for space occupied by exhibits, and a limited amount of power for the operation of mechanical devices to illustrate processes of special interest will be furnished to exhibitors without charge.

Ants.

Editor Florists' Exchange:

In answer to A. Dummett's article in regard to red ant in his seed boxes, I would suggest that he put fresh tar roofing paper under his seed boxes. This has served me well under similar circumstances. C. L. CONARD.

The Coal Situation.

Editor Florists' Exchange:

I have noticed in your valuable paper lately that a number of our craft is having trouble in securing a sufficient quantity of coal to keep Jack Frost outside of the glass. We have been having a moderate supply, but no large quantity has been on the market at any time this Winter, and what we have been able to secure has been very high-priced. Hard coal is now selling at $7.00 per ton, while soft coal, run of mine, is selling at $5.50 to $6.00 a ton. I have used hard coal until this Winter, when I have been obliged to burn soft coal. Everyone knows what a smudge it makes, covering the glass with soot. This I tried to remedy, and have been so successful that I have now but very little smoke or soot. This is how I obtained the desired end: Give but little bottom draft and leave the upper door open about an inch, with all the check drafts closed so as to get as strong a draft as possible while the gas is passing off. By leaving the feed door open, as above stated, air is admitted over the fire, and the gas burns instead of passing off in the form of smoke.

I hardly think this could be done in a small boiler with a poor draft. I experimented with a brick-set No. 9 Furman. Care must be exercised in firing not to put too much coal on at a time. After the gas has burned you will have a bed of coke. Apply another covering of coal as soon as the last is coked, and repeat the operation till you have a large body of clear coke, when you can close your boiler doors as you would in burning coke or coal until the fuel is well burned out, or until you require more fire, when the operation can be repeated.

The question kept suggesting itself to me, How can I lower my coal bill and keep it at a point where all my year's earnings would not go to the coal merchant? This is what I have learned after a series of experiments. I now use half soft coal, run of mine, or slack, and half hard coal screenings, mixed in the bin. This I treat in a similar manner as clear soft coal, with very satisfactory results. It lasts almost as long as hard coal, and makes a very hot fire at a great saving in cost. This is how it works in my boiler: I fire with about 1½ inches of the above mixture, possibly 2 inches, not any more at one firing. This I treat as before stated for soft coal, and when all the smoke has passed off I at once fire again and repeat the operation until I have a good bed of fire which will last without further care after the drafts have been set to suit the weather. This, with the temperature outside at from 10 to 20 degrees above zero, will last me from 4 to 6 hours, depending on how strong the wind is blowing.

In order to make a success with this fuel, it is necessary to have the hard and soft coal well mixed. The soft coal cokes and holds the hard coal screenings from lying so close together as not to permit the air to pass through in sufficient amount to allow of combustion. This makes a very hot and durable fire. If you should require a quick fire after you have a bed of coke, take your bar and run it under your fire and lift it up so as to break the coke, open up your drafts, throw on a couple of shovelfuls of coal, and "let her go." You will find you have one of the hottest and quickest fires you ever had.

Hope this may help someone who is short of fuel and short of funds to pay present prices. E. A. BUTLER.

Niagara Falls, N. Y.

BUSINESS DIFFICULTIES.

BEVERLY, MASS.—David H. Guinvan, florist, has filed a petition in bankruptcy. Liabilities, $8,127.28; no assets.

SPRINGFIELD, MASS.—The Murphy Company, florists, are petitioners in bankruptcy, with liabilities of $2,785.93, and assets of $1,000. The firm consists of Dennis J. Murphy and Irving Bolt. The heaviest debts of the firm are all unsecured, and some of the larger creditors are: A. N. Pierson Cromwell, Conn., $695.59; Springfield Fire and Marine Insurance Company, $367; George Saltford, $347, and about 25 smaller creditors. The firm has for assets about $200 in stock and $800 in machinery and tools.

New York.

The Week's News.

The express companies have not yet reduced the exorbitant rate for carrying cut flowers, which went into effect December 10, 1902; and, in the meantime, they are losing a good deal of business in certain sections of New Jersey. A wagon express has been instituted between Madison, N. J., and New York, through the efforts of wide-awake rose growers, and this mode of conveyance is proving a decided success. The wagon takes in its route, Chatham, Summit, Short Hills, etc., picking up the boxes of the various growers. In addition to saving the consignors about 50 per cent. on charges, the flowers can be landed in New York two or three hours earlier in the morning than by the former method.

The coal question is in anything but a satisfactory condition, so far as this city and vicinity is concerned. The price of coal is still high, and the supply uncertain.

The monthly meeting of the New York Florists' Club will occur on Monday evening, January 12, in the club rooms, 128 East 28th street. The newly elected officers will be installed, and other important business will come before the meeting.

The annual dinner, to be held on Saturday evening, the 31st inst., in the Hotel St. Denis, will be a grand affair, and members who wish to attend will confer a favor on the dinner committee by informing Charles B. Weathered, 46 Marion street, New York.

The Brooklyn Horticultural Society met on Monday evening, with President C. W. Ward in the chair, and upwards of twenty-five members present. Albert M. Herr, secretary of the American Carnation Society, was also in attendance. The arrangements for the entertainment of the Carnation Society are being pushed with vigor, and another meeting is to be held on Monday evening, January 19. Through the efforts of Alfred H. Langjahr, some valuable prizes have been offered by several of Brooklyn's business houses, notably a silver cup by M. Straus, jeweler, and a cut-glass water bottle by F. Loeser & Co. Secretary Herr will make application for fare and third railroad rates. To secure this fare necessitates the presence at the meeting of one hundred members from a distance. Those intending to be present should at once notify Mr. Herr, to enable him to complete arrangements with the transportation companies.

For toastmaster at the banquet to be tendered the delegates the names of Lieutenant-Governor Woodruff, Editor St. Clair McKelvey, of the Brooklyn Eagle, and Park Commissioner Young are mentioned.

At the annual banquet of the Erie Railroad officials, held Friday evening, January 9, in the hotel Savoy, Edward Sceery, florist, of Paterson, N. J., had the contract for supplying the elaborate decorations.

Notwithstanding the fact that one of the largest Sunday papers in the city proclaimed that the use of holly and evergreens would not be so much in vogue for the holidays, and that the fire commissioners debarred the department stores from festooning their interiors, the sale of these articles at Vaughan's Seed Store this Christmas has been greatly in excess of that of any previous year.

The shortage in vine seeds is very pronounced, particularly cucumbers. Wrinkled varieties of peas are also scarce, as are also wax beans and some varieties of corn.

Charles Zeller, the veteran Flatbush florist, has been on the sick list for some time. His many friends will be glad to hear that his health is slightly improved.

The annual bowling for individual prizes of the Flatbush Florists' Bowling Club will take place on Thursday evening, January 15.

Eugene Dailledouze attended the smoker of the Philadelphia Florists' Club held in Horticultural Hall, on Tuesday evening. Mr. Dailledouze took along with him some new carnations to be exhibited before the Quaker City experts.

Traendly & Schenck, wholesale florists, 38 West 28th street, are receiving the first shipments of the season of Ulrich Brunner roses.

Julius Lindstrom, author of "The Culture of Adiantum Farleyense," has reduced the price of that booklet from $1.00 to 50c. each.

Mary Edna, daughter of J. H. Griffith, secretary of the A. T. De La Mare Printing and Publishing Company, Limited, was married on January 1 to Charles Henry Zimmer, of Weedsport, N. Y.

The annual smoker of the Morris County Gardeners and Florists' Society will be held in the Button Building, Madison, N. J., on Wednesday evening, next, January 14. The annual dinner of the Tarrytown Horticultural Society will take place at the Florence Hotel, Tarrytown, N. Y., on the same evening.

Visitors in town: Albert M. Herr, Lancaster, Pa.; and Carl Jurgens, Jr., Newport, R. I.

FIRES.

HINGHAM, MASS.—The greenhouse establishment of Miss Abby Bradley was damaged by fire December 26.

SPRINGFIELD, O.—The greenhouse plant of Charles Unglaub was destroyed by fire on January 1; damage, $2,500.

AKRON, O.—A fire, which caused slight damage, occurred in the greenhouses of W. P. McFarland on Monday, December 24, 1902.

DUBUQUE, IA.—The boiler-room and some greenhouse stock belonging to W. A. Harkett Floral Co., were damaged by fire on December 26 last.

Advertiser's Note.

The "ditto" marks after the Brenchleyensis Ceres and La March Gladioli, in our advertisement on page 2 of last issue, should have been omitted.

JOHN LEWIS CHILDS.

Brings Double the Orders of the Other Two Papers Combined.

The sale of novelties this year seems slow; but, so far, your paper has brought double the number of orders received from the other two papers combined.

HENRY EICHHOLZ.

CARNATIONS.

Growing Mrs. Thomas W. Lawson Variety.

Among the many florists to-day who are growing Mrs. Thomas W. Lawson carnation we find quite a difference of opinion as to its merits; and, by investigation, that the treatment of it differs greatly with the grower. I do not wish to be understood to say, in this article, that I know all there is to be known about the growing of this carnation. I merely give my method of handling it, and let me say, that as a money-making carnation on this place there is none to compare with it, as it has nearly every requisite of an ideal carnation. Perhaps the form of the bloom might be improved; and we wish it would never burst; still it is at the top of the list.

Let us begin with the cutting and follow the treatment. When grown in quantity there is no need to cut back, as some suggest, plants here and there which are strong and vigorous from which to take stock, as the variety is a good cutting producer, and there is no cutting quite as good, to my mind, as a well-ripened side shoot from a vigorous flowering stem. I go over the benches and select these from such plants as come up to my standard, and after trimming the jagged end and removing some of the lower foliage, the cuttings are taken to the propagating frame. We seldom trim the upper end of the cuttings, and this I do not consider necessary unless they are so large that too much space will be taken up. But care should be exercised in removing the lower foliage to avoid injuring the cutting. When this foliage is removed always pull it away from the base, never toward it. This will save many a cutting from disease and early death.

The cuttings should root in about four weeks and we consider ninety-five per cent about the usual quantity which will come out of the bench in good healthy condition. Cuttings should be potted off as soon as rooted and given full sunlight, after having been shaded lightly for a few days.

Considering, then, that the cuttings have come from the propagating bench during the latter part of January or the first of February, we should have good stocky little plants to set into the field in April. Great care is necessary with pot stock to prevent a single plant here and there from drying out. Always remember that a wilted carnation of any description is worthless.

We plant into the field as early in April as the weather will permit, which is usually before the fifteenth; almost any kind of a day will do when growing plants from pots. While in the field we give them thorough and systematic cultivation, and this is necessary, especially in dry weather. Cultivation prevents evaporation of moisture from the soil, and by saving this the plant is benefited. A hoeing will do as much, if not more, for a field of carnations than a shower. It will, in fact, benefit any crop as much. A great deal of success in the field depends on the soil, and, in my opinion, this should be well drained above all things. A second requisite is plenty of food; and with these the plants should do well.

Topping in the field is one of the most important points and should be the work of the most careful and most experienced man on the place. There is more in topping a field of carnations than merely pulling out the crowns. I like to have the shoots start to run a little, and then cut them back with a sharp knife, taking out the crown and being careful to cut between the joints. The old method of pulling out the crown I have always considered a source of disease, especially with some varieties, and of these Mrs. Thomas W. Lawson is one. The number of toppings necessary depends on the growth; and each topping will increase the number of shoots. We keep removing the centers of shoots, as I have described, until the middle of July, whenever they are ready to remove. On the last topping depends the date of the bloom, and a topping about July 15 this past year gave us over 11,000 flowers from 4,500 plants, which we consider a good return.

Watering in the field I hear has been done with good results, but with Mrs. Lawson I should prefer to do without it; and let the plant go on sending its rootlets in search of water instead of coaxing them to the surface to be destroyed by the sun and cultivation. Let nature do the watering, and after each rain cultivate thoroughly.

The question of when to bench Mrs. Thomas W. Lawson can only be answered in one way: When the plants are ready. We must consider their condition and to house the variety too early is not much better than too late. By August the plants should be in excellent condition; and by this I mean stocky plants with a dozen or more shoots ready to run up into dollars and cents. If the plants are not stocky and healthy, they should be allowed to remain, and if the few healthy ones do not get to growing, they, with the diseased ones, should not be counted as plants. When the plants are not as I have described, but are healthy, though lacking in thrift and vigor, they should be allowed to remain, and good plants at September 1 will be found to be better than poor plants at August 1.

Having the plants ready, let us consider soil for a moment. My experience has been that Mrs. Lawson needs a fairly heavy soil, and yet one that is porous and friable. It does not like "cold feet;" and to do it well it must have a soil rich enough to feed a rank grower, and one which will not hold an over-abundance of water.

When we begin benching, we have the benches even full of soil, and the spaces marked off. The space given depends on the size of the plants, but 10x12 inches will be the average. Then after being favored with a good rain, we give the roof a light mud-bath for shading and begin to plant, taking care to set the plants no deeper in the houses than they were in the field. We like to do our planting early in the morning before the sun gets strong; and the plants should at least be dug and gotten into a shaded house at this time of day. The man who digs has an important duty, and he must be one who can select the best, for the best is never too good. We use a spading fork and like it very much for this work. In handling Mrs. Lawson carnation, the base of the plant should be handled very carefully, for this variety throws a great many flowering shoots from its base. This should be remembered in planting, for where a plant is set too deep we see none of these.

After planting we keep the plants as well as the atmosphere moist for a few days, and then gradually remove the shading, giving them full sunlight after about ten days. By this time the white rootlets should be making their way through the soil, and the plant has commenced to grow. We keep up syringing for a few weeks on bright days, but discontinue this before the latter part of September, after which we use the hose only when we see signs of spider, or to water dry spots.

Mrs. Lawson likes to form its flowering shoots under glass, but, in fact, so do many other varieties. When a shoot is on its way upward at benching time, we usually get a short stem as a result of the check the plant receives; but when the plants are benched during August, a good crop of flowers should be produced, with plenty of stem.

Calyx-bursting is one of the worst faults of this variety, and I have come to the conclusion that this is due to an over-supply of moisture and is not as much dependent upon temperature as is generally supposed. When a high temperature is maintained the evaporation from the soil is rapid, and, consequently, it does not get "water-logged" as easily; but if this is kept on the dry side there is practically the same condition of soil and few bursted calyces.

Here, too, comes in the bench question; and Mrs. Lawson does much better with us on benches than in solid beds. The beds do not dry out as well and give more bursted flowers, although much more care is taken to avoid over-watering. Lillian Pond is similar to Mrs. Lawson in this respect, and since it has been kept hunting water it has been too busy to get down-hearted and blow its brains out. There is less suicide where the plants are kept at work.

Mrs. Lawson will stand and will pay for heavy feeding, and this can be begun when the shoots commence to set bud, although the plants require less food during the months of November and December than they will later when the days are longer and the cut is on the increase. Sheep manure seems to give the best results, with a little bone, or super-phosphate and wood ashes for appetizers. In using liquid manure, care should be taken not to soak the benches, for this variety does not do well with a wet bench, no matter what the liquid. A light watering with liquid cow manure will be beneficial, and once in ten days we think about right. With feeding, the quality of bloom should hold good right through the season; and, with care and healthy plants at the start, Mrs. Lawson should prove, if not the best paying carnation, a profitable one.

CARNATIONS GROWN BY THE CHICAGO CARNATION COMPANY, JOLIET, ILL.

Carnation Illustrations.

Through the courtesy of The Chicago Carnation Company, of Joliet, Ill., we present herewith some excellent illustrations of the new varieties of carnations being grown and introduced by that firm. The sorts pictured are Her Majesty, white; Marshall Field, white variegated, and Harlowarden, the grand crimson variety, recently exhibited before the New York Florists' Club, scoring 94 points.

Carnations at Cottage Gardens, Queens, N.Y.

A few hours were recently spent with C. W. Ward, among his carnations, at his extensive establishment, Cottage Gardens, Queens, L. I. The many new seedlings raised here every year are always of great interest, and Mr. Ward has reason to be very much gratified at the measure of success he is meeting with in his endeavor to obtain fixed types from seed in each separate color.

As the crimson section was the first one taken up in this respect, naturally the greatest advance has been made with this color; and, as this year's results are showing, the crimsons are firmly fixed, and can be grown from seed with a certainty as to their color. This may seem at variance with the results obtained by many breeders of carnations; but when we take into consideration the careful work that Mr. Ward has been doing along this line, the care with which this pedigree stock has been built up, as it were, and the many years over which the work has extended; when we consider all this effort, and observe the results on the benches of seedlings to-day, we can easily see that the endeavor to fix the crimsons, so that they can be relied upon for breeding purposes, has been crowned with success.

Among the new crimson-colored carnations that are ahead of their ancestors, there are three that are sure to become popular when they are disseminated. These are, President Roosevelt, Octoroon and Creole Beauty. It does not seem long ago since Governor Roosevelt was distributed, and received such unbounded commendation for its superior color. In comparing this variety with any of the three new ones, we can vouch for the statement that the Governor Roosevelt looks black and lusterless alongside of them.

In the pink shades, both light and dark, and in the yellows and scarlets, Mr. Ward is working along similar lines, and he feels confident of success, though he did not commence with these as early as he did with the crimsons. There are, however, many beautiful flowers among them; but, as they are unnamed, and only known by number, any description of them given would be premature. But, if one wants to see a collection of choice fancy carnations, in colors embracing almost every possible shade, he should go to Queens, and spend an hour or two in the seedling house; the sight is worth a long day's journey.

While traversing the many greenhouses, various new varieties are seen on the benches; varieties that have been proved of sufficient merit to be grown in quantity, which are to be disseminated in the near future. The first one noticed is a pink, named Ethel Ward. This variety has proven a very free and continuous bloomer, and comes in quite early. The color is near the shade of Floriana, though it is a trifle darker than that variety. The plants make no superfluous growth, and are averaging high in the number of flowers per plant.

There is a sport from Governor Roosevelt, that appeared three years ago, which is showing remarkable qualities, though it has not been given a name as yet. The variety is a pure white, and has the well rounded form of flower that made its parent so distinguished. The bloom is carried erect on a stem that will easily measure three feet; the plant has a thrifty habit, and blooms profusely.

Gloriana is a light pink-colored flower, and, as seen on the benches, with its delicate shade of color, and its profuseness of bloom, it appears to the observer as one of the most profitable pink carnations in existence. The flower has very broad petals, with a slight tendency to incurve at the edges, and Mr. Ward informed us that it was not proving as good a seller as Alpine Glow.

The latter sort occupies a bench in the same house, and is what may be called of a Daybreak shade of pink, a free and vigorous growing variety, and one that always sells easily. We believe both Gloriana and Alpine Glow are to be sent out this season.

Another charming pink carnation is Mrs. Theodore Roosevelt. The flower is of the Mrs. Thomas W. Lawson shade of color, though it is more brilliant, and, to our idea, is a decided improvement over the latter, so far as color goes. While it is a good average-sized flower, it does not, perhaps, quite equal the Mrs. Lawson in that respect, but it is a non-burster, and is very floriferous.

Red Devil is a bright scarlet variety, with a habit similar to that of General Maceo, one of the freest carnations ever introduced. Governor Bliss is a fine scarlet for the holidays, but is not depended upon after that time.

In the fancy section, Judge Hinsdale has come to the front and always brings top figures in the cut flower market. This is a variegated variety, white penciled with carmine, very large, and is carried on long stems.

The standard varieties of carnations as grown here, are all producing their quota of flowers. Prosperity is doing remarkably well, as is also Mrs. Thomas W. Lawson. The plants of the latter sort that were grown indoors all Summer are a wonderful sight, and there is no doubt but that indoor Summer culture is the ideal treatment for this variety. Golden Beauty, as a yellow, is all that could be desired, both for quality and quantity. Lorna, for white, is doing pretty well; and a bench of Challenger, scarlet, is throwing plenty of bloom, though the stems are short.

A few plants of Mrs. Potter Palmer are giving bursted flowers mostly. Mrs. E. A. Nelson is being tried, but the color of the bloom lacks brightness to a serious extent. J. H. Manley, the scarlet that gave so much promise a year ago, was planted very extensively, but through some cause or other it has developed a white streak in the petals. Whether or not this is a constitutional defect remains to be seen, though Mr. Ward is inclined to that belief.

Bench of Harlowarden.

VIEWS IN ESTABLISHMENT OF CHICAGO CARNATION CO., JOLIET, ILL.

Motor Vehicles for Florists.

The exorbitant express rates on packages of cut flowers now prevailing have driven the florists to seek relief in some method of conveyance for their products to market other than by express. It has been proposed to put in operation between country towns, within reasonable distance, and New York City, motor vehicles of some kind for the purpose in view; and the following information appearing recently in the New York Times may be found serviceable and opportune:

A steam truck is now being sold by a Worcester (Mass.) firm which is said to have shown an operating expense of but one-third that of a corresponding service of horse drawn vehicles. The initial cost of the motor truck is much higher, but the operating expense per ton mile is much lower, which accounts for the difference in the showing. In addition, the service by the motor trucks is practically independent of weather conditions, which in practice will make the advantage on the side of the motors even larger.

The expense of trucking by horses is figured as follows:

Four horses, at $200	$800	
Truck, at $500	500	
Harness, at $50 per horse	200	
Blankets, at $1.50 (two sets)	12	
Stable extras (brushes, harness dressing, etc.)	25	
Cost	$1,537	
Depreciation 10 per cent per annum of vehicles	50	
Depreciation 25 per cent per annum of horses	200	
Depreciation 25 per cent per annum of harnesses	50	
Depreciation 100 per cent per annum of blankets	12	
Depreciation 100 per cent per annum of brushes, etc.	25	
Total depreciation		$337.00
Wages		1,300.00
Feed (365 days)		730.00
Shoeing	$350	
Veterinary services	100	
Maintenance of vehicle	75	
Maintenance of harnesses	20	
Total maintenance		$545.00
Interest on investment, at 5 per cent		61.85
Insurance, at 1½ per cent		21.55
Cost to operate		$2,995.40

Disregarding any loss of efficiency in very hot or cold weather, and assuming that a four-horse team travels fifteen miles a day, half of that distance loaded and half unloaded, there will be traveled seven and one half miles a day, making, with an average load of seven tons, a total of fifty-two and one half ton miles. This, multiplied by the available working days of the year, taken as 275, gives a yearly ton mileage of 14,437. Dividing the yearly cost of operation by this figure gives the cost per ton mile as $0.208, or a fraction over 20 cents.

In the case of the motor truck the cost is figured as follows:

Cost	$7,500
Depreciation, at 15 per cent, per annum	1,125
Interest, at 5 per cent	375
Insurance, at 1½ per cent	112
Wages	1,300
Fuel (275 days)	770
Lubricating oil at 50 cents per day	187
Spirits and waste	50
Maintenance and repairs	300
Cost to operate	$4,219

In the case of the truck, however, 40 miles a day can be accomplished, and taking one half of this as the load mileage, the daily ton mileage, with a load of 10 tons, is 200. For the year of 275 working days the total ton mileage is 55,000, which, divided into the yearly cost of operation, gives a cost per ton mile of $0.0767, or less than 8 cents.

The trucks produced by this company have a capacity of ten tons. The available road space is 16 feet 10 inches long, giving a total load area of 118 square feet.

A growers' stock company operating one or more machines over a given territory wherever good roads are to be found, and carrying their own produce to market, would not only be enabled to make far more prompt, safe and satisfactory deliveries than the express companies, but would find themselves with a handsome profit at the end of each operating year.

Review of the Market

NEW YORK.—The most noticeable feature in the flower market at the present time is the sudden drop in the price of violets. While these flowers are coming in more plentifully, it does not seem as though they were so numerous as to cause a decrease in their value of almost 50 per cent.; and there is no doubt that the principal reason for their cheapening is the fact that the buyers are in a retaliating mood over the holiday prices.

Business in general is fairly good, though at the beginning of the week everything was dragging considerably. The supply of roses is anything but abundant, and this tends to maintain prices at about the same as those prevailing one week ago; and as the supply of American Beauty seems to be shortening up, efforts are making to increase the price a little on the special blooms in some quarters.

Carnations have been selling very slowly all week, and values have gone down on all grades. Good Mrs. Thomas W. Lawson are freely offered at $6.00 per 100, and such as have supported calyxes will not bring more than three or four cents each.

Bulbous stock is beginning to be too plentiful for the demand, and prices have dropped accordingly. Paper White narcissus has reached 50c. per 100; jonquils bring only from 35c. to 50c. per dozen; Roman hyacinths are at $1.00 a 100, and tulips, both white and yellow, hang fire at $2.00 per 100. Lily of the valley, from new pips, is coming in, but it looks pale and will not probably average $2.00 per 100. Lilies are not so plentiful, and clear out all right. Cattleya Trianæ are selling well, but the smaller flowered variety is difficult to dispose of. Cypripediums are very plentiful just now, and among them are many with very short stems; these latter are being disposed of at low figures, as a rule. Lilac, in cut sprays, is coming in occasionally and $1.00 per bunch is the asking price, though it seems to hang fire. The demand for smilax and other green materials is about equal to the supply, and prices remain stationary. A few Ulrich Brunner roses appeared in the market this week.

BOSTON.—New Year's Day occasioned but little increase in business for the wholesalers on their out-of-town orders. But with the retailers in the city a very good day's trade was experienced. Since then business has only been fair. The market is but fairly well supplied compared with its usual condition at this season; but there seems to be plenty of everything to meet the rather light demand, except white roses of the medium grades and good lily of the valley.

American Beauty roses are selling out well now, with $6.00 per dozen the highest price, except for a limited supply of specials, for which $8.00 has been obtained. The medium grades, at $3.00 to $4.00 per dozen, are the best sellers, and clean out easily. There is only a fair stock of good tea roses, and, as a general rule, everything cleans up well. Best grades of Bride and Bridesmaid fetch $16.00 per 100, with a few specials as high as $20.00; No. 1 make $10.00 and $12.50, and seconds, $6.00 and $8.00; smaller grades are held at $3.00, $4.00 and $5.00. Special grade of Liberty reaches $25.00 per 100, and the same grade of Meteor makes $16.00. But such prices are obtained for only a small proportion of the daily receipts, as most of the stock is composed of No. 1 and seconds, fetching $12.50 and $8.00 respectively, and smaller grades, $2.00 to $6.00.

Carnations are now in good supply for the prevailing demand, and move much more slowly. Values have been shaded somewhat. The best grade of ordinary sorts is now freely offered at $2.50 to $3.00 per 100, while fancy stock of such varieties makes $3.50 and $4.00; novelties go to $5.00 per 100. Inferior stock is cleaned out at $1.50 and $2.00 per 100.

Violets, too, have increased in quantity this week, and the price has taken quite a slump, which is due more to the lack of demand than to any great increase in the supply. It has been difficult to move them at 75c. and $1.00 per 100. Trumpets and campernelles are now in very good supply, the former fetching $3.50 and $4.00 per 100 and the latter $1.50 per 100. A few Von Sion have arrived, but not enough to quote prices for. Roman hyacinths and Paper White narcissus are in overstock at $1.50 and $2.00 per 100. Lily of the valley has been in good supply, but this week shortened up for a few days, and it has been difficult to get enough to fill orders. Freesia is beginning to come in, but as yet is scarce and sells well at $3.00 and $4.00 per 100. Lilies are very plentiful, and are going harder this week. Prices have been held up with difficulty, $10.00 to $12.50 per 100 are ruling figures for both callas, and Lilium Harrisii. Stevia continues in good supply, and sells well at 20c. and 25c. per bunch. Mignonette is still scarce and poor. F. J. N.

BUFFALO.—Trade is somewhat slow, but not enough stock is coming in to create a glut. Funeral work and a few receptions take the small supply. Violets seem to be more plentiful, but the demand for them is still very good.

CHICAGO.—The past week the supply has been about equal to the demand. Long-stemmed American Beauty roses have not moved as freely as could have been wished, and are quoted at present writing at from $5.00 to $6.00 for extra fancy stock, while other grades have moved more freely at from $3.00 to $4.00. Bride and Bridesmaid are coming in of better quality and are fairly well cleaned up each day at from $4.00 to $12.00, and $15.00 for some extra fancy stock. Meteor holds at from $4.00 to $10.00 per 100; Perle des Jardins, $4.00 to $8.00; Ivory, $4.00 to $10.00; Golden Gate, same figures; Liberty, $6.00 to $20.00, the latter price for extra fancy.

Carnations are arriving in larger quantities each day, and the tone of the market is not so firm as heretofore, although there is a good demand for fancy stock and the prices realized are considered fairly good. The quotations are from $3.00 to $8.00 for fancy, and from $1.50 to $3.00 for ordinary.

Bulbous stock is in better demand than around the holidays and is quoted at from $2.00 to $3.00 for Roman hyacinths and Paper White narcissus; callas, $1.50 to $2.00 per dozen. Lilium Harrisii, $2.00 to $2.50 per dozen; tulips, $6.00 per 100; violets, 75c. to $2.00 per 100; lily of the valley, $2.50 to $5.00; stevia, $1.50 to $2.00; sweet peas, $1.50; mignonette, $4.00 to $8.00 per 100; adiantum, 75c. to $1.00 per 100; smilax, 15c.; asparagus, 30c. to 75c. per string. R. J.

DENVER.—The trade this year at Christmas was as good if not a little better than in previous years. Plants were most in demand, though flowers were well cleaned up and a shortage was noted on American Beauty and good tea roses. The weather throughout the week was pleasant, and plants had only to be lightly wrapped for delivery. Prices prevailed about the same as in other years, with a slight increase on American Beauty and good teas; the best of the former going at $20.00 per dozen, and from that down to $4.00. The demand, though, was for the $12.00 to $20.00 grade. The quality of cut stock was excellent—about the best ever offered in this market at this season of the year. Bridesmaid and Bride sold at from $2.00 to $5.00 per dozen, and Liberty at from $2.00 to $6.00.

Carnations were in good supply and well cleaned out at $1.50 and $2.00 per dozen; some very fine Mrs. T. W. Lawson being offered. Violets met with good sale, and were in ample supply, selling at $4.00 per hundred. Lily of the valley, Paper White narcissus and Roman hyacinths were a drug.

The trade in potted plants was ahead of that of other years, and everything that was at all good was sold. Poinsettias took the lead, the pans having the preference. Prices ranged from $3.00 to $5.00. Azaleas, also, met with favor, the plants that could be sold at from $3.00 to $5.00 going very fast. Some fine large ones were offered that brought $8.00. Some excellent cyclamen were seen, a few specimen plants at the Park Floral Co.'s store being very well done. Boston ferns were in good demand, the $1.50 plants being a popular size. Holly and greens sold well and were pretty well cleaned up at prices a little in advance of other years. Mistletoe was poor and the sales only fair. S.

Christmas sales left the market rather slim, and with trade good throughout the week and New Year's, conditions remained about the same. Prices tumbled from 20 to 50 per cent. on different things just after Christmas, but why I do not know, as there was no surplus and the demand was good until New Year's trade was over. A few good flowering plants found ready sale, but the bulk of the trade was in cut flowers. American Beauty and violets went extra well on December 31 and New Year's, quite a call being noticed for them, occasioned by the Denver Club ball, which took place on New Year's eve, the decorations for which were by the Daniels & Fisher Co. The best American Beauty brought $12.00 at retail, while violets went at $2.00 per 100, and about as many were handled as at Christmas.

The best tea roses realized $4.00 per dozen and were well cleaned up. About the same can be said of carnations, very few remaining unsold when business was over. They brought $1.00 and $1.50 per dozen.

Trade since New Year's has been rather quiet, with the market gradually getting back to its filled up condition.

CINCINNATI - While New Year's trade was not rushing, still we had a fine business and sold all the good stock that we could get. There were no complaints of stock being salted; it was the opposite - stock cut too tight. But we were obliged to have it. Christmas prices prevailed all along the line. Business with the stores continues good; several large weddings and receptions helping matters wonderfully. E. G. G.

PROVIDENCE, R. I.—Alas, for all those optimistic florists who looked forward to Christmas as a profitable season! Both grower and retailer report too high prices and an exceptionally short cut. Carnations led the van in the matter of excessive figures, these flowers wholesaling at from 3c. to 5c. in the open market for a grade not worth half that price. 'Tis true some growers treated their regular customers with a little consideration, but many simply insisted on pirate prices, which in turn forced the retail figures to a hitherto unheard of notch, causing the general public to discriminate against our business in favor of confections, etc. How much money was lost in this way is not known, but the average florist agrees that the volume of trade was much less than last year. Carnations brought 75c. to $1.50 per dozen. Roses were in fairly good supply, bringing from $2.00 to $3.00 per dozen. Violets were very scarce, and easily sold out the day before Christmas for 50c. to 75c. per bunch of 25. Holly was a disappointment as far as the net profit went. All the downtown grocers and marketmen sold it, and cut into the florists' trade.

Christmas greens brought high prices, but were all handled at a satisfactory profit. Very little was carried over. The weather was bad, and had been so for a week or 10 days. This was harmful to the plant trade, and curtailed receipts. There were no novelties to speak of, most of the plants being azaleas and cherries. There was no extra call for Begonia Gloire de Lorraine.

On account of the high prices, the outlying retailers suffered in securing stock, and were consequently hampered in naming a selling figure. They are quite bitter in their attitude to holiday boosting of prices. C. S. M.

PROVIDENCE, R. I.—Things have been moderately dull since the first of the year. Roses are now quoted at 3c. to 12c. for good stock, with fancy as high as $2.00 per dozen, wholesale. The quality is very fine, especially the color of Bridesmaid. Carnations are firm at $2.00 to $3.00 per 100, and move quickly at retail prices of 50c. to 75c. per dozen, although there is considerable inquiry among purchasers as to the whereabouts of the cheaper carnation you used to have? Violets about supply the demand, at $1.00 per 100 to the trade. Dull, rainy weather characterized the first week in January; nevertheless, all stock is growing well, and producing excellent quality of flowers. C. S. M.

LYNN, MASS.—For some weeks preceding Christmas the outlook for trade was very poor. The coal question in our city has given the people something else to think about besides flowers. With hard coal almost impossible to get and soft coal at ten dollars a ton, the conditions were very much against the usual demand at the holidays; however, the last day or two most everything was sold out, carnations still hold the lead; many more could have been disposed of, the supply was somewhat limited on account of cloudy weather. Prices ranged from 75c. to $1.50 per dozen. Flowering plants were next in order; they seem to gain in favor each year. Azaleas, cyclamen and primroses were the leaders. Foliage plants did not sell nearly as well as former years; they have not sold well all Fall, probably on account of empty coal bins. Violets were scarce, at $2.50 and $3.00 per 100. When the price of violets is over $2.00 per 100 buyers take something else. Other flowers sold about the same as in former years. Churches decorated about the same as last year; they help the florist very little at Christmas, most of the work being very cheap.

Not quite so much store decoration as usual was practiced. Nothing in novelties was noted. Holly was in good condition and sold fairly well. On the whole, the trade was better than was expected, but not up to last year, being about 20 per cent. smaller. J. L. M.

GREENFIELD, MASS.—Last year was our first Christmas here, and so I can only compare this year with last. Trade this year has been a little more than double in the total amount when compared with that of the previous season, with violets, carnations and roses in greatest demand, at slightly better prices. In plants the call was mostly for something in flower. Cyclamen and Roman hyacinths in pans took the lead. Red carnation and roses were almost impossible to secure. E. A. RICHARDS.

DETROIT.—The holiday market was all that could be wished for in the way of demand. Stock was quite up to the standard. The warm weather before Christmas brought flowers in earlier than desired and tended to shorten the supply considerably, but there was enough to go around, with the exception of special roses. Carnations were cleaned up. Violets were short of the supply; the blooms would not open up in the dark days, yet many thousands were sold, and at good prices. The past week stock has been coming in faster, and prices have dropped again to normal. There has been no overdemand. Sweet peas are in, as well as bulbous stock. In roses, American Beauty lead, with special Meteor a close second. Medium good carnations find a ready market at 2c. and 2½c. DILGER.

GRAND RAPIDS. – The continued cloudy, dull weather of the past month had a bad effect on cut flowers; not only did the plants not bloom as freely as one would like, but the growth is becoming soft, and the flowers sometimes go to sleep too soon. What first-class stock there was on the market was cleaned out quick, the poorer grades of which there were lots, sold last. But everything went and at good prices. Red stock was awfully scarce, and the one color above all others in demand. White was the only color left.

Lots of azaleas, Roman hyacinths, Paper White narcissus and lily of the valley in pots and pans were left over.

Poinsettias, although in seemingly good supply, were all ordered three days ahead of Christmas; they are pre-eminently the Christmas flower.

Roses were scarce; red in particular couldn't be had at all. American Beauty brought good prices.

Violets were very scarce, the wholesale price on them being $2.50 to $3.00. Color is what is wanted for Christmas—red as first choice, then bright pink.

We predicted a heavy trade in holly. One firm sold 200 cases of as fine holly as ever came to town. Pines and palm leaves were not much in evidence. Green for wreathing is declining in popularity, and laurel was not on the market at all. Very little mistletoe was used; the quality was poor and prices high.

The stores made little real attempt at artistic display, except to fill their windows neatly with plants.

Wholesale prices were a little lower than those of Chicago, while retail prices were as follows: American Beauty, 25c. to $1.50 each; other roses, $2.00 to $3.00 per dozen, carnations, 75c., $1.00 to $1.25 per dozen, the last for Mrs. Lawson and Prosperity; lilies, $4.00 per dozen; Roman hyacinths, Paper White narcissus and lily of the valley, 75c. per dozen. On the whole, trade was better than last year. Shipping business was continuous and heavy; it would have been even better had not high prices held it down.

The advance in express charges caused a protest from out-of-town buyers. Those along the line of the inter-urban road suddenly found it necessary to have their flowers come over the inter-urban, instead of by express.

Business is still rushing and a good New Year's trade is assured.

Happy New Year to ye! G. F. C.

PITTSBURG.—Business is fairly active with plenty of stock to meet all demands. Trade for New Year's was quite good, better than last year, and prices somewhat lower than at Christmas. Speaking of Christmas trade, from latest reports it was far better than ever before. For good, No. 1 stock the highest prices were obtained. The greens business was overdone; excepting holly, all stock was too abundant. Trees were left on the hands of every dealer; several carloads were unsold. A consignment of fifty crates of log moss, which arrived too late for the holidays, was sold at auction for 2c. the crate. Some bouquet green also went at ridiculously low prices. E. C. R.

LOUISVILLE, KY.—From all reports Christmas trade was much better than last year. Prices realized were satisfactory, and stock, with the exception of violets and American Beauty roses, equal to the demand. Noticeable was the increased call for plants, especially those having bright colored berries or flowers. Retail prices for Christmas were American Beauty, $6.00 to $15.00; Liberty, $2.00 to $4.00; Golden Gate, $2.00 to $4.00; Bride and Bridesmaid, $1.50 to $3.00; carnations, 75c. to $1.50; Roman hyacinths and Paper White narcissus, 50c. to 75c.; poinsettias, $2.00 to $4.00; lily of the valley, 75c. to $1.50 per dozen; violets, $2.00 to $4.00 per 100. Holly, ground pine wreathing and wild smilax sold well and brought good prices.

Something unusual for this city was the shortage of holly. Heretofore, the packers of southern holly have usually made the produce commission houses here the dumping place for whatever stock they had left after the principal orders had been filled, and these commission houses would sell the stock to peddlars at a little above the cost of transportation. No doubt having learned a lesson, these packers did not flood the local market and no peddlars were on the streets, but the florists, with very few exceptions, had not ordered larger quantities, and on the morning of December 24 holly could not be had.

Mrs. C. Rayner, who just before last Easter opened a store on Fourth street, retired from business on Dec. 29; Mrs. C. B. Thompson, for many years on Jefferson street, taking the place.

A. R. B.

CLEVELAND.—The cold Winter weather, without sunshine, is still with us, and as a result flowers of all kinds are bringing holiday prices. The supply is not nearly large enough to go around. The market quotations at this date are: Roses, teas, $5.00 to $12.00; carnations, $3.00 and $6.00; violets, $1.00 and $2.00; narcissus, $3.00; Roman hyacinths, $2.00 and $3.00; lilies, $15.00 and $18.00; smilax, $15.00; adiantum, $1.00 and $1.50 per 100; common ferns, $1.50 per 1,000; galax, $1.00. G. W. S.

INDIANAPOLIS.—Business has eased somewhat since the holidays. Prices, course, are lower in all lines. There is not been much funeral work, and rge decorations are not as numerous last year during December and Janry. Roses are of good quality. Bride d Bridesmaid sell at $6.00 to $10.00 holesale; $1.50 to $2.00 retail. Liberty still high and bring $4.00 to $6.00, retl. The supply of American Beauty is large at present; $3.00 to $12.00 per zen is the common price for them. Vits sell well at $1.50 per 100, wholesale; per bunch of twenty-five, retail. Cartions are plentiful; the best bring $3.00 r 100; 75c. per dozen is the retail price. ite a supply of tulips, narcissus and ffodils is on the market. The latter ll best at 75c. per dozen. Lily of the lley is fine, at 75c. per dozen. I. B.

ST. JOSEPH, MO.—Christmas trade as about 20 to 25 per cent. better than year ago, carnations taking the lead cut flowers, with roses a second. Vits were scarce, and the demand light. ses and carnations were only of fair ality. Holly sold well, about one-third re being used than last Christmas. uch of the holly was of an inferior ade and hard to dispose of. Why will ople spend time and money in gatherg poor holly? Some of it was like so uch brush, and would not sell at any ice. Christmas green was in light deand, very little being used for decorans. Trees were plentiful, but of very or quality, and would not sell at one-rd the price of good, shapely nursery own trees, the latter of which could not had at any price.

A few American Beauty roses brought om $6.00 to $15.00 per dozen.

New Year's trade was about the same one year ago. On account of belated ains much stock did not arrive until in the day, which made it bad for retailer.

Florists are all scrambling for coal, it ing a very scarce article, and prices aring high.

Fred Krumm, after a nine weeks' siege sickness, managed to get out in time look after his Christmas trade.

W. J. Stuppy has returned from Chigo after a week's visit among the owers of that place. E. X.

Chicago.

ristmas Retail Trade.

The retail Christmas sales of cut wers and plants in this city were ger than in any previous year, esially in the residence districts ere some of the best stores are loted.

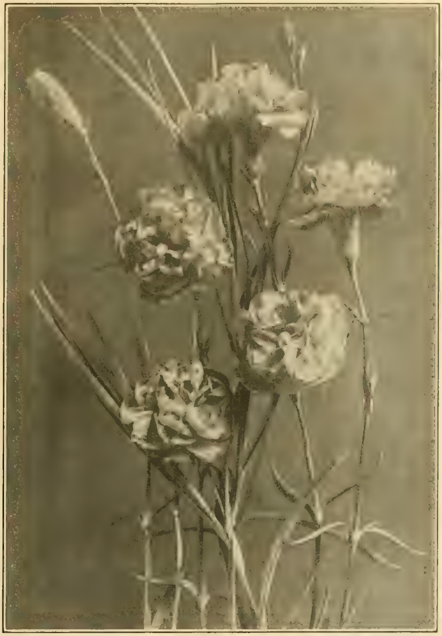
A. Samuelson, W. J. Smythe, P. J. auswirth, O. J. Friedman, Andern, Mangel, Lange, E. Wienhoeber d Wittbold all report an especially sy Christmas, and if it had not been the severe cold weather that preiled business would have been a eat deal heavier. An advance of om 10 to 20 per cent. is the general port. An increased demand for wering plants was experienced. thing in the way of novelties was n in the plant line. Azaleas were fine condition, and some extra nice ants were in evidence. They sold at om $10.00 to $15.00 each. Some wellwered ericas went at from $5.00 to .00 each. More holly plants were en than heretofore, and went fairly ell at from $5.00 to $15.00 each. In e line of berried and fruited plants re ardisias, oranges and Christmas ppers, which were ready sellers at irly remunerative prices. Primulas, lips in pans, crab cactus and Gloire Lorraine begonias were abundant. e consensus of opinion seems to be at the latter plant has not come to y, as it does not give satisfaction a private dwelling house; there do t seem to be any lasting qualities to It is used here mostly for filling skets for dinner table decorations. ere were good sales of made-up rk in the plant line, such as hamrs, baskets, cornucopias and autobiles, with such prices prevailing as uld suit the customer, at from $5.00

n the cut flower line there was an mense business done. The call was iefly for colored flowers. American auty roses were in great demand, th enough on hand to supply the de. They sold at from $5.00 to $25.00 r dozen retail. Liberty were retailed om $3.00 to $10.00 per dozen; Bride d Bridesmaid at the same figures, ile carnations went at from $1.50 to 00 per dozen. Violets were retailed $1.00 per bunch. There was not ch money in these flowers for the tailers as they paid $3.00 per 100 for m.

ws Items.

Trade in general is fairly good. ith colder weather prevailing since Christmas stock has hardened up somewhat. There is an increased cut of carnations, which are not so firm in price. American Beauty roses are arriving in quantity, with the fancy long-stemmed flowers a drug on the market.

The Flower Growers' Company opened their new place on Tuesday, January 6, with nine growers represented. They have not got things in shape yet, but expect to be in proper form by the first of next week. The paper hangers are still at work re-decorating the room. The company will give a reception and ball at their store on January 13 to celebrate the opening. All in the trade and their friends are cordially invited to attend.



HENRY EICHHOLZ'S NEW YELLOW VARIEGATED CARNATION, TIGER.

The trade here was grieved to hear of the fatal shooting of Oscar Kreitling, the West Twelfth street florist, on New Year's afternoon, in his store. The deceased was 38 years old and leaves a widow and two children, a boy and girl, aged respectively 17 and 14. Oscar started in as a boy with Edgar Sanders, for whom he worked for a number of years. He had been located on West Twelfth street for the past 14 years, and was doing a fairly good business. The funeral was held on Sunday, January 4, and was attended by a large concourse of friends and relatives, the trade being fairly well represented.

P. J. Hauswirth has moved from 13 Congress street to 227 Wabash avenue. When it is finished he will have one of the finest retail stores in the city.

C. Dickinson of E. H. Hunt's, has been on the sick list for the past week.

W. W. Barnard & Co. report the loss by fire of their catalogue, which was ready for the press, and in the hands of the Adventist Publishing Company, of Battle Creek, Mich., when that firm's establishment was destroyed by fire on December 30, 1902, resulting in the loss of cuts, plates and copy. At present Barnard & Co. are busy compiling a new catalogue. This means a considerable loss to them in time and money.

Visitor: Mrs. A. H. Bunde, St. Paul, Minn.

ROBERT JOHNSTONE

Philadelphia.

Florists' Club Meeting.

The smoker on Tuesday evening, together with the exhibits of new carnations, brought out a very large attendance, the best seen at the club for some time.

The Club Room Committee was authorized to make arrangements to entertain The American Rose Society during the exhibition here in March. The exhibits of carnations, and the diameter of the flowers staged, were as follows:

From J. D. Thompson Carnation Co., Joliet, Ill.: Nelson Fisher, 3 inches; M. A. Patten, 3 to 3½ inches; Governor Wolcott, 3 inches; Enchantress, 3½ to 4 inches.

From the Chicago Carnation Co., Joliet, Ill.: Marshall Field, 2½ to 3 inches. This is described as a striped Mrs. Bradt; Harlowarden, 2½ to 3 inches; Mrs. Higinbotham, 2½ inches, described as a Daybreak pink.

From S. J. Reuter, Westerly, R. I.: Lillian Pond, 3½ inches.

From Isaac A. Passmore, West Chester, Pa.: Seedling No. 5, a good white, 3 inches.

From Dailledouze Bros., Flatbush, N. Y.: Fragrance, blush pink, 2½ to 3 inches; white Bradt, 3½ inches; No. 111, large white, 4 inches; No. 138, large white, 4½ inches.

From Little South Floral Co., Natick, Mass.: Queen, a good white, 3 inches.

From Robert Craig & Son, Philadelphia: E. A. Nelson, 2½ inches; Adonis, 2½ to 3 inches; President McKinley, light red, and a very promising carnation, 3 inches.

From Wm. Murphy, Cincinnati, O.: Murphy's White, 2½ to 3 inches.

From W. G. Saltford, Poughkeepsie, N. Y.: Fair Harvard, described under artificial light as a violet crimson, 3 inches.

From Henry Eichholz, Waynesboro, Pa.: Tiger, orange scarlet variegated, evidently a good grower, 3 inches.

More elaborate description is not given here, as nearly all of these varieties have been fully described and advertised.

A hearty vote of thanks was tendered those who sent exhibits.

J. D. Thompson being present, was called upon, and made a few remarks. He said, as yet they were young in carnation growing, but he knew full well if eastern growers had the rich fertile soil of the West, the growers in the West would have no chance, as the eastern men had the experience. Enchantress was doing well, and producing rather better than Mrs. Thomas W. Lawson. They grew it in a night temperature of 52 degrees.

Eugene Dailledouze spoke of the keeping qualities of carnations, and in answer to a few questions, said, to keep carnations give them plenty of pure air, and no ice box. A flower grown in good, clear weather should, when cut, keep good 12 to 14 days. His firm cuts the flowers every morning, and ships the next, and has no complaints about the keeping of the stock.

Coal Question.

This matter is quite as serious as last reported. We do not hear of anyone closing up houses around this city, but a low temperature is being maintained wherever possible. Some growers have put on an extra night man, whose duty is to watch the temperature, and immediately he finds a house getting above the limit, to shut off a line or two of pipe. This saves quite a quantity of fuel. The florists who are not located on the Reading Railroad are in the worst shape, and rely on soft coal. The last price heard was $6.25 per ton at the mines. The freight is $1.45; that makes $7.70 on the siding, and, in many cases, a long haul has to be made so that under these conditions, with no advance in prices of plants or flowers, there is absolutely no profit left. In fact, no doubt many are running at a loss. Should a cold spell of very low temperature, lasting seven or eight days come, many growers would suffer losses, as they just obtain sufficient coal to get along with and none to put in reserve.

DAVID RUST.

NASHUA, N. H.—Total Christmas sales in cash showed an increase of 27 per cent. Prices were about 25 per cent. higher than last year. Stock was plentiful enough, and of good quality. There was an increased demand for green goods. Plant sales were about as in former years.

A. GAEDEKE & CO.

LENOX, MASS.—Christmas holiday trade was livelier than in some past years. The call was for roses, carnations, Roman hyacinths and, in pot plants, for adiantum, begonias, etc. Prices were fair.

Red Cedar from Cuttings.

(1) I saw an item in your paper on the propagation of junipers from cuttings. Would you let me know whether or not the common red cedar can be propagated from cuttings and at what time of the year; also what kind of cuttings are best? G. A.

—The common red cedar seeds so freely in these parts and the seeds germinate fairly well that all the plants required are raised in that way. I have never known of its being raised from cuttings, but have no doubt whatever that plants could be so raised. Some of the prostrate forms in nurseries are supposed to be varieties of the red cedar, and they root readily from cuttings.

Answering your question, at what time to make the cuttings, do it now, or any time during January—the sooner the better. Use the top (end) shoot of the past season's growth, making the cuttings about four inches in length. You have read the suggestions how to treat cuttings in the article you refer to? JOSEPH MEEHAN.

Acid-Dipped Glass.

(2) What is the meaning of "acid dipped" window glass? Wherein does it differ from ordinary makes? CONSUMER.

—We have inquired of glass dealers in New York City, but are unable to find out anything about the kind of glass you mention. Can you not supply us with further particulars, where you saw the glass offered, the makers, etc.

Starting Cuttings of Chrysanthemums.

(3) What is the best time to start cuttings of chrysanthemums Timothy Eaton, Col. D. Appleton, Mrs. Henry Robinson and Mrs. Jerome Jones? My object is to have the plants come on as late as possible consistent with good flowers. Also when they should be planted on the benches? C. W. G.

—We would not advise taking the cuttings later than the first week in May, and benching them in July, if fairly good flowers are desired.

Vincas and Marguerite Carnations.

(4) Sow seed of the Marguerite carnations now, and of the Vinca about the first of March.

Trouble With Geraniums.

(5) We send an affected geranium leaf. Last Summer the plants in one of our best geranium beds were similarly affected. They stopped growing, and the whole bed was ruined for the season. Now a few leaves on the plants in the cutting bed are beginning to act in the same way. W. & N.

—The trouble with the leaves of the geranium plants is due apparently to the methods employed in watering. Do not let the plants dry out and then water overhead lightly. That is what causes the leaves to turn brown and fall off. Just give the soil a good watering whenever it gets dry, and keep the foliage dry most of the time, then there will be little trouble with leaves withering.

Spiraeas for Easter.

(6) When is the correct time to bring in spiræas for Easter? W. & N.

—Put the spiræas on the bench the first week in February.

Pentas.

(7) The pentas probably need more heat than they are getting. They are stove plants.

Carnations.

(8) What are the best carnations to grow for the retail trade, for profit? I plant about 1200 in white, pink, red and scarlet. I get from 50c. to $1.00 per dozen.

What is the quickest and best remedy for red spider on carnations on side benches? P. N. G.

—There are so many carnations on the market that we cannot single out what is the best kind in its color for general cultivation. Some sorts do well in one locality and do but indifferently in others, so that any advice we might give would be misleading. We think that by reading the published accounts regarding different varieties, and when buying, not relying on just one variety of a color, but trying several, until the best has demonstrated itself, is the safest way to attain the desired object.

To rid the plants of red spider, there is no better method than syringing regularly and with all the force of water at command.

BRIEFS FOR BUSY FLORISTS.

POINSETTIAS.—Plants that have been cut down, and from which it is expected to take cuttings for next season's supply, should be kept on the dry side for a few weeks. They need not take up any valuable space in the meantime; underneath a bench in a warm house will suit them nicely; and if laid on their sides, they will need no further care until such time as the cuttings have to be taken.

PANSIES.—By sowing seed at this time very nice flowering plants can be had by the first of May; and if a moderately cool house is at command the plants require very little care. They must not be grown too warm, however, or they will prove a failure. The seed should be sown in shallow flats, and as soon as the young plants are large enough to handle, transplant them into shallow boxes and keep them at a night temperature of 50 degrees. Fumigate occasionally to keep down the aphis, which soon become very troublesome if fumigating be neglected, or if the house be kept too warm.

PETUNIAS—If special varieties of double petunias have been carried over from last Summer they need to be potted over now to start them growing. By doing this early in the year a good crop of cuttings will be obtained that will make good-sized plants before the bedding out season arrives.

BOSTON FERNS.—This is an opportune time to plant a few of these on a bench, in a good warm house. Use about five inches of good rich soil in which to plant them, and as the runners form and take root, lift them out and pot them. By this means plenty of young stock can be worked up.

Boston.

The Week's News.

There is a big sick list among the boys; nearly every store has its quota of employees laid up, and at the market many of the growers are missed. Donald Carmichael, Robert Montgomery and Jim Denny are among this week's additions to the list of those confined to their homes.

Fred. L. Harris, the veteran gardener, who passed his 80th birthday on December 30, took a bad turn Saturday last.

The many friends of William J. Martin, of Milton, will learn with regret of the death of his wife, which occurred on Saturday last after a lingering illness. At the funeral Monday at St. Gregory's Church quite a number of his friends were in attendance. The burial was at Natick.

At the regular meeting of the Massachusetts Horticultural Society on Saturday last the long-looker-for by-laws for the government of the society were presented. This new set was brought in by a compromise committee on which both factions were represented, and its most important change from the present set is the placing of the government of the society in the hands of a board of fifteen trustees. The trustees are to appoint the finance, library and publication, and standing committees. The standing committees except that on gardens is to be reduced from five to three members, and the garden committee from seven to five. The secretary and treasurer are to be elected instead of appointed.

Several committee reports were presented. That of the committee on appropriations shows decided decrease in every department, and will do away with many of the small Saturday exhibitions. The appropriations recommended to be set aside for prizes and gratuities are as follows: Plants, $1,500; flowers, $1,875; fruits, $1,275; vegetables, $900; gardens, greenhouses, etc., $375; native plants, $125. Last year's appropriations in the same departments were: $2,500, $2,000, $1,700, $1,200, $500 and $175 respectively. The committee further recommended the following appropriations: For school gardens, $150; for library work, $525; for committee on arrangements to meet extraordinary expenses, $225; for committee on forestry and road improvements, $110; for committee on lectures and publications, $200. It is expected that the new set of by-laws will be adopted without much opposition. Four new members were elected.

A small exhibition was staged in the exhibition hall and included pots of Primula sinensis, P. stellata and P. obconica; and quite a varied vegetable display.

Dennis J. Murphy and John I. Bolt, doing business as the Murphy Company, at Springfield, have filed a petition in bankruptcy, with liabilities stated at $2,785, and assets, $1,050.

John H. Cox was in town a few days last week. F. J. NORTON.

Providence, R. I.

News Jottings.

John Macrae had the palm decoration of the Central Baptist Church last Sunday.

Schellinger, of Riverside, always manages to produce presentable Lizzie McGowan carnations. He ought to grow more of them.

Macnair entertained his store force to a post-Christmas banquet last week. He believes in recognizing the endeavor spirit of his help around the busy times.

A Miss Farrington is busying herself as a sort of impresario at teas, receptions, etc., among some east siders. She has full charge of the floral decorations at such affairs. Her quotations on stock are sometimes used against the regular florists by their steady customers. C. S. M.

Woonsocket, R. I.

Thomas H. Greene, with greenhouses on Summit street, recently suffered a loss of $200 by a leak which sprung in the hot water pipes in the houses ruining most of his palms and ferns.

Buffalo.

News Notes.

No real complaint is heard regarding the recent Christmas trade. Everyone seemed to be in for a respectable share, to pleasing results over past years.

Among decorating orders recently done, Wm. Scott handled something especially fine on the 24th ulto., one of the largest of our new old-style chateau mansions being given into his hands for embellishment for a colonial costume dance.

On the 26th, Palmer & Son decorated for the annual ball given by the Buffalo Club, being the affair of the season locally considered. Under Arthur Beyer's handling of plans and details a pleasing success resulted.

Byrnes & Slattery is the name of a new florist firm at 672 Main street, to open January 7. The former gentleman is local to this city, and the latter has been with Thorley, of New York, for a period of years. VIDI.

Cincinnati.

Carnation Matters.

Now that the holidays are over we hear some talk of the coming Carnation Society meeting in Brooklyn. It looks as if only two will be in attendance from Cincinnati.

There is a movement on foot that bids fair to make the carnation the national flower without the formality of legislation. Lewis G. Reynolds, of Dayton, O., is the prime mover. The object is to form a Carnation League of America to perpetuate the memory of President William McKinley, and the principles he promulgated. Mr. Reynolds, in an interview, announced that the projectors of the league hoped to be able to make a general promulgation of its object on January 29, the anniversary of Mr. McKinley's birth. The league will be a permanent organization. No fees will be asked. Funds for its preliminary establishment have been provided. The location of the headquarters has not yet been decided upon. Women will be enrolled as well as men, and everybody will be asked to wear a carnation on January 29. Absolutely no taint of commercialism attaches to the Carnation League. It will have no political features, but is for the people of this great nation. The movement is indorsed by Senator Hanna, Judge William R. Day, Hon. Myron T. Herrick and Hon. Ryerson Ritchie, all members of the McKinley National Memorial Association.

This league will undoubtedly do what the committee was appointed to try and do at the meeting of the American Carnation Society, held in Indianapolis last February. E. G. GILLETT.

Cleveland.

Club Banquet.

The annual banquet of the Cleveland Florists' Club was held in the club rooms on the evening of January 5. About fifty people participated. This annual affair has gained such large proportions that it is eagerly looked forward to by the members. The one just past proved to be the largest as regards attendance and good time. Everywhere happiness and good fellowship reigned supreme. The club's effort in bringing the craft more closely together is being realized beyond all expectations, and will prove beneficial to all of us.

Adam Graham, Sr., our ex-president, was elected toastmaster. Wit and humor were in full supply, and aided by the tonics and cigars made one of the most enjoyable nights spent in a long time. The balance of the evening was devoted to bowling and other games. President Gordon Gray was detained at home through some unavoidable happening, this being his first absence since joining the club.

All the members should be present at the next meeting, Monday, January 12, as the coal question will come up for discussion.

News Notes.

A. Deouble, who leased the old Livingston place in the east end, is reported very sick and in the absence of a night fireman the establishment was partially frozen, some plants being a total loss. One of his horses died the past week and no doubt ill luck has been with him for some time.

Mr. George, Jr., of the Storrs & Harrison Company, of Painesville, Ohio, has been visiting among the growers the past few days.

Business is still booming in the cut flower trade; funeral flowers are much in demand. G. W. S.

Pittsburg.

Club Notes.

The January meeting of the Florists' Club, held on the evening of the 6th, was not so well attended as usual; the bad weather kept the boys at home. A list of delinquent members was taken up and some names dropped from the roll; others will get 30 days' notice to settle up or be dropped likewise. Quite a number of members are back in their payments, and as the club needs money for some bills on hand, it should be forthcoming. The nomination of officers for the year resulted as follows: President, Wm. Falconer; vice-president, E. C. Reineman; secretary, H. P. Joslin; assistant secretary, E. C. Ludwig; treasurer, F. Burki; executive committee, P. S. Randolph, John Bader and F. Burki. A short talk on ferns was indulged in by the members. The president appointed E. C. Reineman and T. P. Langhans as an auditing committee. Roses will be the topic at the February meeting.

J. B. Murdoch & Brother are cutting fine roses from their new plant in Washington County.

H. H. Negley expects to start on a trip to the Mediterranean ere long. E. C. REINEMAN.

Indianapolis, Ind.

News Notes.

New Year's business was about equal to that of last year, but it is observed New Year's is gradually falling back as a flower day, probably due to the fact that calling has been declared out of date. Violets, lily of the valley and American Beauty roses were the flowers mostly bought. The retail prices were silghtly lower than at Christmas, but the wholesale figures remained the same. Taking the holiday season for 1902 as a whole, Indianapolis florists may say that it was a prosperous one.

The monthly meeting and annual election of officers of the Florists' Association of Indiana takes place at the Commercial Club rooms, Monday afternoon and evening, January 12. Supper will be served to all members in the club dining-room. There are several important matters to be brought before the meeting, and all are urged to be present.

Several brother florists are nursing sore arms, due to vaccination, and it will be hard work to fight thrips, red spider and mildew single handed.

There were from twelve to fourteen thousand violets cut in Indianapolis during the holidays. This number was not sufficient to meet the demand.

I. B.

Flower Market for Indianapolis.

Indianapolis is to have a flower market of pretensions if the plans of the Board of Public Works are carried out. The plans call for the inclosure of the fifty-foot street between Tomlinson Hall and the meat market with a structure of stone, steel and brick and converting this street into a mammoth flower market. The flower stands are now scattered. It is believed that the creation of the special flower market will add to the city a desirable institution.

The plans also provide for the construction of a building of stone, steel and brick over the entire area east of the meat market. The plan of this admits of the addition of 240 stalls in the space that is now open. It is also the purpose to discourage the use of the streets for vendors and the ordinance requiring them to detach horses from their vehicles is believed to be the leverage that will move them all into the new building.

Saddle River, N. J.

J. G. & A. Esler have had several rushes during the past few weeks which not only cleaned them out of flowers entirely, but sent them out among the neighboring florists as buyers. On one occasion the death of a prominent lay reader in the Episcopal Church was the cause of an extra demand; and, last Sunday, the funeral of a leading member of the Order of Red Men gave them a busy day.

While the Bergen County florists on the line of the Erie have not yet been out of coal, still it is not plentiful. The supply is doled out in ton and half ton lots, with a fair chance that this method of supply will continue throughout the Winter. E.

Cromwell, Conn.

J. A. Budlong and son, of Providence, R. I., the well-known gardeners and florists, were in town last week and visitors at the greenhouses of A. N. Pierson.

The grafting beds have been started, and the work of supplying the annual heavy demand for rose stock is well under way. The output will be a little larger this year than last. Manetti is being received in very good condition this year and promises to produce healthy plants. This is being rapidly potted in preparation for grafting.

In consequence of the great popularity achieved by the Mrs. Lawson carnation a year ago and the consequent heavy demand for plants last Summer, many growers feared an over-production this season and a fall in price. This has not been the case. While it is undoubtedly true that many more are being grown this Winter than last, this has so far had no effect on prices. The demand has kept pace with the production. The variety is more popular to-day than ever before.

H.

New Haven, Conn.

Mrs. Laura Cheney has secured a patent for a waterproof holder for flower pots. The holder consists of a strip of waterproof material, which surrounds the pot and is buttoned or strapped together, and a waterproof bottom of the same material. The whole can be taken to pieces for packing, and a great number of covers can be made to occupy a small space. The cover may be decorated or it may be covered, at the fancy of the purchaser, with bright tissue paper, silk or any of the pretty materials that women use for the purpose.

The American Carnation | How To Grow It

A Standard Work Written by Request of the Publishers of the Florists' Exchange.

By C. W. WARD

THE CARNATION in America has reached a status and importance in the florist's industry possessed by no other flower of modern times, and a practical work on the subject of the cultivation of the plant has become an urgent necessity. This want is fully and completely met in the present volume, which furnishes the results of years of actual experience of the author, who is recognized as being among the foremost of carnationists in America. The scope of the book will be gleaned from the subjoined table of contents:

History and Development of the Carnation—The Carnation in America—The Commercial Importance of the Carnation Industry—The American Carnation Society—Use of Carnations as a Decorative Flower—General Greenhouse Culture—Soils—Manure and Fertilizers—Propagation and Shipping of Young Stock—Treatment of Young Stock preparatory to Planting Out—Field Culture—Lifting and Planting Carnations from the Field—Treatment after Benching—Picking, Packing and Shipping Carnation Flowers—Insects and Preventives—Diseases and Injuries—Packing and Shipping Field-grown Plants—Forcing Houses for Carnations—Bench Construction—Sub-irrigation—Heating Carnation Houses—Carnations for Summer blooming—Bedding and Hardy Carnations—Carnations for Pot Culture—Raising Carnations from Seed—Cross breeding and Fertilizing—Varieties—Sports and Variations—The Ideal Carnation—Traits and Peculiarities—Various Classifications of the Carnation—List of Varieties for Different Localities—The Future of the Carnation—Its Commercial aspect and Prices—Who shall engage in Carnation Growing—Does it Pay to do things Well—Calendar of Operations—Carnations in California, Canada, in the West, the East, the South.

It will at once be seen that a work of this nature should be in the hands of every florist and others interested in the subject who desire to keep abreast of the times, and to make the growing of carnations, by the most modern methods, a profitable part of their business.

The Book is profusely illustrated by original engravings from life made specially for this work, with four colored plates. Handsomely printed from large, clear type on fine enameled paper. Quarto, cloth. Price, $3.50.

MAGNOLIA CONSPICUA—Commonly Known as the Chinese White Magnolia.

One of the most admired of all the Genus, both because of its pure white flowers and its early blooming. Has reached a height of 35 feet on the grounds of Mrs. B. B. Knight, Providence, R. I., where, as is evident, it is quite at home.

THE FLORISTS' EXCHANGE

We are a straight shoot and aim to grow into a vigorous plant

A WEEKLY MEDIUM OF INTERCHANGE FOR FLORISTS, NURSERYMEN, SEEDSMEN AND THE TRADE IN GENERAL

Vol. XV. No. 3 NEW YORK, JANUARY 17, 1903 One Dollar Per Year

SPIRÆA FOR EASTER FORCING.

We offer a few cases each of the following sorts as below, as long as unsold. These can be shipped safely by freight, as it will not injure them in the slightest if frozen. There is plenty of time to get them in for Easter, if wanted, and they also make good stock for Decoration Day. Now is the time to lay in a stock before they are all sold.

JAPONICA and COMPACTA MULTIFLORA. Case of 250 clumps for $8.00; in less quantities, $4.00 per 100.

ASTILBOIDES FLORIBUNDA. Case of 250 clumps for $10.00; in less quantities, $5.00 per 100.

JAPANESE FERN BALLS

Best Quality, $25.00 per 100.

The surplus bulb stock recently offered has sold fast, but we can still supply the following, in first-class shape, as long as unsold, at prices named below:

SMALL SIZED NAMED HYACINTHS.

These are splendid for Easter forcing, and are fine for growing in pans or pots. Nothing is more readily salable. Price is very low, and the bulbs are first-class remarkably good for the low price at which they are offered. They will throw almost as good flowers as the larger and higher-priced bulbs. If you have never flowered these, try a thousand or two. You will be pleased with the results. They cannot fail to make money for you.

The following pink varieties at **only $1.50 per 100; $12.00 per 1000** (worth $16.00 per 1000), viz.: Baron van Tuyll, Gen. Pelissier, Gertrude, Gigantea, Robt. Steiger and Solfatara.

The following blue varieties at **only $1.50 per 100; $12.00 per 1000** (worth $16.00 per 1000), viz.: Grand Maitre, King of the Blues, La Peyrouse, Chas. Dickens, Blondin, Czar Peter; also Tamerlan (yellow).

The following white varieties at **only $2.00 per 100; $16.00 per 1000** (worth $22.00 per 1000), viz.: Baroness van Tuyll, Grandeur a Merveille, Blanchard, L'Innocence, Mme. Van der Hoop, and Paix de l'Europe.

FINE NAMED HYACINTHS. Single and Double.

We offer a limited stock of the following varieties in first-sized bulbs, at $3.00 per 100; $25.00 per 1000 (worth $35.00 per 1000), viz.: La Peyrouse, Regulus, Tamerlan, Grand Lilas, La Pluie d'Or, Grandeur a Merveille, Bloksberg, Bouquet Tendre, Czar Nicholas, Crown Prince of Sweden, Flevo, Garrick, Grootvorst, Gen. Antinck, King of Wurtemburg, La Tour d'Auvergne, La Virginite, Lord Anson, Lord Raglan, Othello, Prince of Orange, Prince of Saxe-Weimar and Princess Royal.

HYACINTHS IN SEPARATE COLORS.

We still have a few of these left in singles and doubles, which we offer as long as unsold at **$2.50 per 100; $20.00 per 1000** (worth $26 per 1000).

WHITE ROMAN HYACINTHS.

We still have a few cases of 12-15 centimeter bulbs, which we offer as long as unsold at **$15.00 per 1000** (worth $25.00 per 1000).

TULIPS.

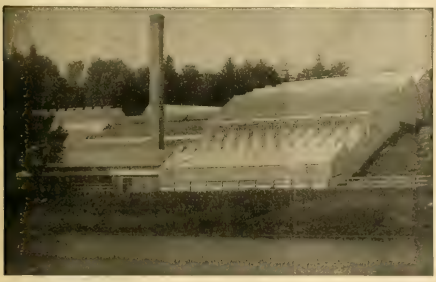
SINGLE and DOUBLE.

Most of the varieties here offered are among the very best forcing varieties, especially for late or Easter forcing, viz.: Rosamundi Huykman, Bizard Verdict, Couleur Ponceau, La Candeur, Yellow Rose, Lady Grandison, Duke of York, Rose Blanche and Count Leicester, at $5.00 per 1000; Cottage Maid, Joost van Vondel, Brutus, Pæony Red, at $6.00 per 1000; Tournesol, red and yellow, Gloria Solis, Le Blason and Rosine, at $7.00 per 1000; Pottebakker, white, Duc van Tholl, scarlet, and Standard Royal Silver, at $7.50 per 1000; Rose Grisdelin, Belle Alliance and Mariage de ma Fille, at $10.00 per 1000; Proserpine, at $12.00 per 1000; White Joost van Vondel and Rose Luisante, at $20.00 per 1000.

NARCISSUS.

Silver Phœnix and Grandis Maximus, at $15.00 per 1000.

F. R. PIERSON CO., Tarrytown-on-Hudson, N. Y.



Asparagus Plumosus Nanus

CUT STRINGS, 50 CTS. EACH.

NEW CROP FLOWER SEEDS

A Discount of 10% for Cash with order from this list on orders amounting to $2.00 or over.

OUR FLOWER SEEDS are of the grade known as "Florist Flower Seeds." That means that they are of last season's growth. They are selected for florists who depend on the results as a business, and our customers will find them trustworthy.

☞PLEASE NOTE.—Trade packets contain considerable more seed than ordinary or retail packets, being based on Florists' needs for ordinary purposes. Florists invariably get Trade packets unless otherwise specified.

SEED TRADE REPORT

American Seed Trade Association

A meeting of the executive committee of this association was held at the Shoreham Hotel, Washington, January 13. It was decided to hold the next annual meeting of the association at Philadelphia and Atlantic City (probably a part of the time at each place) on June 23 to 25. A program was arranged. There were present at the meeting: President Stokes, Secretary Willard, H. W. Wood, W. H. Grenell, Albert McCullough and F. W. Bolgiano.

Walter P. Stokes and Albert McCullough were also in Washington as delegates to the National Board of Trade meeting, held at the same time and place. S. F. W.

Expert in Seed and Plant Introduction and Distribution.

Announcement has just been made of the appointment of Mr. W. W. Tracy to the position of expert in seed and plant introduction and distribution, U. S. Department of Agriculture. Mr. Tracy has for many years been connected with the firm of D. M. Ferry & Co., of Detroit, and his advent to the department service is an important step and will tend to still further strengthen the new management of the Government distribution of seeds. Mr. Tracy is without doubt one of the most efficient men connected with the American seed trade, and his knowledge of the seed business in general will undoubtedly add much to the efficiency of the work of introduction and distribution.

It is the purpose that the Department, through its agents and by means of the seeds distributed, shall disseminate more accurate information regarding varieties of plants and their uses; to show the relation existing between varieties, and where a variety is known under more than one name, or two varieties by the same name, to correct the error; to assist the horticulturist in classifying, and to introduce new varieties after first determining their adaptability to a particular locality. To do this it is the purpose to co-operate, under Mr. Tracy's management, with many of the experiment stations in making tests of little known varieties of flowers and vegetables; to establish trials at several points throughout the country, with a central trial grounds located at Washington.

One of the important features of introduction and distribution to be emphasized is the encouragement of the planting of small gardens. Under the present management, the seeds used for distribution are grown under contract made between the jobber or grower and the Department; the inspection of these growing crops will be done by Mr. Tracy and his assistants. The stock from which the crop is to be grown the next year will also be carefully inspected and watched from time to time and all plants not true to name and type rogued out and destroyed. Accurate and comprehensive variety descriptions are to be written, a printed copy of which shall accompany the seed; and the seed distributed is expected to come up to the standard stated in the description.

In all matters where the advice and judgment of one who is thoroughly in touch with the trade is required, Mr. Tracy will act in the capacity of advisor, but the executive management of the distribution will remain as at present. Mr. Tracy's appointment will take effect February 1. W. R. B.

European Notes.

The new year is upon us, but no new conditions have at present appeared, and our progress toward the completion of deliveries is hindered by rains and muggy conditions which prevail nearly every day.

The frosts, which are sandwiched between the storms, appear to have very little effect upon the cabbages for next season's crop, that managed to survive the severe spell in November. At present they are looking very promising. The same is true of turnips and rutabagas, which have now got a good hold after transplanting. Judged by external appearances only, the conditions of trade are excellent. Orders are coming in very fast (and sometimes furious). Prices rule high for the principal lines and all would go merrily as a marriage bell. But (to be continued in our next).

The star of the sweet pea appears to be in the ascendant in England just now. The recently formed National Sweet Pea Society held its annual meeting on December 29, and the report presented was of a most encouraging character, of which a substantial balance at the bank, a solid increase in membership and reliable promises of support for the work of the coming year were the most salient features.

As the Royal Aquarium is no longer available for the annual exhibition (which has been fixed for July 15 and 16), the show has been transferred to the delightful surroundings of Earl's Court under very generous conditions granted by the managers of that beautiful and popular resort.

The veteran Richard Dean resigns the post of exhibition secretary, and the two offices are now to be filled by the general secretary, H. J. Wright, who will bring younger blood and newer ideas to the carrying on of the work. George Gordon, V. M. H., is elevated to the rank of president, and his place as chairman of committees is filled by S. B. Dicks. All through the trade a largely increased demand for sweet peas is reported, and the publication of the new schedule will add a further stimulus—all of which is very gratifying and profitable to

EUROPEAN SEEDS.

Burpee's Farm Annual.

The present year marks the 27th issue of Burpee's Farm Annual, which is fully up to the high standard of its predecessors. There is an originality about the Annual in the make-up, in the plain, business talks concerning the offerings it presents and other features that invest it with an individuality among catalogues, at once striking, attractive, interesting and fascinating. Mr. Burpee never fails to give the originator's name of any acquired meritorious article he is offering, along with its good points, and at times the purchase price. There is no attempt made to conceal the full addresses of those who testify to the satisfaction given them by Burpee's "Seeds that Grow," proving that the firm has faith in the intrinsic worth of the goods it handles holding its customers against the allurements of competitors. These are some of the points that distinguish the Annual from its numerous neighbors. This year, we note with satisfaction that an article appearing in The Florists' Exchange on September 6, 1902, concerning the trial grounds at Burpee's Fordhook Farms, finds a prominent place in the pages of the Annual.

The catalogue contains 184 pages, and covers, the latter beautifully embossed showing life-like representations, in color, of Burpee's Black Beauty egg plant, Matchless tomato, and Burpee's White Evergreen sugar corn. Incorporated in the book which is profusely illustrated, are colored plates of Four Finest Long-Keeping Onions; new watermelon, Burpee's "Halbert Honey;" Seven Superb Nasturtiums; and Collection of Sweet Peas. The lists of novelties offered in every department are comprehensive, particularly those in sweet peas and florists' flowers.

Thorburn & Co.'s Catalogue.

The present issue is the one hundred and second successive annual catalogue distributed by this firm, and it is, as usual, replete with interesting and substantial information. Most beautiful are the numerous half tone engravings of vegetables and flowers dispersed throughout the catalogue; while the various tables, showing time of flowering, height, color, etc., of the subjects, the seeds of which are offered, are of an especially serviceable character. Very full lists of specialties and novelties, both in flowers and vegetables, are supplied. Profusely illustrated.

Dreer's Garden Calendar.

The calendar this year comes to us in a dainty cover, with a blue background, on which are beautifully embossed lifelike representations of Stokesia cyanea (cornflower aster) and Japanese iris, the name of the firm being in gold. The Dreer establishment at Riverton, N. J., now covers over 100 acres of ground; and there are 87 large modern greenhouses. The calendar is very comprehensive in its character. Extensive and valuable lists of specialties and novelties are included. It is profusely illustrated, and contains charming colored plates showing collections of vegetables, nasturtiums, cactus dahlias, and torch lilies. The lists of aquatic and hardy perennial plants are particularly full and interesting. A most handsome and serviceable catalogue.

Random Notes on Advertising.

The following pertinent paragraphs appear in the December issue of Agricultural Advertising:

> If I were a seedsman I would never use all of my advertising space telling what my seed catalogue contained. I would make special offers on some particular variety of seed, having in view the adaptability of the crop to the section of country covered by the medium used. It would be well enough to conclude the ad with "catalogue free" or "send for catalogue." It is not the catalogue that the seedsman desires to sell. He seeks buyers for the seeds he has for sale.
>
> As a rule, illustrations in small ads do not pay for the space they occupy. An attractive border or a rim of white space looks better than a concentrated etching of a pansy that resembles a blot of ink more than the delicately colored little flower it is designed to portray. Illustrations are important and quite appropriate, however, where space admits of their proper use. Quality of paper is a factor that enters into this study. A fine halftone engraving is virtually thrown away when used on a cheap, flimsy grade of paper. Therefore, when ads are to be illustrated with cuts of this kind, it is highly important that the mediums employed shall be of suitable quality for the best presentation of the object or objects engraved on the plates.
>
> The practice of keying ads is apparently losing popularity. I interpret this fact as very conclusive evidence that many doubting Thomases have been convinced of the effectiveness of advertising.
>
> Nursery stock is now quite largely sold direct to those who do the planting. Formerly a great many of the leading nurserymen employed agents to dispense their wares. In most cases this plan has proved less satisfactory to nurserymen than making direct appeals through agricultural publications to the class of farmers whom it is desired to reach. Judicious advertising has taken the place of the slick-tongued tree-venders and both the nurseryman and his customer get a better and cheaper service. A small ad inserted in the right kind of papers at the right time will produce more profitable results for the nurseryman than agents paid twice the cost for selling half as many dollars' worth of stock.
>
> Advertising of trees, shrubs, and plants grown by nurserymen should begin early in the Winter and continue regularly until the legitimate close of the season. Orders for many kinds of nursery stock are not filled until within a few weeks of planting time in the Spring, so that by beginning his advertising campaign early the nurseryman will be able to "book" a great deal of business that he might otherwise fail to secure.

Dwarf Lilacs.

The greater number of lilacs used for forcing are on their own roots, their floriferous character, while so small, resulting from the dwarfing that growing in pots brings about. These, when planted outdoors after being done with for forcing, make large, strong plants of the usual lilac character. But there is another variety of dwarf lilac, those budded on the privet stock. These are never as vigorous as others on their own roots, the privet not being of the same robust character as the lilac. If budded low, near the ground, so that when re-set it can be placed a little deeper, bringing the junction below ground, roots will emerge from the lilac, and in this way a lilac growth will result in time. The budding of the lilac on the privet is rarely done with the object of dwarfing it, but to increase the stock rapidly. A row of a thousand privets can be budded and not a hundred miss in the lot. The next year young lilacs, perhaps two feet high, are for sale. When worked on privet, the lilac flowers at a younger age, which is an advantage at times. I say at times because to many the lilac on its own roots, in the old way, flowered soon enough. But many want something new and something to flower quickly, and the budded lilac answers the requirements.

The California privet is the one used for stocks. The plants are set out in Spring, cut down almost to the ground and the shoot resulting is the one budded the September following.

White Pine as a Shelter Tree.

That the branches of the white pine are apt to snap in severe storms when trees are old is well known, and this fact sometimes deters one from planting the tree. But this snapping does not occur to any great extent when the trees are young, the branches being more flexible. This should be remembered in connection with its use as a wind-break or shelter-affording tree, for which purpose but few evergreens are its equal. In the most exposed places it stands better than almost any other tree. The reason is to be found in the soft needles it possesses. These suffer but little in gales of cold wind, as they give to the gale, instead of standing rigid and combating the wind as does the Norway spruce, for example. By a little pruning of side branches when young, the white pine can be made a bushy tree.

The Flowering of Rhododendrons.

The nursery salesman who has the confidence of his customer has no trouble in getting him to take some rhododendrons without or with but few flower buds when a selection of a number for a bed is being made. The new customer, without knowledge of the salesman's integrity, might regard the advice as insincere, that it would be to his advantage to select them in that way. But it takes but a year or two to convince every one that has anything to do with these plants, that when every shoot contains a flower bud there will be none the next year. If some shoots are without buds and some with them, those plants are all right, the budless ones will flower next year. But the shoot carrying a bud will rarely carry buds on the shoots it will make after the flower decays. The wise person in selecting plants will reject those heavily budded, unless on the same plant are many shoots showing no bud. It is often a source of regret to a salesman to see a customer selecting plants as full of buds as possible. It is a mistake, if regard be had for flowers the second season.

Even such vigorous growers of the catawbiense type as purpureum elegans and Everestianum, though making strong shoots succeeding the flowers, rarely set a flower bud on the ends of them.

The Beautiful Nordmann Fir.

The unwonted sight of some Nordmann firs being used for Christmas trees in the way of decorative plants in tubs, leads me to say a few words in favor of this lovely evergreen. The fact of its being used denoted progress in the way of spending money at least, for a Nordmann fir costs cash, and the plants seen, being not less than three feet in height, were such as sell at $3.00 to $5.00 each. Having a broad spread and such handsome green foliage, it could not be bettered by any other kind for certain positions, such as a center-piece for a table, where a green tree is wanted, not for the hanging of presents. Such trees as this are for the wealthy; the mass of the people will be satisfied with a balsam fir, Norway or white spruce. The Nordmann fir is really the king of firs in the northern states. It is always of luxuriant appearance, even though it has just passed through a hard Winter; and this can be said of but few other evergreens in the family of firs. In the matter of transplanting, it is not a difficult case. With a little care, seeing to it that the roots do not become dry, transplanting is usually successful. One cause for the reason of this beautiful evergreen being higher-priced than some others is its exceedingly slow growth for the early years of its seedling life. For a year or two the little plants are barely out of the ground. Every year thereafter their advancement is less slow until, when of a three-foot size, six to ten inches a year will be added to their height.

Planting Larch in Spring.

It seems unseasonable to be writing now of Spring planting, but planting in the South will soon be in order; and noticing in your advertising columns attention being called to stock for Spring planting, and larch being listed among the articles named lead me to speak of it. This is not the first mention of it, but it will bear repeating that one of the easiest things to grow when planted in season, and one of the hardiest at any other time, is the larch. And then, it is such an early one to feel the breath of Spring! Therefore, get your plans made early for the planting of the larch. The frost will no more than be out of the ground before its buds burst. When set later, and well pruned in, I have known of some that have grown and many that have died.

Some other early budding trees and shrubs that come to mind as I write are weeping willow, bush honeysuckles, Spiræa sorbifolia, Pyrus japonica, Viburnum plicatum, Ribes floridum, and other species.

If note of these things were made and preparations begun to have early plantings of them a good deal of disappointment would be avoided. Very many of these subjects will not do well at all set late, even with severe pruning.

South Carolina Holly.

Mention has been made in another place of some holly seen along the streets of Philadelphia at Christmas, said to have come from South Carolina. This holly differed in a marked way, and to its advantage, from what is usually seen along our streets. It was of far more vigorous growth, some of the shoots of the past season being nearly a foot in length, in marked contrast to the short-jointed shoots of the other. The advantage of having these thrifty shoots will be recognized by everyone. Then the leaves were longer, not nearly as round as those of the other, of a better green, and many of them, especially of the latest growth, almost devoid of prickles. In the last respect they resemble those of the English holly, or some forms of it, at least, which, on shoots well laden with berries, are almost free from spines or prickles.

The conclusions formed are, that these branches must have come from holly bushes growing in very rich soil. One dealer, when asked the cause of the very different appearance of this holly from that usually seen, said it was the "swamp holly"; but whatever its local name, it is but Ilex opaca. Swamp holly in the North is one of the deciduous hollies, Ilex (Prinos) verticillata. JOSEPH MEEHAN.

Baltimore.

Jottings.

The cold weather, the scarcity of coal, and express rates on the increase, have made your correspondent derelict in his duty.

Trade is about as usual, nothing extraordinary. The florists are glad to keep body and soul together. No one is looking far ahead or making any plans for the future, except to buy coal early in May, before the roses fade.

The club meets regularly, with a rather slim attendance. The boys are hustling to keep Jack Frost out.

On express rates the club passed resolutions as follows:

"Resolved, That it is the sense of the Gardeners' Club of Baltimore and the florists' trade in general, that the increase of express rates on cut flowers by the Adams and United States Express Companies is unwarranted by existing circumstances, a hardship on the trade generally, and the rates should be abated.

Resolved, also, That a committee of three be appointed to take the matter in charge, and forward a copy of these resolutions to the superintendents of said companies; also to Mr. John N. May, of Summit, N. J.

The committee is composed of Messrs. Wm. Fraser, R. Vincent, Jr., and I. H. Moss.

The Florists' Exchange, of this city, at its stockholders' meeting, elected the following officers and directors for one year: I. H. Moss, president; W. Akehurst, vice-president; E. Kress, treasurer; Wm. Fraser, secretary; Fred. Bauer, John Rider and Edwin A. Seidewitz, directors. The business of the year was the best in the history of the organization.

EDWIN A. SEIDEWITZ.

Fancy Carnation

"TIGER"

Orange, striped pink; 2½-3½ inches; calyx strong; fine stem. Six blooms for 50 cents, prepaid. **"A Beautiful Flower,"** says Mr. Horace McFarland. **Don't miss it.** We have grown it for five years. Ready for immediate delivery, 12 for $1.50, $10.00 per 100, $75.00 per 1,000

ENCHANTRESS, for immediate delivery, $3.00 per doz., $12.00 per 100.

MRS. LAWSON, for immediate delivery, $3.00 per 100.

All cuttings are guaranteed healthy and heavily rooted, or money refunded.

HENRY EICHHOLZ, Waynesboro, Pa.

Mention the Florists' Exchange when writing.

GOVERNOR LOWNDES

Color, pure White.

Size, 3 to 3½ inches in diameter.

Calyx, spreading at the top, making it practically non-bursting.

Form, the lower or guard petals stand out straight, retaining the full size of bloom. Petals slightly serrated and beautifully arranged, forcing a full rounded center.

Odor is very sweet and particularly pleasing.

Stem, 19 inches to 2½ feet during the season, and always strong enough to carry the large flower erect

Habit, strong and vigorous; thrives well and grows rapidly. Transplants readily and comes into bloom early, and is not a cropper. It will stand closer planting than most varieties.

Productiveness, extremely free flowering. More productive than any other large white. A profitable and high-grade commercial variety.

Price, $2.50 per doz.; $12.00 per 100; $100 per 1000. 50 at 100 rate; 500 at 1000 rate.

CARNATIONS

Carnations at L. E. Marquisee's.

A visit to the home of The Marquis, and a pleasant chat with the originator, Mr. Marquisee, of Syracuse, N. Y., are always of interest. On mentioning how many men I had met, who, failing to find a new carnation the first season not up to their expectations, had thrown it out and pronounced it worthless, Mr. Marquisee said: "That is radically wrong. I always try my new carnations three years at least before I will pronounce one worthless. Would a farmer pronounce a new variety of corn valueless because it did not come up to his expectations the first year? No; another field, with different soil, would be tried. That is just the way it should be with carnations. Too many people do not give enough attention to the kinds of soil required for different varieties. Then, the temperature is another matter of great importance. For example, Mrs. Thos. W. Lawson variety requires 55 degrees, whereas 45 to 50 degrees is right for The Marquis."

Mr. Marquisee is to be highly commended for not distributing his variety Empire State. This means quite a loss to him financially, for, after growing it for four years, and having orders for 30,000 cuttings without advertising it, means that he will send our only something that is really good.

The long-continued wet weather of last Summer does not seem to have affected his seedlings, of which there are four of special merit. There has not been a sign of stem rot in any of them. His seedlings have an individuality of their own—magnificent foliage and an upright growth, with long, stiff stems, and every shoot carries a flower. Of the four seedlings that I was much impressed with, one is a white, larger than Empire State; a perfect flower, on stiff stems that hold the blooms well up. It has a very pleasant clove fragrance, and is a free bloomer. One great advantage with this variety is that it will do well in either a high or low temperature and commences to flower early in the season, continuing till thrown out. Taken all in all, it is the finest white carnation I have seen. Another is a scarlet, and it certainly

The American Carnation

How To Grow It

A Standard Work Written by Request of the Publishers of the Florists' Exchange.

By C. W. WARD

THE CARNATION in America has reached a status and importance in the florist's industry possessed by no other flower of modern times, and a practical work on the subject of the cultivation of the plant has become an urgent necessity. This want is fully and completely met in the present volume, which furnishes the results of years of actual experience of the author, who is recognized as being among the foremost of carnationists in America. The scope of the book will be gleaned from the subjoined table of contents:

History and Development of the Carnation—The Carnation in America—The Commercial Importance of the Carnation Industry—The American Carnation Society—Use of Carnations as a Decorative Flower—General Greenhouse Culture—Soils—Manure and Fertilizers—Propagation and Shipping of Young Stock—Treatment of Young Stock preparatory to Planting Out—Field Culture—Lifting and Planting Carnations from the Field—Treatment after Benching—Picking, Packing and Shipping Carnation Flowers—Insects and Preventives—Diseases and Injuries—Packing and Shipping Field-grown Plants—Forcing Houses for Carnations—Bench Construction—Sub-irrigation—Heating Carnation Houses—Carnations for Summer blooming—Bedding and Hardy Carnations—Carnations for Pot Culture—Raising Carnations from Seed—Cross breeding and Fertilizing—Varieties—Sports and Variations—The Ideal Carnation—Traits and Peculiarities—Various Classifications of the Carnation—List of Varieties for Different Localities—The Future of the Carnation—Its Commercial aspect and Prices—Who shall engage in Carnation Growing—Does it Pay to do things Well—Calendar of Operations—Carnations in California, Canada, in the West, the East, the South.

It will at once be seen that a work of this nature should be in the hands of every florist and others interested in the subject who desire to keep abreast of the times, and to make the growing of carnations, by the most modern methods, a profitable part of their business.

The Book is profusely illustrated by original engravings from life made specially for this work, with four colored plates. Handsomely printed from large, clear type on fine enameled paper. Quarto, cloth. Price, $3.50.

is a beauty—a very free bloomer, each flower on a long, stiff stem that shows it off to great advantage. A vase of these flowers, picked for an order, was a sight to look upon, being brighter than anything I have yet witnessed in scarlets. This sort is also an early and continuous bloomer. The third is a beautiful shade of pink, quite unlike anything yet sent out. It is beautifully and delicately penciled. The flowers are not extra large—3 to 3½ inches; but it will make a splendid flower for design work, being just the color that can be used in most any design, not clashing with other colors. The last is a yellow, very deep and showy, with the edges of the petals fringed with deep pink. The bloom is quite fragrant, and a fine flower borne on stiff stems.

Mr. Marquisee is propagating all he can for the purpose of disseminating these seedlings in the near future.

Congress having placed coal on the free list will tend to relieve the situation to some extent, although it will be some time before any real benefit is felt.

In the year 1902 the congressional distribution of Farmers' bulletins numbered 4,289,126 copies out of a total of 6,150,000. The total appropriation for the preparation and printing of the bulletins was $107,500.

Express Rates on Cut Flowers.

We are in receipt of the subjoined communication on this subject from the chairman of the S. A. F.'s legislative committee, Mr. John N. May:

Editor Florists' Exchange:

The excessive express rates on cut flowers do not appear to interest the florists generally throughout the country, judging from the few protests received up to last Saturday, January 10. Twelve letters only have been received; although notices were printed in each of the three trade papers one week prior to above date. This would certainly indicate that the florists, as a body, do not object to pay the excessive rates now being charged, and is plain proof that they would rather pay sixty-five to seventy per cent. more daily for expressage on the flowers they may be shipping, than trouble to write half a dozen lines of protest, costing them at most four cents.

A committee has been appointed by the president of the S. A. F. to take up the matter at headquarters here in New York; and the invitation for protests, sent out through the trade press as above stated, was a preliminary work necessary for the said committee to have something definite to work upon. The subject certainly would appear to be of sufficient interest to the florists, one and all, to do something, and that something cannot well be less than to write a couple of letters, one for use in New York by the committee, the other to the superintendent of the express company in the city nearest to where each florist is located.

Furthermore, if any concession is to be gained, every florists' club, as a body, should take up the matter at once, and make a vigorous protest to each company in its respective city.

Thus by united action something may be accomplished; but it is useless to suppose the express companies will take any notice whatever of a dozen protests.

In conclusion, if florists want the rates reduced they should act at once, or the matter will fall flat; and the first thing we know another jump in rates will follow. Get your protest in immediately; make it as short and concise as possible, but let it be an emphatic protest.

JOHN N. MAY.
55 W. 26th St., N. Y. City.

The necessity of complying with the request of Mr. May, and that at the earliest moment, should be patent to all. Assistance can only be rendered by the national society and made effectual when its endeavor for redress is backed by the individual effort of the members of the trade of the whole country, whose interests are involved.

The matter of express rates was discussed by the New York Florists' Club on Monday evening last, when some important information was supplied by ex-President O'Mara, who has been exerting himself in the premises and already has had personal conferences with the express companies relative thereto. We direct the attention of our readers to Mr. O'Mara's remarks given in another column. It will be seen that, with the data in his hands, from the viewpoint of the florists, and the statements made by the express companies, he considers the case of the cut flower shippers not a particularly strong one. Protests on the grounds of mere sentiment, he believes, will not carry much weight. It must be shown to the companies that the exorbitant rates now prevailing will result in a loss of traffic to them, which will be diverted to other channels of conveyance, should no relief be forthcoming. Such a presentation of the case would be the most potent favorable factor in the hands of the committee; and it was a similar condition confronting the companies that influenced them in making the reduction in the express rates on plants when that subject was under consideration.

It is claimed by the express companies that heretofore cut flowers have been carried by them at a loss, which was annually becoming greater on account of the increase in business on same, the augmented risk incurred, and the consequent addition to the number of resulting claims for damage and from other causes. The advance in the rates was made, the companies state, to offset the contingent adverse conditions necessary to be met.

On the other hand, the trade can justly advance poor service, resulting in vexatious and damaging delays, creative of financial loss; careless handling of cut flowers, especially in Winter; unsettled and disputed claims; the smashing of returned empty receptacles, and other evils in dealing with express companies and their employees. And while the increase in the rates comes at a most inopportune time, when the fuel question is having its disastrous effects on the business, that fact is not likely to carry much weight in any demand for relief from excessive expressage charges.

All unpaid claims against express companies, of whatsoever nature, with full particulars, should be placed in the hands of the committee, and other data of a material character that will strengthen the case of the florist. But the most potent agency of all, looking to redress, will be a demonstration of the fact that the services of the express companies as carriers of cut flowers can be dispensed with, at no additional cost or inconvenience to the shippers.

That Peony Association of the S. A. F.

Harking back to the so-called "Peony Association of the S. A. F." it is observed in the Proceedings of the Society for 1902 that "a peony enthusiast, located near the executive officers of the Association, who is not in anyway interested in commercial floriculture, has promised to form a Peony garden on his private estate, and allow his gardener to cultivate and look after the collection for the benefit of the Association. This removes all possibility of bias," etc.

Here in so many words we have the integrity and honesty of the whole of the commercial growers of peonies in the United States impugned. The alleged association must of necessity go outside of the commercial growers with the work it proposes to undertake to "remove all possibility of bias," the deduction being that the stigma of "bias" would attach to the result of tests made by the commercial man! This surely is placing the "ornamental horticulturist" on the pinnacle of probity to the disadvantage of his professional brother with a vengeance. Never was a greater insult openly directed against the American florist and nurseryman, and that it should find its exploitation in the proceedings of our National Society is the most regrettable part of it.

Whatever the objects of those responsible for unwarranted assumptions of the character referred to, the S. A. F. O. H., willingly or unwillingly on the part of those held to account for the appearance of an attack on the good name of the craft in the records of the Society, has been made a party to something far from creditable or beneficial.

A duty lies before the president of the Society to annul the entire work so far of the "peony committee," and he should perform it without further delay.

American Carnation Society.

Railroad Rates.

In connection with the meeting of the society to be held in Brooklyn, N. Y., February 19 and 20 next, the railroads in the Trunk Line Association have granted a rate of fare and one-third for the round trip, contingent on an attendance of not less than 100 delegates who have paid not less than 75 cents on going journey. Tickets (and certificates) may be purchased not earlier than February 16 and not later than February 20, except from places where it is possible to reach the place of meeting by noon of February 20, when tickets may be sold for morning trains of that date. A fee of 25 cents will be collected for each certificate validated.

The New England Association, Central Passenger Association, Southeastern Passenger Association and Western Passenger Association, as well as the Canadian lines, have been asked to co-operate, the latter in reduction from Canada east of and including Toronto.

Obituary

John Peed.

John Peed, senior member of the firm of John Peed & Son, of Roupell Park Nurseries, Norwood Road, London, S. E., died on December 24, aged 72 years. The deceased had been in the gardening business all his life, and his firm did a large American trade.

Charles Winter.

Charles Winter, a florist of Mansfield, Mass., and a frequent exhibitor at the shows of the Massachusetts Horticultural Society, died January 10, after a lingering illness.

Samuel B. Smiley.

Samuel B. Smiley, Lancaster, N. Y., was found dead in the boiler room of his greenhouse establishment, on the morning of January 9, by his wife. Mr. Smiley's death was due to heart disease.

William Strueber.

William Strueber, one of the best known German residents of Oshkosh, Wis., died suddenly at his home, 133 Eveline street, Sunday afternoon, of heart disease. Decedent was 73 years of age and was until recently engaged in the florist's business.

Claudius M. Ravier.

Claudius M. Ravier, of Mobile, Ala., died Friday afternoon, January 9. He was one of the pioneer florists of Alabama. The deceased was born in France and for some years was a student in the botanical gardens of Paris. He occupied positions in the United States in New York, Rochester and New Orleans, commencing as a florist in the latter city in 1869. Six years later he went to Mobile. A widow, three sons and one daughter survive him.

John Dick.

John Dick, Sr., one of the pioneer florists of Philadelphia, died on Tuesday last, January 13, aged 88 years. He was born in Edinburgh, Scotland, and came to this country in 1836. From 1838 to 1841 he was in partnership with James Ritchie at American and Oxford streets. He then started a place of his own at Fifty-third and Woodland avenue, and for many years was noted as a grower of camellias and hardy roses. At one time he opened a seed store at 135 Market street, and later conducted a retail flower store at 1,723 Chestnut street. He acquired considerable real estate, and had practically been out of business for 15 years.

Delegates desiring that hotel accommodations be reserved for them should address the chairman of the Brooklyn Horticultural Society's reception committee, Mr. Charles G. Weeber, 25 Willow place, Brooklyn, N. Y., as early as possible.

It would greatly facilitate the work of the reception committee in handling the delegates if, as far as possible, they would endeavor to come in parties; and if each also would advise Mr. Weeber of the train and the depot in New York City at which he will arrive, so that all can be met and escorted to their respective hotels.

Fred. L. Harris.

Fred L. Harris, of Wellesley, Mass., passed away on Sunday, January 11.

Mr. Harris leaves behind him one of the greatest horticultural monuments in the country, in the beautiful world-famed Hunnewell estate, where the deceased was gardener for over forty years, from which position he retired about two and a half years ago.

Mr. Harris was born in Upway, England, on December 30, 1822. After a long apprenticeship, and having acquired a thorough knowledge of his chosen profession, derived at some of the finest estates and gardens in his native country, he came to America, settling first at St. John, New Brunswick, in 1850. He went to the late Mr. H. H. Hunnewell in 1853, when began the transformation which converted acres of woods into the finest and best laid-out garden in the country. Mr. Harris, then a young man, took hold of this immense undertaking, and through his experience, taste, tact and love of the beautiful in nature succeeded to a degree beyond the expectations of the most vivid imagination. It would be vain to try at this time to tell of his capabilities. They are known to all.

From that time the Hunnewell estate became the school and Mr. Harris the teacher for scores of younger gardeners, who have later made their mark in the horticultural world; and all without exception agree that to Mr. Harris is due much of the credit, so that witnesses to his handiwork exist in all parts of this section. Mr. Harris was always interested in young men who showed they had the "right stuff" in them, and was of great assistance to them. Under his care the Hunnewell place improved rapidly and all who visited it during the Boston convention will recall with pleasure the happy day spent there. Pleasant, kindly and entertaining, he was always ready and pleased to have visitors.

Deceased married in 1862, and had two children, one of whom, Fred L., Jr., survives him.

After more than forty years in service Mr. Harris retired in the Summer of 1900, and shortly after was attacked with a lingering illness, from which he never fully recovered. As stated, on Sunday morning he died, having survived the late Mr. Hunnewell, who reached the ripe age of 91, but a few months.

Funeral services were held at his late home, Tuesday, at 2:30 p. m., and were well attended by neighbors and a large turnout of gardeners and florists, who came from far and near to pay their last respects to him they loved so dearly. Very fine music was rendered by a quartette, and an impressive eulogy preached by the clergyman. The remains were taken for burial to the family lot at Natick, where Mr. Harris rests beside his late wife.

The floral tributes were numerous and very fine. The Horticultural Club sent a choice wreath of violets and lily of the valley.

F. J. N.

Reflections on Current Topics.

MR. EDITOR: I've had another rude awakening. This time by my wife. Will you, sir, and the gentle reader bear with me while I narrate the circumstance?

I had just settled down to a comfortable siesta, after an unusually heavy dinner, consequent on receipt of the remittance of one of your pittances for "work well done," for which, thanks, when Mrs. Job, who is a lover of high-class literature (that is why she reads the three florist trade papers), looked up from the pages of the January 10 number of your ancient Western contemporary, and exclaimed, somewhat sharply: "Job, now, like these Philadelphia scribblers, you've opened your mouth and put your foot in it at last."

"What's the matter, my dear?" I drowsily questioned. "My mouth, like Mercutio's wound, is hardly so wide as a door; and I wear a number ten shoe."

"Why, here some fellow, far back in the row, is calling you all sorts of names—a fly, a gnat, a mosquito, a donkey, a monkey, a wart, and a boil," said she.

"Read it, please." And she did, adding, "the man who wrote that is a gentleman and a scholar."

"Well, now," said I, in the language of my erudite friend, Fritz Blumenschneider, "I must have one or more sore spots touched, and rubbed it in, to make so smart dose fellows," that they should thus style me a walking menagerie of pestilential parasites, simian and asinine curiosities, and a circumambulating museum of anatomical afflictions, and so forth. And as Holy Willie soliloquized, so did I.

"What am I, or my generation,
That I should get such exaltation!"

"You take it mighty cool," said Mrs. Job. "Why, I'd be madder than a wet hen."

"What's the use? it's harmless. 'Come, let us reason together,' and you'll find the characterizations not half so bad as they were intended to be."

"Take the mosquito first. Scientists have proven it a useful, a very useful insect; and if it's the female kind that I am likened to, so much the better. She performs a duty to mankind in singing around them and keeping them guessing as to where she will alight next."

"You say the 'Lastman' states I alighted on 'Lonsdale's bald spot.' That must be the 'leviathan of horticulture' who contributes 'Notes and Comments' to the funny column of another paper, and signs 'E. L.' The same 'leviathan,' I take it, who indites state documents on greenhouse management of a platitudinal nature, to be distributed for nothing, thus depriving the trade papers of legitimate business, and raises the deuce when 'national and other organizations' give away for publication the essays written gratis for them. A man named Watson commends E. L. for his generosity; E. L. himself condemns the societies, and rails at the editors for grabbing their 'only asset.'"

"Funny, ain't it?" said she. "It is," said I.

"You say they also call me a gnat. Now, that's a very formidable insect. You've read of some folk who 'strain at a gnat and swallow a camel.' That's like the S. A. F.; it wrestles till it's red in the face with the poor old peony and lets the coal question go to blazes."

"What's the next similarity? Oh, yes, the donkey. Well, now, you remember the long-eared quadruped that Balaam rode. Wise in his own conceit, Balaam lambasted the poor ass, till it actually roared a warning, and the false prophet's life was saved. The Balaams are not all dead yet, and there is still need for an ass. I hope to remain one—of this character—till gathered to my sires.

"Acquaintance with Kipling, did you say, and a member of the monkey tribe? Why, yes; I once aped Kipling in the columns of The Florists' Exchange by writing a poem (?) on 'The Fool.' Some eminent writer had written himself down 'The Fool,' and we all gave him credit for having a wonderful knowledge of himself. Certainly; Rudyard and I are intimate friends; it is well to remind us, in whatsoever manner, of the fact, 'lest we forget.'

"Next? Oh, yes. 'A wart on the trunk, or a boil on the neck of the trade,' they call me. As my 'gibberings, jeremiades,' etc., seem only to disturb the equanimity of two individuals, these twain must consider themselves 'the trade'—one the trunk, the other the neck. Now that reminds me of one of Aesop's fables, about the fly that sat on the axle of the chariot wheel and exclaimed, 'What a dust I do raise!' But even warts, boils, and other excrescences, facial or otherwise, are beneficial. They demonstrate very forcibly a constitutional derangement of some organ of the anatomy upon which they appear. And if my premises regarding the constitution of the trade is correct—then, in the words of Hamlet, was it? 'There's something rotten in the State of — Pennsylvania'?"

"They want to know how you eat, too," said Mrs. Job.

"Well, now, that's pretty personal. But it calls to mind the following story: Georgie said to his sister's admirer one day: 'Mr. Staylong, let me see you drink.' 'Why do you make that request, Georgie?' 'Oh, because my mamma says you drink like a fish.'

"How do I eat? Just like other donkeys. 'Lastman' will have no difficulty in ascertaining how, if he'll take a look in the mirror the next time he's at the

JOB."

Acid Dipped Glass.

Editor Florists' Exchange.

Referring to question No. 2 in your last week's issue, acid dipped window glass is glass dipped in a preparation of different acids to remove the smoke on the glass when it comes out of the flattening oven. All large factories now dip their glass, and only a few small concerns cannot afford to have a tub on account of the expense. Glass not dipped is smoky, whereas dipped glass is clean and has a brilliant surface.

C. S. WEBER & CO.

New York.

Editor Florists' Exchange:

Acid dipped glass is glass dipped in hot acid. This is done to remove the dirt and does not improve the quality of the glass.

DURHAMVILLE GLASS WORKS.

FIRMS WHO ARE BUILDING.

RUSHVILLE, MD.—George F. Moore will erect two new greenhouses the coming Spring.

CHESTER, PA.—Emil Leiker has begun the erection of an additional greenhouse, 25 x 100 feet in size.

WESTFIELD, MASS.—S. E. Barton will build a large greenhouse upon land recently purchased by him.

The board of regents of the University of Idaho have appointed Lowell B. Judson, of Lansing, Mich., to fill the chair of horticulture in the university and horticulturist of the experiment station, made vacant by the resignation of Professor F. A. Huntley. Mr. Judson is a graduate of Harvard A. B. course, and from the Michigan Agricultural College, where he specialized in horticulture for several years.

New York Florists' Club.

Despite the cold weather prevailing on Monday evening last, January 12, a very satisfactory attendance was present at the club meeting. Ex-President Sheridan delivered his valedictory, in which he referred to the very satisfactory condition of the club, both as regards membership and finances. There were now on the roll nearly 250 members, most of whom were in good standing. Mr. Sheridan expressed his appreciation of the assistance rendered him by the officers and the various committees, as well as the encouragement given him by the large attendances of the members at the meetings.

He then introduced President-elect Troy, who, in a neat little speech, promised his best endeavors on behalf of the club. He regretted the financial failure of the past show, and added that the club had a duty to perform to the New York public in giving exhibitions, even if only in a small way to which the public could be admitted free. He hoped to see another outing of the members in the Summer, which would be as enjoyable as the one held last year. He called attention to the forthcoming meeting of The American Carnation Society in Brooklyn, February 19 and 20, and also touched on the matter of the advance on express rates. He then appointed Messrs. Hafner and Elliott to escort Vice-President Traendly to his chair. The vice-president had delivered his speech on the evening of his election and had nothing further to add.

Secretary Young and Treasurer Weathered made their customary annual addresses, promising the best service at their command in behalf of the club. Mr. Weathered stated that the annual dinner would take place at the St. Denis Hotel, Broadway, January 31, at 7.30 o'clock, price of the ticket being $5.00.

Mr. O'Mara, on behalf of the committee on resolutions on the death of Alex. McLennan, presented a set of resolutions bearing testimony to the unswerving honesty, splendid integrity and valued services rendered to the club by the deceased for many years. A copy of the resolutions was ordered sent to the bereaved family of Mr. McLennan.

Two new members were elected and two others proposed.

William Turner, of Oceanic, N. J., remitted the amount won by him for prizes at the late show to the funds of the club, and was tendered a vote of thanks for his generous consideration. The treasurer reported several payments to the guarantee fund, and a desire was expressed, that as money was required to be disbursed for prizes, those contributing to this fund should send in the amount of their donations to Mr. Weathered as early as convenient.

A letter was read from the secretary of the Cincinnati Florists' Society in reference to the advance in express rates, asking the co-operation of the Florists' Club with a view to the restoration of the former rates. Mr. Butterfield moved that a committee of three be appointed to take this matter in hand. F. W. Kelsey, in seconding the motion, stated that it was a subject on which emphatic action on the part of all horticultural societies should be taken. Not only had the rates been increased, but the service was more unsatisfactory than before, and there was no valid reason, in his opinion, why any increase should be made in the rates for cut flowers. The president appointed as a committee on express rates Messrs. O'Mara, May and Sheridan, that committee to work in conjunction with the legislative committee of the S. A. F., which is composed of the same gentlemen. Mr. O'Mara stated it was incumbent upon the shippers of cut flowers to strengthen the hands of the committee as far as in their power lay; he asked that any suggestions toward that end be sent to Mr. May or to Mr. Sheridan, so that the strongest possible presentation be made at first to the express companies. He had visited several of these companies in New York, and as far as he could see, after hearing the information supplied by the express companies, the shippers of cut flowers had not a very strong case; that is, judged by the material in his hands from the latter. He referred to the work of the Society of American Florists in obtaining a reduction on the express rates on plants. That case, he said, had an element of strength which did not appear in the present one, as he saw it. The express companies were at that time confronted with a loss of the trade of all the catalogue men of the United States, which was to be diverted to the mail. The general public, seeing that goods could be forwarded by mail, would also be influenced by the action of the catalogue men, and the express companies were alive to the loss which was likely to ensue through their refusal to comply with the request of the S. A. F. There were probably five millions of catalogues issued, each one of which made a reference to the shipping of plants by express, and to be deprived of that advertising was a serious matter for the companies. It took nine months from the time of the first attendance of the committee before the express companies to secure the reduction on rates on plants. So far as he could see, hardly any of these arguments could be brought before the traffic managers in the present instance. One argument could be brought before them, viz., that florists near the large cities could deliver their own flowers by wagons and take the traffic away from the express companies. If it could be shown that this was feasible, then the matter would be simplified. He advised that delay would be profitable, in that it would enable the committee to gather data from which to make the strongest possible presentation of the case, from the florists' standpoint.

In answer to a question by Mr. Wallace as to the grounds upon which the advance had been made, Mr. O'Mara replied that the express companies claimed that special service was necessary in the conveyance of cut flowers; also special wagons for their delivery, as the flowers, being perishable, could not be held for the ordinary runs of the express wagons. The goods were more expensive to handle, and the risk greater; claims for damages were more frequent than on any other class of merchandise, and, he regretted to say, a good many of these claims, on investigation, had been found to be the result of actual carelessness on the part of the shipper, or on the part of the receiver. The packages were bulky and less weighty than those used for other merchandise, consequently smaller receipts accrued from their conveyance. These were the most salient points, so far as he remembered, brought forward by the express companies.

Secretary Young read his annual report, in which he stated that the average attendance at the club during the year had been 35 members. He also gave in detail the certificates and other awards made at the meetings.

The president appointed the following committees:

Awards—George Cook, Henry Siebrecht, William Duckham, Charles Lenker, and J. V. Phillips.

House and Entertainment—W. F. Sheridan, F. H. Traendly, and Robert Kuhne.

Dinner Committee—Chas. B. Weathered, W. F. Sheridan, F. H. Traendly, Lawrence Hafner, and S. S. Butterfield.

Legislative Committee—Patrick O'Mara, John N. May, and A. S. Burns.

The following committee was also appointed to draw up resolutions of sympathy with Mr. O'Mara on the death of his sister: Messrs. Sheridan, Hafner, and Dowsett.

Mr. Stewart referred to the death of F. L. Harris, former gardener on the Hunnewell Estate, Boston, who had passed away on Sunday morning at the age of 80 years. Mr. Harris was an honorary member of the Florists' Club. The following gentlemen were appointed to draw up suitable resolutions: Messrs. Manda, Stewart, and Troy.

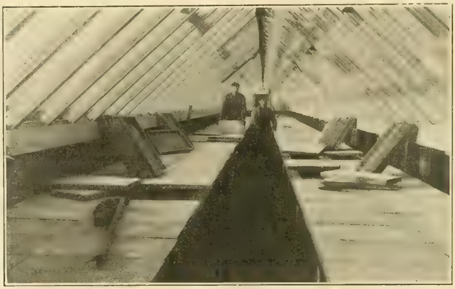
Mr. O'Mara gave notice of a motion that he would present at the next meeting, that the House and Entertainment Committee be instructed not to have refreshments at the monthly meetings unless on special occasions when refreshments would be considered necessary and advisable. The matter was discussed by Messrs. Sheridan, Morris, Scott, and Wallace, and the entertainment committee, having promised to keep the expenditure down to the lowest notch, an appropriation was granted in the meantime to continue the practice, which was considered to have a beneficial effect on the attendance.

An invitation to the officers was received from the Morris County Gardeners and Florists' Society to attend their smoker on January 14.

Mr. Wallace spoke of the forthcoming meeting of The American Carnation Society in Brooklyn next February and referred to the expected large attendance and exhibition. He also stated that matters were progressing favorably relative to the proposed banquet to be given the delegates, and that efforts would be made by the secretary of The American Carnation Society to obtain reduced railroad rates for delegates attending the convention.

An invitation from President Ward, of the Brooklyn Horticultural Society, to the members, setting forth that tickets to the banquet could be obtained at $3.00 each, was ordered filed.

The meeting here adjourned.



USE OF CEMENT SLABS IN CONSTRUCTION OF BENCHES. SLABS 1½ x 12 x 21 INCHES. COST ABOUT 7½ CENTS PER SLAB.

At Establishment of J. Gammage & Son, London, Ont.

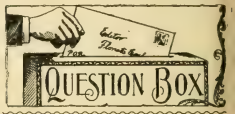
Cement in Greenhouse Construction.

We have used cement for side walls to tile benches with economical and successful results. The lower wall, before the tile is put on, is four inches in thickness and of any desired depth to suit the grade. It is composed of one part cement to seven of gravel. After the tiles have been placed in position, a top wall, or side, to the bench is made, two inches in thickness and four inches high. This is composed of one part cement and four parts of fine gravel and sand.

Our success with the above led us to try cement for other purposes, and the accompanying photograph illustrates what we are doing. The construction under way is 10 x 100 feet, for propagating. The slabs, which are composed of one part cement to three parts of sand and fine gravel, are 1½ inches thick by 12 inches wide and 21 inches long. They were moulded in the moulds shown in picture.

This being an experiment, we used ordinary wooden bench supports. Of its utility, durability, and advantages over wooden and brick bottom benches for propagating purposes we are now satisfied, and in future operations will use angle or tee-iron supports, thus making an absolutely permanent construction.

The saving in first cost is decidedly in favor of this style of building, being about 60 per cent. of what wooden and brick bottom benches would cost, and the future saving in repairs will be an item in favor of the system. The cost of time and material for the two benches was $25.34, not including the wooden substructure. WM. GAMMAGE.



Cyclamen.

(9) What is the proper temperature for cyclamen from the time the plants are housed in the Fall till they come into flower? ONTARIO.

—We take it for granted that the cyclamen referred to are plants that have been growing all Summer, and expected to flower at Christmas time or later. If such is the case, they should have a night temperature of from 50 to 54 degrees, raising it ten or twelve degrees during the daytime.

Violets.

(10) I mail you samples of violet leaves for inspection and would like to know if the damaged foliage results from improper culture or from disease. The plants are grown without heat other than natural, and being banked in hot-bed manner. The plants prior to December 5 produced exceptionally good blooms and in quantities, but from that date the leaves seemed to turn yellow, without any discernible reason. The variety is the Princess of Wales, which has proven very prolific until this season. We have had but few days when ventilation could not be given.
E. D. E.

—The violet leaves do not show any trace of disease other than what might have been caused by the plants being kept too warm, and making a very soft growth, and then having the heat suddenly taken from them, causing the growth to stop right at once and the leaves to turn yellow. We are of the opinion that the frame has been quite warm from the heat given off by the manure surrounding the frame, and as the manure heat has become exhausted and much colder weather has happened at about the same time, the violets have suffered a drop in temperature that has given them a severe check. Pick off all the decayed leaves; give air on all favorable occasions, and keep water away until the soil becomes dry, and the violets will recuperate.

Dahlias for Cuttings.

(11) Will you kindly tell me in your paper the best temperature in which to grow dahlias to produce cuttings?
X. Y. Z.

—Put the dahlias where they will have a night temperature of 60 degrees, and they will grow freely enough to produce cuttings.

Primula Veris Superba.

(12) What is the best time to sow Primula veris superba, and what is the most successful way to grow it?
J. H. F.

—Sow the seed any time during February or March, so as to get nice little plants by the time the ground is fit to work in Spring. Plant outdoors, in good, rich soil; and at the approach of Winter give a good protective mulch of straw or leaves. The following Spring the plants will flower in profusion. If it is desired to flower them indoors, lift the plants in the Fall, and, after potting or benching them, treat them as is done with pansies, affording a night temperature of 48 or 50 degrees.

The Logan Berry.

(13) What other fruit is the Logan berry the nearest like; and is it a profitable crop to raise by the acre?

R. J.

The Logan berry is the result of a cross between the raspberry and the blackberry, and has a habit of growth nearly like the latter-mentioned fruit. Whether it would be profitable or not to grow by the acre we are unable to say. We very much doubt it. Can any of our subscribers speak on this matter from experience?

BRIEFS FOR BUSY FLORISTS.

This is January 17, and Easter Saturday is just twelve weeks away, and a brief résumé relative to bringing along various Easter flowering plants will no doubt be in order at this time.

HYDRANGEAS.—These were put into a cool house the first week in January and have been syringed overhead once a day since, and the leaf buds are now breaking nicely. A night temperature of 50 degrees will suit them for two weeks yet, then the temperature should be run from five to eight degrees higher and kept there until the flower heads are well along. Have the pots standing where they will drain easily, and keep the plants well supplied with water at all times. Fresh tobacco stems spread around the pots will keep down all aphis.

LILAC.—The plants of these that are to be forced for Easter have all been potted up carefully, and at present are resting in a well-lighted, frost-proof shed, with no artificial heat. They will be put in the house during the week commencing February 23, and will have a night temperature of 60 degrees to start with. After one good watering, a daily syringing will be about all the water needed until growth starts. The syringing is a necessity in order to get the leaf buds to break evenly.

HYACINTHS AND TULIPS will remain in the storage house until the week commencing March 16; then they will be placed in a cool house, with a night temperature of about 48 degrees. A light shading will be afforded them for four or five days, after which they will get full light and sun; and aside from care in watering, they will need no further effort to bring them into flower.

NARCISSUS VON SION.—We treat these the same as the hyacinths and tulips, except that we bring them in one week earlier. They will be put on the benches during the week commencing March 9.

PEONIES we shall bring in the first week in February, and put them in a temperature of 48 or 50 degrees, raising it five degrees in about ten days; giving them a further raise in temperature of five degrees about ten days after that. There should be no checking of the peony after growth once starts; so do not make the mistake of giving them too much heat during the first stages of their growth.

ROSES, MOSS and H. P.—These are at present in a night temperature of 40 degrees, and get an occasional spraying on bright days. Commencing about the 26th of this month, the temperature will be raised gradually until 58 degrees at night is reached, which will be then maintained right along. After the plants are fairly started growing, care must be taken that the night temperature does not vary much, as the foliage is very susceptible to mildew. A free use of tobacco stems is also necessary to keep down the aphis.

CRIMSON RAMBLER ROSES improve so much in beauty, for some time after they commence to flower, that it is advantageous to give them a week or ten days more time than the hybrid perpetual or moss roses; and the latter part of this week is not any too soon to begin raising the temperature for them. As mildew forms so easily on Crimson Rambler, the heating pipes should constantly have a little sulphur painted on them; and cold draughts through the ventilators must be avoided.

BOUGAINVILLEAS. — These can stay in their cool quarters until the middle of February; then they should be put into a house where the temperature at night is about 58 or 60 degrees. Syringing overhead on all bright days should be practised, and as the flowering period approaches liquid manure should be given them occasionally.

LILIES.—The plants should be growing freely now in a temperature ranging from 60 degrees at night to 74 degrees with sun heat. Aphis must be kept down at all cost; and the flower buds should begin to show about March 1; then the plants will be in time without any hard forcing.

METROSIDEROS.—Very little forcing is needed to have these in for Easter. They are in a cool house as yet, and will stay there until about the 1st of February; then they will be given a night temperature of 50 degrees and should come in all right without any further forcing.

ERICAS.—These plants will not stand a wide range of temperature at any time. Keep them at near 50 degrees at night, with a raise of eight or ten degrees during the day; and as the flowers begin to open, shade the glass a little and they will last a long time. Over-watering is one of the main things to be avoided with ericas.

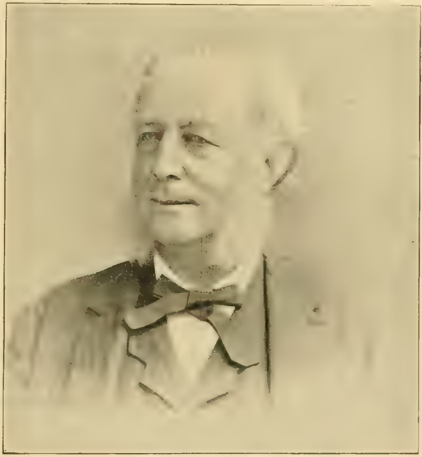
SPIRAEAS are at present under the bench in a house where the temperature runs at 58 degrees at night. They will be put in the benches the last week of this month, and will come in for Easter without any extra forcing. They need lots of room when growing and plenty of water.

GERANIUMS.—A limited number of pans of these can always be disposed of at Easter time, and about the last week in February the pans should be fitted up with plants of even size, which should be kept growing right along, and they will be in full bloom when wanted.

ACACIAS AND GENISTAS.—These will require no extra effort to have them in on time. A temperature ranging from 52 degrees at night to 70 degrees in bright sunshine will suit them right through.

AZALEAS.—Very little heat will be needed to bring these in on time; they are at present in a 45-degree temperature and will stay there until the first week in March; then they will be set over on the benches and afforded all the light possible. No forcing will be needed to flower them on time.

RHODODENDRONS. — These need more heat than azaleas, and by the second week in February should go into a night temperature of 55 degrees, and be syringed overhead on all bright mornings.



THE LATE F. L. HARRIS.
(See Obituary, page 61.)

Snapdragons.

The tall kinds of snapdragon (Antirrhinum majus) can be profitably grown for cut flowers. They are easily raised and propagated, are not particular as to soil or temperature, are but little troubled by disease or insects, and furnish an endless variety of colors. Grown outdoors they get along without any special care, bloom profusely all Summer, and, therefore, make excellent bedding plants in places where higher priced material is not wanted. However, the flowers from plants grown in the garden are not worth much for the florist; they are coarse and without any grace, and their colors are dull, compared with those of the same kinds cultivated under glass. In fact, they differ so much in all respects, that anybody, who has not grown them both ways, will declare them to be entirely different kinds.

Well grown flowers of snapdragons, raised in greenhouses, at all times sell readily, and at the end of the season the returns from a bench of them are greater than those from the same space occupied by carnations or any other cut flower stock. That is saying a great deal, but it is said always with the understanding, that the flowers of this old favorite must be high-grade blooms which they can and will be, if as much care is devoted to their growing as is spent in the raising of other cut flowers.

To have the best success with snapdragons, seeds of the best varieties, in separate colors, must be sown now, January, to begin with. All colors, even mixed bunches, sell, but those most in demand and therefore most profitable, are the pure white, the golden yellow and the deep blood-red. Sow the seeds in shallow boxes, not too thick. They germinate quickly and will in a few weeks be an inch high, when they should be planted singly into two-inch pots, and before they get a shift into three-inch pots pinch off the tops, breaking off about an inch or less. By the middle of April, or earlier, if the season permits, plant in the open ground, about a foot apart. There they are allowed to bloom, which they will do quick enough; and now is the time to get the stock for the greenhouse.

They furnish any amount of cuttings. Take the strongest, two or three inches in length; select the finest colors and keep them together and separate, and insert into sand like other cuttings. They will root as easy as coleus. As soon as they are rooted, pot them up into 2-inch pots, placing them into cold frames, repot as required and pinch off every bud as soon as it appears. By the middle or end of September they should be fine bushy plants in 4-inch pots. Now they are planted, from 14 to 16 inches apart, into the bench in the greenhouse, in good, rich soil. Plant them deep. A solid bed is the ideal place for them. They need lots of head-room, from five to six feet at least. In a very short time heavy, thick, waxy shoots from the roots will appear above ground, and these, at last, are the ones that will bear the flowers we are after—flower spikes from 12 to 16 inches on stems five feet long.

Snapdragons require a lot of water, a night temperature in the Winter of about 50 degrees, some disbudding, if extra good blooms are wanted, and constant watching to keep the stems straight, which, if not kept tied up, will grow crooked in a single night. An average plant will produce from 15 to 24 good flowers and any number of small ones at the base, which latter make good material for design-work and small bouquets.

The common price for the flowers, all through the Winter up to Decoration Day, is one dollar a dozen and double that figure and more at the holidays; and the plants can be had in bloom at almost any time you want them. A bench of well-grown red snapdragon for Christmas, or a bench of white flowers for Easter, in full bloom, is a grand sight and valuable property in the hands of the grower. And as this flower keeps for weeks, before or after it is cut, holding them back a little before a holiday could hardly be considered "pickling."

Keep in mind that the antirrhinum is a bi-annual and strong material for cuttings should be raised annually from seed, or at least every two years.

The dwarf varieties of snapdragon, if grown under glass and in about the same way as above described, make fine pot plants, can be had at any time in the year and sell especially well at Christmas, Easter and Memorial Day. The semi-dwarf kinds and those belonging to the so-called grandiflorum section, are only good for bedding out.

FRED. W. TIMME.

New York Botanical Garden.

The Board of Managers of the New York Botanical Garden helds its annual meeting January 12. The following officers were re-elected: President, D. O. Mills; vice-president, Andrew Carnegie; treasurer, Charles F. Cox; secretary, N. L. Britton. The report of the director-in-chief, Dr. Britton, showed that the number of species grown in the herbaceous grounds during the year was about 3,000; the number of species represented in the fruticetum, or collection of shrubs, was 530; the number in the salicetum, or willow collection, was 50, and that in the viticetum, or collection of vines and trailers, about 60. The total number of species of hardy trees represented in the Garden, including the native kinds, is now about 300, some of which are still in the nurseries. The number of species grown in the public conservatories is about 5,800, as against 3,400 a year ago. The additions have been wholly obtained by exchange with other institutions, by collection in various parts of tropical America, and by growth from seeds in the propagating houses. The director points out the necessity of an additional range of greenhouses. The total number of species now represented in the plantations and conservatories, including the native flora of the tract, is about 10,600, as against 9,300 a year ago.

In the year about 67,000 specimens have been received for the museums and herbarium, and about 90,000 specimens have been incorporated with the various permanent collections; showing that at least 23,000 specimens previously received have been brought into use for study. Forty-three students, including graduates of thirty-one different colleges and universities, have received the privileges of the laboratories, herbarium, and library in the course of the year, and these students have pursued investigations in practically all lines of botanical research.

The library of the Garden now contains about 13,000 bound volumes, of which 1,962 were added in the last year. The gifts of books included 263 volumes, and gifts of money from members of the Garden for the purchase of books amounted to $2,265.

Review of the Market

NEW YORK. The weather has been extremely cold for several days this week, and the supply of flowers has been greatly diminished. Roses particularly are scarce and, while it cannot be said that there is a great demand for them, they are so few in number that fairly good prices are being maintained. There has been an occasional instance of a few American Beauty selling at $1.00 each, but they have been in less than one dozen lots.

Carnations have not changed in value materially, but they are clearing out satisfactorily. There has been a better demand for the white ones than for any other color.

Violets are diminishing in value, and, as the weather has been too cold for the street men to operate, it is a difficult matter to clear out on the inferior bunches. The very finest specials can be had at $1.00 and $1.25 per bunch of 100, and the bunches of specials, that are in fifties, are obtainable at 75c.

Cattleyas are more plentiful, and, with the exception of the small varieties, are moving out satisfactorily. Dendrobium formosum is again coming in regularly, as are several varieties of lælias.

Lily of the valley, when good, is clearing out nicely and at fair figures, though there are some coming in that will not average more than $2.00 per 100.

Bulbous stock, such as white and yellow narcissus, tulips, and Roman hyacinths, are in good demand, and are clearing out in good shape; as are smilax, asparagus, and maidenhair fern.

BOSTON.—Not for many years has this market been so scantily supplied with stock at this season of the year as at the present, and were business at all lively, the effort to obtain stock would create almost a panic. Good roses are very scarce, indeed; and carnations of the better sorts are not so plentiful as usual at this time, though in fair supply. Still the shortage of roses occasions a stronger demand for carnations, and they clean up easily. Bulbous stock, except hyacinths, is in good supply; but, as with carnations, it cleans up very well. Violets have become more plentiful during the past week than they have been for months.

In roses prices are held up pretty well. Fancy special American Beauty and Queen of Edgely fetch $8.00 per dozen, with extra grade at $6.00; No. 1, $3.00 and $4.00, shorts from 75c. to $2.00. Fancy Bride, Bridesmaid, and Liberty realize $25.00 per 100, and sell out early; extras make $16.00 and $20.00; No. 1, $10.00 to $12.50, and the smaller grades, $4.00 to $8.00. Red roses have been in very short supply, and it has been impossible to fill all orders for Liberty and Meteor. Prices on the latter range from $4.00 to $16.00.

Carnation prices have not changed much since last week, though the flowers are very easily disposed of. The best grades of ordinary sorts fetch $3.00 per 100, with ordinary grades at $2.50 and inferior stock at $1.50 and $2.00. Fancy grades of ordinary kinds make $4.00, with specials at $5.00 and $6.00.

Jonquils are in good supply, but are selling very well at $3.50 and $4.00 per 100. Campernelles are not so numerous, and bring $1.00 and $1.50 per 100. Paper White narcissus are in good supply at $2.00 and $2.50; and Roman hyacinths make the same figures, but the supply has shortened up considerably. Lily of the valley is yet in limited quantity at usual rates. Freesia is a little more plentiful, but cleans up daily, at from $2.00 to $4.00 per 100. Lilies are in good supply, at $8.00 to $12.50 per 100.

F. J. N.

CHICAGO.—The market is inclined to be a little erratic. The supply of roses is on the decline, and good prices are being realized. American Beauty have reached $5.00 to $6.00 per dozen for extra fancy stock, while other grades run from $3.00 to $4.00 per dozen. Bride and Bridesmaid are not over abundant, and fancy select easily realize $15.00 per 100, while good stock is quoted at from $6.00 to $10.00 per 100. Meteor bring from $3.00 to $10.00 per 100; Golden Gate, $4.00 to $10.00; Ivory, $5.00 to $10.00. Liberty realizes $4.00 per dozen for extra fancy stock, other grades at from $4.00 to $25.00 per 100. Perle des Jardins sells at from $3.00 to $8.00; Mme. Abel Chatenay, $8.00 to $12.00; Sunrise, $8.00 to $10.00. Bulbous stock is not in any over supply. Violets are quoted at from 50c. to $2.00 per 100. Carnations are arriving in increasing quantities and are not so easily cleaned up as heretofore, especially colored stock. White varieties are holding up well and are quoted at from $3.00 to $4.00 per 100. Most anything brings that price if white, while colored stock is selling at from $1.00 to $3.00; some novelties may realize a better figure, Prosperity going at from $6.00 to $8.00, and Harlowarden at $6.00 per 100.

PHILADELPHIA.—The supply of roses is considerably below the demand; pink and white tea roses are in greatest call. It cannot be said that any class of cut flowers is very plentiful; no grower appears to be sending in what he ought to as in regular times. Much of the scarcity is no doubt due to the coal question, as houses are being run at low temperatures. There appears to be a good supply of colored carnations; white is scarce with many, but Wm. J. Baker says he has plenty. Edw. Reid is still doing a large business in sweet peas, handling some extra choice white and pink flowers. Lily of the valley is in strong demand and only fair supply. S. S. Pennock is doing a large busines in orchids.

DAVID RUST.

CINCINNATI.—Dark and cloudy weather has prevailed over this part of the country for the last four weeks, which has curtailed the cut of roses very considerably. Carnations are more fortunate, and are now coming in equal to the demand. Severe cold weather has also been experienced, using up the coal pile in a hurry. But the florists in this section are more fortunate than our eastern brothers, as we can secure all the coal needed, thanks to the Ohio River. Prices still remain firm on all good stock. American Beauty roses, select, bring $6.00 per dozen, and grade down to $1.00. Bride and Bridesmaid, Golden Gate, best, 8c. to 10c.; seconds, 4c. to 6c.; lily of the valley, 4c.; L. Harrisii, 20c.; narcissus, 3c. to 4c. Roman hyacinths, 3c. Violets are scarce at $2.00 per 100 for the best.

E. G. G.

PITTSBURG.—For three or four days we have had extremely cold weather, the thermometer at some places being as low as 5 to 7 degrees below zero, with a sharp wind blowing. It required lots of coal to keep up the temperature under glass. There has been no scarcity of coal as yet, and as long as the rivers remain open there will be plenty; but if the cold spell should continue, we might have trouble in getting coal, as the railroads could not begin to supply our cities at present. Natural gas is little used by growers, as the cost is considerably more than that of coal, and during this cold spell even the gas was scarce in some localities. The weather has a good effect on prices of cut flowers, for they are rather high. Roses were a little scarce, but the stock coming in is choice. The principal work the past week was for funerals, and some costly designs were made. E. C. R.

OMAHA, NEB.—Owing to a large number of funerals in Omaha and surrounding towns, the florists have been very busy. But on account of very cloudy weather and zero temperature, stock is comparatively very scarce, especially in white flowers and American Beauty roses. Prices are holding up very well, probably better than last year. Those at retail are: American Beauty, $2.00 for shorts, $3.00 to $4.00 for 15 inch, up to $9.00 per dozen. Other roses, 75c. to $1.50, with select at $2.00 per dozen; carnations, 60c. and 75c.; fancy, $1.00; narcissus, 75c. and $1.00; Roman hyacinths, 60c. to 75c.; lily of the valley, 75c. and $1.00; violets, $1.50 to $2.00 per 100; mignonette, 75c. and $1.00 per dozen. J. H. B.

BUFFALO, N. Y.—The better class of flowers coming in are readily absorbed by the demand, especially roses and white carnations, the latter somewhat owing to the larger recent calls for funeral flowers. Contrary to common conditions for a long while past, colored carnations in good quality are arriving a bit ahead of the demands. Violets, apparently, are not in as good supply as in some past seasons. For the desired kinds of stock especially, good firm prices are being realized. VIDI.

KANSAS CITY.—In a general report of the city florists we find that the holiday business was very satisfactory. The supply in all lines was equal to demands, and the fair weather preceding Christmas brought in orders early.

In blooming plants no finer lot could be found, and the retailers experienced a brisk trade in azaleas, Gloire de Lorraine, begonias, pans of hyacinths, primroses and poinsettias at prices fully 25 per cent. better than those of other years.

This advance in the prices has been set by the customers themselves demanding that the azalea shall be trimmed in pink, green and gold, with a large bow of expensive ribbon and, lastly, that it shall be delivered by a special messenger in the automobile. There was a good demand for green goods. Mr. Newell, one of our heaviest retailers, says there was some shortage in Christmas green roping, probably owing to the fact that time could not be spared to make it up.

Mr. Murray found but two cases of holly of his large shipment that were not exceedingly fine.

Carnations took the lead in cut stock and such varieties as Harlowarden, Mrs. Thos. W. Lawson, Mrs. Higinbotham and Marshall Field went easily at $2.00 and $2.50 per dozen, prices that have never been reached in this city when the flowers were handled in large quantities.

All bulbous stock was unusually good. Narcissus and Roman hyacinths brought the usual price of $1.25 per dozen.

There was no great demand for novelties while good material lasted. More wreaths of red immortelles were sold than in former years, but aside from these the call for such dried goods was light.

E.

TOLEDO, O.—Trade during the holidays far excelled that of last year. Potted plants and cut flowers were plentiful; and customers did not seem to care much about the prices. Thousands of roses, carnations, violets, azaleas, Roman hyacinths, poinsettias and strings of smilax were consumed. The most elaborate floral decoration was at the home wedding of Miss Tolerton. Mr. Heinl had charge of the work, which was the most extensive ever attempted in the city. In the drawing room and library, Mr. Heinl used 500 poinsettias, 1,500 Meteor roses, 500 American Beauty, and 600 strings of smilax. The Yacht Ball, given New Year's eve, was a scene of great floral beauty. A miniature man-of-war, made of Roman hyacinths and carnations, with smokestack wound with red satin ribbon, the entire design resting on a bed of blue immortelles, formed the center-piece at a function given in honor of Captain Richmond Pearson Hobson.

Meteor roses sold at $2.00; American Beauty, $5.00 and $8.00; carnations, 75 cents to $1.50; poinsettias, $1.50 to $5.00; violets, $3.00 per 100; Azaleas, $3.00 to $8.00 each; Roman hyacinths, $1.50 to $2.00; Lily of the Valley, $1.00 to $2.00 per dozen; Boston ferns, $3.00 to $8.00 each; callas, $1.00 to $3.00.

Thomas Magee says trade during the holidays was 50 per cent. better than last year's. Joseph Sigrist reports business excellent. Miss Belle Flick says trade was better than for some years past.

C. J. S. P.

NEWPORT, R. I. Christmas trade here was much better than last year's, and considering we have one more retailer, every one seems to have done a good business. Our growers did a good business, and could have sold more stock. Among the retailers F. L. Zeigler was way ahead, in plants; he disposed of over 100 araucarias alone. Azaleas sold well, also ericas. Lilium Harrisii, Roman hyacinths in pots and boxes and Paper White narcissus sold well. There were also a large quantity of primulas and solanums disposed of. Green and Christmas trees sold clean out.

Geo. A. Weaver Co. report sales about equal to last year's. On Christmas Day there were no flowers or greens to be had at the florists' stores. The weather was propitious up to Christmas Day, when we had a terrible snowstorm, which greatly retarded deliveries. T. F.

ASPARAGUS PLUMOSUS

$6.00 PER 100.

J. GAMMAGE & SONS, London, Ont.

Mention the Florists' Exchange when writing.

FLORISTS' STOCK

Roses. Caroline Soupert, 2¼ in., $4.00 per 100.
Asparagus Plumosus, fine, 2½ in., $6.00 per 100
Geraniums, fine, from pots, named, $3.25 per 100
Araucaria Excelsa, 5 in., 4 tiers, $6.50 per 10.
Kentias, 3 in., fine for fern pans, $15.00 per 100

CHANGES IN BUSINESS.

JACKSONVILLE, FLA.—The Griffing Brothers Company has sold out its floris department to C. D. Mills.

OCEAN GROVE, N. J.—Dean Thompson, formerly of Asbury Park, N. J., ha gone into partnership with his father a this place, and discontinued his plant a the former location.

WICKFORD, R. I.—The Homoganset Greenhouses have sold their plant to thre practical florists, who will do busines under the name of The Homogansett Florist Co., and will raise roses for the Nev York and Boston markets.

CLEVELAND, O.—A. Tilton has retire from the seed firm of A. Tilton & Son The business will be conducted, under th same title, by George A. and Judd Tilton sons of the retiring partner.

FIRES.

JOLIET, ILL.—The greenhouses o Ludwig Schmidt were destroyed by fir on the morning of January 8. The los is considerable.

MARQUETTE, MICH.—Fire did damage amounting to $1,200 in the greenhouse establishment of Mrs. Emma Stafford on December 23, 1902.

Canadian News

MONTREAL.—The weather continues cold and dull, and its effect on cut flowers is very marked. American Beauty roses have suffered most, and in many cases the flowers are completely spoiled. Bride and Bridesmaid are in better condition, although the color of the latter is not of the best. Carnations are fairly plentiful, but a good demand in funeral work keeps the whites well cleaned up. Violets are still dragging considerably, although the supply is much below the average and the quality very fine. Roman hyacinths and Paper White narcissus are plentiful, and, outside of funeral work, are not wanted. There is a fair sale for lily of the valley; most of this stock finds its way into funeral designs. With the exception of a few indifferent tulips, Dutch bulbs are not seen yet.

The plant trade since the opening of the new year has been quiet; there is little call for any other than decorative stocks. The coal famine is very much in evidence in this locality. Anthracite, when obtainable, costs anywhere from $12.00 to $20.00 per ton, and at these figures, of course, is altogether out of the reach of florists. Soft coal is moderately plentiful, although this has increased in price 100 per cent.

Harrisii lilies, even the plants that were the healthiest in the early stages, are getting badly diseased, and the lookout in this variety is very unfavorable. The Japanese bulbs are better, but the old trouble of mixed varieties is again at the front. In one lot of 1,000 supposedly longiflorum giganteum, there were but 10 true to name, the balance being made up of about equal parts Lilium Takasima and a small growing variety that averages about one flower to the plant and is practically worthless. B.

TORONTO. Business is a little slow, with stock coming in rather plentiful; roses, carnations, and violets being in good supply. Firsts and selects sell well, but second and poorer grades do not always clean up. Dunlop is showing some very fine carnations, Prosperity, Mrs. Lawson, Cressbrook, The Marquis, Norway, Lorna, and Governor Roosevelt being very good. Good American Beauty roses ar scarce, as are good double violets. Singl violets are plentiful, also lily of the valley. Some very good mignonette around, and nice tulips are coming in.

There was a considerable quantity o funeral work done last week that use up quite a large amount of stock tha otherwise would have been left on han Prices of stock are just about the sam as in other years, although those for coa and other firing material have doubled so most of the income of a good man of the boys is going up the chimney.

T. M.

Canadian Cut Flower Prices.

LONDON, ONT.—Bride and Bridesmai bring $6.00 to $12.00; Golden Gate, $6.00 t $12.00; Madame Hozte, $6.00 to $12.00 Souvenir de Wootton, $6.00 to $12.00. Carnations, inferior grades, all colors, $2.00 standard varieties, $3.00 to $4.00; fanc $4.00 to $5.00; hyacinths, $3.00; lily of th valley, $3.00 to $4.00; smilax, $15.00; violets, $1.50. Dull, cold weather. Roses ar of good quality, the supply about equa to the demand. Carnations are in bris call, with a supply not equal to it. Plan sales have dropped off. A few good azaleas have moved this week. G.

TORONTO, ONT.—American Beaut extra, $50.00 to $60.00; No. 1, $25.00 t $40.00; culls and ordinary, $5.00 to $10.0 Bride and Bridesmaid, extra, $12.00 t $15.00; No. 1, $8.00 to $12.00; No. 2, $2.0 to $6.00. La France, $3.00 to $12.00; Meteor, $2.00 to $12.00; Mrs. Pierpont Morgan, $2.00 to $12.00; Perle des Jardins $2.00 to $8.00; cattleyas, $35.00; cypripediums, $15.00. Carnations, inferior grades all colors, $1.00 to $1.50; standard varieties, white, pink, and red, $2.00 to $4.00 yellow and variegated, $3.00 to $5.00 fancy, all colors, $4.00 to $6.00; adiantum $1.00; asparagus, $20.00 to $75.00; callas $6.00 to $10.00; daffodils, $3.00 to $5.00 daisies, 50c. to $1.00; freesia, $2.00 t $3.00; galax leaves, 15c. to 20c.; hyacinths $1.50 to $3.00; lily of the valley, $1.50 t $4.00; mignonette, $1.00 to $4.00; narcissus, $1.50 to $3.00; smilax, $15.00 to $25.0 tulips, $2.00 to $4.00; violets, 75c. to $2.0

New York.

Happenings of the Week.

With the terrible cold weather, the shortage of coal and exorbitant express rates, the florists' lot is not a very happy one just at present.

Frank L. Moore, rose grower of Chatham, N. J., is to be commended for the strong personal effort he is making to obtain a repeal of the excessive express charges. Mr. Moore has a petition signed by upward of eighty growers, who are all shippers over the route of the United States Express Co., and the petition will be laid before the head of that company. The petition states among other things that the express rates in force at present are decidedly unfair, and are discriminating against one of the most regular departments of the company's traffic.

A petition, signed as this one is, with so many regular shippers over one route, will no doubt carry some weight when presented before the proper officials, and if some one enthusiast in each shipping section would take up the work on the some lines as Mr. Moore has done, something would probably be done by the express companies toward repealing their outrageous discrimination against the carrying of cut flowers.

The annual dinner of the New York Florists' Club, which takes place at the St. Denis Hotel on January 31, is to be an unbounded success, and members who intend being present, but who have not yet notified Mr. Weathered of their intention, should do so at the earliest opportunity. A first-class musical combination has been secured, and we shall have a fine entertainment in addition to the elaborate menu.

There will be a meeting of the Brooklyn Horticultural Society on Monday evening, January 19, in the Germania Club, 120-2 Schermerhorn street. All the members should attend, as important business will be transacted.

A. H. Langjahr has secured another prize, a handsome lamp, Abraham & Strauss, Brooklyn, being the donors.

Charles Lenker, Freeport, L. I., seems to be one florist who can make money out of the coal famine. Whether he has the inside track of a railroad, or a mine, is not apparent; but he is getting coal in car-load lots and supplying his neighbors at a slight profit to himself.

George K. Zeiner, whose greenhouses are located on Clarkson street, Brooklyn, suffered a loss of $3,000 by fire on Friday night, January 9. The fire started near the boiler, in which a coal fire was burning, but the direct origin is unknown. The whole establishment, so far as stock is concerned, is a total loss, as what did not get destroyed by fire perished with the frost. Much sympathy is felt for Mr. Zeiner, as he carried no insurance on the greenhouses. Among the stocks destroyed were two houses of fine mignonette, one house of azaleas, one house of primulas, and one house of stevia; also 2,000 strings of smilax, and a large stock of Spring bedding plants.

At the sessions of the New Jersey State Horticultural Society, held in Trenton, N. J., last week, C. W. Ward, Queens, L. I., presented a paper on the subject of "Plant Breeding," and W. A. Manda, South Orange, one on the newer privets and roses for hedges and embankments.

Mr. and Mrs. C. L. Allen, of Floral Park, N. Y., will celebrate their golden wedding anniversary on the afternoon and evening of January 27. Their latch string will be out to all of Mr. Allen's many friends on that date, whose hands he will be glad to shake. We wish the amiable couple many more years of wedded bliss, and we are sure their large circle of friends will join in the sentiment.

Chas. E. Koch, of Clarkson street, Brooklyn, had the misfortune to have a heavy iron bar fall across his foot a few days ago, and as a consequence he has a lame member and also a very painful one.

The firm of W. A. Manda, South Orange, N. J., has been incorporated, with a capital stock of $150,000. Incorporators: Albert A. Manda and Daniel McRorie, South Orange, N. J., and William H. Carey, Jersey City, N. J.

John Young's head clerk, George Hildenbrandt, is laid up with a severe case of tonsilitis.

R. O'Mara and his sister, Miss O'Mara, are spending a few weeks in Florida.

James W. Withers will go to Jamaica, West Indies, soon, for the benefit of his health.

John N. May, Summit, N. J., is confined to his home with an attack of "grippe."

Mrs. Wm. Plumb was taken very ill a few days ago, and had to be removed to the hospital at Mineola, L. I.

A. N. Broadhead, proprietor of the Lake View Rose Gardens, Jamestown, N. Y., was in the city Friday, January 9, attending the banquet of the Erie Railroad officials, at the Hotel Savoy.

Chicago.

News of the Week.

With the thermometer registering 6 degrees below zero the growers have been rather worried over the coal supply the past week, but, so far, I have not heard of any actual losses on account of the scarcity of fuel. From reports there is plenty of coal if one can afford to pay the prices asked, which are sometimes double what the contract figures were last Summer and Fall.

The market the past week has been brisk, everything in the line of good stock finding a ready sale at extra good prices, especially good roses. American Beauty have shortened up in supply considerably, with the prices not so firm as a week ago. The supply of carnations is on the increase; white kinds are not in overabundance and find a ready sale, while colored stock does not move so well, especially the poorer grades.

The retailers report trade as fairly good for this season.

Poehlman Bros. are receiving some fine white lilac, both single and double, which finds a ready sale at from $2.00 to $2.50 per dozen.

A goodly number of the trade attended the dance given by the Cut Flower Growers' Company in its new store at 60 Wabash avenue, Tuesday evening. About 60 couples were present. All report having had a good time.

From reports, some extensive buildin will be done in the Spring in and around this city. Benthey & Co. are to enlarge their New Castle range by from 35,000 to 40,000 square feet of glass, to be planted to Liberty and Mme. Chatenay roses. Poehlman Bros., of Morton Grove, contemplate the erection of some 125,000 feet in the Spring, and will also make extensive alterations on their present range. Several other firms expect to enlarge their present areas of glass, but are not able to state at present to what extent. Whether this market will be able to handle the increased output remains to be seen, but from present appearances it can, if the additions are devoted to the right kind of stock, as it seems impossible to get sufficient of certain kinds to supply the market. It will take good figuring, with management, to produce just what is wanted at the right time.

J. B. Deamud is sojourning on his farm at Cairo, Mich., for a few days this week.

Hugh Wood has been on the sick list for the past week.

Edgar Sanders is able to be around the house again after a short siege of sickness following Christmas, which confined him to his room.

A girl baby arrived at the home of W. Kidwell on Monday night.

ROBERT JOHNSTONE.

Cleveland.

News Jottings.

The coal problem was the subject of much discussion at the club meeting Monday night, and after a thorough understanding of all the members' views, it was decided to drop it for the present. The majority of members seemed to think that now was a very poor time to desert your old coal dealer, but to do the best you can until the supply comes more equal to the demand.

A visit to A. Graham & Son's establishment found everything in the usual good order. Stock of all kinds was looking in fine shape, and gives promise of plenty for the large Spring trade. One house of longiflorum lilies for Easter and earlier was the finest I have seen for some time. Lilium speciosum, album and rubrum that were grown from cold storage bulbs were just coming into flower, and as the present supply of blooms is so limited these should help out wonderfully. Two benches of Princess of Wales violets were as good as I have seen in Cleveland this year, and give promise of a heavy cut of flowers in a short time.

At G. M. Nauman's place the stock was looking fine, especially one house of violets. All the new varieties of carnations are here on trial and a goodly number are showing what their originators said for them. Governor Wolcott, as seen here, is fine, as is also Mrs. Higinbotham. These two sorts will be grown largely the coming season. A seedling carnation at this place grown under the name of Louise Nauman, which will be offered to the trade the coming season, is a very good one for those who grow for their own retail trade. It is a good producer and keeper.

Smith & Son's pink seedling carnation Magdalene is pronounced by all to be the cleanest and most rapid upright grower of any carnation, and the color perfect of its class, with a stem hard to beat. It should without doubt prove to be a grand commercial variety. This carnation is to be offered to the trade next season, and will be shown at Brooklyn in February, as George Smith, the proprietor of this place, has one house that will be in just on time for the show.

Adam Graham, Jr., was confined to his bed last week, but later reports say that he will be up and around shortly.

Three new members were admitted to club membership at the last meeting, and there is still room for more.

Trade is good, stocks scarce and prices high. Were it not for the coal bills we would have good reason to be happy. G. W. S.

Pittsburg.

Express Rates on Cut Flowers.

Many complaints are heard about the express charges being too high and some other abuses of the express companies. This matter is to be discussed at the February meeting of the Florists' Club, and those who complain the most should make it a point to attend the meeting. Perhaps something can be done to remedy some of the faults.

News Notes.

John Bader was confined to his room for some days with a bad cold, but is out again.

Casper Limbach states that he is receiving many inquiries about prices of glass in large quantities for the coming season; so it is likely that considerable building will be done the coming Summer.

E. C. Ludwig expects to move to the city shortly. He is tired of his country home—a nice place, but rather inconvenient to get there.

E. C. REINEMAN.

Omaha.

News of the Week.

The January meeting of the Nebraska Florists' Society was held on the 8th inst. After transacting regular business the members decided to have a bowling tourney on the night of February 10. C. H. Green, of Fremont, was in attendance.

The annual meeting of the Nebraska State Horticultural Society will be held at Lincoln, January 13, 14 and 15. Second Vice-President J. J. Hess, L. Henderson, P. B. Floth and J. H. Bath, of Omaha, will attend.

In addition to the prizes offered for fruit exhibits, there are premiums for roses, carnations and violets.

J. H. Hadkinson has accepted a good position with the landscape department at the St. Louis Exposition.

J. H. BATH.

Madison, N. J.

The Morris County Gardeners' and Florists' Society held its annual smoker and installation of officers in the Brittin Building on Wednesday evening last, about 55 members being present. An old-time tin horn delegation came up from the New Jersey Floricultural Society. Among the notables present were: W. J. Stewart, E. W. Clucas, H. W. Gibbons, Messrs. Moore, Hentz and Nash, A. Caparn and G. Tricker. Letters of regret at inability to be present were read from Austin Shaw, Alex Wallace, J. W. Withers, and others. After the treasurer and secretary had read their annual reports, the officers for the ensuing year were duly installed. When the regular order of business had been dispensed, the entertainment commenced. The Three Merry Monarchs, or Foster's Funny Fellows appeared on the boards. In justice to these clever gentlemen it is fair to say that they are certainly the best trio of performers that have honored our town. It is pretty hard to get up a laugh right after a coal strike, but we did laugh, and laughed to beat the band.

The Goebel Bros., the remnants of a disbanded minstrel troupe, also did some clever stunts, incidentally ringing in a few "new" jokes. One or two of the visitors from New York fainted, but were quickly revived by a judicious spraying of the now famous Morris County Gardeners' and Florists' punch, warranted, as one facetious member remarked, to cure coughs, colds, warts or bunions. After joining hands and rendering "Auld Lang Syne" (I say "rendering" advisedly), the meeting dispersed at 12:30 a. m., everybody departing, feeling perfectly satisfied with themselves and each other.

CHAS. H ATKINS.

Germantown, Pa.

The Germantown Horticultural Society held a meeting January 12. Edwin Lonsdale talked on "Begonia Gloire de Lorraine." It was carnation evening, and a varied display of that flower was made. One of the finest specimens shown was Enchantress, exhibited by Peter Fisher. The election of officers for the year resulted as follows: President, Edward Neville; vice-presidents, Charles J. Wister, Albert Woltemate and Edwin C. Jellett; secretary and treasurer, George Reynolds.

Tarrytown Horticultural Society.

About fifty members and friends of the Tarrytown Horticultural Society sat down to an elegant dinner in the Florence Hotel on Wednesday evening, January 14. Although this society is only four years old, it has come to be known as one of the foremost and most progressive horticultural associations in the land, and its annual dinner is looked forward to with pleasurable anticipation by those friends of the society who are fortunate enough to be invited to attend.

The tables were gracefully adorned with cut fronds of that peer of all the nephrolepis, N. Piersoni, with vases of carnations as centerpieces.

The president of the society, David McFarlane, acted as toastmaster, and filled the role with tact and amiability. Among the speakers were: The president of the village of Tarrytown, Mr. Brown; C. Reynolds, representing the Dutchess Horticultural Society, from Poughkeepsie; Mr. Maynard, editor of the Tarrytown Argus, and Dr. Russell, coroner of the district. J. Austin Shaw read two original poems, and a local member gave a vocal selection, entitled "You and I."

Tobacco Stems — THE GOOD STRONG KIND, BALES WEIGH 500 LBS. — 60c. per cwt. On Cars N. Y. City.

Indianapolis, Ind.

Happenings of the Week.

A lengthy and business-like meeting was held by the State Florists' Association of Indiana at the Commercial Club rooms, Monday, January 12. The afternoon meeting opened with the customary routine business, which was followed by a brief but pointed address upon current topics of interest by the retiring president, J. A. E. Haugh, of Anderson. The election of officers resulted as follows: President, Fred. Dorner, Jr., Lafayette; first vice-president, E. A. Nelson, Indianapolis; second vice-president, Robert McKeand, Marion; secretary, H. Junge, Indianapolis; treasurer, J. Heidenreich, Indianapolis; executive committee, E. G. Hill, A. Stuart, H. Heller, A. Baur, H. Rieman and J. Hartje.

The coming chrysanthemum show was briefly discussed, after which all retired to the dining room, where an elegant supper was served. Toastmaster Haugh brought forth some excellent remarks from those present.

Quite a collection of flowers was on hand. The new yellow rose, Franz Deegen, was exhibited by Heller Bros. and secured the gold medal. John Hartje's white seedling carnation, No. 473, took the bronze medal. This is an excellent carnation and was easily the best white exhibited. Baur & Smith were awarded a certificate of merit for their pink carnation, Indianapolis. Frank Hereth was awarded honorable mention for his pink seedling, as were Stuart & Haugh for their fine collection of Golden Gate and Bride roses, and for their Avondale, Mrs. T. W. Lawson and Mrs. Potter Palmer carnations. This firm had quite a collection of seedlings, including the following: Freedom, Beatrice, John Mitchell and The News. The committee, which consisted of Messrs. Billingsley, Rieman and Huckreide, would like to see more of the last mentioned. John Hartje's No. 432, a bright pink, was also very worthy.

A large shipment of carnations was received from the Chicago Carnation Co., of Joliet, Ill., too late to be staged. A vase of Harlowarden beat anything in the carnation line seen in this city for many a day. There were also some good flowers of Her Majesty and Mrs. Higinbotham.

I. B.

Hoboken, N. J.

Kogge Bros. report good holiday trade and very good business since.

Hendberg reports the best Christmas he ever had.

West Hoboken, N. J.

The coal question here is somewhat improved. While calling on a few growers I find they all had received extra loads of coal from their dealer, who, it seems, is loading them up during a little quiet spell.

Hackensack, N. J.

Henry Hugues says never has he seen any advertisement bring such quick results as the one in your issue of the 3rd inst. In it he advertised for a man, and on the 5th he had filled the position.

Boston.

The Week's News.

The Gardeners and Florists' Club was unable to get a quorum together for the meeting on Tuesday night. There are strong signs of disinterestedness among the club members, and the very ones who complain of it are those who are seldom in attendance to submit suggestions to further the interests of the club.

The many friends of the late Fred. L. Harris learned with regret of his death on Sunday last, at his home in Wellesley, at the advanced age of eighty years and twelve days.

A meeting of flower shippers and others interested is called for Saturday, January 17, at 9 a. m., at the American House, to protest against the unwarranted advance in express rates on cut flowers.

William H. Elliott is cutting fine American Beauty roses at his New Hampshire establishment.

His many friends in the business will be pleased to learn that Judge C. W. Hoitt, of Nashua, N. H., has been elected president of the New Hampshire Senate.

F. J. NORTON.

Bridgeport, Conn.

The sign over Reck's flower store at 985 Main street has been changed. It now reads Reck & Son. Carl Reck, who since his return home has been employed in his father's business, has now become a partner. John Reck started in business for himself at 463 Main street, 25 years ago. He remained 16 years at 463, then removed his flower shop to 985 Main street. During these 25 years of business life he has labored hard to advance the culture of flowers as well as to manifold their use among the public. Carl Reck, after leaving school, worked for two years in his father's greenhouses. He then went to Europe, where he worked in the most prominent flower and seed establishments for nearly two years. On his return he re-entered his father's business.

New Haven, Conn.

The New Haven County Horticultural Society held its first meeting of the year Tuesday, January 6. The members present, of which there was a large attendance, condemned the action of the express companies in raising the rates on cut flowers. The Society appointed a committee to draw up resolutions against the express companies' charges. Between the advanced express rates and the high price of coal, the florists are having a hard Winter. The coal situation is unchanged.

The election of officers for the ensuing year resulted as follows: President, Gustave X. Amhryn; vice-president, Wm. McLean Gardner; treasurer, David Kydd; secretary, Thomas Pettit; board of managers: Robert Angus, John N. Champion, Wm. Ferrier, Robert Paton, J. W. Woodward, including the officers of the Society. It was voted to hold the annual dinner soon.

WM. McLEAN GARDNER.

Providence, R. I.

Club Banquet.

The Florists' Club held its annual banquet at Taft's Hotel, Thursday, the 8th inst., and covers were laid for 40 guests. The attendance was a representative one, including those among us who have the best interests of the business at heart. We had the pleasure of listening to Professor Southwick of the Park Museum, President Smith of the Horticultural Society, Mr. Bryant of A. H. Hews & Co., Mr. Turner of the Putnam Foundry and Boiler Co., and others. The subject of oil as fuel was discussed freely, and although in its infancy, was shown to be the coming heat commodity.

M. Sweeney acted as toastmaster, in a special manner ably aided by President Appleton, both being full of sentiment and reminiscence. The coal question was generally touched upon, but a tone of moderation prevailed, despite the warmth of feeling. Robert Johnston spoke of closer relationship between the employer and his help. F. Macrae was reminiscent of the days of the Hoggs, McNaughton, McCoid, Johnston, Fairbrother, and Kelly.

Mr. Macnair touched upon the probable heavy Spring crop of carnations and the necessity of finding ways and means to fairly and honorably dispose of it. Mr. Chappell mentioned the young men now taking an active interest with their father florists. Altogether the affair was extremely pleasant.

C. S. M.

Fremont, Neb.

During a high wind last week, 400 panes of greenhouse glass were lifted from the establishment of H. Green and shattered. The gap was closed by the use of canvas, but not until a good many of the plants had been damaged. The total loss was about $75.

Christmas Notes.

In every instance trade with both the grower and retailer was good. Baskets filled with blooming plants, such as poinsettias, cyclamen, primroses, azaleas, etc., found ready sale at an average price of about $10.00 retail. In cut flowers, violets were most sought after, the supply being short. Every store was tastefully and beautifully decorated for the holidays, each being distinct from the other. Many decorations for parties and openings have occurred during the past two weeks; Schroeter had two big orders out-of-town. Wild smilax was not called for so much as last year, more holly and ground pine being used. The genral verdict is that trade was ahead of that of last season. The weather was propitious, and stock could be easily handled. Very little complaint has been heard in regard to salted flowers.

The coal question is still a serious one in this vicinity. Many had contracts for soft coal, which is the fuel used almost entirely here, but supplies are difficult to obtain, with very little hope for immediate relief.

W. J. Pearce, of Pontiac, has great success with his roses. His shipments to this market for ninety days past have been about 8,000 a month, in addition to the supply used for his home trade.

Klagge, of Mt. Clemens, stil leads in violets. He is also cutting good carnations. Grohman Bros., of Saginaw, had some very fine Bride and Bridesmaid roses. Bishoff had some good violets in limited quantities. Many growers are well stocked with smilax. Holznagel had a nice lot of poinsettias, as did Breitmeyer's Sons.

Hopp & Lemke, of Grand Rapids, sent to the Michigan Cut Flower Exchange eighteen flowers of their long-stemmed seedling rose. It is a sport, and promises to take a foremost place in the ranks of the forcing roses. The variety was shown at the last club meeting on Wednesday evening, and very highly commended.

Loyd Vaughan, of E. H. Hunt, Chicago, was a viistor, as was Charles Schwake, with Charles Meyer, New York.

DILGER.

Cincinnati.

News of the Week.

Vernon Graves, of Richmond, Ind., was in the city last Wednesday looking up the coal situation, as the party who holds his contract is not delivering the fuel fast enough. H. M. Altick, of Dayton, O., was also here on a similar mission.

The Cincinnati Florists' Society, in session Saturday evening, passed resolutions condemning the action of express companies in demanding exorbitant rates on cut flowers, and ordered copies of the resolutions mailed to the agent of each express company and to John N. May, of Summit, N. J. It is gratifying to see that The Society of American Florists is now waking up, and will make an effort at least to help fight the impositions being heaped upon the florists of the United States. Don't let it stop at the express companies: but it should go after the coal barons as well.

The business of the Cincinnati Cut Flower Company has been acquired by J. M. McCullough's Sons, and will be moved to Walnut street. Albert Sunderbruch, I am informed, will be in charge.

E. G. GILLETT.

Buffalo.

News Notes.

Though in the throes of almost a blizzard, the store men are not complaining about business at present. On the contrary, trade generally is called good. Some social functions call for decorating in a moderate way compared with a few weeks ago. Good flowers seem to be had all right about as needed, but prices, that may be termed firm, have to be paid for them.

The new florist firm of Byrne & Slattery opened its doors on Saturday last, at 658 Main street. The store is in a new building, and amply spacious. The furniture is finished in white enamel, silver trimmed, the office and ice box in the after part, with passage way between leading to a rear working space. A metal ceiling is cream-tinted. An announcement folder was distributed, and an attendance called flattering as regards numbers, responded on the opening day, for which made-up novelties and combinations for effect that combined true metropolitan marks of construction were freely displayed.

A lamentable incident was the sudden death, on Friday of last week, of Samuel B. Smiley, of Lancaster, N. Y., from heart failure. Mr. Smiley was locally identified with the growing interests of this vicinity for many years, and ever bore an esteemed character and reputation for integrity. A widow and several children are left to mourn their loss, and the sincere sympathy of the local craft are extended to them. The funeral was held from the family residence on Sunday last.

VIDI.

San Diego, Cal.

The florists of San Diego are not troubled with cold weather or cloudy skies like those in the same line of business in the Eastern States, or even in California farther north. Few in this locality pretend to build costly greenhouses, for even such stock as the poinsettia is a common shrub in gardens about town.

Carnations, roses, smilax, etc., are grown in the open ground, which makes such stock much cheaper than when grown in costly glass structures, and kept warm at present exorbitant prices of coal.

One item of special interest here of late was the visit of Samuel Parsons, Jr., the noted park expert of New York. He spent about ten days here, just before New Year's, looking over our 1,400-acre park, for the purpose of making definite plans later. Mr. Parsons was induced to come out and investigate this matter by Mr. G. W. Marston, a prominent merchant, who becomes responsible financially for this visit and the expense of making plans for future park improvements.

Miss K. O. Sessions had something new for Christmas in the way of a blue fir, or spruce, from the high mountains in the eastern part of the country.

L. M. F.

Poughkeepsie, N. Y.

The annual banquet of the Dutchess County Horticultural Society took place at the Nelson House on the evening of January 8. As usual, the affair was a grand success. There were two toastmasters, Frank E. Lown and Frank Hasbrouck, and they arranged a program of wit and cheerfulness which made the banquet a memorable one. Several of the speakers read imaginary letters from noted personages, such as President Roosevelt, ex-President Cleveland, Governor Odell, Judge Parker, and others. In the alleged letter from the President it was stated that "next to shooting big game, he loves to see the flowers shoot." The other communications made hits as to local matters, and were much enjoyed. Mr. Wager told how he would reform Poughkeepsie. "Every other house in Rhinebeck," he said, "is a violet house, and now they are building in between."

The society met in the afternoon and re-elected the following officers: President, E. Lyman Brown, who last year gathered in over one hundred new members; vice-president, Wm. G. Saltford; treasurer, Charles Mitchell; secretary, Harold Cottam.

Tuxedo, N. Y.

The annual meeting of the Tuxedo Horticultural Society was held on January 6, 1903, C. D. Shaeffer in the chair. The treasurer's report showed a substantial balance on hand in favor of the society. The secretary's report also showed very satisfactory results. This society was organized on January 31, 1902, with nine members; at present there are forty-eight on the roll.

After the regular business was transacted the officers of the past year were re-elected. A press secretary was also elected. The officers are: C. D. Schaeffer, president; George Stewart, vice-president; Thomas Murray, secretary; Frederick Bently, treasurer; James Davidson, press secretary. An executive committee, as follows, was also chosen to carry on the work formerly done by the essay entertainment and exhibition committees: George Stewart, William Hastings, C. D. Schaeffer, R. Franke, J. Davidson, F. Bently and J. Allen.

JAMES DAVIDSON.

Union Hill, N. J.

Joseph Meyer, employed by John Rickert, of New Durham, N. J., was struck by trolley at midnight New Year's Eve. Meyer, in stepping out of the way of one car stepped in front of the one which struck him. Fortunately he was caught in the fender. He received an ugly gash on the head and had several teeth knocked out. His condition is improving.

DEAN'S SYSTEM OF GREENHOUSE HEATING

By MARK DEAN

DO YOU WANT TO KNOW

HOW
- To determine the area of any greenhouse?
- To tell the amount of radiation necessary to heat the same?
- To place the heating pipes to best advantage?
- To figure what the pipes and fitting will cost?
- To set up a boiler?

DEAN'S SYSTEM OF GREENHOUSE HEATING is the name of a new book which will fill a long felt want, because it has tables all figured out giving the amount of radiation and number of pipes necessary for greenhouses of all sizes, formulas for obtaining different temperatures, radiation per lineal foot of pipes of various sizes or the number of feet of radiation in any number of feet of pipe, list prices of pipe, pipe fittings, etc., besides much other valuable information. Handsomely bound. By mail, postpaid $2.00.

Orange, N. J.

The annual installation of officers was observed by the New Jersey Floricultural Society on January 7, George Smith becoming President, William Bennett vice-president, Joseph A. Manda secretary, and Malcolm MacRorie treasurer for the coming year. All made short felicitous addresses which contributed much to the pleasant evening.

A vote of thanks was proposed by George Smith to the retiring president, John Hayes, who has just completed a term of office marked by dignity as a presiding officer, and a policy which has sustained the society at home and its good name before the world. The treasurer's report showed a balance of $280—always an indication of health. The past year has been marked by three social entertainments and six addresses upon live topics of interest; while Mr. Hayes has advocated the use of the stereopticon as a means of instruction.

The season just closed has been marked by success to nearly all our florists financially, despite the coal famine, which continues to trouble. Those living close to the railroad and who hauled their own coal upon the first influx after the strike, have done best. Most are subsisting from yard to furnace, as the fuel is doled out to them thus far.

A WEEKLY MEDIUM OF INTERCHANGE FOR FLORISTS, NURSERYMEN, SEEDSMEN AND THE TRADE IN GENERAL

Vol. XV. No. 4 NEW YORK, JANUARY 24, 1903 One Dollar Per Year

SPIRÆA FOR EASTER FORCING.

We offer a few cases each of the following sorts as below, as long as unsold. These can be shipped afely by freight, as it will not injure them in the slightest if frozen. There is plenty of time to get them n for Easter, if wanted, and they also make good stock for Decoration Day. Now is the time to lay in a tock before they are all sold.

APONICA and COMPACTA MULTIFLORA. Case of 250 clumps for $8.00; in less quantities, $4.00 per 100.

STILBOIDES FLORIBUNDA. Case of 250 clumps for $10.00; in less quantities, $5.00 per 100.

APANESE FERN BALLS

Best Quality, $25.00 per 100.

The surplus bulb stock recently offered has sold fast, but we can still supply the following, in first-class shape, as long as unsold, at prices named below:

MALL SIZED NAMED HYACINTHS.

These are splendid for Easter forcing, and are ne for growing in pans or pots. Nothing is more adily salable. Price is very low, and the bulbs are rst-class—remarkably good for the low price at hich they are offered. They will throw almost as ood flowers as the larger and higher-priced bulbs. you have never flowered these, try a thousand two. You will be pleased with the results. hey cannot fail to make money for you.

The following pink varieties at **only $1.50 er 100; $12.00 per 1000** (worth $16.00 per 1000), z.: Baron van Tuyll, Gen. Pelissier, Gertrude, igantea, Robt. Steiger and Solfatara.

The following blue varieties at **only $1.50 per 00; $12.00 per 1000** (worth $16.00 per 1000), viz.: rand Maitre, King of the Blues, La Peyrouse, has. Dickens, Blondin, Czar Peter; also Tamerlan ellow).

The following white varieties at **only $2.00 per 00; $16.00 per 1000** (worth $22.00 per 1000), viz.: aroness van Tuyll, Grandeur a Merveille, Blanhard, L'Innocence, Mme. Van der Hoop, and Paix l'Europe.

INE NAMED HYACINTHS. Single and Double.

We offer a limited stock of the following varieties first-sized bulbs, at $3.00 per 100; $25.00 per 1000 orth $35.00 per 1000), viz.: La Peyrouse, Regulus, amerlan, Grand Lilas, La Pluie d'Or, Bloksberg, ouquet Tendre, Czar Nicholas, Crown Prince of weden, Flevo, Garrick, Grootvorst, Gen. Antinck, King of Wurtemburg, La Tour d'Auvergne, La Virginite, Lord Anson, Lord Raglan, Othello, Prince of Orange, Prince of Saxe-Weimar and Princess Royal.

HYACINTHS IN SEPARATE COLORS.

We still have a few of these left in singles and doubles, which we offer as long as unsold at **$2.50 per 100; $20.00 per 1000** (worth $26 per 1000).

TULIPS.

SINGLE and DOUBLE.

Most of the varieties here offered are among the very best forcing varieties, especially for late or Easter forcing, viz.: Bizard Verdict, Couleur Ponceau, La Candeur, Yellow Rose, Lady Grandison, Duke of York, Rose Blanche and Count Leicester, at $5.00 per 1000; Cottage Maid, Joost van Vondel, Brutus, Pæony Red, at $6.00 per 1000; Tournesol, red and yellow, Gloria Sohs, Le Blason and Rosine, at $7.00 per 1000; Duc van Tholl, scarlet, and Standard Royal Silver, at $7.50 per 1000; Belle Alliance and Mariage de ma Fille, at $10.00 per 1000; Proserpine, at $12.00 per 1000; White Joost van Vondel and Rose Luisante, at $20.00 per 1000.

NARCISSUS.

Silver Phœnix and Grandis Maximus, at $15.00 per 1000.

SEED TRADE REPORT

PHILADELPHIA, PA.—W. Atlee Burpee & Co. announce in their wholesale price list for market gardeners, florists, and farmers, that they have secured the services of an assistant who for many years was employed in the best seed house in Germany, and that orders and inquiries addressed to the concern in the language of the Fatherland will be carefully attended to.

ST. PAUL.—The lateness of foreign crops this season is causing serious delay to the seedsmen who have a Southern trade. Importations are fully a month later than usual, while the slowness of freights on the railroads causes another delay of two weeks or more; consequently, Southern planters will necessarily be late in their first plantings.

The customs authorities have relented somewhat in their attitude toward importers, and by an order from the Secretary of the Treasury are supplying seedsmen with all the information possible regarding prices, with the reservation, however, that the Department will not fix prices for any one, but will give all information possible regarding them. This is a step, at least, in the right direction.

Recent callers were: W. H. Small, of Evansville, Ind.; and W. H. Grenell and A. T. Ferrell, of Saginaw, Mich.

VERITAS.

Alfalfa and Insects on Vine Seeds.

Editor Florists' Exchange:

We enclose herewith letter received from the entomologist of our State university in response to a clipping sent to Professor T. L. Lyon, taken from The Florists' Exchange, in relation to alfalfa helping to produce the insects that have affected the vine seed crops.

We questioned this item and sent it to the professor for his opinion, and you note his reply.

Western Seed and Irrigation Co.,
FRANK T. EMERSON,
General Manager.

Waterloo, Neb.

P. S.—We have never lost a seed crop of any kind from grasshoppers.—F. T. E.

(Letter referred to.)

Your favor of the 7th inst. addressed to Professor T. L. Lyon has been referred to me for reply. I have glanced over the newspaper clipping in The Florists' Exchange to which you refer me, and am confident that the correspondent has no grounds whatever for his assertion, since alfalfa is so entirely different from the cucurbs that the insect enemies of the two will be entirely different. In other words, insects which feed on the alfalfa will in no wise trouble the vines of melons, cucumbers, and squash; neither will the latter transfer their attention to the alfalfa. I cannot say so much, however, concerning the grasshoppers, which naturally become more numerous in alfalfa growing districts, since these are not confined to any one particular kind of plant, but rather are apt to feed upon all sorts of cultivated vegetation growing in the vicinity of alfalfa fields.

LAWRENCE BRUNER.

European Notes.

The position of the European trade as regards peas is becoming somewhat acute. Owing to the wellnigh incessant rains, it has not been safe to open the pea stacks for threshing; consequently, the full extent of the shortage, and the additional loss to be incurred in the picking, is only now becoming apparent. Every day has a fresh and disagreeable surprise in this direction, and deliveries are becoming almost unreasonably late.

Radishes, particularly those planted on fairly strong land, are almost equally troublesome and backward, but the yield, when ascertained, is not so disappointing. The same is true of carrots, particularly the short varieties; but the damp air which surrounds us on every hand makes the work of "bearding" the seed both tedious and difficult.

In other years it has often been possible to fill orders with strong growing, fully matured seed of the previous harvest. Owing to the almost total failure in 1901, this is not now possible, and the delay, which we all deplore, is inevitable.

The Douglas Spruce.

Editor Florists' Exchange:

I note in the Exchange of December 27 what Mr. Joseph Meehan says of the Douglas spruce. It occurs in all parts of California, though the type we have in this county is Pseudo-tsuga Douglasii Carr var. macrocarpa Engelman. In the central and northern parts of the State they have the specific type first described. For some reason botanists now list it as P. taxifolia Britton. Would they had changed the generic in place of the specific name! In the south it occurs only as a small tree, but northward it is often 15 feet in diameter, 300 feet high, ranging in columns 100 to 200 feet high before a branch appears.

I have a photo of the cones and branch of the Colorado type and it is quite different from ours. It occurs here from about 2,000 to at least 5,000 feet altitude. While scarce here, it is abundant in the central and northern sections.

About Acer macrophyllum; just why this is the "Oregon maple" I do not know, but it is commonly so-called. It occurs throughout the State in both the Sierra Nevada and Coast Ranges and in this country is our only maple It is one of four species in the North (three maples and one box elder) Here it is almost solitary—but few at least in a place—and runs from 10 to 30 feet. It grows in mountain canons and ravines, sometimes in the steepest

places. On last Thanksgiving Day I saw it in the canons when ascending Mt. Lowe, at about 2.000 to 3.000 feet, and the leaves had just turned a golden yellow, making it a beautiful sight It occurs in but a few local stations and is rare with us. Five hundred miles farther north it is a little more common. Wherever it grows there is some snow in Winter.

ERNEST BRAUNTON.

Los Angeles, Cal.

Raising Hollies from Seed.

Answering an Ohio correspondent who wishes to know how to raise hollies from seed, I would say that there are nursery firms here that raise these plants from seed. The berries are obtained when fully ripe, in early Winter. They are placed in a box and pounded with a rammer sufficient to bruise the pulp of all, after which they are set away to rot the pulp. It takes some time for the pulp to rot, but has taken place by Spring, when the seeds are washed free of pulp and are ready for sowing. The sowing may be outdoors, or in boxes indoors; but wherever it be, the seeds require a whole year to germinate. There will be no sign of seedlings until the following year.

Nurserymen sow nearly all their seeds outdoors in beds three feet wide, which admit of tending the seedlings, weeding, etc. without treading on the beds.

It is possible that were the seeds sown early, indoors, they might germinate quicker than when outdoors, especially were they treated to a soaking in hot water for a day, as is now often done with locust and other hard-shelled seeds; but I have not tried this plan.

Evergreens Near Cities.

In the report of the expert commission which recently examined Central Park, New York, appears many sensible observations concerning the trees and shrubs growing therein. Among other things referred to is the uselessness of planting coniferous evergreens near cities. This is practically correct, but I wish to call attention to an evergreen, which, in Philadelphia, has stood, and that very well, too, where other sorts have not. I refer to the Austrian pine. Whether it has just "so happened" I cannot say, but more than once has this tree appeared in a thriving condition when the appearance of others has been far from inspiring.

In the way of broad-leaved evergreens the euonymus, California privet, holly, box and aucuba stand very well, not objecting to city life as many shrubs do; and many fine specimens of these are to be seen in the closely-built section of the city. Very often it is the soil as much as the air that is at fault, which is often the refuse of rubbish heaps, clay from cellar excavations and similar non-suitable material. Given proper soil and freedom from proximity to leaky gas pipes, trees to rejoice us would often succeed those now it grieves us to see.

Flowering Grapes.

The "sweet-scented grape" of the trade is an infertile Vitis riparia, grown and planted by those who want a rapid growing vine to give shade and sweet flowers, but not fruit. The question has been asked me whether a seedling of Vitis riparia would not be a sweet-scented grape. Certainly it would, and the Concord grape is sweet-scented; but to be the sweet-scented grape of commerce it must be one which bears no fruit. The seedlings of V. riparia may or may not be fruit-bearing. When we sow seeds of any of our native species, V. riparia, æstivalis, cordifolia, cinerea, or labrusca, we may get lots of plants that will be infertile, and, as these are all sweet-scented, I know of no reason why they should not be just as good for all purposes as are infertile V. riparia.

This character is peculiar to the American grape. Seedlings of the European, Vitis vinifera, all bear fruit, but when we sow seeds of our native ones we take our chances on barren sorts.

By watching the behavior of a wild grape vine, noting in Spring if very fragrant and then in Summer if fruit-bearing or not, one could soon possess himself of a lot of cuttings of a flowering grape.

English Morello Cherry.

Our common pie cherry, Early Richmond, is seen everywhere, as it certainly deserves to be, being a sure cropper and bearing abundantly. But it is rather surprising the English Morello is not oftener seen in collections, being a tart cherry of much excellence, suitable for the same purposes for which the Early Richmond is grown. The English Morello is the pie cherry of England, and is usually seen trained to walls. Both because of the climate, and its being a late sort naturally, it is not uncommon to see the fruit hanging on the trees in September and October, their tartness helping to prolong their keeping period. As this tree grows with us it is less spreading than the Early Richmond, making a more shapely tree and having thicker wood. The fruit hangs on the tree a long time, becoming when ripe of an almost black color. Nurserymen are so much accustomed to thinking only of the Early Richmond in connection with the pie cherry that they overlook all others. Many a customer who asks for a pie cherry would be better satisfied, perhaps, in the end with the English Morello, and this one should be added to their lists of sorts available.

Early Flowering Shrubs and Vines.

With Midwinter on us, as it is at this time, we may be expecting soon to see Spring announced by the appearance of a few of the flowers on those early shrubs which show impatience with cold weather. There come to mind the Lonicera fragrantissima and L. Standishi, Chimonanthus fragrans and Jasminum nudiflorum as being of this class of shrubs. After New Year's these shrubs advance their flower buds rapidly, and with a week or two of temperature above freezing they are in bloom. The loniceras are not vines, but shrubs, though of a somewhat straggling nature, which, however, is easily overcome by pruning. They approach an evergreen character closely, and in well-sheltered positions may be classed as evergreen. These positions are where the plants should be placed if to realize the pleasure of their early flowers. Frequently, in such spots, these shrubs are in full display in February; and when in an open place March often finds them in flower. The blossoms are yellowish-white and pleasantly fragrant.

The Chimonanthus fragrans is known as the Chinese allspice. It is a great favorite in the South, where large bushes, when in flower, pervade the air with sweet odor for a great distance around. Though quite hardy in these parts, it is not very often met with, because it will persist in flowering before Winter is over. Let a few mild days come in late Winter and out come the flowers, only to be caught by the freezing which is pretty sure to follow. As a pot shrub it is grand. Its yellow flowers, though not large, are powerfully scented, and the odor of one of them is sufficient for a room. It is difficult to advise where best to plant a shrub of this kind. If in a sheltered place, the flowers are hastened in their opening. If two plants could be had, one in an exposed place where its flowers would be retarded, the other in a sheltered one, the chances would be good for enjoying one or the other.

The Jasminum nudiflorum is the yellow-flowered jasmine, which blooms before the leaves appear. In severe Winters it holds its flowers back very well until the cold gives way to the warmer days of Spring. It is half vine and half shrub. When in vine shape it is the prettier. Trained on low trellises near a dwelling it makes an admirable display.

It remains to be said that shoots of these vines and shrubs placed in a vase of water in a warm room flower quickly; and where freezings are anticipated which would destroy the blooms, it is almost as satisfactory to have the shoots in flower indoors as on the bushes outside.

JOSEPH MEEHAN.

New Castle, Ind

The South Park Floral Company narrowly escaped the loss of nearly $8,000 worth of rose plants since the beginning of the cold spell. Lime formed in a feed pipe from the boilers and cut off the supply of heat, and when discovered the temperature was only a few degrees above the freezing point. Fortunately, an emergency connection with another boiler had been made the day before.

BRIEFS FOR BUSY FLORISTS

VASE PLANTS.—When the planting out season arrives, it is generally apparent that there is a shortage of plants suitable for placing around the edges of vases, veranda boxes, etc., and a little care about such stock should be taken now, if this has not already been done. The ivy geraniums should be gone over, and every cutting taken that is available; also the trailing abutilons, both green and variegated. Where the double sweet alyssum is grown in odd corners, a batch of cuttings from them should be taken, and they will make nice suitable plants for working in by the time they are needed.

FANCY PELARGONIUMS.—Do not allow these to become root-bound while they are in the small-sized pots. Shift them along as fast as is required; and use a moderately rich soil when potting them. Fumigate with tobacco regularly to suppress green fly; and keep the plants growing by holding them in a warm house.

BEDDING GERANIUMS.—From now on we cannot afford to slight these, the most popular of all Summer flowering plants. Such of them as were rooted last Fall are now in three-inch pots, and a cutting can be taken from the most of them, which should make a fair-sized plant by the first of June.

FUCHSIAS.—This is about the time to take the main stock of cuttings of these, where the plants are wanted for Spring sales.

Loomis, Cal.

The rooted cutting business of the California Carnation Company is in a most satisfactory condition. In the last six weeks the company has shipped over 276,000 rooted cuttings Next year two millions will be grown

THE FARQUHAR ROSE

A MAGNIFICENT FORCING PLANT FOR EASTER.

AWARDED THE SILVER GILT MEDAL OF THE MASSACHUSETTS HORTICULTURAL SOCIETY.

Certificated by the Horticultural Society of New York.

In this new Rose we have at last a worthy companion to the Crimson Rambler, bearing beautiful clusters of pink double flowers.

THE FARQUHAR ROSE is a vigorous and rapid grower. Many of the stock plants, cut down for propagation last July, and then not a year old, have since developed shoots twenty to twenty-two feet in length.

THE FARQUHAR ROSE has glossy, bright green foliage, which does not drop, and retains its lustre until cut down by severe frost in November or December, a feature which makes it most valuable for covering trellises, pillars, summer houses, fences and rocks. It is perfectly hardy and does not require protection during winter.

THE FARQUHAR ROSE bears magnificent clusters of bright pink double flowers on long stems, which are most serviceable for vases and table decorations, while the individual flowers are useful for bouquets and designs. As an Easter plant, its color alone gives it a decided advantage over the Crimson Rambler.

Mr. Jackson Dawson, of the Arnold Arboretum, who raised the FARQUHAR ROSE, describes it as follows: "It can be best described as flowering perfectly double in clusters, the individual flowers being similar in size and color to the flowers of Carnation Melba. The plant is of rapid growth, stocky, trailing habit, with bright, glossy foliage. All who have seen it pronounce it something extra. In commenting upon it Mr. W. R. Smith, of the United States Botanic Garden, Washington, D. C., says that it is a rose for the millions. Prof. R. B. Watson, of the Bussey Institution, and many private gardeners, have declared it a great success."

TESTIMONIALS AND PRESS COMMENTS:

MR. W. R. SMITH, CURATOR UNITED STATES BOTANIC GARDEN, WASHINGTON, D. C., writes:

"I saw your new Rose, 'The Farquhar,' when it first bloomed with its raiser, Mr. Jackson Dawson, of the Arnold Arboretum, and was so pleased with it that I at once pronounced it *a rose for the people.*"

DORCHESTER, MASS., May 10, 1902.

Gentlemen: I have made a specialty of forcing Roses for Boston Market for many years, especially Crimson Rambler, which I have considered the finest novelty of recent years. Your new Rose, "The Farquhar," is a better thing than the Crimson Rambler. Its foliage and its beautiful rose-pink color are unequaled in any climbing rose. I consider it the finest floral novelty in existence.

Yours very truly,

LAWRENCE COTTER.

MILTON, MASS., May 10, 1902.

Gentlemen: "The Farquhar Rose" is a fitting companion to the Crimson Rambler. So many worthless roses have been sent out with the name Rambler that this name has fallen into discredit. Your Rose is a true hardy climber, bearing large trusses of beautiful deep pink double flowers, with a fragrance different from any other rose I know.

Yours very truly,

GEORGE M. ANDERSON.

THE FLORISTS' EXCHANGE, Vol. XIV., No. 23, says: "This Rambler is the largest yet, being quite two inches in diameter, very double, and of the liveliest bright pink imaginable; borne in large clusters and with the individual flowers on longer stems than those of Crimson Rambler, so that they could be used in design work. It will make a magnificent Easter plant, and its vigor, hardiness, etc., make it a sure winner for outside."

THE AMERICAN FLORIST, Vol. XVIII., No. 728, says: "At the exhibition in Horticultural Hall, on Saturday, May 10, R. & J. Farquhar & Company showed plants in bloom of the new Farquhar Rose, and received therefor a silver gilt medal. This Rose, which was raised by Jackson Dawson, is the result of a cross between Rosa Wichuraiana and Crimson Rambler. It is of similar habit to the latter, but the deep pink flowers are larger and it has a slight fragrance.

AMERICAN GARDENING, Vol. XXIII., No. 387, says: "The attraction of the show (Massachusetts Horticultural Society, Boston, May 10, 1902), however, was the new Farquhar Rose. This is a new pink Rambler, raised by Jackson Dawson of the Arnold Arboretum, from whom the whole stock was purchased by Messrs. Farquhar. The color of the flowers is brilliant rose, the clusters are similar to those of Crimson Rambler, the florets, however, being larger and more double. There is a slight fragrance. The award of a silver gilt medal was thoroughly deserved and, measured by the position it is bound to occupy in the near future, might even have been higher."

STRONG PLANTS from 3½-inch pots, $50.00 per 100; 25 or 50 plants at 100 rate. Delivery will commence April 1, and orders will be filled in rotation as received.

R. & J. FARQUHAR & CO., 6 and 7 South Market St., **Boston, Mass.**

Buffalo.

While the scarcity and high prices f fuel have this Winter no doubt vorked adversely to putting on ordiiarily necessary heat, extreme condiions, as in other places mentioned, are iardly our share, as anthracite is readly obtainable at about $6.00 per ton, nd soft coal at $5.00.

Captain James Braik, of the parks, is gain laid up from an accident; this ime from the kick of a horse. This is he third occurrence within six months f a similar accident.

H. A. Meldrum Co., a department tore firm here, who gave a free chrysnthemum show last Fall in the inerests of their advertising department, eem to be pleased with the results of ame to the extent of announcing to he craft an intention to repeat such iext Fall, and ready to offer not less han $1,000 for prizes in cash.

The Buffalo Florists' Club has again gotten down to settling on a meeeting ight on the second Tuesday of each month, which will be followed from his date. A meeting was held on Tuesday evening of this week in Kasting's store. In the absence of Presient Braik, Vice-President Fred B. Lewis, of Lockport, occupied the chair. Action was entered into regarding the ecent increased express rates on cut lowers and co-operating in the movenent elsewhere inaugurated by appointing a committee consisting of William Scott, Charles H. Keitsch and William F. Kasting to promote intersts therein. The intention of the Melrum Co. in reference to giving a hrysanthemum show next Fall, gained he approval of the members present, nd it is expected that a co-operation f interests will result. Resolutions of ympathy on the recent death of S. B. Smiley, of Lancaster, a club member, vere acted on, and ordered to be enered on the minutes. Visitors at the neeting were Messrs. Ringier and Bunard.

QUESTION BOX

Rhubarb Roots.

(14) Can rhubarb roots forced this Winter be used a second time?
S. E. B.

—Rhubarb roots, after having been forced one season, are not utterly destroyed, and if planted outdoors as soon as the weather is warm enough they will again get established; and be useful for cutting from, though no cutting should be done the first Summer.

Hen Manure.

(15) Can hen manure be used for growing pansies out-of-doors, like any other fertilizer? Can you give me an estimate of how much would be required for a bed containing 350 square yards?
S. E. B.

—Hen manure is a good fertilizer, but it should be used carefully. We would first mix the manure with its equal, in bulk, of soil, and let it lie in open shed until the Spring; then of the compost thus made, spread almost two inches in thickness over the surface of the bed, and fork in lightly. It would take two big wagon loads of the compost to cover the bed in question; and if the soil is already in fair tilth, a thinner covering could be afforded.

Paterson, N. J.

Edward Sceery has again been appointed to a place on the Board of Park Commissioners. The term is five years. Mr. Sceery has completed one term to the satisfaction of the people of Paterson.

Mrs. Kirberg recently handsomely decorated the residence of Mr. Bamford, one of the large silk manufacturers of Paterson.

Hansen, of Ramseys, and the Eslers, of Saddle River, supply Robert Smith, the Market street florist, with three and one-half inch Mrs. Lawson carnations.

The American Carnation | How To Grow It

A Standard Work Written by Request of the Publishers of the Florists' Exchange.

By C. W. WARD

THE CARNATION in America has reached a status and importance in the florist's industry possessed by no other flower of modern times, and a practical work on the subject of the cultivation of the plant has become an urgent necessity. This want is fully and completely met in the present volume, which furnishes the results of years of actual experience of the author, who is recognized as being among the foremost of carnationists in America. The scope of the book will be gleaned from the subjoined table of contents:

History and Development of the Carnation—The Carnation in America—The Commercial Importance of the Carnation Industry—The American Carnation Society—Use of Carnations as a Decorative Flower—General Greenhouse Culture—Soils—Manure and Fertilizers—Propagation and Shipping of Young Stock—Treatment of Young Stock preparatory to Planting Out—Field Culture—Lifting and Planting Carnations from the Field—Treatment after Benching—Picking, Packing and Shipping Carnation Flowers—Insects and Preventives—Diseases and Injuries—Packing and Shipping Field-grown Plants—Forcing Houses for Carnations—Bench Construction—Sub-irrigation—Heating Carnation Houses—Carnations for Summer blooming—Bedding and Hardy Carnations—Carnations for Pot Culture—Raising Carnations from Seed—Cross breeding and Fertilizing—Varieties—Sports and Variations—The Ideal Carnation—Traits and Peculiarities—Various Classifications of the Carnation—List of Varieties for Different Localities—The Future of the Carnation—Its Commercial aspect and Prices—Who shall engage in Carnation Growing—Does it Pay to do things Well—Calendar of Operations—Carnations in California, Canada, in the West, the East, the South.

It will at once be seen that a work of this nature should be in the hands of every florist and others interested in the subject who desire to keep abreast of the times, and to make the growing of carnations, by the most modern methods, a profitable part of their business.

The Book is profusely illustrated by original engravings from life made specially for this work, with four colored plates. Handsomely printed from large, clear type on fine enameled paper. Quarto, cloth. Price, $3.50.

Mention the Florists' Exchange when writing.

FOUNDED IN 1888.

THE FLORISTS' EXCHANGE

A Weekly Medium of Interchange for Florists, Nurserymen, Seedsmen and the Trade in general

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter

Published EVERY SATURDAY by

A. T. DE LA MARE PTG. AND PUB. CO. LTD.
2, 4, 6 and 8 Duane St. New York.
P. O. Box 1697. Telephone 3766 John.

REGISTERED CABLE ADDRESS:
Florex, New York.

YEARLY SUBSCRIPTIONS.

To United States, Canada and Mexico, $1.00. To foreign countries in postal union, $2.00. Payable in advance. Remit by Express Money Order, draft on New York, Post Office Money Order or Registered Letter. The date on the address label indicates when subscription expires.

BINDERS.

The publishers can supply binders which will hold the papers for one complete volume, keeping them in perfect order for ready reference. Price, postpaid, $1.00.

ADVERTISING RATES.

Per inch, $1.25. Special positions extra. Send for Rate Card, showing discounts on continuous advertising.

For rates on Wants, etc., see column for classified advertisements.

Copy must reach this office not later than Thursday to secure insertion in issue of following Saturday.

Orders from unknown parties must be accompanied with cash or satisfactory references.

ILLUSTRATIONS.

Electrotypes of the illustrations used in this paper can usually be supplied by the publishers. Prices on application.

BOOKS.

The publishers of The Florists' Exchange are headquarters for all standard books pertaining to the Florist, Nursery and Seed Interests. Send 2c. stamp for complete descriptive catalogue.

The Bureau of Plant Industry, Department of Agriculture, Washington, D. C., has compiled and issued a list of American varieties of vegetables for the years 1901 and 1902. The manuscript was prepared by Mr. W. W. Tracy, Jr., assistant in Botanical Investigations and Experiments, who deserves great credit for his careful and painstaking labors.

Bertemann Bros., Indianapolis, Ind., issue a neat little memorandum book which, in addition to serving that purpose, instructs recipients on the several stocks obtainable at different seasons of the year from the firm. It is a unique and useful way of advertising.

THIS WEEK'S SUPPLEMENT.

Ulmus Americana.

The American elm, Ulmus americana, has long been recognized as one of the noblest of native trees. Other trees grow as large, but none makes the grand appearance of this elm. Even in its own genus none approaches it in general merit. In Pennsylvania the only other species native to the State is U. fulva, well known as the slippery elm. Its growth is not at all like that of U. americana. The illustration is a fair type of the way the latter branches. There is, generally, a solid trunk, sometimes 4 to 5 feet in diameter, and then a divergence of branches. The trunk apears to stop suddenly, the huge branches—trunks in themselves—taking its place.

The illustration is of a tree on the grounds of Messrs. Ellwanger & Barry, Rochester, N. Y. This specimen was planted by nature, and was already a large tree in 1840, when the land on which it stood was purchased. It stood at that time in the crotch or "V" of a rail fence, in the center of the division line between two pieces of property, and thus had escaped the axe. Since then, it has grown considerably, its present dimensions being as follows: Girth at 2 feet from the ground, 13 feet; girth at 7 feet from the ground, 15 feet 1 inch; height, 78 feet; spread, 80 feet 4 inches.

It may be 125 to 150 years old. It branches 7 feet from the ground, having seven main boughs with numerous large auxiliary ones. At present its umbrageous arms shade the business office of the nursery. Its girth and height, while not extraordinary, are nevertheless much beyond the dimensions of the average elm, and its graceful beauty, whether revealed in its naked spray in Winter and its bourgeoning buds in the Spring, or when its foliage is stirred by the passing Summer breeze, is ever a renewed delight to all who may perceive in a majestic elm what Michaux has termed "the most magnificent vegetable of the temperate zones."

In the vicinity of Philadelphia, where this species grows wild, it is always, or nearly always, found in low ground, not a wet place, but flat, and with deep soil. These trees are more spreading, though of the same pleasing outline. It is more common than the Ulmus fulva, which is to be seen but occasionally, and usually along the margins of creeks.

As an avenue tree the American elm has been much planted in parks, and still is to-day. In Fairmount Park, Philadelphia, a long line has been set skirting the drive along the border of the Schuylkill River, which in time will make a grand appearance. In New England this tree has been so much planted for shade, besides being native there, that New England and the elm seem to belong one to the other.

When planting this tree its great size, when full grown, must be remembered, or it may become decidedly out of position. Surroundings have much to do with this. Take the tree illustrated, for example. It is over 70 feet in height, over three times that of the cottage it fronts, yet it will strike no one as being out of place. Probably, in its younger stage, when its branches obscured the house, it may have appeared less pleasing than now.

Other native elms, less often met with in cultivation than they should be, are: U. racemosa, alata and crassifolia. Both racemosa and alata are interestingly corked, the bark of alata being arranged in somewhat winged ridges.

Ulmus crassifolia is a small-leaved species, native of Texas and other southern States, and, while all the other species named ripen their seeds in early Spring, this one does not until the very last thing in Autumn. In this respect, it keeps company with a Japanese species, U. parvifolia, which, curiously, behaves precisely in a similar way.

The early ripening seeds require sowing as soon as gathered, to be successful in getting them to germinate. Following a good season, the seedlings will be a foot in height by the time growth for the season is over.

JOSEPH MEEHAN.

AMERICAN CARNATION SOCIETY.

Varieties Registered.

By P. J. Fay (Gardener to Dr. Wm. Seward Webb), Shelburn, Vt.

MRS. WM. SEWARD WEBB.—Color white, a sport from Mrs. George M. Bradt that has not reverted in three years and therefore is considered as fixed and a distinct variety. Flower very large, the original being small in comparison; very double and deeply fringed. More healthy and vigorous than Mrs. Bradt, with a longer-stemmed flower that is fragrant.

By Henry Eicholz, Waynesboro, Pa.

TIGER.—Color orange, striped pink; size 2½ to 3 inches; calyx very strong, seldom splitting; type that of Mayor Pingree; habit stiff, no supports being needed; foliage, a dark green; an early and continuous free bloomer.

ALBERT M. HERR, Secretary.

Post Check Currency.

The advantages of the Post Check Currency system were presented to the House Post Office Committee on January 5, by Mr. C. W. Post. The members of the committee were greatly interested, and several of them unhesitatingly declared themselves to be friendly to the measure. At the conclusion of the hearing the matter was referred to a sub-committee consisting of Hon. H. H. Bingham, Hon. J. H. Bromwell and Hon. W. S. Cowherd for further consideration and report and this sub-committee is now taking the matter actively in hand. Those who favor an expeditious, safe, and economical plan of sending money through the mails, at a minimum cost to the sender—and that means all in the trade—should address a letter to either of the gentlemen named, at Washington, D. C., urging the adoption of the Post Check Currency system.

St. Louis World's Fair.

Announcement is made by the executive committee of the World's Fair to be held in St. Louis in 1904, that Frederic W. Taylor, who has been acting chief for the past year, is to be Chief of the Department of Horticulture dating from January 1. This, in addition to the appointment made more than a year ago by which Mr. Taylor has been and is to continue Chief of the Department of Agriculture.

It seemed desirable to have these two great departments handled as a harmonious whole, since the buildings to house them are located upon and occupy exclusively a large and high hill in the most commanding position on the Exposition grounds.

The building devoted to horticulture will cover six acres and the one devoted to agriculture twenty acres. Surrounding these two buildings are forty-one acres of ground, the entire area of which has been placed in the hands of the chief for planting and treatment.

Applications have already been received for outdoor space to such an extent that it is assured that the exhibit will be by far the largest and best ever made at any exposition.

Indoor space has also been applied for in a thoroughly satisfactory amount, and it is likely that within sixty days there will be applications on file for the entire area.

The plans of the two great buildings are well under way and bids will be called for upon one of them within the next ten days, the other being treated a little later. As soon as these plans are ready to be photographed copies will be sent to the agricultural and horticultural press in order that those interested in these great industries may know with regard to the splendid provisions being made for them in the exposition.

A writer in the Rosen-Zeitung for December last states that the La France rose seeded with him, and that from the seed secured he grew three seedling rose plants, all of which, however, were of little value. He asserts that La France may not be infertile, as is claimed by some.

Obituary

Mrs. Kunigunda Krick.

Mrs. Kunigunda Krick died suddenly of heart disease on Saturday, January 17. She was the widow of Charles M. Krick, one of the pioneer florists of Long Island, and a sister of George Zeiner, florist, Flatbush, N. Y.

After her husband's death, which occurred on March 19, 1895, Mrs. Krick, until very recently, continued the florist business at Central place, Brooklyn.

The deceased lady was born in Germany, May 6, 1829. She had never been sick for a single day, and on the morning of her death went about her household duties as usual. Two sons, William C., of 1287 Broadway, Brooklyn, the inventor of the florists' letters, and other trade accessories, and George M. Krick, a florist, also two daughters, survive her. Interment was in Evergreens Cemetery on January 20.

John Lydon.

John Lydon, one of the best known orchardists in Geneva, N. Y., died Monday, January 12, 1903, from enlargement of the heart. He had lived in Geneva over fifty years. Mr. Lydon was born in Ireland and came to America when a young boy. Early in life he secured work in a nursery, and several years ago became connected with the experiment station. His work was mostly with fruit trees. He had general supervision of the orchards of the station. He was also a skillful exhibitor and was in charge of the various exhibits that the station sent to the fairs and horticultural meetings. His last work of the kind was at the meeting last week of the New York State Fruit Growers' Association in Buffalo, where he had charge of the exhibit made by the station. He leaves a widow and nine children.

John S. Murray.

The late John S. Murray, the pioneer florist of Montreal, was born in Rattray, Perthshire, Scotland (not in Alyth, Forfarshire, as has been so often stated), in 1833. He came to Montreal in 1854, working the first few years as a private gardener. In 1861 he started the present store at 822 Dorchester street, in connection with his first greenhouses. These soon becoming inadequate to meet the demands of his growing business, in 1877 he purchased a block of ground in Côte street, Antoine (now Westmount), and built what was then the finest range of glass in Canada. To this he added the dwelling in which he resided at the time of his death.

Mr. Murray was known as a quiet, unassuming man, thorough-going, home-loving, attentive to business, honorable and scrupulous in all his transactions, and was highly respected by all who knew him. His pleasant personal appearance, gentle manners and genial smile made him a great favorite with children, of whom he was passionately fond, and to many the pleasantest as well as the most lasting memories of Mr. Murray, will be of him in the midst of a crowd of children at the Gardeners and Florists' Club's picnics, his hands and pockets full of cakes, candies and other such things as children love, advising, superintending, distributing and adjusting contests. To any who attempted to attract him to other objects his invariable reply was, "Leave me alone; I'm happy."

P. A. Peterson.

P. A. Peterson, of the firm of P. A. Peterson & Son, founder of the Rose Hill nurseries near Chicago, died on Monday, January 19, 1903. He was born in Sweden seventy-five years ago. He acquired the groundwork of his profession in his native country, and was for many years employed in the establishment of Louis Van Houtte, Belgium. Mr. Peterson landed in America in 1851, first working for various firms in the East, and latterly settling in Chicago in 1853. He bought the first acre of ground for his nurseries the first year he arrived. These nurseries now contain 500 acres. One of his specialties was peonies, of which the firm has an extensive collection, and when these plants were in flower invitations were extended to many friends in Chicago and elsewhere to witness the gorgeous array of bloom then presented. On three occasions Mr. Peterson proved a delightful host. He was the first nurseryman in Chicago to move large trees, and all of the city's parks and boulevards, as well as those of other places, contain his products. In 1895, William A. Peterson was admitted to the firm, and soon thereafter assumed the management of the concern.

The deceased was an enthusiast in his profession, was widely read, and highly esteemed by the craft for his many sterling qualities.

Though not a politician, Mr. Peterson served as a trustee of Jefferson many years, and most of the good roads and bridges in that district are due to his efforts. Peterson avenue, which was named for him, he opened for a distance of three miles at his own expense. As a philanthropist his name is known from one end of Sweden to the other. Mr. Peterson was for many years a member of the Union League and Germania clubs, and of horticultural societies at home and abroad. In 1894 he was made a Knight of Vasa by the King of Sweden. Mr. Peterson leaves a widow and one son.

Reflections on Current Topics.

MR. EDITOR: I have just read your awful arraignment of authorities responsible for the attempt to form what you style the "alleged Peony Association of the S. A. F.," and beginning "harking back." It seems to me that article should have commenced with the words "Barking back," for, evidently, those whom you call in question are "up a tree," where for the time being they remain silent and shivering like the guilty urchin treed by the faithful canine of the farmer.

Who'd a thought of it, that in her old age the S. A. F. should seek to contract a "morganatic" alliance with such an antiquated anthropoid as the peony? Had the S. A. F. wished to wed with, say, the association of aristocrats of the vegetable world, and flung herself away on them, one would not have been so astonished at her antics; but the plebian peony! Fie! And to think she would throw down her best friends, the commercial men; lose her faith in their honesty, after these many years of unselfish support, for her unsophisticated stripling, "the ornamental horticulturist." Well, that beats the band!

From what I hear, however, the peony specialists only laugh at the old girl's capers, and are waiting, like yourself and the other recognized and respected members of the trade, to hear what her father, the president, thinks of her cantrips. Has she got beyond him? Or is he a believer in the axiom that "silence is golden," when to speak could neither explain away nor expiate?

This, it looks to me, is a clear case of the tail wagging the dog, and a straggly sort of a tail at that. Like the fox terrier's, a caudal appendage of this kind is far better excised than permitted to dangle. The president should Carrie-Nation it at once, for his own credit, and that of the "good old S. A. F.," the pet of post-prandial horticultural orators, and the pride of the prudent and practical craftsman.

I met a Boston man the other day, and he informed me they had a rousing meeting in that city on Saturday last concerning express rate matters. He showed me a local newspaper containing a resolution adopted at that meeting, in which the advance on rates was respectively represented as being, among a few other things, discriminating, arbitrary, unreasonable, unwarranted, unprecedented, and oppressive. He also told me that, failing the force of these adjectives to move the express companies either to tears or to take off the added 50 per cent., the S. A. F. will appeal to Congress for a special bill regulating the rates of transportation. He likewise stated that a Boston retail florist, in an interview, had advanced the remark, that the express companies needed all they got for the excellent service they rendered. I was glad to hear that the S. A. F. had the courage to threaten these coin-corralling corporations with the law. But if there's many more holding the view of that retailer, what's to be the result? "A house divided against itself" can accomplish but little. This is surely a case for the utmost harmony and unanimity of purpose.

However, am somewhat of the opinion of ex-President O'Mara. Something stronger than mere words are wanted to take the feet from these common carriers. Strike from under them the props they put forward in support of their action. By material proof show that their assertions are erroneous. Tell them, and prove it, that the work they do can be performed for the old rate and still at a profit to themselves. Flaunt in their faces unpaid, justifiable claims arising out of the very want of the extra care and service they assert they give; above all, do as the Exchange and Mr. O'Mara says: Divert your traffic, if you can, to some other mode of conveyance; for, like ourselves and the S. A. F., the express companies will begin to think, if some unfavorable condition comes up to touch their pocketbooks; when anathemas and word-slinging by way of condemnation, censure, or advice, pass them (and us) as the idle wind. This is a case for action, not words.

DAVID RUST.

Secretary Pennsylvania Horticultural Society.

I see by the papers that Alexander Dowie, of Zion, with 3,000 of his followers, is about to begin a campaign on Milwaukee with a view to the city's conversion to Zionism. That campaign will last till August. Probably "Lastman" in his present condition might find consolation by then becoming a Dowieite, and thereby secure stronger caustic correctives than he evidently possesses, in hymn and prayer, for the salvation of JOB.

Presentation to Secretary Rust.

A very pleasant happening occurred at the meeting of the Pennsylvania Horticultural Society, held Tuesday evening, January 20, when its secretary, David Rust, was presented with a handsome sum of money in recognition of his valued services rendered to the Society. A committee had been appointed to take the matter in charge, consisting of Messrs. John McCleary, chairman; Henry F. Mitchell, treasurer; Edwin Lonsdale, secretary, and Messrs. William Robertson, William Kleinheinz, George Morrison, Thomas Long, and Gordon Smirl.

The presentation was made by Robert Craig in one of his felicitous speeches. In the course of his remarks Mr. Craig said that, owing to the burning down of the Horticultural Hall in 1893, the Society had unfortunately fallen behind financially on account of the expense of renting halls for exhibition purposes, while the new hall was in process of building. During those years the lot of the secretary was not a pleasant one, as he had to bear the brunt of all complaints. Now, however, the Society was free of debt, and things were going smoothly. He commented upon the work of Secretary Rust during the exhibitions and complimented him on his faithful services in the most trying times, his unfailing courtesy and obliging disposition. Mr. Craig's remarks were loudly applauded.

Mr. Rust, in a few well-chosen words, returned thanks for the unexpected testimonial, adding that such a presentation was undeserved, as he had only done his duty. No one but he who holds the position of secretary could understand fully the true value of such a token. If a secretary did his duty faithfully to his society, he was sure to displease some one at times; but he (the speaker) was pleased to see that his past efforts had been appreciated. This material recognition of his services would prove an incentive to greater endeavor.

The list of subscribers was headed by Mr. James W. Paul, Jr., president of the Society; Mr. Sidney W. Keith, treasurer, and such prominent members as Mr. C. Hartman Kuhn, Mr. Beauveau Borie, Mr. James M. Rhodes, Mr. C. L. Borie, Jr., Mrs. George W. Childs-Drexel, Mr. George D. Widener, Mr. James W. Pepper, and others.

Mr. Rust is now serving his eighth year as secretary of the Pennsylvania Horticultural Society, having been elected to the office in December, 1895.

FIRES.

FLEMINGTON, N. J.—Fire in the greenhouses of L. Bonnot, on January 13, was fortunately discovered and extinguished before much damage was done.

ROSLINDALE, MASS.—The greenhouse of James I. Little was recently injured by fire to the extent of $100. The blaze was caused by a defective flue.

CHANGES IN BUSINESS.

LAWRENCE, MASS.—Edward Dowding will start in the florist business here.

ROCKFORD, ILL.—The R. B. Van Valkenburgh nursery business has been purchased by H. O. Hinkley, florist, who intends to also engage in landscape gardening.

CARNATIONS

American Carnation Society.

The American Carnation Society was incorporated at Albany, N. Y., on January 19 last, to increase general interest in the cultivation and use of the carnation. The directors are: W. G. Bertermann, of Indianapolis; Fred H. Lemon, Richmond, Ind.; Albert M. Herr, Lancaster, Pa.; Fred Dorner, Jr., Lafayette, Ind.; William Scott, Buffalo, N. Y.; W. J. Vesey, Fort Wayne, Ind.; Charles Willis Ward, Queens, N. Y.; William Swayne, Kennett Square, Pa., and Eugene Dailledouze, Brooklyn.

Premium List for Brooklyn (N. Y.) Show.

The schedule of premiums for the Brooklyn exhibition of the society, February 19 and 20 next, has been issued by Secretary Herr. The show will be held in the Art Building, 174 Montague street, Brooklyn, N. Y., which is but a short distance from the meeting room of the society, the Germania Club House, 120-2 Schermerhorn street. All exhibits should be addressed to William Plumb, manager carnation exhibition, 174 Montague street, and should be sent prepaid.

This year no papers will be read before the society; instead, the question box will be called into requisition after completion of the formulation of a new constitution and by-laws, consideration of which, it is expected, will consume the major portion of the sessions of the society.

Varieties shown for a certificate of merit must have been bloomed not less than three years; and not less than fifty blooms must be shown. An entrance fee of $5 00 is charged for each variety, which must be properly labeled with the society's card. Cards can be had from the secretary.

The preliminary certificate can be competed for by two-year-old seedlings, twelve blooms or more to be shown; and an entrance fee of $2.00 paid for each variety.

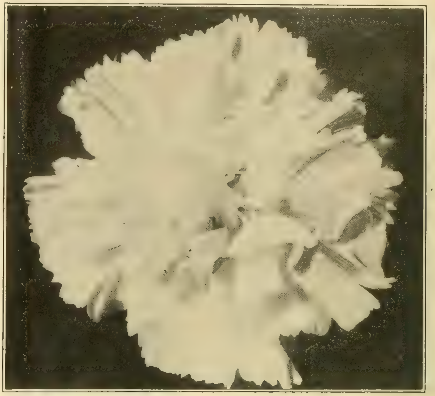
In Class A, first and second prizes of $12.00 and $6.00, respectively, are offered for one hundred blooms in each case of white, light pink, dark pink, scarlet, crimson, yellow variegated, white variegated, and any other color.

In Class B, premiums of $6.00 and $3.00 will be awarded for fifty blooms, in the colors named above; also in class C, prizes of $3.00 and $1.50 for twenty-five blooms, in the same colors.

The special premiums offered include the following:

For collection of carnations, not less than ten nor more than fifteen varieties, and not less than fifty nor more than one hundred blooms of each variety in a vase, arranged for effect, buds and carnation foliage to be allowed; undisseminated varieties admissible; open to all growers who are members of the American Carnation Society: First prize, Brooklyn Institute Special, $50.00; second, $30.00; third, $20.00. The prizes may be awarded in silver plate, bronze, or art glass, at option of winner.

VASE OF CARNATION WHITE MRS. THOS. W. LAWSON.
Grown by C. H. Allen, Floral Park, N. Y.



SINGLE FLOWER OF CARNATION WHITE MRS. THOS. W. LAWSON.

For collection of carnations, not less than six nor more than ten varieties, and not less than fifty nor more than seventy-five blooms of each variety in a vase; arranged for effect, buds and carnation foliage allowed: open to all growers having not more than 25,000 feet of glass devoted to carnations: First, Ward silver cup, value $25.00; second, $10.00. Undisseminated varieties not admitted.

For collection of carnations, not less than five nor more than eight varieties, and not less than twenty-five nor more than fifty blooms of each variety in a vase, arranged for effect, buds and foliage allowed; open to all growers having not more than 15,000 square feet of glass devoted to carnations, undisseminated varieties not admitted: First, Straus silver cup, value, $25.00; second, Loeser vase, value $15.00.

The American Carnation Society's special prizes are: $25.00 silver cup, for best exhibit of two hundred blooms of carnations, any variety, any color; undisseminated varieties admissible.

For best collection of single blooms of carnations, not more than one bloom of any variety to be shown; all to be correctly named or numbered; undisseminated varieties admissible: First, $15.00; second, $10.00.

The Lord & Burnham Company, of Irvington and New York City, offer first and second prizes of $30.00 and $20.00 for the best collection of commercial carnations, varieties to have been introduced to commerce prior to 1902; collection not to exceed ten varieties, fifty flowers of each variety to a vase.

Chatterton Warburton, Fall River, Mass., offers $25.00 in cash to the party showing the best vase containing fifty bloms of variety Cressbrook, their own growing.

Peter Fisher, of Ellis, Mass., offers first prize of $12.00; second of $8.00, and third of $5.00 for vases of fifty blooms of variety Governor Wolcott, grown by the exhibitors.

The Lawson gold medal will be given for the best vase of one hundred blooms, any variety, any color; the Lawson silver medal for the second best vase of one hundred blooms, any variety, any color; the Lawson bronze medal for the third best vase of one hundred blooms, any variety, any color.

The special medals of the Society of American Florists will be awarded as follows: A silver medal for best vase of fifty blooms of carnations not yet disseminated; bronze medal for second best vase of fifty blooms of carnations not yet disseminated; the variety in all cases to be of American origin. The judges are to reserve awards in this class if in their opinion the exhibits are not worthy of the medals.

Copies of the schedule can be obtained on application to Secretary Albert M. Herr, Lancaster, Pa. Further special premiums, if any, will be announced later.

An Explanation.

In my last article I spoke of the cut from 4,500 Mrs. Lawson plants being over 11,000, but I neglected to mention that this was simply for the month of December, 1902. No doubt those who read the article noticed the omission.

The Use of Ashes.

The question of sand for propagation is a very interesting one, for the reason that many florists are not so situated that good clean sand can be readily obtained by them. Sand is the propagating medium in most places, but often there is considerable expense connected with it, for it at times becomes necessary to bring sand from a distance and this makes it an item of considerable expense. During my studies on sterilization of soil I became convinced, that to have healthy stock it is absolutely necessary that the stock come from the cutting bench free from damping fungus; and I considered the advisability of sterilizing the sand used for propagation.

Ashes have been employed before for this purpose, and not finding it economical to sterilize sand I began to experiment with soft coal ashes; and with them we have had excellent success. In the first place, they are free from all fungus, and are as thoroughly sterilized as any one could wish. Then, too, they are not hard to obtain, as wherever coal is burned there must be ashes, and these can be had without the cost of carting.

When ashes are used in the propagating bed they should be sifted through a fine sieve and then put into the bench. Moisten them well and let them stand over night. Then pound them down and wash them, putting on enough water to thoroughly wet them and until it begins to run through the bench. This takes out any injurious gases that may have clung to the ashes, and leaves them perfectly clean. They will then need to stand a day or so, and can be used exactly as sand is. It takes a heavier knife to cut them, however, and one cannot do quite as rapid work; but with a house that has a tight roof and well ripened cuttings to work with the percentage of well-rooted, clean, healthy cuttings should be large.

There is, however, one point in connection with ashes wherein it is different from sand: When the cuttings are rooted, in sand, we do not keep them quite as moist as we do while they are rooting, and they come out as well as they would were the sand wetter. With ashes it is different. When the cuttings are rooted they can be kept until it is convenient to take them

THREE BLOOMS OF DAILLEDOUZE BROTHERS'
White Seedling Carnation No. 138 A.

SINGLE FLOWER OF DAILLEDOUZE BROTHERS'
White Seedling Carnation No. 138 A.

out, slightly on the dry side; but before taking them from the ashes they should be watered thoroughly. Where this is not done the ashes are liable to cling to the roots and cause them to be broken off. When I first used ashes I lost a good many cuttings for this reason. They would look perfectly healthy and not in the least wilted, but would have no roots; and it was a question for some time as to why this should be so, until I accidentally discovered that the ashes they came from seemed to be full of roots and had become so hard that the roots had been broken. When the ashes are moistened, however, they do not hold together and we now have no trouble from that source.

When potting cuttings from ashes they should be dipped into water which will cleanse them and leave fine clean roots to put into the soil. This also applies to cuttings from sand.

Care of Potted Stock.

Personally, I favor early propagation, and especially in the case of heavy-growing varieties, such as Mrs. Thomas W. Lawson; but the care of potted stock is a great drawback, and when one must have a great many plants it becomes a serious problem. To take cuttings from the sand or ashes in the early part of March and then let them root well in the pots before they go abroad in April is comparatively easy, but if they are potted off in early January it is a different proposition. If a young plant becomes pot-bound and bony it is seriously injured, and this must be carefully guarded against. If possible, we put cuttings into 2-inch pots and in a light soil, which will enable them to root well and yet not be rich enough to force a rapid growth. When these pots become full of roots we transfer the plants into 3-inch pots, with soil slightly richer, and the result is fine bushy little plants in excellent condition for planting out in April.

The plants must have a house with plenty of light and sun, to do well, and I am inclined to believe that if it is not possible to give them these conditions, a February cutting will be productive of better results in the end.

I have not used flats for cuttings, as I know many do, for the reason that I think young stock does better when the roots are confined. Growth commences when the roots strike the edges of the pots; and then when a plant shows disease there is very little chance for it to infect the others, as is often the case in flats. There is also considerable injury to the roots when young plants in a flat are divided at planting out time, which is avoided by having them in pots.

Unrooted Cuttings.

I have read with interest one or two articles on the subject of buying cuttings unrooted, and being somewhat interested in the sale of cuttings, have had a chance to see both sides of the case. Perhaps it is well for the buyer to get the cuttings unrooted. I don't care to discuss that side of the question; but there is no doubt that a cutting will ship better rooted than when fresh from the plant. A dealer who sells stock unrooted can assume no responsibility whatever in the sale of them. Perhaps they may not get through on time, and come to the buyer in a wilted condition, and he fails to root them. He, in almost every case, will demand a rebate, and while his claim may have some justice in it he has no right to ask, or expect, that his loss will be made good. The risk with unrooted stock is great for the buyer, and the sale of it is largely unsatisfactory to the seller. I have made it a rule to sell unrooted stock only when the buyer comes after it, and if it is delivered to him fresh from the plants it is his property and the whole responsibility is his, also. I think others who handle stock will agree with me, that this is the only satisfactory way of dealing with the problem, and if they do not agree with all I have said on the matter, they will at least agree that all risks must be taken by the purchaser.

Ivory Soap for Red Spider.

The handling of red spider when, as in rose houses, the plants dry out easily and can be frequently syringed with a strong stream of water is comparatively simple; but with the heavy growth which some varieties of carnations give us, it is a more difficult problem. A heavy syringing is not good for the plants ,and is liable to injure a great many of the more brittle varieties. I have experimented with Ivory soap and have had some very satisfactory results. Soap has been used for red spider in many places and on many different plants. Lodeman, in his "Spraying of Plants," refers to soap as an insecticide. Galloway, in his "Violet Culture," recommends soap for red spider. There was also, in one of the recent issues of a contemporary, an article on soap for red spider on roses. This treatment is not new, but it is, I think, very effective with carnations. I had a batch of cuttings recently which showed signs of red spider; these were given a bath in a very weak solution of Ivory soap and there remains not a sign of the insect; and the cuttings were uninjured by the treatment. In the case of a badly infested bench, soap can be applied with a spray pump, and practically every red spider with which the soap comes in contact will be killed. Soap will also destroy the eggs and practically exterminate the pest. Should the soap, however, be allowed to remain on the plants, it will leave a light film over the pores, and should therefore be washed off. A light syringing will cleanse the plants and leave them uninjured and free from this troublesome pest.

I understand there is an arrangement on the market, which some are using, that contains a cake of soap. This is attached to the hose so that the water comes in contact with the soap and thus, when the plants are syringed, the water contains a very small percentage of soap. I have never used this machine, but on roses it might work well. With carnations, however, I should, I think, prefer the ordinary spray pump. We dissolve the soap in a pail of hot water and use one cake of soap to a 150-foot bench.

W. R. PIERSON.

White Mrs. Thos. W. Lawson.

The illustrations herewith show a vase and single flower of the white variety of carnation, Mrs. Thomas W. Lawson, grown by C. H. Allen, of Floral Park, N. Y. This sport is identical with the type in every respect save color, which is a pure white, and is sure to become popular when introduced. At present Mr. Allen is working up a stock of the plants.

White Seedling Carnation No. 136 A.

Dailledouze & Bros.' (Flatbush, N. Y.) white seedling No. 138 A. is now in its third year. Prosperity is its seed parent, and it has all the good characters of its ancestor. The Brothers consider it the most perfect white carnation they have yet seen. It is a strong grower, a free bloomer, with a good stem and calyx and, in size, it is the largest white variety the firm has grown, the average flowers reaching 3¾ inches in diameter.

White Fly or Plant-House Aleyrode

This pest is sometimes very troublesome in greenhouses, and the Connecticut Experiment Station has rendered an excellent service in publishing a bulletin (No. 140, September, 1902) dealing with the insect and remedies for its eradication. The depredations of the white fly are not limited to plants in the greenhouse, but extend to those in the garden as well. In forcing houses it has been most troublesome on tomato, cucumber and melon plants, and the florist must fight it persistently on ageratum, lantana and heliotrope and Solanaceous plants (those belonging to the potato family) are favorites of the pest.

Professor W. E. Britton, State Entomologist of Connecticut, the author of the bulletin in question, summarizes his experiments as follows:

> The white fly is closely related to the scale-insects, and to the plant lice. It resembles the former in its immature stages, but differs from it in that both sexes are winged when reaching the adult stage.
>
> It injures plants by sucking the sap from the under sides of the leaves. The lower leaves are the first to shrivel and drop. Most of the injury is caused by the nymphs or immature insects.
>
> The nymphs of the white fly have been found upon fifty-eight different kinds of plants in Connecticut.
>
> About five weeks are required for the white fly to pass through its life-stages, all of which are found on the under sides of the leaves. Eggs hatch in eleven days, and the young nymphs crawl for a short time, when they become stationary and secrete wax in long filaments. When the adults emerge, the pupa skins remain attached to the leaves. It is not yet known whether the species can survive the winter unprotected in this climate, but it is carried over on plants in greenhouses and dwellings.
>
> It is thought to be identical with the European species A. vaporariorum of Westwood, but this has not yet been fully determined.
>
> Fumigating with tobacco is not an effective remedy. Hydrocyanic acid gas (using two and one-half ounces of potassium cyanide for each one thousand cubic feet) killed the insects, but injured tomato plants. Dr. Fletcher used one ounce of cyanide and did not injure his plants, but killed all the insects.
>
> Spraying the under surfaces of the leaves with a mixture of whale-oil soap and water (one pound dissolved in eight gallons) proved to be a cheap and effective remedy. If applied frequently, however, the soap should be occasionally washed from the leaves by spraying them with clear water.

Review of the Market

NEW YORK.—The demand for cut flowers continues very light, and as the supplies of most kinds of flowers have shown a decided increase, there is a strong downward tendency in values. Roses have about doubled in quantity over the supply of a week ago. The augmentation began to be felt last Saturday in fact, and since that time roses have moved anyway but satisfactorily, compared with their increased cost of production, while coal is so expensive. Special Bride and Bridesmaid are quoted at 15c each, and it is but for an odd dozen or two that 20c each can be realized. American Beauty are in fair supply, but the quality cannot be said to be up to the average.

Carnations are abundant, so far as the colored varieties go, but of white kinds there does not seem to be any surplus. The latter move fairly well all the time. There is a general inclination toward diminished prices and the averages will be somewhat lower than those obtained last week.

Bulbous flowers are becoming more plentiful, and Roman hyacinths, Paper White narcissus and short-stemmed tulips have gone down in price. A limited number of narcissus and Golden Spur is coming in, for which the asking price is $6.00 per 100. Some Murillo tulips are arriving that are bringing 60c per dozen.

Mignonette is not selling so well as formerly; neither is smilax, but the demand for asparagus and maidenhair fern continues good. Violets are coming in heavily; and lilac also is arriving quite plentifully, for which $1.00 per bunch is asked.

Cattleyas are in ample supply, as are also several varieties of lælias. John Young is receiving some fine blooms of lælia alba, which are meeting a good demand.

BOSTON.—Cold, dull weather during the first three days of this week had a depressing effect on trade. The market is very short on roses of all kinds, especially white ones, likewise on white carnations, and in several instances it has been found impossible to fill orders. There are seldom any roses offered for sale at the wholesale markets these days, as they are picked up on arrival. White ones are especially short, so that prices hold up very well. American Beauty make $8.00 per dozen for fancy specials, with extra grade at $6.00 and No. 1 at $3.00 and $4.00. Seconds realize $1.50 and $2.00, and clean up very well Bridesmaid are in fair supply, but not enough so to meet the demand; and many more Bride might be disposed of at good values. Fancy specials make $3.00 per dozen without difficulty, with extras at $2.00 to $2.50 and No. 1 at $1.50. The smaller grades are held at $6.00, $8.00 and $10.00. Meteor and Liberty, too, are only in fair supply, and are sold up daily, the former at prices ranging from $4.00 up to $16.00, while fancies of the latter variety, in small lots, have reached $4.00 per dozen, though $3.00 is about the average figure for the best of them. Carnations are in good supply; they, too, clean up very well, white kinds being the best sellers and red ones the poorest. Good stock of ordinary sorts clean up easily at $2.50 to $3.00 per 100, while select stock of these kinds reach as high as $4.00 in special cases Inferior stock is sold at $1.50 per 100 in quantities Fancies and novelties reach $5.00 per 100. Lilies are in good supply at $1.50 per dozen, which price rules the sale of the best of both Harrisii and callas, though much of the inferior stock is cleaned up at from $7.00 to $10.00. The supply of jonquils has shortened up somewhat this week, and they sell readily at $3.50 to $4.00 per 100. A few Von Sion, of fair quality, are arriving, but do not move very fast yet, being held at $4.00 to $6.00 Tulips, too, are showing up in limited quantities, but most of them are short-stemmed. They fetch from $2.00 to $4.00, the latter price being for a few which have very good stems for this season Paper White narcissus and Roman hyacinths are not so plentiful and sell more readily at $2.00 to $2.50. Violets though not in large supply, are moving very slowly now, it being impossible to dispose of the daily receipts, which are hardly normal for the season. Prices range from 60c to 75c per 100 for the better grades, with inferior stock at 50c per 100 F. J N

PROVIDENCE, R. I.—Carnations are firm at 2c. to 3c.; roses are in somewhat short supply, at 6c. to 10c. for good stock. Violets are plentiful at 50c. per hundred. The weather has been clear, now followed by extreme cold. Coal is obtainable at $10.00 to $12.00 per ton for anthracite. Business is satisfactory, although spasmodic The straight call for cut flowers is not heavy, almost everything being worked into designs. M.

CHICAGO.—With a gradual falling off in the receipts from day to day the market for the past week has been stiffer, especially so in the case of roses, which are coming in in limited supply. American Beauty are not very abundant, with prices ranging at from $5.00 to $6.00 per dozen for extra fancy stock, while medium and shorts bring from 75c to $3.00 per dozen. Bride and Bridesmaid roses are selling at from $6.00 to $12.00 per 100; a few extra fancy may bring a still higher figure Golden Gate realize from $4.00 to $12.00 per 100; Meteor, $4.00 to $8.00 per 100, Perle des Jardins, same figures; Liberty, $4.00 to $25.00 per 100; Sunrise and Mme. Abel Chatenay, from $6.00 to $12.00 per 100. Carnations are in fair supply, but for these there was not such a good demand the forepart of this week as last. Prices are about the same as at last report; ordinary will run from $1.50 to $2.50 per 100, while the better grades realize from $2.50 to $4.00 per 100. White are the best sellers on the market at present. Prosperity is bringing from $6.00 to $8.00 per 100. Bulbous stock is in good supply, and the demand for all kinds of it is better, though prices are a shade lower. Roman hyacinths and Paper White narcissus are quoted at from $2.00 to $4.00 per 100; callas and Harrisii lilies at from $1.50 to $2.00 per dozen; lily of the valley, $2.50 to $5.00 per 100. The supply of tulips is on the increase, and some fairly good red, white, and yellow flowers are seen. They sell at from $3.00 to $4.00 per 100. White lilac realizes from $1.00 to $2.00 per dozen sprays. Mignonette is selling at from $4.00 to $8.00 per 100. Violets are rather erratic; one day there is a large supply, and the next day a scarcity. The wholesalers find it rather hard work to maintain an established price. Violets are quoted at from 75c to $1.50 per 100 at present. Maidenhair brings from 75c to $1.50 per 100; asparagus, 35c to 50c per string; A. Sprengeri, $2.00 to $4.00 per 100; common ferns, 20c per 100; galax, 15c per 100. Smilax is in better demand and is selling at from $10.00 to $12.50 per 100. Sweet peas go at $1.50 per 100. R. J.

PITTSBURG.—A fair business is the past week's record, with stock plentiful, excepting roses of all kinds. It seems that most of the growers' plants are off crop at present, as goood Bride, Bridesmaid and particularly American Beauty are hard to get at any price. Roses are higher in price than for some years at this season. Carnations are doing well around home, but with some of the growers it might be better, as they are not cutting what they should. Some blame the cloudy weather, and they may be right, for we have had but little sunshine this year. A good lot of Harrisii lilies is being cut now, and quite a few shipped from outside places. The flowers are of good size. Most of our growers are complaining about bad bulbs; with some these are worse than ever. Paper White narcissus are very plentiful and lily of the valley fairly so. Good tulips are scarce; all that have come in up to date are short-stemmed.

At a reception given to Attorney-General Knox by Henry Frick at his home in Pittsburg the past week, flowers of the choicest were in evidence everywhere throughout the house. Mr. Fraser, the gardener, who has charge of the conservatories of Mr. Frick, used the finest plants for decorating, and displayed great taste in their arrangement. Mr. Fraser also had charge of the cutflower arrangements. The stock was furnished by E. C. Ludwig, the Allegheny market florist
E. C. R.

INDIANAPOLIS.—January business, so far, equals that of 1902. There are few dinner or other decorations, but funeral work has kept the storemen busy. Good stock of all kinds is scarce, especially roses, which sell as follows: Bride and Bridesmaid, $1.50 to $3.00 per dozen; Perle des Jardins, $1.50 per dozen; Ivory, $2.00 to $3.00; American Beauty, $3.00 to $12.00 per dozen. The price of Liberty is so high that it is almost impossible to handle this rose at a profit; $3.00 per dozen is the wholesale figure for them; mostly $4.00 and sometimes $5.00 is their retail price. Meteor are good and sell at $2.00 to $3.00 per dozen.

Carnations are scarce and high; $2.00 to $3.00 per 100 is the price of medium grades; fancies command $4.00 to $5.00 per 100. The retail demand for them is almost double that for roses. Most carnations are sold at 75c to $1.00 per dozen.

Bulbous stock is becoming more plentiful; lily of the valley is coming in in goodly quantity. Roman hyacinths sell at 60c per dozen; daffodils, 75c; tulips, 60c and freesia at 40c. Some fine Dutch hyacinths bring $3.00 per dozen. It is impossible to use all the home-grown violets at $1.00 per 100; bunches of twenty-five bring 35c to 50c. A few sweet peas are to be had at 25c per dozen. I. B.

ST. PAUL.—Trade has shown but little improvement since the holidays, owing in part to the cold weather, and partly to general dullness in all lines following the holidays. Carnations are plentiful, but not of the best quality. The dark weather has had the effect of making them soft, weak-stemmed, etc. Roses are scarce, and average poor, with weak, deformed necks. A few days of sunshine would put them in good shape again. Violets are of good quality, but show lack of sun in diminished numbers. Lily of the valley, Roman hyacinths, Paper White narcissus, lilies and tulips are coming in in limited quantities.

This Winter has been without a precedent in the number of dark and cloudy days, and all stock has suffered. None of the growers has cut more than half the usual number of blooms. With coal from 50 to 75 per cent. higher priced than last year, the outlook is anything but encouraging, and the loss account will outweigh the gains at many establishments.

Funeral work, the mainstay of business in dull periods, has been exceptionally light of late. Shipping trade has been fairly good. Several receptions have been booked for the near future which will tend to enliven business a little.
VERITAS.

THE LATE MRS. KRICK.

See Obituary, page 86.

CINCINNATI.—We have had a few days of bright weather, but not enough to cause much change in the cuts now coming in. Roses are still scarce; especially is this true of Bride and Bridesmaid. American Beauty seems to hold up well, and, of course, the price holds up well, also, the best selling out clean at $6.00 per dozen. Bride and Bridesmaid bring, 4c, 6c, 8c and 10c; Meteor, same figures; Liberty, 4c, 6c, 8c, 10c and 15c; carnations, $1.50, $2.00, $3.00 and $4.00 per 100; lily of the valley, $4.00; Roman hyacinths and narcissus, $3.00 per 100; Harrisii lilies, $2.50 per dozen; callas, $1.50 per dozen. Violets are still scarce; best single fetch $2.00 per 100. All in all, business is good, with not enough good stock to fill orders. E. G. G.

WORCESTER, MASS.—Trade is about the same as it was a year ago, cut flowers forming the majority of the sales. Considerable feeling is growing against the Adams Express Company on account of the increase of fifty per cent. in rates for cut flowers carried over their lines. The rates are so high now that it is cheaper to pay carefare than expressage. For a small box to North Grafton, six miles distant, the company charges 40c, while the carfare is 10c. There seems but little remedy, as the Adams Express Company controls the lines between here and Boston and New York. There should be some law to regulate charges, the same as there is in the case of railroad fares.
J.

Philadelphia.

Pennsylvania Horticultural Society.

The meeting on Tuesday last was well attended. George Morrison, gardener to Curwen Stoddart, Jr., Esq., read a very interesting paper on the Hawaiian Islands. The paper was perhaps too long, going too much into history, but the latter part of it on the flora, horticulture and agriculture was very instructive.

The exhibits at this meeting were very good. Joseph Hurley, gardener to Jas. W. Paul, Jr., Esq., showed three splendid cyclamen plants and received a certificate. Francis Canning, gardener to Samuel T. Bodine, Esq., staged three very fine plants of Primula stellata, for which he received a certificate. First prize for Primula sinensis went to George Morrison, who staged some well-grown specimens. For hot house tomatoes and cucumbers, Joseph Hurley was first; and for mushrooms, John McCleary, gardener to Wm. Weightman, Esq., took first honors.

The schedule committee reported a list of prizes for dahlias for September.

General News.

John Burton will build six houses this season; two, 27x150 feet, two 22x130 feet; these four to replace some old ones which will be torn down; also two new houses, 27x130 feet. Lord & Burnham will supply woodwork, iron gutters, etc.

The Lord & Burnham Company have erected a section of greenhouse on their space at the Flower Market, 1228 Cherry street, to show construction gutters, ventilators, benches, etc. D. T. Connor, who represents this firm in this city, makes his headquarters now at the market, where he will be glad to meet anyone by appointment.
DAVID RUST.

New London, Conn.

The Gardeners and Florists' Club of New London County was formed on January 6 with a membership of 15, and good prospects of a further increase. Meetings are to be held the first and third Tuesday of each month at the greenhouses of one of the members. The officers of the club are: John Maloney, president; Wm. H. Corkey, vice-president; H. H. Appeldorn, secretary; John Silva, treasurer.

BINGHAMTON, N. Y.—Graham & Co., are doing a very brisk trade. Mr. Graham has been sick, but is out and hustling again. A. Osier, formerly with Fancher, is doing a very brisk trade for a beginner. S. G. Ellis has had quite a severe blow this Winter, his heating apparatus and boiler having given out shortly before the holidays. He just barely escaped having all his plants frozen up. A. E. Fancher says business is quite good, although coal is at $8 a ton. H. J. Hopkins is doing very well with the place he built last Summer. James B. Tully is said to be laid up with a broken thigh. G.

Annual Bowling Event at Flatbush.

On Thursday evening, January 15, the annual bowling for prizes by the members and friends of the Flatbush Florists' Bowling Club took place in the alleys on Flatbush avenue. Thirteen bowlers were present, and the prizes each one brought were so disguised that no clue to the contents of the parcel could be gained from its outside appearance. The first game played was the contesting one, the highest scorer taking first choice of the premiums, the second highest scorer taking second choice and so on down to the lowest one. All the prizes were valuable, and the poorest players stood just as good a chance as the experts. The following is a list of the prizes in the order in which they were won, together with the scores made: W. H. Siebrecht, 177 a box of coal and a fine silk neck scarf. D. Y. Mellis, 167, a superbly illustrated book on the Spanish War. J. I. Raynor, 165, a fine Saynor knife and chamois skin case. J. Thielman, 163, a leather cigar case. Louis Schmutz, 153, an illustrated book on the late war. P. Riley, 146, a handsome bisque vase. E. Dailledouze, 144, a bottle of Old Valley extract of corn. H. Dailledouze, 137, a box of cigars. A. Zeller, a two years' supply of Royal Ash tobacco. R. J. Irwin, 126, an automobile smoking set. S. S. Butterfield, 130, a box of cigars. J. A. Shaw, 120, a box of cigars. R. Clark, 110, a box of cigars. After the excitement of opening the packages had subsided, another game was played, the scores made being as under:

J. Thielman	129
W. H. Siebrecht	193
A. Zeller	114
J. Irwin	114
J. I. Raynor	104
S. S. Butterfield	95
R. Clark	112
P. Riley	175
E. Dailledouze	182
L. Schmutz	118
H. Dailledouze	124
J. A. Shaw	147

A Device for Stringing Smilax, etc.

Leo Wellenreiter, florist, Danvers, Ill., has invented a simple device for the tying of smilax and asparagus strings. The instrument will save time and labor, and a patent has been applied for.

Canadian News

Ottawa.

A Cold Snap.

We are in the midst of a genuine old-time cold snap. Last night the thermometer went down to 30 below zero, with quite a sharp wind. It kept two men quite lively putting wood into the fires. We had no stock of coal laid in, so have had to use cord wood the whole Winter. On this especial night six cords at $5 a cord were disposed of; tougher on the proprietor than on the boilers. By having to use wood, at the high price, our firing has cost us 50 per cent. more than last year.

A Society Meeting.

The Ottawa Horticultural society helds its annual meeting last Wednesday and elected Mr. P. G. Keyes president; Mr. Stewart, first vice-president; Alderman Ellis, second vice president; Mr. J. Watson, secretary and treasurer. Mr. R. B. White, retiring president, reported the society in a most flourishing condition, with a steady increase in membership, and financially. The society also decided to have a bulb meeting in March at which bulbs will be given to the school-children to grow for the show which will be held in March, 1904. A very good idea.

Visitors.

Mr. Wood, of Hageman & Co.; Mr. Schwake, representing C. Meyer, and Mr. Cornelis of Aug. Rholert, New York.

Montreal.

The Club Dinner.

This event took place in the club room on Monday night, January 19. Considering the extremely cold weather, it was very well attended. It seems a pity that some hall with proper appointments cannot be secured for the affair. The club room answers, but it cannot be denied that the elegant appointments seen in some dining halls are a great aid to sociability. President Trussell presided and about 40 members were present. It must have been very gratifying to the officers to see so many of the newer members present. The menu was a good one and was thoroughly enjoyed. The usual toast list commencing with the "King" and concluding with "The Ladies," was duly honored, and the evening was rendered pleasant by capital songs by Messrs. McAllister, Walsh, Jr.; Bollen and Walker. Professor Birks presided at the piano.

Lachine Horticultural Society.

Dr. W. H. Coard, of the Department of Agriculture, Ottawa, will deliver a free lecture under the auspices of the above society in the Town Hall on January 23. The subject will be "Soils and Fertilizers for Small Areas." To each person in the audience will be presented a plan drawn to scale and divisible by five, to serve as a guide in following out the methods recommended by the lecturer. To this will be appended lists of fruits, vegetables, etc., for such areas, and other matters of importance pertinent to the subject. B.

Hamilton, Ont.

Happenings of the Week.

George Sones is considerably improved in health, being able to be around a little these days. He has still a few chrysanthemums in flower, and they are in very good shape.

W. Holt is building a new dwelling house.

A good many of the florists are now burning soft coal. This means a good deal of extra attention to firing, but it is the only thing obtainable here now.

Horticultural Society.

The annual meeting of the Horticultural Society was held on January 15 in the Public Library building. President A. Alexander occupied the chair. The election of officers resulted as follows: J. O. McCullough, president; James Anderson, first vice-president; John Cape, second vice-president. The Board of Directors consists of the following gentlemen: Andrew Alexander, F. H. Lamb, Dr. Storms, J. Kneeshaw, Adam Brown, J. M. Dixon, J. Webber, J. M. Hull, and F. B. Greening. J. M. Dixon is again secretary-treasurer. The annual report showed that the society had been unusually active, and had accomplished a great deal for horticulture in the city. Although the year's expenses had been heavy, there was a balance on hand of over $200.

Mr. McCullough, the new president, is a young man and an energetic worker in the interests of the society, so that another good year's work is expected.

Club Meeting.

The regular meeting of the Gardeners and Florists' Club was held Tuesday evening, January 20. The meeting took up the following live topics: What should 4-inch geraniums be sold for? Should this club make a fixed scale of prices for plants, bouquets, etc? What is a fair discount for one florist to give another when buying plants to sell again? To the first question the general answer seemed to be that geraniums in 4-inch pots should bring 10c each, or $1.00 per dozen; the ruling price last year was 90c per dozen. On the second question the opinion seemed to be that a fixed scale was impossible. A man should have the privilege of clearing out stock that is likely to be left over, and at a lower price if necessary. Some of the members expressed the opinion that if the florist would take a little more trouble to arrive at the cost of the plants, he would ask a fair price at all times. A fair trade discount was fixed at 20 per cent. This is a step in the right direction, for I could name instances where growers, in selling to a brother florist, have charged even higher than the price that the same goods were retailed for. How does the above-named discount compare with what is given in other places? It would be interesting to see an expression of opinion on this matter from other Canadian centers. The topics are certainly of live interest and are, if I am not mistaken, right within the province of florists' club work. If some of these long-standing and disputed points could be settled in an amicable way, there is not the least doubt but that the whole trade in the vicinity will benefit. Let us all give the club and President Turner our support, and keep the good work going.

A note from the family of the late Mrs. Townsend was read thanking the club for its floral tribute.

After all the business was finished the boys had a pleasant time at cards and checkers. BEAVER.

Montreal's Pioneer Florist
See Obituary Page 86

THE MARKET

LONDON, ONT.—With the severe cold weather we have been experiencing, some of our local men have had considerable difficulty in securing enough fuel to keep out Jack Frost, and those who did not make contracts will have but little profit out of their season's business after paying their coal bills. Slack is selling at from $4.00 to $5.00, mine run, $6.00 to $8.00, and select lump at $10.00; hard coal at $12.00 to $15.00 per ton.

Trade has been good, with the supply of stock nearly equal to the demand, excepting white, of which there is a decided shortage, owing to the constant demand for funeral work. Prices remain firm. Roses are selling at from $1.50 to $2.00 for teas, and $3.00 to $6.00 for a dozen American Beauty. Carnations bring 60c to $1.00; violets, 25c. Very few bulbous flowers have been offered yet. Since the very cold weather set in there has been but little demand for plants.

It is reported that a number of florists in surrounding towns have had to close up their houses owing to the scarcity of fuel.

Gammage & Sons contemplate alterations and additions on a larger scale than usual the coming season. G.

MONTREAL.—Business continues very quiet, and flowers are far from abundant. The wholesale prices have gone back to Christmas figures, a jump owing no doubt to the extreme scarcity and high cost of fuel. The weather is still very cold, indeed, often far below zero. On the 18th readings varied from 24 to 30 degrees below. One of the peculiarities of the Christmas trade was that, although there was a great scarcity of plants, a couple of growers disposed of their stocks of primulas, solanums, etc. Good plants in 5 inch pots delivered at the stores at $1.00 per dozen. The same parties are now selling first class Paper White narcissus at $1.25 per 100, the first cost of the bulbs being $9.00 per 1,000, to which cost of transportation and duty have to be added. Their price for first Roman hyacinths is 75c per 100. Speaking of Roman hyacinths there is great dissatisfaction with the bulbs this year. They appear to be affeted with a disease similar to that found on the Bermuda lilies, and none of the bulbs is throwing more than one good spike. Rumors are also afloat that the Dutch bulbs are away below the average in quality, but it is a little too early to judge yet. B.

HAMILTON.—A good deal of cloudy weather is coming our way, and flowers are not at all plentiful. There is not much doing in any line just now, but the prospects for Spring business are good. A question which should give the local growers some concern is the matter of prices. For three or four years prices of every commodity have been gradually advancing, while the low selling values with which this city seems burdened have not been raised. There seems to be some apprehension that as plants and flowers are luxuries they would be purchased in much smaller quantities, if prices were advanced. There is surely something wrong if the price of a luxury cannot be advanced so as to leave a fair margin of profit. This appears to be possible in other lines of business. However, in view of the high price of fuel this Winter there will be some serious trouble if better values are not obtained the coming Spring. To an outsider it must appear that the average florist endeavors to be a philanthropist more than a business man.

January 22 will as usual be celebrated as "Violet Day," in commemoration of the death of Queen Victoria.

BEAVER.

TORONTO.—Business has improved very much and stock is now limited and high. Roses are scarce, and all stock is cleaned up quickly. There is a good demand for violets and all, except the very poorest, are soon picked up. Carnations are good and fairly plentiful. Roman hyacinths and Paper White narcissus are still in oversupply, being seldom wanted except for funeral work. All our retailers appear to be doing well, but a good many of the growers will be pleased if they come through the Winter all right without any profit, as the coal question is still a serious one to them. Hard coal is hardly obtainable and when it can be secured it is offered at from $10.00 to $15.00 a ton. That is like burning gold. The weather has been very cold for several days. On Sunday night it was 8 below zero, and there was a nasty wind blowing from the west. This kept several of the craft out of their beds for that night and one often hears the remark from some of the smaller growers: "I wish I had shut down in the Fall and saved all this trouble." But I suspect that most of them will pull through all right. I sincerely hope so. T. M.

OTTAWA, ONT.—Business has been fairly good, especially in funeral work. Flowers are scarce, roses especially so. Carnations are good, but the supply is not equal to the demand. Freesia is very good [illegible]. Some [illegible] a crop of heath, [illegible] very useful during the scarcity of cut flowers. Prices have kept up well. Carnations bring 50c to 75c, and roses $1.50 to $2.50. E.

FREDERICTON, N. B.—Since January 1 [illegible] the darkest three weeks we have ever experienced and to intensify matters the night of January 18 was the coldest to keep out the frost occurring in 27 years. The thermometer went to 2[illegible] to 30 below zero, with a strong wind blowing all night. I have found [illegible] with tobacco stems help wonderfully in keeping out the frost when the temperature falls in spite of one's efforts. J.B.

Cut Flower Prices.

TORONTO, ONT.—American Beauty roses, fancy special, $50.00; extra, $30.00 to $40.00; No. 1, $25.00 to $30.00; culls and ordinary, $8.00 to $15.00; Bride and Bridesmaid, No. 1, $10.00 to $15.00, No. 2, $4.00 to $8.00, Mme. Cusin, $3.00 to $15.00; Liberty, $3.00 to $15.00, Meteor, $3.00 to $15.00, Mrs. Pierpont Morgan, $3.00 to $15.00, Perle des Jardins, $2.00 to $12.00; cattleyas, $75.00; cypripedium, $15.00. Carnations, inferior grades, all colors, $1.00 to $1.50, standard varieties, $2.00 to $5.00; fancies, $4.00 to $6.00, adiantum, $1.00, asparagus, $20.00 to $75.00, callas, $6.00 to $10.00, freesia, $2.50 to $3.00; galax leaves, 15c to 20c; hyacinths, $2.00 to $3.00, Harrisii lilies, $12.00 to $15.00; lily of the valley, $1.50 to $4.00; mignonette, $1.00 to $4.00; narcissus $1.50 to $3.00, smilax $15.00 to $25.00; tulips, $2.00 to $4.00, violets, 50c to $2.50. T. M.

HAMILTON, ONT.—Bride and Bridesmaid are bringing $8.00 to $10.00; Liberty, $12.00, Perle des Jardins, $8.00 to $10.00, carnations, inferior grades, all colors, $1.50 to $2.00; standard varieties, $2.00 to $4.00; callas, $8.00 to $12.00. Smilax realizes $15.00 to $20.00, violets, $1.50.

Funeral work is much below the average, but there is no overplus of flowers. The weather is rather dull and cold. Harrisii lilies promise to be in on good time; in their health there seems to be a great improvement this year, and that improvement did not materialize before it was needed. BEAVER.

LONDON, ONT.—Prices remain the same as last week. Roses are in short supply, also carnations, excepting white, which are scarce. There has been a large call for flowers for funeral purposes. G.

GOOD SMILAX

CHRYSANTHEMUMS

Chrysanthemums for Exhibition

Read before the Montreal Gardeners and Florists' Club, January 5, 1903, by George A. Robinson

The subject assigned to me this evening is too broad to be covered in one paper, and as the club has decided to hold a show next Fall I will confine myself to remarks on growing specimen plants and cut blooms. If this paper is the means of instilling a larger degree of enthusiasm into the members, and thereby, we get a larger number of exhibitors, I shall feel amply repaid.

Successful growers of specimen chrysanthemum plants commence at exhibition time to prepare for the next year, by noting varieties, with their distinctive qualities, such as color, stocky growth and size of bloom. Having decided on what varieties to grow, "eternal vigilance" must be the watchword until the prize cards are hanging on your plants.

Cuttings from the base of the stock, rooted in the early part of February, make the best specimen plants.

A common fault is to leave the cuttings in the sand until they make a spindly growth and wiry roots. Nothing more effectually impairs the future constitution of the plant. Just as soon as the cutting stands up stiff it will be found that roots one-half inch in length are formed. This is the time to pot them and you will have a clean, thrifty plant, that will go right into the new soil and render a good account of itself.

The first potting should be into two-inch pots, using a light soil, placing the young plants in a cool, airy house. Give the plants a two-inch shift as they require it, using a heavier soil at each potting. At the final potting, in June, use good, well-rotted fibrous loam, with a sprinkling of bone meal, and burned refuse or lime rubbish, to keep the soil open. Use very little manure, as too much humus has a tendency to sour the soil before the roots can make much headway, while the properties of value are exhausted before they can be used. Pot moderately firm, and water sparingly, until the plants get well rooted.

Pinching must be attended to regularly, commencing when the plants are in small pots and four inches high, continuing without intermission until about the end of July. This work must be done systematically, never allowing one shoot to gain strength at the expense of the weaker ones.

After the pinching is stopped the training must be attended to. Don't allow the shoots to get all bunched together, as this means diseased foliage. Give the plants plenty of room; turn them around occasionally to keep them in good shape. Syringe twice a day in bright weather.

A light fumigating, a dusting with tobacco dust, or a syringing with some of the many tobacco extracts will obviate the injury often caused by the ravages of insects.

As soon as the plants are well rooted in the flowering pots, feeding should commence. The larger and stronger the plant the more food it will require. It is far better to underfeed than to over-feed, until the buds are set, as over-feeding at this stage will result in a tall and weak growth. After the buds are set, feeding must commence in real earnest and must be persevered in. It is just about this time that the close observer realizes what a gross feeder the chrysanthemum is. This part of the treatment is not the most pleasant thing in the world, but on it depends the final success. Animal manure should be the basis of all fertilizers. Decoctions made from horse, sheep or cow manure are the safest to use. Hen manure and night soil are both excellent fertilizers, but must be used with discretion. Nitrate of soda and sulphate of ammonia in the proportion of one quarter ounce to one gallon of water is beneficial. A complete change of food each week is much better than mixing several fertilizers together all the time. It is impossible to give the exact proportions of each of these fertilizers. This, and the time to elapse between each feeding, must be left to the discretion of the grower.

An occasional dose of lime water will keep the soil sweet and aid materially in hardening up the shoots. All feeding must cease as soon as the flowers begin to show color.

Disbudding must be attended to as soon as the buds are large enough to handle. This work should be done as much as possible early in the morning, while the buds are brittle.

In disbudding, commence at the top of the shoot, and if the top bud get broken out, one a little lower down will be left to replace it.

Just as soon as the blooms begin to show color the final staking must be done; and at this time the plants will have reached a stage where it is possible to put each bloom in its proper position to make a symmetrical plant.

S. J. MITCHELL, HOUSTON, TEX.

Judge and Grower of Chrysanthemums.

For exhibition blooms, cuttings rooted the early part of March and flowered in seven or eight-inch pots, with one, two or three blooms to the plant, are in every way superior to later cuttings flowered in six-inch pots. The blooms in the former may not be any larger, but they will have a better finish.

The cultural directions given for specimen plants will apply equally for specimen blooms.

A problem in which experts greatly differ is "taking the bud." My opinion is that the early crown buds, with but very few exceptions, should not be taken. August 15 is early enough to take the bud of most varieties, and many will make exhibition flowers if the buds are taken later.

Most of the failures from crown buds are caused by keeping them too cool. A temperature of 50 degrees at night with a rise during the day should be maintained.

With a terminal bud, the plants must be kept cool to allow the latest formed wood to ripen. Neglect of this important matter is the cause of most of the trouble with weak-necked flowers.

Some delicate manipulation is required just before the exhibition to have each variety in perfection at the proper time. The best way to retard early blooms is to put the plants into a cool, dry and darkened room, or cellar. They keep much better in this way than if cut and treated similarly. To force a late bloom is a very difficult matter and is often attended with very indifferent success.

There has been a lot of discussion lately upon the varieties known as weak-stemmed for exhibition purposes. I cannot see any objection in supporting a weak-stemmed flower for exhibition purposes. Many of the largest and most graceful reflexed flowers are too heavy to stand erect and these varieties are the very ones that prove the most attractive at the exhibitions. The elimination of these varieties from flower shows is having its effect on the American raiser, and while varieties such as the white and yellow Major Bonnaffon, Pennsylvania, Ivory, etc., are disseminated in large numbers, the more showy sorts are neglected; consequently, we have to rely on European and Australian raisers for these.

"Variety is the spice of life," and especially the life of a chrysanthemum exhibition, so let us collect all the large, showy and odd, as well as the commercial varieties, and have a show to please the public, rather than to suit ourselves.

S. J. Mitchell.

The accompanying portrait is a very faithful likeness of S. J. Mitchell, of Houston, Tex., doubtless the best authority, grower and judge of chrysanthemums in the Gulf States. It is all the more in his favor to say, that for a period of more than ten years he has never adopted this pleasant pastime as a means of financial gain, and has repeatedly refused the most flattering offers to sell his plants or flowers. He began this work at a time when prize-winning chrysanthemums were almost wholly unknown to the South; and, when he had succeeded in producing some very enviable specimens, he suggested a flower show at Houston, so that the entire community might observe what the best methods of cultivation could do for this flower, as an advancement over the button-like blooms left to flower on the plant at will. This was the first chrysanthemum show ever held in Texas, and perhaps the first in any of the Gulf States. A few years later, through valuable encouragement and assistance by Mr. Mitchell, flower-lovers at Waco held their first show, and since then exhibitions have been held regularly each year at Alvin, Marshall, Ennis, Galveston, Navasota and Paris—all Texas cities and towns; and success to a greater or less extent has met every effort.

After Mr. Mitchell had reached the first rank as a grower and winner of premiums, including a very handsome gold medal, he turned his attention to the judging of chrysanthemums as a science, and during a trip to England in 1897 visited and had access to the library of C. Harman Payne, secretary of the National Chrysanthemum Society of England; and in discussions with him, also with H. J. Jones, H. Cannell and other famous growers, many valuable points on the subject were obtained. On returning to this country, Mr. Mitchell was elected sole judge of the Waco show, and up to this time has been the judge of flower shows in Texas on nineteen occasions, sometimes officiating at two or three places the same season. During a meeting of the Chrysanthemum Society of America, held at Detroit, Mr. Mitchell proposed to that body a new scale of points for judging, as a revision of the former scale. This was adopted, and is the present scale now in use by this body.

This gentleman has contributed much on floriculture to various periodicals. As a judge he has clear perceptive faculties, based on the study in hand, and his services in this capacity are much sought. M.

The Peony.

Paper read by John H. Cox, of the George A. Weaver Co., Newport, R. I., before the Newport Horticultural Society, January 21, 1903.

Pæonia is an old Greek name. The plant is said to be named after a celebrated physician called Peon in the days of Theophrastus, who, it is stated, employed the plant in his medicinal practice. In the Materia Medica its medicinal properties are described as follows: "Strong, peculiar, disagreeable odor and nauseous taste, at first bitter and then sweet; was used by the ancients as a cure for epilepsy, and it is used by the faculty of the present day as an anti-spasmodic. An eminent scientist, by name Dragendorf, in analyzing the seed found a fixed oil, an alkaloid, and peonic acid. The latter is said to be very poisonous."

The peony belongs to the vast family, or natural order of Ranunculacæ, among which are found many plants of medicinal value. The peony, by some called piony, is a hardy perennal plant, a native of Europe, northern and temperate parts of Asia, North Western America, China and Japan; so you see it is an accommodating plant to nearly all tolerably cold climates. The situation should be remembered at the time of planting, for the cooler it is the better will be the quality of the flowers, and the longer will be the season of blooming. It is only within the last twenty or thirty years that this now becoming popular flower has been considered of much intrinsic value excepting as an early summer flowering subject for the herbaceous border.

Now, to say a few words on the varieties first brought into cultivation, and from which come the beautiful strains which are interesting us at the present. First, we have Pæonia albiflora and Pæonia officinalis; both were introduced about the year 1548, the first named from Siberia, the latter from Southern Europe. In 1789 we had Pæonia Moutan from China and Japan, which is now very popular, being commonly called the tree peony. Pæonia tenuifolia was introduced to cultivation in 1765, and is found from Transylvania to the Crimea.

In these old, though important varieties we obtained the blood that has produced the elegant forms and exquisite colors in the flowers that are before us at the present day. For instance, P. albiflora, with its northern nativity, has given the stronger and hardier constitution, and it is these varieties, hybridized with the latest flowering sorts of Pæonia officinalis, together with the Chinese and Japanese varieties, that may give us a continuation of large, handsome flowers the whole of the Summer. The types of Pæonia officinalis give us the early flowers which come usually in May and June; and the types of P. albiflora from June into July.

It is a remarkable fact that there is a number of the herbaceous varieties that are synonymous. I will give you a few instances: Pæonia edulis is synonymous with P. albiflora. It is historically recorded that the Mongolian Tartars ate the roots of this variety and otherwise used it as a charm, believing it prevented epidemic diseases, epilepsy, etc. Pæonia Fischeri is synonymous with P. anomola; P. California is synonymous with P. Brownii, P. cretica with P. arietina. The latter variety is by some known as "The Ram's Head peony" from the formation of the seed pods, which are curved like a ram's horn. There are a great many more synonyms, but time and space demand that I must leave them for the present.

Pæonia tenuifolia is a distinct type of the herbaceous class; its light, graceful, slender, laciniated foliage, and its deep crimson flowers make it a very charming variety; and it ought to be a good parent for hybridizing with some of the late flowering sorts, as its season of blooming is usually from the middle of June. Pæonia tenuifolia flore pleno is very similar, almost a facsimile in foliage to the type, but bears beautiful double crimson flowers; it is a very valuable sort. There are also two more varieties of this beautiful thread-like foliage type: Pæonia hybrida and Pæonia laciniata, but they have somewhat broader leaf segments, with single and semi-double flowers.

Pæonia Moutan is a beautiful species of a habit very distinct from that of the herbaceous class, it being of a shrubby nature, that fact giving it the cognomen of the tree peony. This class provides a grand adornment to lawns and all flower gardens, when judiciously planted.

There is also another type which has come into prominence—the anemone-flowered class. This is the result of the ever-enterprising hybridizer's labors, which have been rewarded with marvelous productions of flowers of extraordinary size, fragrance and delicateness of color. It has been procured from the P. albiflora types and those of P. officinalis.

The peony is a highly decorative plant, and no garden is complete without a collection, for it can be had in nearly all the colors of the rainbow; and in some the colors are so prismatic that they cast different shades as you move along and gaze upon them.

The new types of single varieties are creating marked attraction and admiration on account of their monstrous flowers of from twelve to fifteen inches in diameter, exquisite colorings and massive centre of golden yellow anthers, rendering them remarkably striking at a long distance.

I will now give you a few remarks on the cultivation. First, I will take Pæonia Moutan, or tree peony. This may be raised from cuttings, by layering, or by grafting, the latter in preference, for even the amateur will gain more success by grafting. August is the best month for propagation. Be careful to select well ripened wood, or scions without any flower bud. Previous to cutting the scions for grafting, it would be policy to prepare the necessary stocks for working upon. The stocks I recommend are the old varieties, P. albiflora and officinalis, preferably the former. Dig around the old stools or clumps, and select suitable tubers for the operation. After grafting the tubers should be potted into a good compost, and the sets plunged in a frame covering the graft lightly about one-third the length. Shading is necessary, and care in giving air to prevent damping. Some propagators like a little bottom heat to increase the union, but the writer's experience has been more successful without it. After the union is completed, it is preferable to keep the young stock in a cold frame throughout the Winter, with a light protection of dry leaves, the whole covered with sash, or shutters, to keep the rains and snows from the plants, removing the coverings on bright, sunny days to give air, and to prevent any accumulation of moisture. In the Springtime the young plants should be set out in well prepared beds of good rich soil for a year or two, after which they will be ready for the decorative department for which they are desired.

The peony is a gross feeder, consequently the ground may be dug deeply and a goodly portion of well rotted manure dug in. The varieties of P. Moutan are very liable to be damaged in the flower buds by the early Spring frosts, and a protection of some fir branches is recommended until that danger is over. In the Fall of the year it is advisable to give the plants a good mulching over the surface, as a protection to the roots.

The herbaceous peonies are increased by division of the roots making it rather a slow process to gain a massive show of blooms, for the flowering stools dislike continual division and moving. In preparing the bed, or border, for herbaceous peonies, it is well to have the ground liberally manured with well decomposed or rotten manure, and thoroughly trenched. There is no herbaceous plant I know that dislikes constant removals more than the peony, hence it is advisable to plant where it can remain undisturbed.

Some of the herbaceous peonies make excellent plants for Spring forcing and flower very freely, but they have not become popular in this line, on account of the large stock needed to give a yearly succession for forcing, as one can only use the stock once in three years successfully. Consequently, the clumps forced this year should be planted out and allowed to remain undisturbed for two years, and any flowers showing should be picked off.

This popular plant is becoming more sought after every year as a florist's flower, and the supply does not equal the demand. The blooms may be shipped long distances very successfully if cut right and carefully packed. Last Spring I saw flowers that had been cut and shipped 500 miles turn out perfect, and they fetched $8 to $12 per 100 in the wholesale market, according to grade and color.

I will now give the names of a few varieties which have been recommended within the last few years. The names of the newer sorts I hope to be able to place before you in the near future.

Varieties of Pæonia Moutan, flowering in May.—Beauty of Canton, Blanche Noisette, candida, carnea plena, maxima plena, versicolor plena, Emperor of China, Osiris, Reine de Fleurs, Snowball, Mandarin and alba lilacina.

Varieties of herbaceous peonies, flowering from June to July—Madame Callott, white tinged with rose, and rose scented; Madame Schmidt, purple crimson, showy golden anthers, very fragrant; pulcherrima, guard petals blush, centre white, rose fragrance; purpurea, superba, rich glowing purple, very fragrant; incomparabilis, rose, shaded purple, very fragrant; papaveræflora, white, centre primrose, exquisite fragrance; festiva maxima, pure white, very fragrant; Ambroise Verschaffelt, rich purple, fragrant; Buckii, intense crimson purple, rose-scented; carnea elegans, delicate pink, shading to white, fragrance of the violet; Decaisne, deep rose, delightful fragrance; and The Queen, blush rose, large flowers, rose-scented.

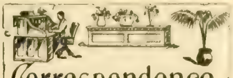
A Recording Thermometer.

The Helios-Upton company, of Peabody, Mass., are having excellent success with the sale to the trade of their recording thermometers for greenhouse work. They state their advertising returns from The Florists' Exchange have been most satisfactory. The following testimonials received from florists who have used these thermometers will be found interesting:

Albert M. Herr, of Lancaster, Pa., says: "Your recording thermometer No. 177 is giving very good satisfaction, and is certainly one of the very best things ever gotten up to help us keep an accurate knowledge as to how our greenhouses are attended to at night. If we only had plenty of coal, at a nominal figure with this thermometer we would have no need of any failures from improper temperature this Winter."

The Lake View Rose Gardens, of Jamestown, N. Y., write: "Will you please forward us by first mail 250 more of the dials, same as we received with the thermometers, and kindly send us four more thermometers, with all supplies."

Samuel Lynnes, of Norwalk, Conn., states: "Enclosed please find my check for $18, in payment for the thermometer. It certainly is a fine thing, and I would not be without it. By the way please let me know the price of the weekly records, as I will need more in a few weeks."



Correspondence

Subsoiling.

Editor Florists' Exchange:

I see by December 13 Florists' Exchange that Mr. Meehan touches on the advantage of subsoil cultivation. I believe this work is of much more importance than many imagine. The preparation of the soil is a subject too often neglected, or not enough insisted on by writers on landscape gardening, while pages are written on the beauty of trees and their charming effect by judicious and tasteful planting. Too often many a beautiful tree, or shrub, is spoiled by careless planting, to the annoyance of the owner and discredit to the nurseryman, contractor or gardener, which may be just or unjust. Too often it is the case with a contractor to "hurry up," dig a hole and bury the roots, or scuffle up a shrubbery bed, stick in the plants, finish off the top neatly to catch the eye, send in his bill, request early payment, and get out, indifferent as to whether the plants will thrive or not. The result is a source of annoyance to the owner, which he paid well for, instead of a pleasure.

I believe one of the principal causes of the failure of shrubs and trees to grow is because the ground has not been properly prepared. All shrubberies should be trenched, or double dug. But I would go further than Mr. Meehan, I would put the top spit at the bottom of the trench, and manure well the subsoil at the top, and stir up the bottom of the trench another spit. This would give two spits of good earth for the plants to grow in, and three spits for draining and "cooling" purposes.

A short time ago I discussed the subject of better preparation of the soil for trees and shrubs with a nurseryman. He admitted trenching and so forth would be much better, but said he could not afford to do that and get anything out of his contracts; no doubt he would rather replace a tree or shrub that died. I also not long ago put the question to a contractor who handles a considerable number of trees and such like. His reply was: "There is very little planting done; the subjects are merely placed in position. The people won't pay for proper planting."

What does this mean? That those who make it their business to do landscape work do not try to elevate the trade, or to place horticulture on its highest pedestal?

There are many rich people in this country who I believe would be willing to pay for the best workmanship did they but know it, and it seems to me the persons who should insist as much as possible on the elevation of the trade are those who are engaged in the business.

Just a word or two upon the principles of proper preparation of the soil for landscape and general gardening. There is scarcely an article in The Florists' Exchange on roses, carnations or chrysanthemums but deals with the necessity of proper preparation of the soil and feeding the plants. (See last week's number, paragraph on "Christmas," by W. R. Pierson, page 1429.) Mr. Pierson knows what he is talking about; he works on sound principles, and knows by experience the good results that follow the carrying out of his advice. Apply the same principles to fruit, flowers, vegetables and shrubs in the open, and good results are sure to follow, to the satisfaction of the employer and the credit of the workman.

We read much about plants and flowers that catch the eye, but very little about their roots. Would not some articles on roots and their action be interesting to your readers, as well as instructive? I should like to see such articles.

GEO. McNAUGHTON.

[We shall gladly welcome articles of this nature.—Ed.]

Ratio of Coal Prices to Receipts.

Editor Florists' Exchange:

It is a generally accepted fact that once prices of any commodity are inflated to any great degree it is a long time before they again fall to their normal. Especially is this true when a strong combination is holding them up. Hence I look for a high price to maintain in our fuel bills for the ensuing year and the natural question occurs to me, as it does doubtless to others "How much ought I to be able to afford for fuel?" Or, perhaps, it would be better to say: "What proportion to the gross receipts ought the coal bill to occupy?"

You may say that is a matter for each individual to answer for himself. Doubtless so, yet I think it would be of extreme interest to know just where the trade in general placed the average per centage, and it may help some when they are placing their next year's contract. It may also give food for thought as to how the advance in price of most commodities we florists use are to be met, as it seems to be taken for granted that however much more we have to pay for what we use the prices of plants and flowers are to remain stationary. Yet, certainly there must be a limit somewhere; but at present the florist bears his burden with a stoicity almost equaling idiocy.

The S. A. F. O. H. also, has lost two golden oportunities to prove its usefulness and to gain members by its "masterful inactivity," over the coal situation and the express tariff. Here were two unprecedented chances to show outsiders the benefits of organization, for although the society's efforts might not have succeeded yet a vigorous protest and an active policy on these occasions would have gained it many friends. 'Tis true, now nearly six weeks after, the society is calling a meeting to protest against the express tariffs, but to be successful this should have been done immediately on the publication of the increase, and been made with all the vigor and authority of the association and its allies. In short, a fighting policy should have been pursued.

SAMUEL BATSON.

The Logan Berry.

Editor Florists' Exchange:

In answer to R. J. in issue of the Florists' Exchange for January 17, the Logan berry is a novelty only and is not desirable as a market fruit. The fruit is so delicate and soft as to render it unfit for market purposes. R. J. had better plant some reliable variety of blackberry.

New York.

The Week's Happenings.

The annual dinner of the New York Florists' Club, which occurs next Saturday evening in the St. Denis hotel, is to be a tip-top affair, and a goodly number of the club's members is expected to be present.

A meeting of the Dinner Committee will be held on Saturday afternoon (today), at three o'clock in the store of Walter F. Sheridan. It would facilitate the work of the committee very much if those desiring tickets would secure them at the earliest possible moment. The price is $5.00.

The Brooklyn Horticultural Society had a very enthusiastic meeting last Monday evening, and all plans for entertaining the American Carnation Society, and the holding of the exhibition connected therewith, are about perfected. Another meeting will be held on Monday evening, February 2. Every member should be present on that occasion, as preliminaries will be completed then. Additions to the entertainment fund were reported, as well as more premiums donated by the local tradesmen. The members expressed a preference for Lieutenant Governor Timothy Woodruff as toastmaster at the banquet.

The coal situation shows no improvement yet. Neither has there been any reduction in express rates. Meantime, there is a decided downward tendency in the prices realized on cut flowers, and the profits of growers are thus getting cut at both ends.

The Manhattan Supply Company, dealers in new and second-hand pipe and fittings, find their business increasing so much that more commodious quarters have been rendered necessary. They have secured the premises at the junction of Duane, Centre and New Elm streets. With the added space thus acquired, facilities are furnished for storing their goods here, instead of having to keep their stock outside of the city. Thus they will be able to make prompter shipments of goods.

The Lord & Burnham Company, of Irvington-on-Hudson and New York City, are making extensive additions to their plant at Irvington. These additional buildings will comprise a large wood-working mill equipped with the most modern machinery for the preparation of cypress wood capping, bars, etc., for their standard iron construction greenhouses, also for the manufacture of cypress greenhouse material for the trade for the "all sash bar" construction (the demand having outgrown the capacity of the present mill); a power house on their new dock for the installation of new steam boilers and engine; also additions to their foundry and shops for making the well-known "Burnham" heating boilers. The enlargements referred to, taken in connection with its present works, including the extensive iron-working shop built three years since, will nearly double this firm's present facilities, making it possible not only to fill all orders very promptly, but also to handle its rapidly growing business in completed greenhouses and all kinds of greenhouse material.

The American Institute will hold a show of roses, carnations, and other flowers of the season, as well as of fruits and vegetables, particularly those grown under glass, in the Berkeley Lyceum, Forty-fourth street, on January 28 and 29. On same dates a farmers' institute will take place, at which some of the speakers will be Professors Johnson, Bailey, Jordan and Hall; also Messrs. Tucker, of the Country Gentleman, George M. Powell and others. In connection with the show a silver medal will be offered for an exhibit of a new rose not generally in commerce.

Branches of the Forsythia are coming in, full of their yellow blossoms, and the retail stores are using them lavishly for window display. The business among retailers is principally for funeral work at this time.

Roberts & Grunewald had a serious fire in their store at 247 Columbus avenue on Sunday evening last. Most of the stock and fixtures were destroyed. There was no insurance. Business will be resumed as soon as the necessary repairs can be done.

Sydney and Arthur, two sons of John Nash, sailed for England on the third of this month on the steamship Minnehaha. Arthur will enter the Ardingly College, Sussex, England, for a course of study, and Sydney will return to America shortly.

The sympathy of the craft will go out to David Deans, grower, Astoria, N. Y., who lost a daughter by death on Saturday, January 17. The Brooklyn Horticultural Society passed resolutions of condolence with the bereaved family.

The eighth annual dinner of the New Jersey Floricultural Society will occur on Wednesday evening, February 4, in the Elks' Hall, Lindsley building, Orange, N. J., at 8 o'clock.

To those florists who are equipped with Lehman heaters, the delivery of flowers and plants during the coldest weather is done without any loss or inconvenience. One or two of these small heaters should be in th hands of every florist who delivers his own goods by wagon.

Richard Clark, of Clark Bros., Portland, Oregon, is in this city for an extended visit.

The John J. Crooke Co., tin foil manufacturers, have changed their location from 186 Grand street, to 155-163 Avenue D, New York, and 149 Fulton street, Chicago.

Paul Dailledouze, of Dailledouze Bros., arrived home Tuesday from an extended western trip. While away he went as far as Chicago, making calls en route at all the prominent carnation establishments. He also visited the noted growers in and around Chicago.

A. N. Pierson, Cromwell Conn., was in town this week.

Chicago.

News Notes.

With milder weather prevailing, trade is a little on the increase. Wholesalers find it pretty hard at present to fill all shipping orders. It seems the more glass devoted to cut flower growing the smaller the crops secured; that is the case this year, at least, around here. The stock will average in quality a great deal better than in any former year, which may make up for the smaller output, when the grower closes his accounts at the end of the season.

The milder weather seems to have helped the coal situation, although many have no great supply on hand. If a heavy snowstorm should come, with a decided cold spell for any length of time, there is no doubt but some heavy losses would be reported. N. K. Welter, of So. Evanston, a vegetable and carnation grower, closed up his carnation houses rather than pay the high price asked for coal. By so doing he will be able to run his remaining houses devoted to vegetables until Spring with the coal he has on hand. He will devote the six houses closed up to the growing of cucumbers and lettuce in the early Spring.

Fire in the Atlas Block early Monday morning caused the commission men located there considerable inconvenience during Monday and part of Tuesday. The loss to them is small. The daily press puts it as follows: Frank Garland, $100; J. B. Deamud, $100; John Muno, $200, and Wietor Bros., $100. No damage was done by the fire except to destroy the gas and electric light connections. One house went back to the custom of primitive days and was doing business by candle light.

Anton Then is forcing some 8,000 longiflorum lilies, and finds the bulbs better than those of last year. They will come in right for Easter. Carnations here are looking well, taking into consideration that they were under about two feet of water several times last Summer.

Welter & Thill, of So. Evanston, report trade fairly good. Carnations are their principal crop. P. M. Broadbeck is also satisfied with business at present. His roses are in first-class shape. John Schoephle & Co., the Belmont avenue florists, report trade double what it was with them last year.

F. Calvert and wife, of Lake Forest, left Tuesday for a four months' sojourn in California and other Western States.

Mrs. F. R. Hills is at the market after a week's illness.

Visitors: O. A. Will, Minneapolis, Minn.; Paul Dailledouze, Flatbush N. Y.; Otto Benthey, New Castle, Ind.

ROBERT JOHNSTONE.

Boston.

Express Rates.

At the meeting of flower growers and shippers of Boston and vicinity, held at the American House, Saturday last, a very strong and decided protest against the arbitrary and unreasonable action of the Adams, American and National Express companies, in increasing the rates on flowers fifty per cent., was made. Secretary William J. Stewart, of the S. A. F., presided, and William W. Tailby, of Wellesley, acted as secretary. Letters were read from many buyers throughout New England and New York State, who were unable to attend, bristling with protest, and adding in many cases, that the present rates will mean a curtailing of their orders.

The following communication, which was received before the opening of the meeting, was read by Mr. Stewart:

Poughkeepsie, N. Y., January 16, 1903.

We, the undersigned, a committee duly appointed by the Horticultural Society of Dutchess county, for the purpose of procuring a reduction in express rates on cut flowers, express our desire of co-operating with your society in its efforts to procure such reduction, and we further desire to aid in any way that we may be able to promote the goal in view, and the common welfare of the flower growers in general.

(Signed)
C. F. BAHRET,
PETER F. DeVOY,
STANTON ROCKEFELLER,
W. H. SLOAN,
HERMAN ASHER,
H. C. BAKER.

Remarks were made by Messrs. Patrick Welch, N. F. McCarthy, John J. Kelly, of George A. Sutherland's; George Patten, of Lowell, and others. Mr. Welch answered the reasons put forth by the Express companies for the advance, stating that their statement as to giving the flowers better care is not carried out in practice, and that allowing shipments to get too heated, or to freeze, is due to the carelessness of the messenger and would not be remedied by the increase in rates.

Mr. Stewart, in the course of his remarks, stated that, should these local meetings of protest fail to bring about the desired result, the S. A. F. will take the matter to Congress.

The other speakers added their words of protest, in about the same strain, nearly all attacking the American Express Company particularly. After considerable debate, a committee on resolutions, consisting of P. Welch, of Boston; James J. McCormack, of Malden, and E. R. Shaw, of Nashua, N. H., was appointed to bring in a set of resolutions, to which all present affixed their signatures. The following committee was appointed to present the resolutions to the express companies: W. H. Elliott, of Brighton; W. J. Steward and P. Welch, of Boston, and E. R. Shaw, of Nashua, N. H.

The resolutions follow:

Whereas, The transportation of cut flowers to the Boston market has been carried on for years almost entirely by the Adams, American and National Express companies, who have always carried cut flowers as first-class matter, and have charged the highest rates on their schedule, but who have since the 10th of December, 1902, arbitrarily and unreasonably increased the price of hauling said goods fifty per cent., without in any way increasing the efficiency of their service.

And whereas, experience and modern means of conveyance and the establishment by these companies of local offices and branches in all sections of the country have very much lessened for the express companies the cost of transportation and the risk of handling said goods, which are regularly forwarded every day in the year, and consequently they should be transported at reasonable rates instead of the increased rate now levied;

And whereas, we feel that the present rates are a discrimination against our business, and therefore unlawful;

And whereas, this increase of tariff by the express companies is in line and following the leadership of the great trusts of this country in increasing their prices, not because better prices are deserved, but to multiply their earnings, and because they feel they are powerful enough to force the public to agree to their terms;

Be it Resolved, That we, the flower growers, flower shippers, and merchants in and about Boston and vicinity, assembled under the auspices of the Society of American Florists, vigorously protest against the unwarranted, unprecedented and oppressive advance by said companies for the expressing of cut flowers.

And that we demand a speedy return to the old rates for the transportation of cut flowers, which amply and sufficiently repay said express companies for any and all risks of handling and the labor and expense of transportation.

P. WELCH,
JAS. J. McCORMACK,
E. R. SHAW,
Committee.

There is evidence of a good representation from Boston at the convention of the American Carnation Society in Brooklyn next month

F. J. NORTON.

Lenox, Mass.

The arrangements for the annual ball of the Lenox Horticultural Society are going merrily on. It is expected that Gartland's orchestra of Albany, which is to furnish music, will attract many from out of town, and the largest attendance in the history of the society's annual entertainment is looked for. Committees have been appointed as follows: Arrangements, chairman, Charles R. Russell, George Thompson, E. J. Norman; floor directors, chairman, H. P. Wookey, William Clifford, John C. Morrow; reception, chairman, A. J. Loveless, Frank Butler, Robert Schmidt, J. E. Bosworth; tickets and door, Alexander McConnachie, William Henry, William Wood and Ernest Lundberg.

Pittsburg.

The Week's News.

E. C. Beatty, of Oil City, spent a day in town the past week. At the Rose Gardens, natural gas is still used as fuel for heating, but during the last cold spell the gas was scarce and wood was substituted for some days. Mr. Beatty stated that coal was hard to get to their place, and they have burned considerable wood in their time.

William J. Boas, representing Edwards & Docker, of Philadelphia, and S. S. Skidelsky, were in town during the week.

The salary of the Superintendent of Parks in Allegheny has been raised to $2,000 by the council. William Hamilton still holds the position, to which he was appointed many years ago.

E. C. REINEMAN.

St. Louis.

The News.

Mrs. Emily North, the widow of Joseph North, who was proprietor of the North Floral Co., died last week at her home at Kimmswick, Mo.

A. Hotchkiss, aged 87 years, and for fifty-three years superintendent of Bellefontaine Cemetery, was buried Sunday, January 18, in the cemetery whose present beauty and fame are due more to his efforts and skill as a landscape engineer than to anything else. Mr. Hotchkiss removed here from New York City to occupy the position held at his death.

Through an error in the transmission of a report made the writer, the note appearing in a late issue of the Florists' Exchange, to the effect that it was reported Eugene Michel would sell his Maryland avenue store, was not correct. The reported sale was that of the C. L. Connon store to Mr. Townsend.

F. W. M.

Indianapolis, Ind.

Notes.

Through an oversight in my correspondence in the last number of The Florists' Exchange, Stuart & Haugh, of Anderson, were given credit for a lot of carnations which should have been credited to Baur & Smith, of Indianapolis. The seedlings mentioned included the following: Freedom, John Mitchell, Beatrice and The News. The yellow rose Franz Deegen was also credited with having received a gold instead of a silver medal. There is some controversy in regard to this latter, as the writer understands that the rose in question is not yet eligible to receive any medal of the association.

Henry Rieman has a nice lot of Harrisii lilies in bloom. He has made a specialty of cultivating several new strains of cyclamen and some of his fringed varieties are excellent.

Messrs. A. Wiegand & Sons had a large out-of-town shipment last week.

Bertermann Bros. presented each member of the Indiana Legislature with a carnation and souvenir book last week.

The business of the Vail Seed Company is to be sold to the highest bidder, Thursday afternoon, January 22. Al. Eshbach, the former manager, has taken a position with the J. A. Everitt seed house.

I. B.

Cincinnati.

Some Predictions and Other Things.

The retail stores all seem to be doing a nice steady business over the counter, but with very few decorations in sight that amount to anything. Orchids have been called for more this season than I have ever before known in this city, and, I believe, they will soon be as staple as American Beauty roses. Golden Gate rose was not in favor here until this season; now we cannot get enough of it to fill our orders. Ivory will be just as popular as Golden Gate when it is better known. Liberty is here to stay and is by far the best of all the red roses. Sunrise is another rose that will sell when it is grown in quantities large enough to fill an order, and keep up regular supply. It is a novelty, having bronze foliage. Franz Deegen will also be sought after when it is grown in quantity. Meteor has had its day, and so has Perle des Jardins; but we have two other roses much better to take their places.

We still need a scarlet carnation, and a white one. While there are many in the market, none seem to quite fill the bill. So far among the new whites that I have seen only one comes near the mark, and I have not seen the variety often enough to give its name. No doubt many new ones will be on hand at Brooklyn.

J. A. Peterson started January 19 for a business trip to St. Louis, Chicago, and one or two other cities.

Millionaire Callahan, of Dayton, O., died Saturday, and H. H. Ritter is overwhelmed with orders.

E. G. GILLETT.

St. Paul

Among Growers.

Hahn Olsen's new houses are looking very nice these days under the careful superintendence of Ludwig Anderson. Nothing but plants and bulbs are grown here, but these are certainly done to the queen's taste. For the holidays he had as fine a lot of azaleas and poinsettias as we have ever seen. He has a nice lot of seedling ferns, just potted, that will be in fine shape for Spring sales; 3,000 lilies are coming on nicely, besides a large quantity of other bulbous stock. There are three houses, each 20 x 100 feet, running north and south; 16 x 18 glass was used. The roof is supported by an iron truss work bolted to the centre posts, leaving the walks free from posts or everhead projections. Considerable trouble is experienced with water gathering in the boiler pit, which necessitates frequent pumping. The houses are located near a bluff, on solid rock foundation without sewerage and the water which collects cannot flow away.

W. J. Lempke, who succeeded E. Behrens on Kent street, is building up a nice trade. His houses are in rather bad shape, but he hopes to rebuild them in the Spring.

L. L May & Co.'s houses are looking fine, as usual. Owing to the lateness of construction the new range has not produced very much yet, but their roses are now coming on in good shape and with a few days of sunshine will show an abundance of bloom. A bench of Prosperity carnations in the new range has already produced several thousand fine flowers, and the plants are full of buds all the time. A bench of double violets was badly affected by club root and had to be thrown out. This is the fourth attempt at growing violets, with the same results. Roses on their own roots are similarly affected, and none but grafted stock is now used. A bench of Prince of Wales violets, however, is not affected at all; the plants are growing vigorously and producing abundantly. This new range was erected on the Dietsch short span plan and will be eagerly watched by growers in this vicinity. Three houses of carnations, containing good plants, are in fine shape, and are one mass of buds. The varieties grown here are White Cloud, Flora Hill, G. H. Crane, General Maceo, Governor Roosevelt, Melba, Genevieve Lord, Morning Glory, The Marquis, Mrs. Lawson, Queen Louise, Mrs. Frances Joost, Armazindy and a few Norway. White Cloud, G. H. Crane and Mrs. Lawson are the favorites in their respective colors.

In roses this firm has some two and three-year-old grafted Bridesmaid and Bride, both in solid beds and benches, and all doing equally well. Golden Gate is also grown here with great success, and is, all things considered, the most profitable sort ever cultivated.

Some two-year-old Liberty are looking fine, but are very shy in bloom. However, the lack of sunshine may be the cause of this. The plants are strong, healthy and thrifty, and the flowers being cut are large, well developed, with stems of good length. Meteor has not been grown in two years, but will probably be planted another season.

An immense stock of Spring bedding plants is being propagated. Some 50,000 geraniums have already been rooted, and more are going in daily. The firm also has a large stock of Boston ferns and assorted ferns for jardinieres, as well as adiantums.

Bulbs are forced here in large quantities for their retail trade. Among other items we note 50,000 Roman hyacinths, 25,000 Paper White narcissus, 50,000 lily of the valley, 8,000 lilies, 20,000 freesia, 25,000 daffodils, 25,000 tulips, 10,000 Dutch hyacinths, as well as 800 azaleas, 200 lilacs, 500 spiræas, 500 hydrangeas, 500 hybrid roses, Crimson Rambler, and others in large quantities.

VERITAS.

DEAN'S SYSTEM OF GREENHOUSE HEATING

By MARK DEAN

DO YOU WANT TO KNOW

HOW { To determine the area of any greenhouse?
To tell the amount of radiation necessary to heat the same?
To place the heating pipes to best advantage?
To figure what the pipes and fitting will cost?
To set up a boiler?

DEAN'S SYSTEM OF GREENHOUSE HEATING is the name of a new book which will fill a long felt want because it has tables all figured out giving the amount of radiation and number of pipes necessary for greenhouses of all sizes, formulas for obtaining different temperatures, radiation per lineal foot of pipes of various sizes or the number of feet of radiation in any number of feet of pipe, list prices of pipe, pipe fittings, etc., besides much other valuable information. Handsomely bound. By mail postpaid $2.00.

Providence, R. I.

News Notes.

Mr. Keller received some sword ferns from Boston, the most of which are better than the usual run.

The Pawtucket florists seem to be holding forth at the same old gait. Frank O'Reilly is one of the pioneers and is at his store every day. He has done a pile of design work in his time.

Leach & Son are always busy. They have a new style electric light worth looking into.

Young Mr. Kelly of Valley Falls, has a clean house of carnations. He caters to the Valley trade. Hoffman has an immense number of bulbs forcing. His tulips are now ready; also lily of the valley.

Mr. Miller is busy potting kentias in combination. One of the houses is being altered for solid beds. His stock of grated roses is very large.

C. S. M.

Ridgewood, N. J.

Andrew V. D. Snyder cut a big crop of Prosperity and G. H. Crane carnations during the holiday season. The flowers being fine, he realized bonanza prices.

Wm. F. Barkham has put up a half dozen decorations during the past week, one of the finest being the adornment of the opera house for the Y. M. C. A.

E.

Passaic, N. J.

Wm. L. Hundertmark furnished a unique design for Assemblyman Pettersen, in the form of a representation of a section of a trunk sewer.

The main part was composed of pink carnations; the manhole of white carnations, and the beginning and ending were of dark red carnations. Roses and hyacinths were appropriately placed where they made an effective showing.

Peoria, Ill.

B. Juerjens is rejoicing over the arrival of a young son.

TALLMANS, N. Y.—The violet growers of Tallmans are short of coal and are unable to secure a supply. They are barely keeping the frost out of their houses.

HOT BED SASH
Now Ready.

DELIVERED PRICE anywhere on lots of one dozen or more. Guaranteed in every way.

ULMUS AMERICANA—THE AMERICAN ELM.

On the grounds of Messrs. Ellwanger & Barry, Rochester, N. Y. Height, 78 feet; spread, 80 feet 4 inches. May be 125 to 150 years old. Ever a renewed delight to all who may perceive in a majestic elm what Michaux has termed "the most magnificent vegetable of the temperate zones."

THE FLORISTS' EXCHANGE

We are a straight shoot and aim to grow into a vigorous plant

A WEEKLY MEDIUM OF INTERCHANGE FOR FLORISTS, NURSERYMEN, SEEDSMEN AND THE TRADE IN GENERAL

Vol. XV. No. 5 NEW YORK, JANUARY 31, 1903 One Dollar Per Year

SPIRÆA FOR EASTER FORCING.

We offer a few cases each of the following sorts as below, as long as unsold. These can be shipped safely by freight, as it will not injure them in the slightest if frozen. There is plenty of time to get them in for Easter, if wanted, and they also make good stock for Decoration Day. Now is the time to lay in a stock before they are all sold.

JAPONICA and COMPACTA MULTIFLORA. Case of 250 clumps for $8.00; in less quantities, $4.00 per 100.

ASTILBOIDES FLORIBUNDA. Case of 250 clumps for $10.00; in less quantities, $5.00 per 100.

JAPANESE FERN BALLS

Best Quality, $25.00 per 100.

The surplus bulb stock recently offered has sold fast, but we can still supply the following, in first-class shape, as long as unsold, at prices named below:

SMALL SIZED NAMED HYACINTHS.

These are splendid for Easter forcing, and are fine for growing in pans or pots. Nothing is more readily salable. Price is very low, and the bulbs are first-class—remarkably good for the low price at which they are offered. They will throw almost as good flowers as the larger and higher-priced bulbs. If you have never flowered these, try a thousand or two. You will be pleased with the results. They cannot fail to make money for you.

The following pink varieties at **only $1.50 per 100; $12.00 per 1000** (worth $16.00 per 1000), viz.: Baron van Tuyll, Gen. Pelissier, Gertrude, Gigantea, Robt. Steiger and Solfatara.

The following blue varieties at **only $1.50 per 100; $12.00 per 1000** (worth $16.00 per 1000), viz.: Grand Maitre, King of the Blues, La Peyrouse, Chas. Dickens, Blondin, Czar Peter; also Tamerlan (yellow).

The following white varieties at **only $2.00 per 100; $16.00 per 1000** (worth $22.00 per 1000), viz.: Baroness van Tuyll, Grandeur a Merveille, Blanchard, L'Innocence, Mme. Van der Hoop, and Paix de l'Europe.

FINE NAMED HYACINTHS. Single and Double.

We offer a limited stock of the following varieties in first-sized bulbs, at $3.00 per 100; $25.00 per 1000 (worth $35.00 per 1000), viz.: La Peyrouse, Regulus, Tamerlan, Grand Lilas, La Pluie d'Or, Bouquet Tendre, Crown Prince of Sweden, Flevo, Garrick, Grootvorst, Gen. Antinck, King of Wurtemburg, La Tour d'Auvergne, La Virginite, Lord Anson, Lord Raglan, Othello, Prince of Orange, Prince of Saxe-Weimar and Princess Royal.

HYACINTHS IN SEPARATE COLORS.

We still have a few of these left in singles and doubles, which we offer as long as unsold at **$2.50 per 100; $20.00 per 1000** (worth $26 per 1000).

TULIPS.

SINGLE and DOUBLE.

Most of the varieties here offered are among the very best forcing varieties, especially for late or Easter forcing, viz.: Bizard Verdict, Couleur Ponceau, La Candeur, Yellow Rose, Lady Grandison, Duke of York, Rose Blanche and Count Leicester, at $5.00 per 1000; Cottage Maid, Joost van Vondel, Brutus, Pæony Red, at $6.00 per 1000; Tournesol, red and yellow, Gloria Solis, Le Blason and Rosine, at $7.00 per 1000; Duc van Tholl, scarlet, and Standard Royal Silver, at $7.50 per 1000, Mariage de ma Fille, at $10.00 per 1000; Proserpine, at $12.00 per 1000; White Joost van Vondel and Rose Luisante, at $20.00 per 1000.

SEED TRADE REPORT

The House has passed the Agricul- ral Appropriation Bill, which pro- des for an increase of the appropria- on for free seeds from $270,000 to 00,000.

European Notes.

The wind, which is not so unkind as an's ingratitude, has proved itself a od second during the past week, and fe of all sorts is being fairly nipped p. Practically the whole of Europe orth of the Alps is in a stiff state of eeze, and as there have not been ny falls of snow in the seed producing nters the plants are having a pretty ad time. Already the broccolis look ke folding their tents and departing, nd of the remainder of the brassicas nly the Savoys maintain themselves nhurt. Your readers shall know the nal results in due course; at any rate, means a certain amount of destruc- on, which is bad. No part of the sea- on is so perplexing to the seedsman as e time when the clearing up ship- ents have to be made. So many ources of supply have to be looked up, nd some delay is practically inevit- ble. EUROPEAN SEEDS.

"Everything for the Garden."

Among the many catalogues which ach our desk none excites greater ad- iration than that of Peter Henderson Co., of New York, the familiar Everything for the Garden." This ear the catalogue comprises over 188 ages, enclosed within beautifully em- ossed covers and replete with up-to- ate information on all that is newest nd best in horticultural lines. The atalogue is profusely illustrated with andsome half-tone and woodcut pic- ures, besides embracing very natural epresentations in color of vegetable ollections, hollyhocks, sweet peas, oneysuckle, Crimson Rambler roses, collection of the newest everbloom- ng roses, etc. This firm, from its arliest days, has had the happy fac- lity of applying catchy popular names o plants. This year we note Nepro- epis Piersoni has been styled the ostrich plume" fern, a not altogether nappropriate designation and one sure o take. The price of the catalogue is 0 cents.

The Deming Catalogue.

The 1903 catalogue of the Deming Company, of Salem, O., is just off the press. As usual, our readers will look to it to exemplify in practical form the latest ideas in spraying orchards, vines, potatoes, shrubbery, etc. It includes hand, bucket, knapsack, barrel, mounted and power sprayers. In certain sprayers of their line, notably the Century, Simplex, Peerless and Success knapsack sprayers, the mechanical agitation of the liquid, insuring perfect mixing of poison with the water, is worked out to a nicety. The wide adaptability and general usefulness of the line cannot be realized without perusing the catalogue. As usual, it will be mailed free to anyone writing for it.

Nursery Department

AMERICAN ASSOCIATION OF NURSERYMEN

Charles A. Ilgenfritz, Monroe, Mich., President; D. S. Lake, Shenandoah, Ia., Vice-President; George C. Seager, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., Treasurer.

CHICAGO, ILL.—The business of P. S. Peterson & Son will be conducted in future under the style of Peterson's Nursery.

HARRISBURG, PA.—The State Horticultural Association has selected Lancaster as the next place of meeting, and elected the following officers: President, Howard A. Chase, of Philadelphia; vice-presidents, Gabriel Hiester, of Harrisburg; Hon. W. T. Creasy, of Catawissa; D. C. Rupp, of Shiremanstown; recording secretary, Enos B. Engle, of Waynesboro; corresponding secretary, William P. Brinton, of Christiana; treasurer, Edwin W. Thomas, of King-of-Prussia, Montgomery County.

KALAMAZOO, MICH.—The officers and employees of the Central Michigan Nursery, to the number of one hundred, with their wives, were the guests of the concern at a dinner given on January 20. The officers of the company are: President, W. E. Upjohn; vice-president, J. W. Rose; treasurer and general manager, Charles A. Maxson; secretary, C. A. Krill; manager greenhouses, W. C. Cook; superintendent of Three Rivers branch, C. C. Nash; landscape artist, E. C. Foster.

Practical subjects appropriate to the occasion were treated by the speakers, among whom were Charles A. Maxson, who responded for the management; Fred W. Remington for the employees of the Central Michigan Nursery; C. A. Krill for the nursery salesmen; W. C. Cook for the greenhouses, and E. C. Foster for landscape gardening. The Morning Gazette-News devotes almost a page to the proceedings, which were of a most enjoyable nature.

Early Blooming of Magnolia Stellata.

In the vicinity of Philadelphia, in 1902, many bushes of Magnolia stellata were displaying expanded flowers before the close of March, and, too, on bushes standing out quite alone on open lawns. It seems an earlier date than has been before recorded. On the 29th of March flowers were expanded. This is a useful and beautiful species. Before expanding, the buds are pink, the flowers appearing white when fully open, and they are sweet-scented and semi-double. This magnolia is of dwarf, bushy growth. The opening of the first buds this season will be watched for with much interest.

Tree Tomato.

Mr. Ernest Braunton, Los Angeles, Cal., referring to the note on the tree tomato which recently appeared in these columns, says in the California Cultivator:

"The tree tomato is Cyphomandra betacea, sometimes known as solanum, from which it differs but slightly in floral structure. It is a native of Brazil and a great favorite in tropical and sub-tropical countries. In California it is highly esteemed, and in practically frostless localities is quite well-known. When well cared for it bears an immense crop of medium-sized pear-shaped tomatoes of an orange red color, richer in taste and firmer in flesh than the ordinary tomato. For the latter reason it would prove far superior to the herbaceous tomato as a shipper. We have never known a person who grew it that did not prefer it to the ordinary sorts. For the frostless belt of South Africa it would be a fine thing, for in Europe there are ranges of glass houses especially for forcing this fruit."

Our thanks are tendered Mr. Braunton for the marked copy sent us containing the foregoing extract.

Tap Roots of Fruit Trees.

Nurserymen's customers frequently complain that the fruit trees furnished them, especially those of the pear, are lacking the tap roots, or those of a strong nature which have descended well down into the soil. It is the custom of the trade to sever these roots in digging, leaving them of about a 12-inch length. The complaining customer is generally astonished when told that the cutting of these roots is good practice, so considered. What is wrong, is to let the purchaser take away the tree before the roots have been cut to a clean, smooth surface at their ends. They are nearly always in a bruised condition, which is much against their well doing.

It is somewhat singular that while purchasers, usually, and not uncommonly gardeners, like to have strong descending roots, the old world gardeners, from whom we receive our A B C in matters horticultural, are so opposed to these very roots, that they go from tree to tree in their gardens undermining them and severing these tap roots wherever found. Their belief is, that these roots are opposed to fruitfulness, that even when trees do bear that have them the fruit is not as good as it should be, and that to have perfect fruit of the best quality well fed surface roots are required.

Our hot soil in Summer suggests that roots are not to be encouraged too near the surface, especially in the case of pears, unless when they are on a lawn; but evidence is not wanting that deep rooting fruit trees are not as satisfactory as others.

Trumpet Vine Not Flowering.

A reader of The Florists' Exchange asks why his plant of Bignonia radicans does not flower. It has been planted to a stable wall since six years ago, and though still growing well and spreading, it has not bloomed. Six years is rather a long time to wait for flowers, but it is evident that the plant feels it has not accomplished its mission in quite covering the wall, and that it is bound to do this before it flowers, as many a vine has done before it. It has been observed so often that it may be deemed law that, while growth is progressing vigorously there will be but little flowering. Whenever vines have "a free foot" they rarely bloom until reaching the extent of what there is to cover. Starve them, or wait until the space is covered by them, and flowering will follow.

It is the same with plants in pots, shrubs and trees of all kinds. The fruit tree making a heavy growth demands that we wait later for its fruit. It must grow well first. So our friend who has the trumpet vine must have patience until the vine has covered the stable wall. It will then turn its attention to flowering.

Pavia Rubra.

Of the various species of pavias, or buckeyes, the yellow one, P. flava, and the dwarf one, P. macrostachya, are not uncommon, but to see the red one, P. rubra, in collections is rare. Though the type is red-flowered, there are varieties of it, some almost yellow, and when collectors send on seeds of it from the southwest, generally the seedlings raised come of various colors. It is well worth growing, being in shape and habit between the two others mentioned; its growth, in height, about six to eight feet. But in the case of the varieties mentioned, some are quite dwarf, little fellows of but two feet having been known to flower freely.

American Oaks in Europe.

A writer in a French horticultural journal notes that American species of oaks are rarely seen in gardens and plantations, with the exception of Quercus rubra, Phellos and macrocarpa.

This seems a singular statement in view of the fact that acorns of all our available species have been sent to France for years past. In fact, nearly all the leading species can be found listed in the catalogues of French nurserymen, obtainable by the thousands in seedling and other sizes, and it must be a mistake that sorts other than those named are not to be met with in French gardens and plantations.

Oaks as Shrubs.

The growing popularity of oaks for ornamental and timber planting is something to be much appreciated by all. What a large and worthy assortment those of our own country consists of! The difficulty that once confronted the planter in the way of getting oaks to live when transplanted does not exist to-day, as the requirements of these trees are better known. Close pruning, with attention to safeguards applying to all trees when transplanted, almost assures success in the case of oaks.

A great curiosity on the few lawns possessing them are the shrub oaks. From our earliest years we all are possessed of the idea that an oak becomes a monstrous tree. To see a little fellow, one, two or three feet high, fully developed and bearing a full crop of acorns, is most astonishing to those who see such for the first time, and as a great curiosity all collections of shrubs should include one.

The most common is the Quercus ilicifolia, the one so abounding in the wastes of New Jersey. Little bushes of two to three feet bear acorns abundantly. Then there is another, growing in the same locality, the Q. prinoides, called dwarf chestnut oak because its leaves are like those of the large chestnut oak in many particulars. Botanists say this is in height two to four feet, but I have seen them ten feet at times.

The black jack oak, Quercus nigra, often exists in a dwarf form. I have seen them all the way from two feet to thirty feet, seemingly in perfection of growth, the smallest, two feet, being full of acorns.

In the South there is a small oak tree called Q. cinerea, of which there is a dwarf form called Q. pumila, said to be the smallest oak known. I have never seen it, but its height is given as from one to three feet, rarely three, and it bears a profusion of acorns when of but fifteen to twenty inches high. If its acorns are like those of the type, they are handsome; for those that I have seen of Q. cinerea are of good size, and of a deep shining black color.

JOSEPH MEEHAN.

FIRMS WHO ARE BUILDING.

MARLBORO, MASS.—Winthrop L. Lewis is building a large greenhouse.

WESTFIELD, MASS.—S. E. Barton will erect a large greenhouse.

SAN FRANCISCO, CAL.—Gustave Gagne is building a large greenhouse.

F. Gonzalez will build three houses for miscellaneous stock.

SAN MATEO, CAL.—Fick & Faber have built a range of greenhouses to be devoted to carnations. A large stock of the variety Miss Louise Faber has been planted.

The Late P. S. Peterson.

The funeral services over the remains of Peher S. Peterson, the Chicago nurseryman, were held in Rosehill Memorial Chapel, Wednesday, January 21. The following tribute to the memory of the deceased gentleman was paid by the officiating clergyman.

The tremendous energy and the personal force displayed throughout these years is witnessed by the fact that seven-eighths of the trees in Chicago parks and boulevards were either grown in his nursery or removed by him from their native forest homes. To him belongs the distinction of being the first man in America to institute and prosecute the business of removing large trees.

More beautiful and more grateful to the eye than polished shaft or mausoleum these noble trees and shrubs in living green stand as a monument to testify that his strenuous life was not lived in vain. . . .

It was his love for flowers and plants and trees that made his life-work a congenial one to him. . . . It was this passion that gave him his unbounded admiration for the great Swedish naturalist Linnæus, the originator of systematic botanical classification, and caused him to become the originator and prime mover and chief giver in the erection of the monument to Linnæus in Lincoln Park, and led him to present a bas relief statue of Linnæus of heroic size to the Art Institute of Chicago.

THE LATE PEHER S. PETERSON.

. . . . As wealth increased his heart turned with increasing love and with generous purpose towards his native land. During the World's Fair he conceived the idea of establishing a permanent Industrial Museum of all the world's tools, and as a result there stands now in Stockholm a permanent exhibit of "Arts and Crafts." He sent hundreds of copies of the little book "Black Beauty" to be given to Swedish children. He founded an Idiot Asylum in such a way as to provide that the inmates might have a fresh air Summer home in the country, and sent over 1,000 crowns yearly to be distributed to the poor of the district of his old parish home.

In the year 1893 the king of Sweden made him a knight of the Vasa Order, an honor conferred only on civilians who bring honor and distinction to their native land.

Mr. Peterson was married to Miss Mary A. Gage, of Boston, Mass., in October, 1865. He is survived by his widow and their son, William A.

Horticulture in the Klondike.

Mr. Dailey, a market gardener of Dawson, says there is a great craze in that section now for flowers. He is building a greenhouse on a small island at the mouth of the Klondike. Mr. Dailey says $100,000 worth of home-grown vegetables were sold in the Dawson markets last season and $20,000 worth of flowers. He believes the interior will from now on supply its own garden truck, and owing to the shortness of the season prices will always be high.

ROSES

As the days have begun to grow longer the plants will require more food. If they are in good condition it will be noticed they are breaking freely, and in order that the growth be strong and healthy, manure should be applied. In liquid form it is no doubt the best, but most growers seem to prefer a good mulch of but partly decomposed cow manure. Put it on when the beds are a trifle dry, on a clear day, when there is a little air on, and water it well in. There will then be no danger of burning the foliage. In spreading the manure, great care should be taken that no young shoots that may be coming up out of the ground are broken, as sometimes they appear two or three inches away from the plant and by a careless man considerable damage can be done.

Keep the plants tied up well and disbudded, as the stems will thus be straighter and longer.

Red spider will soon be making its appearance, and nothing but thorough syringing will keep this pest in check. Greenfly also will soon become troublesome, and as fumigating at this time is not to be permitted, especially if there is a crop of buds showing, fresh tobacco stems should be strewn in the walks; or, better still, tied in chicken wire and hung under the benches, as described in these pages some time ago.

Propagating will now have to be attended to if the plants are wanted from 4-inch pots early in June. The sand for the cutting bench should be clear and gritty, free from all matter liable to create fungus. Two eye cuttings are the best, and each cutting should be cut close to the eye. They will thus root much more evenly. Blind wood, if not too hard, is really the best and cheapest to use. The term "blind wood," however, is not applied to plants that just grow, throwing stems of enormous length without showing any buds. Such plants should be thrown out, as they seldom produce any flowers. It should be borne in mind that upon the quality of the young stock much of the future success depends, therefore, the cuttings should be made only from healthy plants.

If possible, the temperature of the sand should be kept at from 60 to 64 degrees, with the air above about ten degrees cooler, at no time allowing a draught to strike the cuttings.

It would not be amiss to bring in some soil, if it is frozen, so as to have it in shape for potting. A large number of plants is often lost by being potted with soil that is wet and almost at the freezing point.

J. F. R.

CHANGES IN BUSINESS.

BATTLE CREEK, MICH.—L. Cole is the successor of McCrea & Cole.

BRIDGEPORT, CONN.—Julius Reck, formerly of Villa Nova, Pa., is now located here at 25 Ashley street.

TORONTO, ONT.—The Toronto Floral Co., Limited, is organized with a capital of $25,000 and head office in Davisville.

LACONIA, N. H.—J. S. Power has bought the store at 426 Main street and will run it in connection with his florist business.

DANVILLE, ILL.—W. A. Duke has sold his stock and has leased his greenhouses both in this city and Tilton for a term of years to Messrs. Peterson and Kellsner, of Chicago.

CHICAGO, ILL.—The Worcester Conservatories have been incorporated; capital, $50,000; to deal in and grow horticultural products; incorporators, C. P. Wilson, F. Z. Marx, J. P. [illegible].

SAN FRANCISCO, CAL.—Dominic & Co. have bought out the business of George Lyon, 211 Sutter street. C. E. Antonini, a partner, will be in charge of the store.

Eugene Gregory started in business here at 630 Cambridge street shortly before Christmas.

Augusta, Me.

G. P. Sanborn has given up his greenhouses permanently, the high price of coal influencing his decision. He is now operating a retail store in this city. Mr. Sanborn strongly protests against the advanced express rates, and with others, hopes relief may be forthcoming soon.

THE AMERICAN CARNATION.

Now on press. Write for particulars.

THE FLORISTS' EXCHANGE, 2 Duane St., N. Y.

Chicago.

News of the Week.

There is no material increase in the cuts of stock coming into the market; if anything, they are shorter than a week ago. Long-stemmed American Beauty roses can now be listed amongst the scarce articles, as the supply has fallen off considerably. The same is true of Liberty. In fact, I do not think the Chicago market has ever seen such short supplies in the way of roses as there is at the present time, and if the existing cloudy weather continues, it will be some time before there is any material change. The shortage can, for the most part, be traced to the inadequate coal supply, as the great majority of growers have not got fuel enough on hand to carry them through until Spring, and those who have a supply are not firing any heavier than the ones who are short.

In carnations the shortage is not so marked as in roses. The supply of pink sorts is sufficient to meet all demands; white and reds are short, especialy white, due to the large number of funeral orders prevailing at the present time.

Preliminary measures were taken to have a department of floriculture, greenhouse pests, and plant diseases in connection with the horticultural department of the State Experiment station at Urbana, at a meeting of committees of the Chicago Horticultural Society and the Florists' Club held on January 20.

H. W. Bruns, of West Madison, is forcing upwards of three-quarters of a million of lily of the valley pips this season.

Stollery Bros. are commencing to cut from 50,000 tulips; all are in prime condition.

M. Wieland, of Evanston, reports trade better with him than ever before at this time of the year.

The George Wittbold Co. had the decorations for the Fete of All Nations at the Auditorium. Smilax and holly were the principal things used in connection with the different flags. A great many palms were also employed. The firm furnished the cut flowers that were sold there.

The florists have made arrangements to go over the Lake Shore and Michigan Southern Railroad to the carnation meeting in Brooklyn. Those from the West who intend going should make arrangements to accompany the Chicago contingent. A special car will be furnished. Intending delegates should communicate with Mr. Vorburgh, of the Lake Shore Road. About twenty will go from here.

Vaughan's Seed Store is undergoing its annual cleaning prior to the opening for Spring trade.

C. E. Dickinson is again seen at his desk after a short vacation.

Edgar Sanders continues to gain his strength slowly. He is now able to go around his room quite lively.

Visitor: H. E. Philpott, Winnepeg, Man.

R. JOHNSTONE.

Murphy's White Carnation

is proving itself a paying commercial white. It was in full crop for the Holidays. Has been in continuous crop since August. We do not claim a Fancy, but the best paying White on our market to-day, as a keeper, as a producer, seller and shipper. It is all we claim for it. We are booking orders now for February 1st to 15th delivery. First-class cuttings and satisfaction guaranteed, or money refunded. Place your order with S. S. Skidelsky, traveling salesman, or J. Gammage & Sons, London, Ont., Canadian agents, or send direct. $6.00 per 100; $50.00 per 1000; $45.00 per 1000 in 5000 lots; $40.00 per 1000 in 10,000 lots.

$UCCES$

The New Pink Carnation

Succeeds in backing up the claim of the originator that it is the most prolific Carnation to date—the best money-maker grown—and that is what we are all looking for. Bore much larger blooms and 35 per cent. more of them than Mrs. Joost last season. If you want strong, first-class rooted cuttings, order now from Henry F. Mitchell, Philadelphia, Pa., or J. Gammage & Sons, London, Ont., or send direct.

Rooted cuttings, $1.50 per doz.; $2 50 per 25; $8.00 per 100; $70.00 per 1000. Orders filled in strict rotation.

FIRE.

NEWARK, N. Y.—The large greenhouses of C. F. Clark, florist, in the eastern part of the village of Newark, narrowly escaped destruction by fire early on the morning of January 29. Mr. Clark fired the boilers until 2 o'clock in the morning, when he retired. About two hours later Mrs. Clark discovered the odor of smoke and investigation revealed a [illegible] post in the coal bin. Soft coal has been used of late and it has been stored in a bin next to the boilers, the post being a part of the partition separating the boilers from the bin. The heat had ignited the wood as well as some of the soft fuel, but it had not burst into flames before its discovery.

Society of American Florists and Ornamental Horticulturists.

DEPARTMENT OF PLANT REGISTRATION.

Peter Crowe, Utica, N. Y., registers Adiantum cuneatum Croweanum; found growing in a bed of A. cuneatum thirteen years ago, nothing except pure stock of A. cuneatum having been grown for eight years previous. Fronds much larger, habit of growth much stronger than that of the parent variety. Foliage very dark green, graceful, ripening in about one-half the time needed for A. cuneatum. Height, 28 to 30 inches. Has never been known to produce fertile seed. Originally grown by Mr. Crowe under the name of Bardii, for which the name Croweanum is now substituted.

WM. J. STEWART, Secretary.

Express Rates.

The various meetings of florists who ship cut flowers, held for the purpose of protesting against the advance on express rates, which protest is shared in by the S. A. F., are all right in their way, and, we hope, may be productive of the object sought—the restoration of the former rates.

We have been told, however, of the pressure that was necessary to secure a reduction on the express rates on plants, viz., the threat to divert the traffic of the catalogue men to the mails; the withdrawal from all catalogues of the announcement that plants could be forwarded by such and such express, which would result in an immense loss to the companies in the way of advertising, and other kindred moves. It appears to us that should the efforts of the cut flower men to obtain redress by persuasion prove futile, the plantsmen could and should come to their assistance, and advance the same forceful arguments that previously brought the express companies to terms.

Something of a material nature pointing to a curtailment or an entire loss of the traffic of the trade to the express companies is, we think, necessary in the premises. We have but little faith in the potency of resolutions of protest, and we believe the interdependent character of one branch of the trade upon another is a good and sufficient reason why one should come to the aid of the other, when the interests of either are assailed.

It is to be hoped that the catalogue men will come to the support of their brothers in the trade in the manner herein outlined, and we submit the foregoing suggestion for their friendly consideration and adoption.

The American Rose Society.

The joint schedule of prizes offered by the Pennsylvania Horticultural Society at its Spring exhibition and the American Rose Society at its fourth annual exhibition has been issued. The show will be held in Horticultural Hall, Philadelphia, March 24 to 26 inclusive.

In addition to a comprehensive list of premiums offered the following special prizes are enumerated:

For fifty blooms American Beauty rose, the Executive Committee's prizes of $100.00 and $50.00. In the event of there being five or more entries staged in this class, a third prize of $25.00 will be given by the Society. The Lord & Burnham Challenge Cup (of the American Rose Society), valued at $250.00, will be awarded in conjunction with the first (cash) prize for fifty American Beauty roses in this class.

For any variety of rose (American Beauty and Queen of Edgely excluded), fifty blooms, $20.00 and $15.00.

For the largest and best display of cut roses, not more than 25 blooms nor less than six blooms of any one variety to be staged, first prize (presented by President F. R. Newbold), in either cash or plate, $100.00; second (presented by Treasurer J. N. May), in cash or plate, $50.00.

Group of roses in pots, arranged for effect and covering 25 square feet of space, first prize, a silver cup, value $50.00, or cash, presented by James W. Paul, Jr., Esq., President of the Pennsylvania Horticultural Society; second prize, $25.00, presented by the E. G. Hill Co., Richmond, Ind.

The American Rose Society's medals for novelties will be awarded as under:

Gold medal for the best new rose not yet disseminated, whether of domestic or foreign origin. Exhibits to be judged by the official scale of the American Rose Society, and no gold medal to be awarded to any rose scoring less than 95 points.

Silver medal is offered at the same time and under the same conditions for a novelty scoring not less than 85 points.

It is further ordered that the complete scores of all entries in the competition be filed with the secretary of the American Rose Society before the award of any medal is confirmed. No duplicate medals will be awarded. It is understood that though the award of the gold or silver medal may be made to the same variety from one exhibitor exhibited in different centers, only one medal will be delivered to the exhibitor.

The Executive Committee of the American Rose Society reserves to itself the right of selection of the judges who shall pass upon the exhibits in the competition for these medals.

Other special prizes are:

For display of roses in pots, twenty-four plants, three each of eight varieties, in not over 8 inch pots. One prize, silver cup, value $25.00, or cash, offered by Dingee & Conard, West Grove, Pa.

Hybrid perpetual roses in pots, twenty-four plants, six each of Magna Charta, Gabriel Luizet, Mrs. John Laing and Merveille de Lyon. One prize, silver cup, value $25.00, or cash, offered by Henry F. Michell, 1018 Market street, Philadelphia.

Hybrid perpetual roses, twenty-four plants, six each of four varieties, in not over 8-inch pots. One prize, silver cup, value $25.00, offered by H. Bayersdorfer & Co., 50 to 56 North Fourth street, Philadelphia.

Roses, cut flowers, Liberty, one vase of fifty blooms. One prize, silver cup, value $50.00, offered by Robert Scott & Son, Sharon Hill, Pa.

Stove and greenhouse foliage plants, twelve plants, "palms or ferns not admissable." One prize, silver pitcher, value $50.00, offered by Henry A. Dreer, Inc., 714 Chestnut street, Philadelphia.

"Peony Association of the S. A. F."

The subjoined communication, which has been forwarded to us, is self-explanatory, and is inserted for what it is worth:

Editor Florists' Exchange:

Some mild criticism of the S. A. F. Peony Association has recently been indulged in. Nothing vital has been evolved, and it is hardly worth noticing except that some might think that saying nothing there was nothing to say. For the information of the public, therefore, the following points are respectfully submitted:

1. The Peony Committee appointed by President Burton had power to add to its numbers. A committee having that right of associating with itself other members of the parent body became "an association." It is only another name for that kind of a committee, but it publishes better the breadth and depth of the committee's work than the title of committee as usually understood.

2. Any member of the S. A. F. may ask a friend to join the S. A. F. Because one is a member of the Peony Association does not deprive him of that right. If a candidate for membership in the S. A. F. happened to be a peony enthusiast, the Peony Association would naturally want him in their ranks, and they would have a perfect right to ask him; and it would not cost him anything additional. Why should it? If he pays five dollars, the five dollars goes into the treasury of the S. A. F. The Peony Association does as any other committee does as to finances, it draws on the parent body.

3. The advantage of having the peony interests under the wing and in the control of the S. A. F. is, briefly, that it avoids the policy of a practically self-constituted dictatorship in that section of the Society's field of work. The powers given to the committee to gather to itself those specially interested within the S. A. F. are ample, and subject only to the proper control of the executive officers of the S. A. F. They can also gather those outside the S. A. F. by the simple process of having them become members of the S. A. F. While that helps the peony interests, it also helps to build up and broaden the S. A. F.; and it is a practical solution of that vexed problem "closer relations" which has been troubling the Society for the past ten years.

4. The work of revising the nomenclature of the peony will be a most difficult one, and will take years to accomplish. That fact was early realized, as was the fact that to do it properly facilities for growing and comparing the different varieties (there are perhaps 1,000 named varieties of the herbaceous section alone now in commerce) would have to be provided. An amateur peony enthusiast offered to do this, but his place was a little difficult of access to visitors. While the committee were holding the matter under consideration a gratifying solution was presented to them by the Commissioners of Fairmount Park, through Oglesby Paul, the landscape gardener of the park. It is now arranged to have the collection in the park under the care of Mr. Paul. Each contributor's donation will be carefully labeled and kept separate, and all the benefits accruing from a permanent exhibition will thus be secured to the donors at a central point easy of access. This arrangement relieves the Society of all expense in caring for the plants, and removes all suspicion of self interest from the members of the Association. Field notes can be secured readily and frequently by the officers and by any one interested. Further particulars as to this and the matter of an exhibition will be given out later as things develop.

5. In conclusion, those who are working for the S. A. F. and the peony at present are doing so at a sacrifice of their time and means for the benefit of all and they will welcome assistance from whatever source gladly. They feel neither prejudice nor malice toward any one; and they also feel that they have some right to be treated with similar consideration. Let every one with the welfare of the S. A. F. at heart turn in and do something. There is plenty of work for all, and no time for fault finding. Life is short, and there's a great deal to be done.

GEORGE C. WATSON, Secy.
S. A. F. Peony Association.

It seems to us that what is contained in the foregoing communication would far better have been left unsaid, as it explains nothing, and only aggravates the position of those responsible for the attempted creation of the alleged "Peony Association of the S. A. F."

The statement that "The Peony Committee appointed by President Burton had power to add to its numbers" is utterly gratuitous and not in accordance with the resolution empowering the president to form that committee. That resolution proposed by ex-President O'Mara, as set forth in the Society's official report for 1902, is as follows (page 100): "I therefore move that the President of this Society be requested to appoint, at his earliest convenience, a committee of nine on the Peony, who shall report at the next convention the latest facts they may discover in relation to the Peony." The motion carried without alteration or amendment. The limitations of the president are here plainly prescribed. The attempt to explain away any unwarranted interpretation and the breach of these powers by the committee he appointed is not only futile, but a mere agglomeration of verbiage.

It is observed that an effort is now made to change around and qualify the announcement in reference to membership in the so-called "Peony Association," as that appears in the Society's report (page 173) for 1902, copy of which has been distributed in circular form by the party acting as secretary of the alleged association. In that report it is stated: "Five dollars will be the cost of membership in the association the first year, and $3.00 per annum thereafter, membership in the Peony Association also including membership in the Society of American Florists."

Now we are informed the peony enthusiast has only to pay his membership fee in the S. A. F. to entitle him also to affiliation with the alleged Peony Association.

The S. A. F. has never sanctioned the creation of any "association" within itself allowing free membership in such through membership in the national body; neither has it at any time decided to support and maintain any association illegitimate or otherwise, devoted to the advancement of a particular interest; and no person or committee has any authority to assert what the Society will or will not do in a matter of this kind, until, as a body, its wishes thereanent have been voted upon and declared. This peony committee was constituted "to report at the next convention the latest facts they may discover in relation to the peony." Its work is clearly outlined. Sensible men would endeavor to avoid perverting their powers and see the necessity of operating within their authority.

As to such a proceeding as has been instituted by the writer of the foregoing communication and his associates being a "practical solution of that vexed problem, 'closer relations,'" that is merely a matter of opinion. Closer relations had to do with existing societies; at all events, it would have shown much better judgment and respect for the S. A. F. had the peony committee first brought in next year, when it was called upon for its report, its recommendation as to how, in the opinion of its members, these "closer relations" were to be consummated, than that it should set at nought the views of the S. A. F. and act on its own unauthorized initiative in a matter of such moment to the Society.

It is certainly very kind and courteous of the Park Commissioners of Philadelphia to favor the S. A. F. in the manner described, in order "to remove all suspicion of self-interest from the members of the Association," and otherwise. It was legitimate self-interest that prompted the formation of a "committee of nine" to discover facts relative to the peony. We believe the florists and nurserymen of America quite capable of managing affairs that concern themselves most intimately, in an honest and straightforward manner without extraneous aid that may or may not be fully qualified to undertake the work in view. Furthermore, the Society of American Florists is not, so far as we know, in need of any eleemosynary assistance, and to thus inconsiderately place it in a position where the carrying out of any portion of its work is dependent upon the charitable consideration of any other institution, whose own operations are conducted through the beneficence of the taxpayers of any particular city, is to subject the S. A. F. to a cruel indignity, and to heap insult on the public-spirited men who comprise the national Society, in addition to assailing the personal integrity of the peony growers within its ranks. Conduct of this kind merits severest rebuke.

The secretary of the so-called "S. A. F. Peony Association" has advanced nothing that justifies the action of himself and his associates. His talk about "malice and prejudice" is mere twaddle. There is a legal principle involved which no amount of quibble or words can set aside.

As we before recommended, the president should at once annul the operations of the Peony Committee in toto and set men to work who know the value and wisdom of conforming to authorized instructions, men who recognize that "too quick resolves do resolution wrong," and that "things to be done are long to be debated." To permit th's matter to proceed in its present form can only bring about antagonism to and adverse criticism of the national Society, besides establishing a pernicious precedent that will work untold injury in itself as well as the repetitions of it.

We have faith in the good judgment of Mr. Burton influencing him to set this thing right, without further delay, despite any pressure that may be brought to bear upon him to act to the contrary.

The C. S. A. and Variety Estelle

Editor Florists' Exchange:

May I presume upon your time and space to air a grievance which I feel that I have against the Chrysanthemum Society of America?

Three years ago last October, I was fortunate in having a sport originate on my place from a Glory of the Pacific stock, coming pure white, one-third larger, and finishing a week earlier than its parent, with a more rounded form and a different style of petalage. I have carefully nurtured this sport, and have taken great pains to compare it with existing sports of this same variety—namely, White Glory of the Pacific and Polly Rose. Upon satisfying myself that it was different, both in habit and form, from these, I took it before the C. S. A. committee at Cincinnati, October 18, 1902. The committee scored it under the commercial scale and awarded it 85 2-3 per cent., or points, which entitled me to a certificate under the then existing rules of the C. S. A. Edwin Lonsdale, secretary, duly announced the variety, publishing the score in the trade papers, and mailed me a certificate, the receipt of which highly elated me, for having struggled along in the florist business for ten years at last I had originated a new and distinct variety which would establish me among the "chrysanthemum specialists." Alas! for the plans of mortal man, my air castles have been shattered, and my pet's score before the Cincinnati committee has been wiped from off the face of the earth. I refer to the table detailing the work of the C. S. A. for 1902, as published in one of your recent issues (January 3, 1903).

On October 18, 1902, I complied with all of the rules of the C. S. A., paying it a $2.00 fee, which was accepted. The committee regularly appointed by the C. S. A. complied with all the rules and regulations, as laid down to them by the official head of that society in passing upon my new chrysanthemum, and the result was that I received the certificate which I was fully entitled to, under the then regulations of the C. S. A.

In November, at the C. S. A. convention held in Chicago, a new rule was passed, making it necessary for all sports trying for a certificate to be exhibited before three committees, in order to be considered eligible for such certificate. This new law, it would seem, has been applied to my Estelle, for in the report of the C. S. A. the points have been eliminated and in a foot note the November ruling has been applied to my sport, which was certificated a month previous to the ruling. Is this a case of "Backward, turn backward, Oh time, in thy flight"? Again, what of the committee that conscientiously did its duty and served its master, the C. S. A., in issuing this certificate? Is its labor to go for nought, that its judgment is so totally ignored?

I feel that I have been discriminated against, and I judge that feeling from the fact that some of the "powers behind the throne" have circulated an opinion on my Estelle, declaring it synonymous with Polly Rose, before they had ever seen a cut, or a bloom, of my variety. How did they gain their information?

In closing I wish to say for the benefit of the misinformed that notwithstanding all this, I have in Estelle a variety that fills a long felt want, viz., an early fancy white, producing extra sized flowers of fine deep form, over double the size of those of the older varieties with the same culture, and a flower for which the retailer can ask a fancy price and get it with ease. In the market to which I shipped the blooms the demand was greater than the supply, and the retailers vied with each other to obtain the shipments as they arrived. Has either White Glory of the Pacific or Polly Rose such a record?

H. M. ALTICK.

Dayton, O.

[The resolution governing the award of certificates to "sports" went into effect on November 13, 1902, the date of its adoption. There is nothing in that resolution demanding that its operation shall be retroactive, and no subsequent announcement to that effect having been issued by the Chrysanthemum Society of America, we cannot see but that Estelle was entitled to be recorded by the Society as having received its certificate. However, the action of the C. S. A. in making its rule retroactive does not impair the worth of the variety, as that was determined by one of the Society's committees. If Estelle has the merits claimed, and is distinct from the other sports mentioned, the withholding of the announcement of the certificate in the Society's "Review," under the circumstances, will not injure its sale.—Ed.]

An inquiry as to the operation of the C. S. A. ruling addressed to President Herrington elicits the following reply.

Editor Florists' Exchange:

Has Mr. Altick written the secretary in reference to this matter? The rule was not made retroactive, and if the certificate has been refused him why then have him state his case in writing and it can be attended to next month as there will be a meeting of the C. S. A. during the Carnation convention.

A. HERRINGTON.

BOOKS RECEIVED.

THE BOOK OF THE STRAWBERRY, by Edwin Beckett, F.R.H.S. Publisher: John Lane, New York and London.

This work contains a full history of the development of this fruit from its wild state to the present time. The chapters on cultivation are well written, and a perusal of them will repay anyone interested in strawberry culture, whether for profit or pleasure.

A complete list of varieties suitable for forcing, with specific instructions for their cultivation, is given; also several chapters devoted to raspberries and kindred fruits. The work is written from an English standpoint, and for conditions existing there.

BUSINESS DIFFICULTIES.

LOWELL, MASS.—Paul P. Burtt, florist and undertaker, has filed a bankruptcy petition. His debts amount to $9,231.41, most of which is secured. Assets $8,750, of which $6,750 is represented in encumbered real estate.

NEWPORT, R. I.—Max E. Kraus, 32[illegible] Davenport avenue, has filed a petition in bankruptcy. Assets, $10,190; liabilities, $14,003.75. His action has been caused by the scarcity of coal, his plants having frozen up for lack of greenhouse heat.

Obituary

Alvie Kauffman.

Alvie Kauffman, a florist of Dayton, O., who recently went to Springfield, O., for his health, died there Sunday, January 18.

John W. Scallen.

John W. Scallen, the well-known retail florist, Thirty-first street and Broadway, New York, died somewhat suddenly on Wednesday, January 28, 1903, at 9.30 a. m., in his apartments situated over the store. The immediate cause of death was heart failure, though Mr. Scallen had been severely ill with rheumatism for two weeks previous.

Deceased was one of New York's best known retailers, having conducted a store continuously for twenty-one years—one year in the present location, and twenty years in a store directly opposite. Mr. Scallen was born in New York and had always lived in the city. He was 49 years old at the time of his death, and leaves a widow and two daughters, aged 16 and 18 years old, respectively, to mourn his untimely death. The funeral will be held at the family residence at Tremont to-day (Saturday).

CARNATIONS

AMERICAN CARNATION SOCIETY.

Varieties Registered.

By F. Dorner & Sons Co., Lafayette, Ind.

SIBYL.—Bright cerise pink of an exceptional clear even color; size, three inches; form, petalage well arranged; stems always long and stiff, calyx always perfect; habit, strong, vigorous growth. An early, free, and continuous bloomer.

PENELOPE. White. A good late Summer and early Fall variety; very early and free.

LADY BOUNTIFUL (No. 123, 1900).—Color pure glistening white; size, full 3 to $3\frac{1}{2}$ inches, form, perfect, ideal for a high-grade commercial variety; stem, 24 inches and over, stiff and wiry, fragrance, spicy clove; substance of the very best, a strong feature of this variety; habit, ideal, strong, clean, healthy, upright growth. Very early free and continuous flowering. Will produce more blooms to the square foot of bench space than any other white carnation.

ALBERT M. HERR, Secy.
Lancaster, Pa

Carnation Success.

The Burlington (N. J.) Enterprise of January 23 last contains an interesting description of the florist establishment of Councilman John G. Sholl. His new carnation "Success" is highly spoken of. Mr. Sholl states:

"The same carnation gained popular local favor under the name of Burlington Girl, but after considering the matter I decided to call it 'Success,' thoroughly believing that nothing in the carnation line will succeed like it."

He is testing a number of other new seedlings, at least five of which promise good results. Of these one is pure white, two are of a delicate shade of pink and two more are bright pink. Of the latter, one has already produced blooms $3\frac{1}{2}$ inches in size. Mr. Sholl states that if it turns out well this variety will be called "Burlington Girl," and will be put on the market under that name.

Carnation Louise Nauman.

The accompanying illustration shows a house of the seedling dark pink carnation Louise Nauman, originated by G. M. Nauman, at Cleveland, O. This variety will be introduced to the trade next year.

Mr. Nauman does not claim it to be a fancy variety, but a good market sort. The photograph was taken December 1, 1902, and the house was planted September 15 of the same year. The little girl shown in the walk is the young lady the carnation is named for.

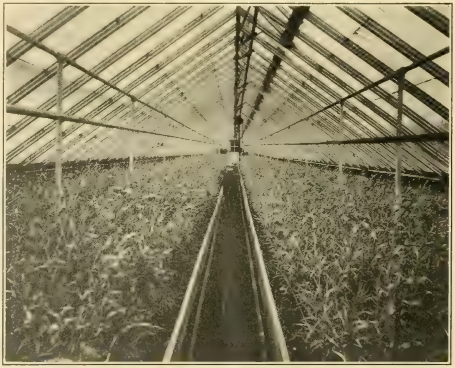
G. W. S.

Our Carnations.

It is wonderful how many varieties of carnations we have at present in our greenhouses, on the tables of the commission houses and on the counters of our retailers; so many, indeed, that only now and then is it possible for wholesaler or retailer to give the right name of this or that variety handled by him. Scores of new names of varieties registered and not registered annually are added to the long list of carnations of American origin; all acquisitions of the past fifteen or twenty years. This decidedly looks like a great gain; but is it? I, for my part, unhesitatingly say, yes. The fact that so many varieties of this old and still to this day popular, beloved and ever-useful flower, have been brought forward by so many of our large and small growers, I hold, seems to indicate that a general, hot race is running for a prize, visionary as yet, and dimly held out by the future, but most certainly to be won, if wise selection, keen judgment, and untiring study, work, and patience are employed.

Of course, like all noble exploits and undertakings, so has this work offered a splendid chance to minds less willing to appreciate a great achievement in horticulture, to satisfy their mercenary greed; while others, unable to know a poor thing when they see it (especially if they are the producers of it) will unwittingly, but not unwillingly, deceive the unwary, who have only read that stereotyped description of "a flower 3 to $3\frac{1}{2}$ inches across, stem 2 to 4 feet long, calyx never bursts, an early and continuous bloomer," etc.—a splendid fairy tale, indeed!

All this is to be expected, and is met with in other lines of progressive enterprise. But when a poor fellow who cannot afford to linger behind in our onward march, finds himself again and again a victim of windiness on the one hand and his own sanguine trustfulness on the other, his heart swells with blue suspicion, and he regards all new carnations as unreal delusions. He has come to the conclusion that carnations are only raised for the cuttings. He feels convinced that the originator of a new carnation has kept up the propagation therefrom for two or three years, until he has 3,000 plants, which will enable him to pick 50 extra-good blooms for exhibition and show. This first step counts. We all must have that kind. The plants of that stock are completely stripped of life-giving shoots for cuttings. Whoever gets some of these first cuttings, when rooted, does not fare so badly, in many cases; but the next crop of weak, spindling cuttings from the same plants, is the cause of disordered livers and bad language, sooner or later. But the thrifty disseminator takes from those same plants still another crop of cuttings to fill all incoming orders for his paragon.



HOUSE OF CARNATION LOUISE NAUMAN.
Grower, G. M. Nauman, Cleveland, O. Photo Taken December 1, 1902.

Many of the investors in a new variety go in deep, so that next season the variety, still being new and somewhat high in price, they want only the cuttings from their investment; and the same process of over-propagation and filling orders is repeated, perhaps minus the knowledge of the particular requirements and culture of that variety. We may once more see some vase or so of this particular carnation exhibited, perhaps less grand than the year before, still the flowers are there, but in another year or two you have to take long walks to find them.

One thing I have noticed with surprise, and in this connection cannot avoid speaking of; and that is, the immense difference between those show flowers and the blooms continually found in the commission houses and stores. One would suppose that at least once in a great while carnations approaching those great show flowers, the gorgeous picture of which is still in our minds, would be found offered for sale here and there; but I have not found any blooms of the newer kinds that could stand comparison with the flowers of the same sorts exhibited.

This is not so in the case of other leading stocks, such as roses, chrysanthemums, lilies, etc. High-grade blooms of these as are shown at the exhibitions to lovers and buyers of cut flowers, can be obtained for money every day in first-class flower stores.

Hundreds of our best customers, willing to pay any price for highest grade goods, expect, when asking for carnations, to get such as they have recently seen and admired at the flower show, and they wonder why they cannot obtain what was held out to them as samples. They do not know, as we do, that our carnations are now, by our experts, nicely classified into exhibition and commercial kinds; and if they did know, they would not understand why an exhibition flower should not be an excellent article of commerce; or why a commercial variety should be unfit for exhibition.

Years ago, in the era of the small beginnings and humble establishments, we also had our flower shows, and a grower of carnations would pick 25, 50 or 100 blooms of one kind from a batch of 400 or 500 plants and compete creditably, and often victoriously, with other growers of the same caliber. Those blooms would convey a correct idea to the visitor at the flower show, of the degree of excellence the carnation had attained, and what people could expect to purchase in that line all the season through.

It is true, we see carnations now (only at exhibitions) that are superior to those that we had fifteen years ago, but superior only in size and stem, and inferior in fragrance, calyx, habit, keeping qualities and productiveness.

About fifteen years ago I cultivated five kinds one season; they were Silver Spray, Heintz's White, Grace Wilder, Tidal Wave, and Portia. In size the flowers averaged alike, with Heintz's White perhaps the largest; and I claim that the blooms of those five varieties then were as large, as long and as stiff stemmed, as bright (if not brighter) in color, and in other respects as good as those now found at our commission houses. They were better, however, in keeping quality, and especially in productiveness.

I grew carnations before that time, commencing with President Degraw and La Purité, and every year since have been trying nearly all the novelties offered, and thousands of my own seedlings, but have not yet found one that will send as much money into my pocket as any of the above five named did, though I admit we have had excellent sorts since then, such as Lizzie McGowan, Daybreak, William Scott, America, and others; but they all have gone, or are going, old and new, and the new ones especially are very, very short-lived—and why?

Having grown nearly all kinds of carnations for many years, and in the last ten years raised many seedlings, experimenting in various ways and trying several different methods of culture at one and the same time side by side, I dare say, by close and constant observation, I have come a little nearer to the solution of the above question and briefly will give the results:

Carnations with bushy, compact habit, broad, dark green, fleshy foliage, and sturdy, very stiff stems, do not stay long with us; but while they do, they like best a very stiff, heavy loam and but little in the way of so-called stimulants.

Carnations with narrow, light-green, grassy foliage are of value (if the flowers are all right) and live longer than most kinds, if their colors are in pink or white; red ones in this class are of no account.

All seedlings, which do not lose in size of flower and vigor of habit in the second and third year after their selection from a batch of yearlings, are worth keeping, while those that show a loss, even if they were the finest of the whole set, are decidedly N. G. But take good care of those which show a marked degree of improvement every succeeding season. Such are scarce, however.

The very best of our pets are in their prime, have reached their zenith, in their fourth year, and after that they gradually, often rapidly, go downhill, losing their vigor, declining to bloom or produce malformed, poor flowers—mere rubbish compared with what they once were.

Carnations grown for cuttings only in a cool house and not allowed to bloom, do not furnish any better material for propagating purposes than do those of their sisters in full flower and in a much warmer place.

Red carnations lose in point of productiveness sooner than the white ones; and white varieties sooner than the pink sorts.

All carnations will burst their calyx under certain conditions in their cultivation. There is no such thing as an absolutely non-bursting calyx.

Sprinkling overhead occasionally all the year round is better for all carnations, healthy or diseased, young plants or old, than the dangerous, so much recommended dry process.

Young stock should not be "pinched" or "stopped" before the first flower buds distinctly show, and should not be kept very cool, but encouraged to make a rapid growth from the beginning.

Carnations with the best constitution and longest life, but smallest flowers, are those raised from seed which was ripened in the Summer; and the shortest-lived and most valueless are those raised from cuttings rooted in the Summer from plants which have done duty in the greenhouse all Winter. Most of my best new varieties have sprung from seedlings, when both the parents were also seedlings in their first year; I have even used successfully single flowers on the one side.

These are a few of the conclusive results derived from my long experience and careful experimenting in the growing of new carnations and old standard varieties. And although I by no means believe them to be infallible guides to follow, or that my observations are even identical with those made by other growers under different circumstances and in different localities, I give them for whatever good they will do, to serve as valuable tips to some less versed in the difficulties and perplexities of raising high-grade paying carnations; to those who contemplate joining in the great race for that ideal far ahead—that carnation which will eventually unfold its grand petals to the admiring multitude; that will become the prototype of a new race of American carnations, consisting of 10 or 12 varieties, which will stay with us long enough after their formal introduction to enable us to make and enjoy their acquaintance, which will abundantly produce flowers that sell at sight all the year 'round; and which dozen varieties will take the place, in our greenhouses, of those threescore and ten kinds we are trying so hard to raise now.

Illinois. FRED W. TIMME.

Pansies and Geraniums.

As roses and carnations occupy first place in cut flowers, so are pansies and geraniums the leaders in the line of bedding plants. Countless thousands are raised annually to supply the demand. A few timely hints as to their culture will, I hope, not be considered superfluous, beginning with the remark, that it is still time to sow seeds of the one and root cuttings of the other to obtain nice plants for Spring sales.

It is true, pansies, if sown now, will hardly be sufficiently in bloom by the middle of April to enable our lady customers in making their selections to critically examine the flowers of every plant in the frame, which is so delightful to them and so trying to us. But, of course, we will have plenty of earlier pansies at that time ready for inspection; some which were sown as early as last year in August, and which are now wintering in cold frames; and we have others, and these I consider the principal and main lot, which are now nice little plants from seed sown in December. They will also be planted into frames outside as soon as time and weather allow.

Where pansies are bought and planted with the expectation that the beds will look neat and the plants remain in fine blooming shape all through the Summer, those sown in December and those sown now give greater satisfaction than others sown in August. Most of our patrons know that very well, for the wants and habits of no other plant are so well understood by the ladies of this and other lands as those of the pansy, and no other is so universally admired. Always procure the very finest strain, no matter how high the price; it will cut no figure when it comes to selling the plant. The gaining or losing of trade depends on this. Remember, also, that pansies want loose, well manured, very rich soil.

As to geraniums, they can be propagated at almost any time of the year, and they are also sold at all seasons and in all sizes, from the rooted cutting up to 5 and 6-inch pot plants. But to have good, stocky plants in May and June, in 4-inch pots, to supply the enormous demand for bedding purposes, those struck in September are certainly the best. If you still have these in 2-inch pots, lose no time in getting them into 3-inch, and in March or April give them the last shift into fours. Some growers, in the Fall, pot their rooted cuttings into 2½-inch pots and out of these into 4-inch pots in March, and very often much later if time is short. I do not approve of this method, though some good plants are grown in that way. I think this plan of growing is all right with some varieties, while some of our best kinds should invariably receive three shifts.

Pinching out the tops is now in order. Care and good judgment are needed to do this work well. Do not put boys to work at it under the impression that it is just the thing for them because it is easy. You will also get a lot of fine cuttings now, which, if inserted in sand or sandy soil, will make nice plants in 4-inch pots for Spring business, if well attended to from now till then. These you can start in 2½-inch and in April shift into 4-inch pots. Some of them will not be strong and bushy enough for the 4-inch size, and they can be sold out of 3-inch pots, or may be kept back for late sales. Give them plenty of bench room, and just break out the points of their tops, when they begin to grow fast. Never let a geranium get thoroughly dry in the Spring months; it hurts them more than over-watering, which latter, however, is the worst that can happen to them in the Winter.

So you see that even in growing geraniums constant watchfulness and good judgment must be employed to get fine plants, although it is generally supposed that good geraniums can be grown by any old woman, because the plant can endure more ill-treatment and abuse than any other common subject. Give them an airy, light bench and the fullest sunshine; a place close to the glass, if you have it, and lots of elbow room. They suffer much by crowding.

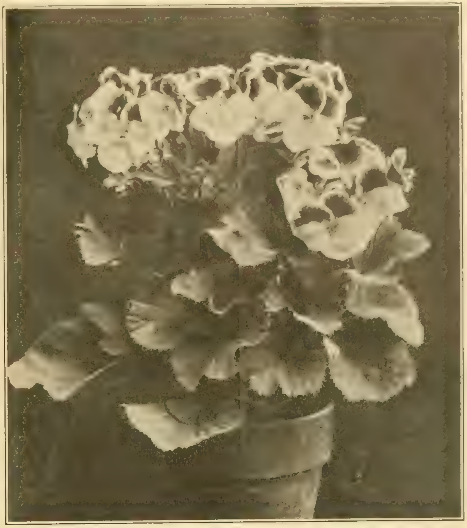
The best bedders at present are: John Doyle, Double Gen. Grant, Alphonse Ricard, Harrison and Bruant, scarlet; E. G. Hill and S. A. Nutt, crimson; Beaute Poitevine, Mme. Landry, Miss Frances Perkins and Jean Viaud, pink; and La Favorite and L'Aube, white.

Do not fill up your houses with old inferior kinds just because you have them and they filled the bill years ago. They don't now, and good newer sorts are as easy to grow and take up no more room than old raggy rubbish. Get some of the newer varieties every year; give them a thorough trial; get up a stock of the best ones and gradually discard old-timers.

FRED. W. TIMME.

Seedling Pelargoniums.

The accompanying illustrations represent some of the results obtained by Mr. Mitchell, of Inverkip, Ont., in the work of hybridizing the pelargonium. Mr. Mitchell has been very successful along this line. The stock of these seedlings has been secured by J. Gammage & Sons, of London, Ont., to whom we are indebted for the photographs as well as the subjoined descriptions of the varieties pictured:

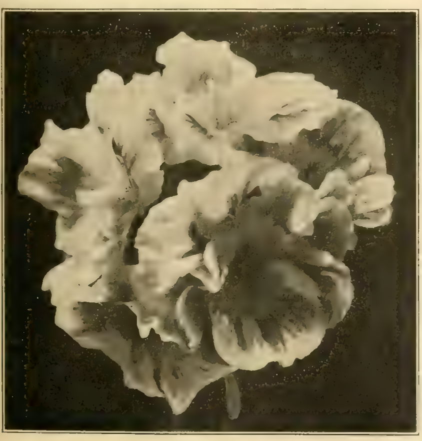


PLANT OF SEEDLING PELARGONIUM PATULLO.
From Cutting Struck in March. Photo Taken in May.

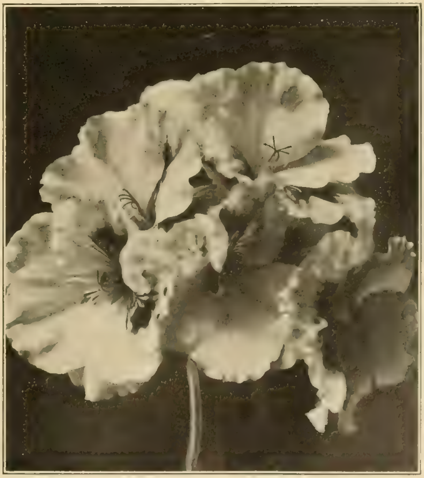
BEAUTY OF OXFORD, semi-double, a seedling from Mme. Thibaut; resembles its parent in general appearance, but is lighter and more delicate in its coloring; remarkably free flowering and of fine dwarf habit.

WOODSTOCK, single; a seedling from Mme. Thibaut and Dr. Andre; very large petals, and immense truss, with frequently ten open florets on a truss. The flower resembles a cattleya somewhat in appearance. The plant is very free flowering, commencing early and continuing until late in the season, being of the Andre type, but stronger.

PATULLO.—The photo illustrates a plant of this new variety in a six-inch pot, propagated in March and photographed in May. It is described by Mr. Mitchell as a seedling from Dorothy and Victor, with dark heavy blotches on the upper petals, the lower petals being light. Season from early to very late. Its chief merits are: Its freedom of bloom, and the short time in which a salable plant can be produced.



TRUSS OF SEEDLING PELARGONIUM BEAUTY OF OXFORD.



TRUSS OF SEEDLING PELARGONIUM WOODSTOCK.

Review of the Market

NEW YORK.—The cut flower trade is in a rather uncertain state at present. White flowers of nearly all kinds do not seem to be in such good demand, while colored stock is about holding its own. A dense fog has covered the city and the rivers on several mornings and as a consequence some consignments of flowers have been a few hours late in reaching the dealers' hands. No serious loss, however, has been occasioned thereby.

American Beauty roses are in shorter supply, and it has been possible to advance the price on the special grades, though of these there are comparatively few coming in. Golden Gate and Bride are not doing so well as they were, but the demand for Bridesmaid continues fairly good. These latter are on the increase in quantity, however, and there is a general weakening in values noticed among the fancy stock.

The birthday of the late President McKinley called for a god demand for carnations, and an advance in the price was possible on some varieties. In a few instances 10c. were reached for Mrs. Thos. W. Lawson, though the flowers were only in small lots. By the hundred they went at from $5.00 to $8.00, according to quality. Ordinary grades of the common varieties of carnations are still being disposed of at $2.00 and $3.00 per 100.

Lily of the valley and Roman hyacinths, together with White narcissus, are dragging and difficult to clear out at the quoted prices. Particularly so is this the case with the last mentioned stock. Trumpet Major and Golden Spur narcissus are moving much better and prices are firmer. White tulips are going slow while the colored ones are meeting with a fair demand. Some double pink tulips are coming in for which 75c. per dozen is realized, while good red and yellow ones bring $4.00 per 100.

Cattleyas are selling fairly well, and where flowers of extra size are obtainable it is possible to get $1.00 each for them. The average price, however, is about 60c. each.

Lilac is not moving so well and some bunches are going to waste, even though they are offered at 50c. and 75c. a bunch.

Harrisii lilies are selling well, and $2.00 per dozen is realized for the very best.

Maidenhair fern and asparagus are moving satisfactorily, and smilax seems to be going better than it did a week ago.

BOSTON.—Market conditions here are about the same as last reported. Trade is quiet and the supply short. Good roses and carnations are particularly scarce, especially white ones. American Beauty are not at all plentiful, and Queen of Edgely have been scarce for two weeks or more. The fancy special American Beauty make $7.00 to $8.00 per dozen, with extras at $5.00 to $6.00 and No. 1 at from $3.00 to $4.00. Bride roses are scarce and are sold out daily, the specials easily making $3.00 per dozen, with No. 1 at $2.00 and $2.50. The small to medium grades bring from $6.00 to $12.50 per 100. Bridesmaid are more plentiful than Bride, but more of the finer grades might be disposed of. Values range about the same as those on the white roses. Meteor and Liberty, too, of the better grades sell on sight, the finest of the former making $16.00 per 100, while corresponding grades of the latter reach $25.00. Smaller grades of both range from $5.00 to $15.00 per 100, and, as is the case with all roses, the daily receipts are easily disposed of.

Though carnations are in fair supply the really good ones are scarce, and the scarcity of good roses occasions an extra demand for carnations. The best of the ordinary kinds make $3.00 per 100, with fancy stock at $4.00, while the fancy sorts and novelties realize $5.00 and $6.00 per 100. Inferior stock sells at $2.00 and $2.50.

Lilies continue in good supply at $10.00 to $12.50 per 100, callas making the same prices in the better grades with smaller stock at $8.00. The supply of jonquils has shortened up perceptibly this week, and have been scarce for two or three days, easily realizing $4.00 and $5.00 per 100. Von Sion are coming in in limited quantities, but are not very well colored yet, they sell fairly well at $5.00 and $6.00 per 100. Tulips are improving in quality and quantity, and move well at $3.00 and $4.00 per 100. Paper White narcissus and Roman hyacinths hold at about the same figures as last week. Mignonette is in fair suply, but is not as good as usual. Smilax sells well at $15.00 to $20.00 per 100. Violets are in good supply, but meet with a light demand for the season, realizing from 50c. to 75c. per 100. Lily of the valley is very draggy, though the prices hold about as usual. F. J. N.

DETROIT, MICH.—The demand far overreached the supply the past week. White stock is being mostly called for on account of numerous large funeral orders. Meteors find ready sale at good figures, as do other roses. There has been a scarcity all around, especially so in white carnations. Everything is cleaned up, even bulbous flowers do not remain long on the tables. DILGER.

CHICAGO.—With the receipts still on the decline the market is steady, with prices about the same as last week. The supply of roses is below the demand. Consignments of long-stemmed American Beauty have fallen off considerably, there not being near enough of these flowers to supply all orders. Prices are quoted at from $5.00 to $6.00 per dozen, for extra long; while medium and other grades are bringing from $1.00 to $4.00 per dozen. Bride and Bridesmaid roses realize from $6.00 to $15.00 per 100, the latter for extra fancy stock; Golden Gate, $6.00 to $12.00, Ivory, $6.00 to $12.00; Meteor, $4.00 to $15.00; Liberty, $6.00 to $25.00 per 100; the latter for extra long-stemmed flowers. Sunrise brings from $6.00 to $10.00; Mme. Abel Chatenay, $10.00 to $15.00 per 100.

The supply of carnations is not so large as that of a week ago, and good prices are realized if the stock is of any quality at all. The demand seems to be mostly for white and red flowers. Prices range from $1.50 to $4.00 per 100, the former for stock that is very poor. Prosperity is bringing from $6.00 to $8.00 per 100, and almost any kind of a good white carnation will easily command from $3.00 to $4.00 per 100.

Violets are still very erratic. While some good prices are realized for a certain quantity, the great bulk of the violets seems to go begging, and have to be closed out at a very low figure. The prices run from 60c. to $2.00 per 100, the latter for extra good stock, the major portion of the sales are at from 60c. to $1.50 per 100.

Bulbous stock is still seen in considerable quantities. Tulips are on the increase, but there are not so many Roman hyacinths as heretofore. Harrisii lilies are arriving in larger quantities, and bringing from $1.80 to $2.00 per dozen. Roman hyacinths and Paper White narcissus bring from $2.50 to $4.00; tulips from $2.00 to $4.00 per 100; freesia, $3.00 to $4.00; mignonette, $4.00 to $8.00 per 100; lilac, from 75c. to $1.00 per dozen sprays. Sweet peas sell at $1.50 per 100 and are very hard to move at that price. They do not seem to take at this time of the year. A few poinsettias are seen, and sell at from 75c. to $2.50 per dozen. R. J.

INDIANAPOLIS, IND.—A large number of orders and a scarcity of good stock characterized the past week's trade. Funeral work has been plentiful. Market trade, too, has been above the average for those fortunate enough to have stock left to take there. There has been a good demand for carnations and nearly all grades have been readily sold. Roses have been scarce and are unsatisfactory, because of the prices which are too high when the grade of stock offered is taken into consideration. The flowers are beginning to show the effects of the dark, damp weather. The call for good Bridesmaid roses has been exceedingly large and there have not been enough of them to fill orders. The retail prices remain about the same as during the previous week. There is an oversupply of violets at present, despite the fact that a great many are sold. $1.00 per 100 wholesale is obtained for good doubles. They are retailed at 25c. to 50c. per bunch of 25. The first freesias have appeared and sell readily at 50c. per dozen. Lily of the valley retails at $1.00 per dozen. Tulips are higher in price than usual, due to the increased price of bulbs, few are sold at less than 75c. per dozen. Narcissus have helped much on funeral work, but few are disposed of for other purposes.

Flowering shrubs of all kinds are being brought in from the forcing houses. They help to decorate the stores and windows even though they are disposed of at low prices. I. B.

KALAMAZOO, MICH.—Business since New Year's has been good in both home and shipping trade. Social events have been numerous and some good funeral orders have been received. Prices have been held stiffly, and roses are still quoted at $1.50 and upwards, while standard varieties of carnations reach 75c. and the best grade $1.00 per dozen. Violets bring 25c. per dozen. Wholesale quotations follow those of Chicago pretty closely in most lines. Stocks are disposed of very readily, and it is expected present prices will remain in force sometime as there is no likelihood of surplus for some few weeks yet. The weather is too dull and cloudy for the time of the year to help much yet. S. B

CLEVELAND.—Trade is still very brisk and all flowers are eagerly sought. As a rule prices are up to holiday quotations. Good stock is selling higher than ever before at this season, and the quality of the cuts is better than usual. Prices for the week were as follows: Roses, teas, $5.00 to $10.00; some selects bringing $12.00. carnations, fancy, $3.00 to $4.00, ordinary, $2.00 to $3.00; lilies, $15.00 to $18.00; violets, $1.00 to $2.00; Roman hyacinths and narcissus $2.00 to $3.00; lily of the valley, $3.00 to $4.00, smilax $15.00, adiantum, $1.00 to $1.50; common ferns, $1.50 per 1000; galax leaves, $1.00 per 1000. G. W. S.

PROVIDENCE, R. I.—Business still comes with alternate spells of rush and quiet, but altogether to our liking. Sometimes the shortage of white stock is very distressing, but with the help of miscellaneous flowers, such as tulips, narcissus and callas, we somehow manage to patch out all right. Roses have advanced in price, just on the eve of a new and bountiful crop. Everything is beginning to look more cheerful with the growers, and, provided we all work fairly, this means a successful season ahead. Prices remain steady, as heretofore quoted. C. S. M.

HARTFORD, CONN.—Business was never better in this locality than at the present time; in fact, ever since Christmas there has been a steady demand for flowers. A number of funerals as well as many social affairs have used up quantities of stock the past week. Flowers of all kinds are scarce and the demand is much greater than the supply. Some very good roses are in the market, principally Bridesmaid, Bride, Golden Gate and Ivory, but many more could be disposed of if obtainable. The retail prices of roses range from $1.00 to $2.00 a dozen. Carnations are also in good demand and are hard to get. The better varieties are most called for and sell at from 75c. to $1.50 a dozen. The supply of violets has been about equal to the demand up to the present week. There was a shortage the first part of the week, owing to the extra call. Quantities of white tulips, Roman hyacinths, lily of the valley and Paper White narcissus are being used in funeral work. Daffodils have just put in their appearance. Azaleas, cyclamen, primroses and cinerarias, in plants, are also selling well. J. F. C.

DENVER.—Business for the past two weeks has run along quietly, with exception of the last three days, when a shortage of flowers in all lines was noted. The market had been stocked, with not much demand for anything excepting white flowers for funeral work. The last three days, though, the stores have been well cleaned up, and we look for a good run of business from now on. There have been no large decorations lately, though numerous little affairs are going on. We are enjoying an exceptional stretch of weather (too bad we can't loan a slice of it to the East, while coal is scarce). The nights and early mornings are a bit crisp, but the days are Summer-like, and those who haven't overcoats don't need them. On Saturday afternoon last the thermometer stood at 60 degrees in the shade. This only stands for Denver, though, for in some parts of the State the people are "enjoying" four feet of snow, and below zero weather. S.

LOUISVILLE, KY.—As up to the present time the sun has refused to show itself, the report from here reads about the same. There are no home-grown violets in numbers enough to speak of. Roses are scarce, and those that do come into the market show the lack of sunshine. Considering conditions, carnations are doing very well. Roman hyacinths and Paper White narcissus are arriving in quantities about equal to the demand. They sell very readily, especially as the price on these has not been raised. Business continues satisfactory; especially brisk has been the demand for funeral work. The prices received are not always satisfactory when wholesale prices of the stock is considered. Retail prices are: Roses, $1.50 to $3.00 per dozen; American Beauty, $4.00 to $10.00 per dozen; carnations, 50c. to 75c. per dozen; violets, $1.00 to $3.00 per 100; lily of the valley, $1.00 per dozen; Paper White narcissus, 50c. to 75c.; Roman hyacinths, 50c. per dozen.

Plants in bloom have been selling very well, in particular such as can be sold at from 50c. to $1.00 each. A. R. B.

Philadelphia.

Excessive Express Charges.

It has been arranged that the advance in express charges on cut flowers is to be the chief topic for consideration at the meeting of the Florists' Club on Tuesday next. President Westcott has appointed the following committee on this matter: S. S. Pennock, A. B. Cartledge, William P. Craig, Charles E. Meehan and George C. Watson. This committee is instructed to gather information and prepare resolutions which will be submitted to the meeting. The matter will then be open for discussion, and such action as the club may deem best.

In conversation with the retailers and commission men on this subject, it is generally conceded that there would be no objection to the increase of rates if better service was guaranteed, viz., quicker delivery, and more careful handling of cut flowers. But up to the present nothing has been done along this line. At Christmas time the Adams Express Company had 28 cars of express matter that arrived in this city and remained untouched for three days. Then, again, on outgoing packages one firm delivered to them 20 packages, prepaid, and got a rate on only seven. This means that no charges could be entered up until the other rates were received. Then, as to the extra charges, Leo Niessen states that during December the charges on goods he shipped amounted to $1,500.00, or $500.00 above the old rate. He also stated that he has one consignor who now pays $15.00 per week on flowers sent in; this is $5.00 more than he used to pay.

The growers around Lansdowne are all sending in their flowers by wagon. Some five or six of them have combined and engaged a local express wagon, which brings in their flowers every morning, the charge being about the same as the old rate exacted by the express company, but the delivery is quicker.

In regard to any action taken to combat the excessive charges, it is generally conceded that something must be done direct at the chief officials of the companies. It is useless to deal with local officers. So it is hoped that a large attendance will be present on Tuesday next to discuss this matter.

Coal Supp y.

Conditions are now much better and every one feels easier. Many growers have had to pay exorbitant prices in the past few weeks, but a wholesale dealer informed me that on Tuesday last soft coal was selling at $4.00 at the mines; and one party who uses 40 to 50 tons a month is this week getting Lyken's Valley buckwheat from a local dealer at $4.50 per ton, in four to five-ton lots.

General News.

W. Perry Brush, representing the Chadborn Manufacturing Company, Newburgh, N. Y., who make the Chadborn automatic ventilators, has spent 10 days in this city and done good business.

Invitations are out for the marriage of Robert Craig's eldest daughter, Edna Mayne, to David Henry Lank. The interesting event will take place on February 17.

Schedules for the combined exhibition of the Pennsylvania Horticultural Society and the American Rose Society, to be held here March 24, 25 and 26, are issued. Copies will be gladly sent to all applicants who will write to either Leonard Barron, 136 Liberty street, New York, or the secretary of the Pennsylvania Horticultural Society, Horticultural Hall, Broad street, Philadelphia. DAVID RUST.

Bowling.

BOSTON.—The boys are displaying no little interest in bowling here now, and it is proposed to start a bowling league to be composed of teams to be designated Growers, Wholesalers, Retailers and, if it is possible to get the seedsmen interested, a team of seedsmen. Arrangements have been made to get the boys together and select the strongest teams from the different branches, and it is hoped to begin the league next Wednesday night. Edward MacMulkin, the Boylston street retailer, has expressed his willingness to offer a cup to the team winning the league, and individual prizes are also spoken of to encourage the boys, and there seems to be no reason why here in Boston we should not be able to get together once a week for such wholesome sport as bowling is.

On Wednesday night, at the Boylston alleys, the following scores were made:

NICHOLSON'S TEAM.

	1	2	3	Totals.
Nicholson	103	84	84	271
Gilson	69	83	88	240
Flanagan	59	92	79	230
Roberts	70	66	65	201
Brady	60	68	73	191
Halloran	60	70	80	210
	421	463	469	1,353

CHARNOCK'S TEAM.

	1	2	3	Totals.
Charnock	80	80	66	226
Barrett	62	76	63	201
Harrigan	86	79	72	237
Houghton	66	53	75	194
Welch	80	74	68	222
Norton	72	85	86	243
	446	447	430	1,323

SARATOGA SPRINGS, N. Y.—During the night of January 22, Charles Ludwig suffered a severe loss by fire. About forty feet of a one hundred foot house devoted mostly to large palms was destroyed. A defective brick flue by which the house was heated, was the cause. He is said to have had some insurance.

Canadian News

More Life Needed.

Canadian correspondents seem to have relaxed their efforts somewhat in the maintaining of the Canadian page. The news from the larger centers has appeared quite regularly until lately. The cessation, however, may be only temporary, but I have often wondered if there is no news of interest in such places as Kingston, St. Thomas, Brampton, Chatham, Woodstock, Quebec, St. John, Victoria, Winnipeg, Halifax, etc., or is it that there is no one in those places sufficiently interested to send occasional notes? No doubt the Editor would accommodate all the news (even if he did have to use his pencil at times) and it would be most gratifying to every Canadian to see the business interests of his country properly represented.

The now rapid development of Canada demands increased activity in every line of business. Don't get behind, florists, put more life into the Canadian page. CANUCK.

The Ontario Fruit Growers' Association.

This association was organized many years ago at Hamilton by the fruit growers of the Grimsby and Niagara districts. It has enjoyed a steady growth in all parts of Ontario, and now includes quite a few members in the other Canadian provinces. It has a membership of over five thousand and holds an annual Winter convention, always in a locality where there is considerable interest in fruit growing. This Winter the meeting was at Walkerton, and a decidedly new feature was introduced in the holding of a special session devoted to floriculture. This was considered a great success, and will no doubt be repeated next year. The following papers and addresses were contributed: "Outdoor Roses from a Canadian Standpoint," C. M Webster, Hamilton; "Hardy Decorative Shrubs and Plants," William Hunt, O. A. C., Guelph; "Winter Window Gardening," Arch. Gilchrist, Toronto Junction; "The Town Beautiful," C. L. Stephens, Orillia; "The Gladiolus and Its Propagation," R. B. Whyte, Ottawa; "Roses," T. H. Race, Mitchell; "The Benefits of Horticultural Societies," J. S. Scarff, Woodstock; "Hardy Annuals," P. W. Hodgetts, Department of Agriculture, Toronto; "Some Perennials I Have Grown," H. J. Snelgrove, Cobourg, and "Insects in the Garden and Greenhouse," Dr. James Fletcher, Ottawa. Many of these papers will no doubt appear in the association's organ, The Canadian Horticulturist. B.

Toronto.

Club Meeting.

The January meeting of the Gardeners and Florists' Association was held on the 20th, and was the most representative gathering we have had for some time. Considerable business was outlined for the coming year. If it is all carried out, 1903 will be the banner year of the association. It is decided to start out, on the 5th of March, with the annual carnation meeting. St. George's Hall has been secured for the show, and a committee appointed to obtain suitable vases. It was decided to have all the vases made alike and stamped with the association's stamp. George Mills will again be superintendent; and as it is expected an executive committee meeting of the C. H. A. will be held here about the same time, there is no doubt but we shall have a good show, visited by members of the craft from all over eastern Canada. The handsome challenge cup offered for the vase of the best carnations in the show, won last year by the E. G Hill Company, of Richmond, Ind., with a vase of Adonis, will be up again for competition. This cup has to be won three times before it becomes the absolute property of the winner.

The next important matter will be the C. H. A. meeting, which, it hoped, will be held here during the first week of our exhibition. The trade exhibit is expected to be the best we have ever had. The meeting will be a very important one, and the boys here expect to make it especially interesting.

The next matter before the association is a very extensive flower and chrysanthemum show in November. This will be on a much larger scale than ever before, and we expect to have the co-operation and assistance of both the Electoral District Society and the Horticultural Society. The executive committee is expected to make a full report on all these matters at our next meeting.

The News.

The meeting of the Toronto Electroal District Society was held last week. The secretary reported a successful year. The officers elected were: R. J. Scoor, president; J. Chambers, first vice-president; T. Manton, second vice-president; directors, H. Simmers, Captain McMasters, George Vair, J. R. Leslie, E. S. Cox, T. McQueen, J. O. Orr, W. R. Frankland, and B. Sanders.

The representatives to the Industrial Exhibition are: R. J. Scoor, J. Chambers, J. O. Orr, T. McQueen, J. R. Leslie, H. R. Frankland. A meeting of the board will be held early next month, when the work for the year will be mapped out.

The Gardeners' and Florists' Union.

This union submitted a letter of which I enclose a copy, to J. H. Dunlop, on January 16. Just why the union selected Mr. Dunlop to start with I have not been able to find out; the president and other officers will not talk anything but generalities. Mr. Dunlop is the largest employer in this line in Toronto, and to his good men pays the best wages in the trade. His men are all paid by the hour for whatever time they work, and so far as I have been able to discover the older men are about satisfied with the general run of things on the place. But the young men, being in the majority and being perhaps more unreasonable, decided to send the letter referred to, which was intended as a request to Mr. Dunlop to meet them in the matter, but which really reads like an ultimatum. Upon receiving it, Mr. Dunlop decided to take a firm stand. He intimated that he was ready to meet them, but only one faced the music. On Tuesday night Mr. Dunlop called them all together in the packing room and addressed them in a body. He pointed out how impossible it was to apply rules to ours that easily fits other businesses. He told them he was ready to discuss the subject with them at any time, and asked those that were not satisfied to say so. All are back at work again, the same as before, and so ends a most ill-advised attempt to alter the condition of things.

COPY OF LETTER REFERRED TO.

At a regular meeting of this Union, held on January 14, your employees decided to submit to you, through the Union, the following scale of hours and wages, and request you to consider the same to take effect February 1:

HOURS. Nine hours to constitute a day's work, fifty-four hours a week's work, and Saturday half holidays from first of May to October 1.

WAGES.—Foreman, 35c. per hour; men in charge of departments, 27½c. per hour; first gardener, 22½c. per hour; minimum wage to be 20c. per hour. Apprentices and improvers to receive an increase of 3c. per hour.

OVERTIME.—All over nine hours per day, fifty-four hours per week, to constitute overtime, and payable at the rate of time-and-one-half.

Should you wish to consult your men in regard to this, we have appointed a committee consisting of Messrs Turp, Milne, Milligan and Atkinson, to deal with this matter We hope to have your reply by the 21st of this month.

JAMES A. ATKINS, President.
DAVID COOPER, Secretary.

Now, Mr. Editor, I think that if those comprising the union will listen to its older members they can find many things which are wrong that they can help to put right; but they cannot do this in a business like ours, as would be done in a factory which can be closed down and opened at will. If a place like that of Dunlop, or any other grower, were closed down at this time of the year for even one day, everything is lost; and men who would think of doing such a thing would never have the sympathy of the craft in general. In fact, the qualities that make a good gardener render him entirely unfit to try to do such a thing; and though business men ofttimes take advantage of their qualities, still good growers are getting to be better appreciated every day, and, I think, this condition will continue. T. M.

Hamilton, Ont.

We have enjoyed warm Spring like weather for the greater part of the week. The remark, "This is easy on the coal-bin," has a real significance this Winter.

F. G. Foster & Son have closed their King street store. There is an opening in this city for a good flower store, operated by an enterprising individual who could gather together and sell to better advantage the quantities of fine stock which are grown here

George Wild, well known in Ontario as an exhibitor of flowers and fruit, now rejoices in the title of alderman.

The parks board has a useful new member in the person of F. E. Walker. Thomas Kilvington still retains his position on the board.

Violet day, January 22, was not a success from the florist's point of view. There were not nearly enough to go round. John Morgan had a limited quantity of very good flowers, but E. G. Brown's violets were entirely off crop. It should be made a point to bring a good crop in for that day next year, otherwise artificial flowers are sure to become the fashion. A great impetus to the celebration of the day was given by bringing it to the notice of the children in the city schools.

BEAVER.

Montreal.

News Notes.

Victoria day was very quietly observed. The violet, which is the chosen flower for this day, was not seen; nor was there any appreciable increase in the quantity sold. No doubt the extremely cold weather was responsible. Some handsome designs were placed on the statue of the late Queen.

The Albani concerts were expected to make things lively for the trade. Expectations here again were not realized.

Through using soft coal in a "Daisy" furnace, T. Ware had an explosion, which wrecked the boiler, and before a new one could be put in position the house of carnations was badly frozen.

Logan Girdwood, the violet specialist, is having his usual success this year with his specialty. While the demand for both double and single is away below the average, he thinks that the proportion of singles called for is larger than of the doubles.

We note the query of "Beaver" regarding the commission on plants the wholesale man should grant the retailer, and we will endeavor to answer the question at a later date. B.

THE MARKET

TORONTO.—Business is fairly good, with stock still very scarce. Roses are in smaller supply than I have seen them for several years. The weather has been very dull and most of our best growers, even though they have coal to burn, have not been able to get many roses lately. Carnations are more plentiful and generally are very good. The majority of our growers are sending in splendid flowers, the newer varieties being especially good. Violets are fairly good and plentiful, and are selling well Callas are coming in more freely. Tulips are getting fairly plentiful and moving satisfactorily. Freesias are also good and fairly plentiful. Cypripediums have been fairly abundant all Winter and have sold well, but are now about done. Other orchids have been scarce, and there has been quite a demand for them. The prices on roses are up to Christmas figures, and from the look of most of the growers' places they are likely to keep up for some time T. M

MONTREAL.—The high prices charged for cut flowers is still acting as a detriment, and sales are depressingly small. Funeral work is fairly plentiful and as many other kinds of flowers than the standard lines can be used, prices are relatively lower. Coal is still as scarce as ever and the weather as cold. Roses are very scarce, indeed; some varieties are nearly unobtainable. Carnations are more plentiful Violets are in supply, but they seem to have gone entirely out of fashion Flowering plants are getting more plentiful again but there is no great demand in this line either. B.

Canadian Cut Flower Prices.

HAMILTON, ONT.—Bride and Bridesmaid, No. 1, $8.00 to $10.00; Liberty, $12.00 to $15.00; carnations, inferior grades, all colors, $1.25 to $2.00, standard varieties, $3.00 to $4.00; adiantum, $1.50; callas, $8.00 to $10.00; daffodils, [illegible] to $3.00; hyacinths, $2.00 to $2.50; smilax, $15.00 to $20.00; tulips, $2.00 to $3.00; violets, $2.00.

For some weeks there has been a scarcity of flowers in almost every line. As, however, the retail prices demanded are low, it does not pay to supply the demand from outside sources to any extent. BEAVER.

MONTREAL.—American Beauty, fancy special, [illegible]; extra, [illegible]; Bride and Bridesmaid, [illegible] to [illegible]; Golden Gate, $10.00 to [illegible]; Liberty, [illegible] to [illegible]; Meteor, [illegible]; Mrs. Pierpont Morgan, $10.00 to $15.00; Perle des Jardins, $8.00 to [illegible]. Carnations, standard varieties, white and pink, [illegible] to [illegible], red, $4.00 to $5.00. Asparagus, [illegible]; callas, [illegible]; freesia, [illegible] to [illegible]; lily of the valley, $2.00 to [illegible]; mignonette, [illegible] to $4.00; narcissus, [illegible] to [illegible]; smilax, [illegible]; violets, $1.00 to [illegible]. B.

CAUGHT ON THE FLY.

EASTON, PA.—H. Kleinhans reports having had a very good holiday trade. Chas. Buenning says business was very good in both his Easton, Pa., and Phillipsburg, N. J., stores. The coal question is a little easier.

BETHLEHEM, PA.—Chairman is moving along quietly in his old style.

SOUTH BETHLEHEM, PA.—H. Vorwaelker is the name of Williams' successor. He says trade is fair, but he was on the verge of closing up last week on account of scarcity of coal.

ALLENTOWN, PA.—Ernest Ashley, the former representative of H. A. Dreer, is doing very nicely in his new departure as a retail florist and seems to enjoy the same popularity with his patrons as he did with the trade. Horn Bros., report trade very fair. They have now one of the finest ranges of houses in this part of the country. They certainly were lucky in getting about 150 tons of coal early in the Fall. It is rumored here that Ellsworth is to re-embark in the retail trade.

WILKES-BARRE, PA.—Marvin's is certainly a very busy place and it is kept up to New York ideas in every respect. Eldridge & Co., have had fair business of late. W. W. Moore & Co., have been quite busy. A. Schelegman & Son are holding their own

Coal is just as scarce here in the heart of the coal region, as anywhere else. Orders cannot be filled under three week's notice.

SCRANTON, PA.—Marvin & Muir are certainly to be commended upon the general appearance of their establishment and up-to-date methods employed by them. Mr. Muir says his must be a New York store or nothing. The Scranton florist supply people seem very busy. W. H. Davis has some very fine houses of lilies and roses, despite the shortage of coal. G. R. Clark claims he has not a complaint to make.

ITHACA, N. Y.—Bool & Co. are very busy with funeral work the busiest place I have seen, so far, this year. Foote & Co. hold their own.

CORNING, N. Y.—G. W. Gardner is a busy man.

G. W. GOLDNER.

Araucaria Excelsa

Fine plants, from 5 in. pots 4 tiers, $6.50 per 10.
Asparagus Plumosus, 2½ in., good stock, $6.00 per 100.
Kentias, from 4 in. 5 leaves, $35.00 per 100.
Crimson Rambler Roses, 2½ in. $4.00 per 100.
Geraniums, best florists' varieties $3.00 per 100

A Trip to Top of Mount Mitchell.

At the convention of the S. A. F. O. H., held last August in Asheville, N. C., one of the attractions was a stereopticon lecture upon the "Apalachian Forest Preserve," by Dr. C. P. Ambler. The interest in this great woodland district stimulated a party attending the convention to make a trip to the top of Mount Mitchell, which is the highest point of the Black Mountain bunch of peaks, and is itself the highest piece of land east of the Rocky Mountains, being rated at 6,711 feet above sea level. This trip called for a sheer ascent of over 4,500 feet from the base of the mountain at "Old Man Tyson's."

The party was led by Joseph Heacock, of Wyncote, Pa., and comprised in addition, Messrs. Robert Kift and S. S. Pennock, of Philadelphia; J. D. Nunamaker, Columbia, S. C.; Geo. C. Schaffer and Otto Bauer, of Washington, D. C.; Henry Moon, Morrisville, Pa.; George W. Wienhoeber, of Chicago (who read one of the brightest papers presented to the convention. George is parading the grandchild of Mr. Tyson in the picture, and while so engaged was "snapped" by one of the party); Benjamin Hammond and Miss Hammond, of Fishkill Landing, N. Y., and Miss Beatty, of Pittsburg, Pa., daughter of the respected treasurer of the Society, and young Ned Heacock. Six mules and three horses carried the provisions and riders. Not having enough mounts, some of the party took turns in riding and climbing.

Anyone who has not been into a primitive country can realize but faintly what a climb of six hours means through a dense, unbroken forest, over the only trail, that made by the water as it ran down the sides of the mountain. Rhododendron and laurel grow thickly among the oaks and chestnuts—and such chestnut trees! straight up, branchless as northern or southern pines, 50 or 60 feet in height.

Up and up we went, over fallen trees, over boulders or broken crags, steeps as sharp to climb as stairways, hour after hour, into a mountain shower that seemed not to come down by drops, but as though we walked into a wall of water, drenching everyone but two, who, by some means, had umbrellas for alpen stocks.

Our guide, Joseph Henderson by name, tall and spare in build, good-natured and tireless, led the way to the "halfway house," a shelf on the mountain that once was a bit of a clearing. The whole section of the mountain was covered with wild boneset in flower. All that remained of the dwelling was a wrecked chimney.

The writer had been assigned to the finest jack mule of the lot, with the distinct admonition to keep at the end of the trail, because the beast kicked. Obeying this injunction, we remained too far behind. This wild boneset showed no path, so in making a bee line through it, suddenly the mule showed speed of uncommon kind. It turned out that mule and man had gone into a nest of yellow jackets. A mule may be a slow animal, but it would take a good trotter to keep pace with it when yellow jackets fasten on the long-eared animal.

With rising altitude came a decided change in the trees. Leaving the oaks and chestnuts behind, came hemlocks, spruce and Canada firs at last; and it is the dark foliage of the latter that gives the name to the Black Mountain range.

Among the mountains is the home of the bald-headed eagle, that soars over the deep, abyssmal valleys of living green, and alights on the tops of the peaks. These birds fly like specks in the sky; but nearer, by the splendid sweep of wing, and poise, they give one an idea why the men of past generations chose this bird—in its native haunts magnificent to behold—as the national emblem of the United States; but this eagle, when seen in cages in public parks, looks only miserable and foul.

All this great wooded mountain land is covered with leaf mould saturated with moisture, and is the reservoir for the headwaters of the rivers which flow east and west.

At dusk the party reached the top of the highest piece of ground in the whole Atlantic side of the continent, and stopped face to face before the grave and monument—a shaft 12 feet high, made of zinc—with this inscription:

"Rev. Elisha Mitchell, D. D., who, after being 30 years a professor in the University of North Carolina, lost his life in the scientific exploration of this mountain in the 64th year of his age, June 27, 1887. Erected 1888."

Strange, almost, to say, that in this vast solitude, away up in the clouds, vandals had shot their bullets freely into the monument, and visitors by the dozen had written their names over the face of it.

The chill, damp mist was thick on the mountain top; sliding down the eastern face perhaps 50 feet, there was a slight shoulder, and upheaved rocks formed a cave of some size. Our guide soon cut down two good-sized fir trees, which, with some coaxing, gradually were made into firewood, and a smoky fire—that smoked out all who had taken refuge in the cave—was soon burning. Then came supper, of Uneeda biscuit, canned corned beef, and only such coffee as a mountain guide can cook.

A bed of dried fir boughs—in fact, a natural spring mattress—with a blazing fire without, the warmth from which now filled the cave instead of biting smoke, made all feel drowsy, and an attempt to sleep began, which was interrupted by the guide, "Charley Roundface," coming back and deliberately asking if someone would like a pillow. We had been searching for stones for pillows. At this time, about nine o'clock, and past, the mist and clouds broke away, and there, looking out over the eastern sky, rose the nearly full moon, the mountain peaks standing like islands in the sea, all around and below the white clouds covering the valley and ravine like the foam of the mighty ocean.

Next morning the party slept rather late. We had no looking-glass, but with the exception of one or two, all looked pretty well fagged; and as we stood up after breakfast, in front of what Robert Kift called "our home on the mountain," the cave, the party looked as seen in the picture. With the thermometer at 51 degrees, the heavy mists obscuring the sun, we started back, and after six hours reached the home of A. A. Tyson, an old Confederate soldier, who fought under General Lee for three years, and surrendered his gun at Appomattox. Over the open fireplace in his best room there stands out boldly a motto with this inscription: "Kept by the Power of God."

Thus ended a side trip from the convention at Asheville, a trip which everyone enjoyed, even though it was hard work; and the half has not been told. BENJAMIN HAMMOND.

Fishkill-on-Hudson, N. Y.

S. A. F. CONVENTION DELEGATES ON MOUNT MITCHELL.

Horticulture has been chosen by the trustees as one of the five subjects in the post-graduate course of the Agricultural College, Amherst, Mass., for obtaining the degree of Ph. D. The trustees have appointed G. A. Drew instructor in horticulture.

QUESTION BOX

Trouble With Heliotrope and Cycas.

(16) I send you some affected leaves of heliotrope and cycas. The heliotrope is from young plants, cuttings of last Fall and just coming into flower, and the cycas are from plants in seven and eight inch pots, with eight or nine leaves, each from twelve to fourteen inches long. All of these have been growing in a north and south, even-span house, with a temperature of 55 to 60 degrees at night. W. & N.

—If the heliotrope is planted on the bench, commence giving a little weak liquid manure once a week, and syringe only on bright mornings, to insure the foliage drying off well before night. Pick off all the discolored leaves and if the branches are at all crowded spread them out more, so as to allow the air to have freer circulation. If the plants are in pots, however, they should be re-potted and kept growing, as being rootbound would cause the leaves to fall and wither.

The cycas evidently never made sufficient roots, hence the poor undeveloped fronds.

Repot into fresh soil and keep the plants rather on the dry side until a new growth of fronds springs from the center; then give water more freely, and keep the cycas in the warmest corner of the house.

Flowers from Seed for Decoration Day.

(17) What kinds of flowers, if any, can be started from seed and brought into bloom for Decoration Day? Also what are the leading varieties of both annuals and perennials which a retail florist who raises his own flowers can depend upon for cut blooms through late Spring and early Summer, when cut flowers are so scarce? IGNORANCE.

—We do not know of any annuals, the seed of which could be sown now and the plants produce cut flowers for Memorial Day, with the exception of stocks. There was a time when verbenas, alyssum, petunias, etc., could be sold as cut flowers, but they do not go in that class any longer.

For Spring and early Summer, one can have sweet peas, iris, peonies, antirrhinum, lilac, cornflowers, mignonette and pansies.

Salt for a Lawn.

(18) Is common salt good for a lawn; I mean a well-established lawn; if so, how much should be used to the acre, and how should the salt be applied? What effect has the salt on the grass? Is there a better fertilizer than the following, which I have used, for an old sod: Ashes of wood and leaves, old cow and horse manure, and sheep manure composted and well mixed? E. C.

—Common salt has never shown much definite results when used as a manure, and we fail to see of what benefit it would be to apply it on the lawn. The compost used on the old turf is all right; we could not suggest anything better.

Gloxinias and Tuberous-Rooted Begonias

(19) What is the best time of year to plant gloxinias and tuberous-rooted begonias? What is the best soil? Where should the pots be situated when the plants are coming into bloom? My plants invariably rot off after making nice, healthy-looking leaves. H. C.

—Pot up the gloxinias the latter part of February or beginning of March, and use a soil that has no manure in it, unless the manure be two or three years old and thoroughly decomposed. If leaf soil can be obtained, take that and fresh loam in equal quantities, and enough coarse sand to make the mixture drain freely; and the gloxinias will thrive in it. After the potting is done place them in a house where the night temperature runs about 58 or 60 degrees, and after the first watering lay a sheet of paper over them. Give no more water until growth commences, unless it is seen that the soil is getting dust dry. As the leaves begin to put forth, water will be needed regularly, but care must be taken that the leaves are not wetted too often or they soon commence to decay. As the flower buds begin to appear the glass should be shaded and the leaves and flowers must never have water splashed over them, though the plants must never be allowed to lack a plentiful supply of water at the roots.

Tuberous begonias may be treated in a manner similar to that provided the gloxinias in starting them. and should be planted outdoors about the first of June.

Cutting Bench Fungus on Carnations.

(20) E. S. The carnation cutting is affected with what is known as cutting bench fungus, sometimes called wet stem rot. The remedy is only found in using sand absolutely free from vegetable matter, and changing the sand often. It would be a good idea to wash the sand thoroughly before putting it in the bench.

Green Worms on Ferns.

(21) Can you advise me what is the best remedy for green worms or spinners, which attack Boston ferns? I have a fine lot of these ferns, and as soon as the young fronds appear they are eaten off by these pests, which are much like a cut worm only of a lighter color and smaller. I have used tobacco dust and Paris green, all to no advantage. The house in which these ferns are grown is 12 feet wide, 100 feet long and 8 feet high. Do you think if I were to transfer the plants to a larger house it would help me any? G. J.

—We have no acquaintance with the green worm, or spinner, that attacks your Boston ferns, and it must be some Southern pest that we in the North have no trouble with. We do not think that removing the ferns to a larger house would mend matters, as the worms would no doubt be carried along with the plants. As poison insecticides and tobacco dust have proved futile, we should try covering the soil with air-slacked lime, and shaking the fronds regularly, so that the worms will fall on the lime; perhaps that would destroy them. If any Southern grower has had experience with this worm perhaps he can give more information about exterminating the pest.

Tulips.

(22) Please tell me what is the matter with my tulips and how to proceed further to get longer stems. The following is the treatment given: I planted the bulbs October 15 last, over 5,000 tulips, such as Proserpine, Cottage Maid, La Reine, Pottebakker White, Chrysolora, in boxes, and covered them with manure after giving them a good watering. When I brought them in, on December 26, they were showing above the ground from one to two inches high, with plenty of roots. I have kept them in a dark place with a night temperature of from 50 to 60 degrees. I cut some Proserpine on January 24 with only four to five-inch stems, and while Chrysolora is commencing to show bud the balance, which are from two to three inches high, are quite white in color.

SUBSCRIBER.

—It was a mistake to cover the tulips with manure after they were planted in the boxes. A covering of ordinary soil would have been better. The heat from the manure has no doubt caused the growths to shoot up before many roots had formed. What is needed now, however, is to get as long stems on the flowers as possible, and to this end we would take a side bench in the greenhouse and lower it down to the heating pipes. Then we would tack a piece of light cloth to the rafters in a line with the edge of the bench, having the cloth wide enough to reach clear down to the side of the bench. Also shade that portion of the glass directly over the bench. When the bulbs are brought in place the boxes on this semi-darkened bench, and the plants will come quite long stemmed; though, before the flower begins to finish, they will need to go into a cooler house for a day or two.

BRIEFS FOR BUSY FLORISTS.

VERBENAS.—If verbenas are needed in separate colors for bedding purposes—and they are most to be admired when planted in blocks of one color only—the best way to work up a stock is to buy rooted cuttings now of plants flowering with the colors desired. By purchasing early and then growing them on in a warm house a large quantity of cuttings will be produced, and these will have plenty of time to be rooted and make stock large enough for bedding purposes when the time comes to plant outdoors.

SEEDS.—Sowings should be made of petunias and pyrethrum; and, if it is intended to renew the smilax bed during the coming Summer, seed of smilax should be sown at this time, also.

GENISTAS.—Now while there is a good bottom heat is the time to take cuttings of the genistas.

HELIOTROPE.—These should also be propagated at this time to have nice four-inch stock for Spring sales.

Carnations, Etc., at Lancaster, N. Y.

The large surface of glass that comprises Palmer & Son's growing establishment at Lancaster, N. Y., is devoted, primarily, to producing blooms for the retail business of the Buffalo city store. Quite a variety of products is grown, although it can hardly be called an all-round place. Interest is centered in blooms of carnations, roses, chiefly the tea and hybrid tea classes; some single violets, with the forcing of bulbous stock actively engaged in. In plants, a house is given to growing along retailing sizes of palms, and caring for some decorating specimens.

Much rebuilding has been the order here for a decade or longer, the beginning having been made by the late W. J. Palmer. In this, iron construction and all approved improvements have been adapted. A fine heating plant of brick construction stands quite detached from the houses. As little potting is called for, and the commonly known wooden shed structures being dispensed with entirely, a practically fireproof place is the outcome, and the firm assumes its own insurance risk.

Acting in the capacity of foreman for many years under the experienced tutorship of Mr. Palmer, Sr., on Barney Meyers now devolves also the practical management of this place, for which his intimate knowledge fits him specially to meet the many demands, and the large crops of blooms of noted quality produced attest to his vigilant, applied skill.

The first houses were 125 feet in length, even span roof, and 15 feet wide, separated from each other by a 15-foot wide outdoor space. This style has given satisfaction, and Mr. Meyers finds it a bit difficult to beget assurance that the attempt in adapting three similarly sized structures, rebuilt the past year in the open, connected, or under-one-roof system, will prove as remunerative. These are now devoted to carnations in an assortment, and being planted the last of all, with stock perhaps not so superior, the comparison up till now is hardly considered complete enough to draw definite conclusions. These last built connected houses are fitted with 8-inch wide "channel iron" gutters of local supply. Walks under the gutters, and one in center of each house portion, give two 5-foot wide benches to each house.

A feature new to our former observations in bench bottom construction here is the employment of 4x5 and 13-inch long hollow brick, with two linear open spaces. Set in flat, on wood framework, a smooth floor for shoveling on is obtained. The bricks are merely placed in without any cement, and readily allow any excess of moisture to percolate between, or the moisture to be largely absorbed. These conditions produce a continuing uniform wetness in the soil, considered a significant gain.

In the rose houses here, for the low set, or practically solid benches, construction consists of a substructure or foundation, directly over the natural ground, composed of other soil, or ashes if more handy, and packed down even and level. On this is placed a bottom of the hollow brick, with sides added above same and built six inches in height. The latter are built two inches thick and are easily made of cement by any skillful workman. The cost is moderate, they being also practically indestructible.

Nine houses are given up to 15,000 carnation plants (in round numbers). Included in these, as regards varieties, are 4,500 Mrs. Lawson, 2,000 each of White Cloud and a white sport of Daybreak, 1,500 of a here well-known sport of Daybreak, close in color to the original; 1,000 Mrs. George M. Bradt, and smaller numbers of Prosperity, The Marquis, Mrs. E. A. Nelson, Morning Glory, Floriana, Estelle and Mrs. Potter Palmer.

Mr. Meyers' comments on varieties intimate that Prosperity is making a grand bloom, but is shy in productiveness. Queen Louise promises well. Mrs. Potter Palmer throws a beautifully formed flower, and the color is all right. Mrs. Lawson has sported here in red, the color being closely identical with that of Mrs. Potter Palmer. A house of inside-grown Mrs. Lawson gave nice results in early blooming on extra long stems. Touching further on this variety, Mr. Myers' experience is that it requires very careful handling as regards even temperature and avoidance of drafts of air. All things considered, however, it is here called the most profitable variety, its prolific quality and selling value of the flowers making it a leader in favor. One house of it, planted in August last, though not producing many blooms before December, has for some weeks past been steadily giving 1,000 of the finest flowers per week; and a close coming crop of buds is in sight.

A bench of the Dailledouze Bros.' strain of pink sweet peas has been forced to good results, and the French early daffodils, in being able to have same by the first of the year in a fairly good grade of bloom, seem an advantage.

In roses, Bridesmaid is being grown to the number of 4,000, Bride to half this number, 1,000 Liberty and Meteor together and nearly 2,000 Bon Silene, the latter being taken up during the last two years, and for city retail uses proving profitable. At the time of our visit, on January 14, with between crops conditions and dark weather, blooms showed sparse in numbers, but healthy and vigorous growths were in evidence everywhere; and satisfactory cuts had been made about the holidays. American Beauty is grown only in the early Fall months. A house of both Liberty and Meteor, of course, of alike treatment, has given profitable crops this season. Several houses are in course of preparation for Kaiserin Augusta Victoria and Souvenir du President Carnot for next Summer flowering.

A batch of 2,500 Lilium Harrisii was brought into flower quite successfully for holiday needs. Though not all buds made blooms by that date, fully 1,500 were cut. These plants incline to average somewhat more than two good flowers.

Two houses of Princess of Wales violets are but a moderate success, being late planted.

This establishment is located within stone throw of the Erie Railroad station, about ten miles distant from Buffalo, so that transportation of its products and communication are simplified and inexpensive.

VIDI.

Sweet Peas.

The month of January is the best time to sow those varieties of sweet peas, which will furnish the main crop of flowers in early Spring. I consider this the most profitable crop in growing this flower, or, to be perhaps more correct, it seems to me to be the only one which pays well; and from March until June, the only time when the flowers bring enough to justify the busy florist in devoting part of his time and the necessary space in his greenhouses to the growing of sweet peas for the wholesale market. Of course, they can be had in bloom now, and in fact, they have been in the market all Winter; but the grand totals of the returns to grower and commission man cause no ecitement.

In order to have blooms all Winter the seeds are planted in August and September either right in the bench, or, which is better into boxes of about 12 x 16 inches and 9 inches deep. In these boxes they are allowed to make a strong, healthy growth out of doors, where they remain as long into the Fall as the weather permits, after which they are carried inside, and as soon as chrysanthemums are done and make room for them, the sweet peas take their places. Although the flowers produced by plants grown in this manner are not bad and the prices obtained for them comparatively high, their yield is not great, and the flowers coming to the market in Midwinter, are considered out of season, there is no call for them, and they are disposed of with difficulty.

Sweet peas, now sown in the greenhouse on benches with the most sunny exposure, will commence to bloom at the end of March, or the beginning of April, and will yield an enormous number of flowers, with long stems and clear colors, which will meet with ready sales at fair prices. And the plants will continue to bloom until field-grown sweet peas appear on the market, after which I have, in late years, found it best to withdraw from the sweet pea business, leaving the field to the clergymen and truck-farmers.

Plant now, and drop the seeds into the bench about two inches deep, 10 to 12 seeds around a pillar or post, if you prefer to grow them in that way, among carnations and other plants, or have a continuous row the whole length of the bench, with the plants two or three inches apart. This latter plan will also leave room for other plants in front of the peas. Provide them in time with strings, or wire, let them have a night temperature of from 50 to 55 degrees and plenty of water overhead and at the roots, whenever required. They should bloom before they reach the glass, which they will if the soil in the bench is shallow; three inches is sufficient, and if they have from [illegible] to 6 feet of head room.

But I have of late adopted a different method of flowering them, to my fullest satisfaction. I plant the seeds in hills from [illegible] to 10 in a hill and the hills 5 feet apart, one row of hills the whole length of a narrow bench. Before the plants reach the glass at any rate, just before they show buds, I cut the strings above and lay the bunches of plants, which spring from each hill, flat on the bench, all one way, so that the top of one covers and overreaches the base of the other, and thus cover the entire bench.

The extreme points, or tops, of the plants will in a few days assume a straight and upright growth again, and will in a short time begin to bloom.

In picking a little care has to be exercised, so as not to disturb the position of the vines, causing the flower stems to grow crooked and twisted. They are sprinkled and watered as before they were laid down. A little liquid manure twice a week later on is needed, if you want the same large, long-stemmed flowers right along, and the blossoms should be picked daily once or twice as soon as they open. Never allow any seeds to form. Grown in this way the picking of flowers is easy and handy; the blooms are fine, large and of a rich, pure color, and by comparison I have found, that under this method of culture the vines bloom earlier and also produce more flowers, at least more high grade blooms, than if raised in the old way having them climb up and down on strings.

The best varieties to grow under glass for their flowers in early Spring are: Blanche Ferry, Salopian, Emily Henderson, Mont Blanc, Lovely, the New Countess, Lady Hamilton and Katherine Tracy. Blanche Ferry is not so reliable a variety as it used to be. In the last few years it has behaved badly with me. After yielding some good flowers for a week or two, after the plants commenced blooming, the flowers became almost unsalable, their originally bright colors turned into a dull, dead purple. What can be the matter with this sort?

FRED W. TIMME.

Primula Veris Superba.

Editor Florists' Exchange:

Are you not rather astray in your reply to J. H. F. in issue of January 17, in regard to Primula veris superba? I have grown this variety pretty extensively, being the originator of it, and never to my knowledge has it perfected a single seed. It is posssible it might do so with artificial fertilization, but if anyone is offering seed of it the probabilities are that it is bogus.

E. M. MITCHELL.

Ontario.

[Our reply dealt with the cultural treatment to be given this primula. The inquirer can say as to how and where he obtained the seed. Will he kindly do so?—Ed.]

PAMPHLETS RECEIVED.

CARE OF PLANTS IN THE HOME AND GARDEN. The Rosary Flower Company, New York and New Rochelle, N. Y. This is a neatly printed and well illustrated booklet, furnishing, in addition to a list of useful plants for home decoration, some serviceable advice on their care. The enterprise of the firm along this line cannot fail to bring its own reward.

Tobacco Stems THE GOOD STRONG KIND BALES WEIGH 500 LBS. 60c. per cwt. On Cars N. Y. City.

Happenings of the Week.

This (Saturday) evening occurs the sixteenth annual dinner of the New York Florists' Club, and that the event will equal any previous like effort of that body is a foregone conclusion. Present indications point to an attendance of almost fifty of the club's members.

The Hon. John Morris is still pondering in his cosy den over different problems beneficial to the trade.

George Hildenbrandt, who has had a severe attack of tonsilitis, is back at his work again in John Young's wholesale house.

William Fogarty, one of the staff in George Stumpp's store, was married on Sunday last to Miss Helen O'Brien. The ceremony was performed in St. Patrick's Cathedral, and a reception followed at the home of the bride's parents.

Thursday was the anniversary of the birth of the late President McKinley, and some of the flower stands on the streets displayed large signs, reading—"Who honors McKinley wears carnations to-day!" It is safe to say that the sale of carnations was much increased thereby.

A movement is on foot to erect in Central Park West, a permanent palace for exhibition purposes on the esplanade, where the old reservoir was located. Such a building, it is said, could be used for exhibitions of flowers, for public receptions, and other public purposes. President Cantor, of the Borough of Manhattan, says that the plan submitted, which includes the foregoing proposition, has been approved by many landscape engineers, and Andrew Carnegie has endorsed the suggestion.

Copin, of Jefferson Market, no doubt feels highly elated over the large orders which the Iroquois, the Thirsty Corner Club, and the Tammany General Committee had for him. These orders he had to accompany in their specially chartered cars to Albany, for the delegation to present to the Hon. Bernard Martin in the senatorial chambers. The work consisted of two eight-foot horseshoes, two large baskets and the decorating of Mr. Martin's desk and seat, as well as his rooms at the Ten Eyck.

The growers of Chatham and Madison, N. J., held a meeting on Wednesday evening to perfect arrangements with the local express of the permanent establishment of the same for the conveyance of flowers to New York. This has been made necessary owing to the regular express companies showing no desire to restore the old rates. It has been demonstrated that growers in these vicinities can get their flowers to market by independent means, and they are going to do it, rather than be squeezed unmercifully by the express combine.

The committee on awards of the New York Florists' Club has prepared a schedule for exhibits at the club's meetings, designating certain flowers and plants for each meeting night. The February exhibits will be orchids and novelties; March, carnations and novelties in plants and flowers; April, roses and novelties in plants and flowers; May, Spring flowers and novelties in hardy plants and flowers; June, peonies, iris, herbaceous and hardy shrub flowers. The committee is anxious to secure the assistance of all growers, and all exhibits sent to the club's secretary, John Young, 51 West 28th street, will be properly taken care of and staged.

The American Institute held an exhibition of flowers, fruits and vegetables on Wednesday and Thursday of this week, in the Berkeley Lyceum, West 44th street. The show of apples was the most extensive in the list, while that of cut flowers was rather meagre. H. Spavin, Mt. Kisco, N. Y., showed a bunch of his scarlet carnation, Mrs. James Wood, and three flowers of a new orange crimson seedling. G. M. Hay, Stamford, Conn., staged a vase each of the carnations Chicago, Mrs. G. M. Bradt and Mrs. Thos. W. Lawson; also a bunch of a seedling light striped variety. Wm. Slack, gardener to Mrs. Oliver Hoyt, Stamford, Conn., showed twenty-five Bride and twenty-five Bridesmaid roses, also a bunch each of single and double violets. H. T. Clinkaberry, Trenton, N. J., exhibited a collection of cypripedium flowers in named varieties.

James Weir, son of John Weir, florist, Brooklyn, had a lively experience with three toughs on Saturday night last. Mr. Weir was riding in a Fulton street car, where three young men were annoying an aged Hebrew; he requested the three to desist in their persecution of the old gentleman. They ignored his request until finally he made them do so by muscular persuasion. This so annoyed them that when the old Hebrew left the car at Jay street, they also left it, and recommenced the abuse of the old man. Mr. Weir, suspecting this would happen, also left the car, and decided he would have them locked up, and, there being no policeman in sight, he collared the ringleader and after a furious struggle, landed him in the police station. The police sergeant complimented young Weir on the course he took and committed the prisoner to be locked up. Two black eyes testify to the strenuous encounter of the young florist.

The Brooklyn Horticultural Society will meet on Monday evening next, February 2, in the Germania Club, 120 Schermerhorn street, Brooklyn, N. Y. A good attendance is desired. The preparatory work consequent upon the coming carnation convention will, it is expected, be completed at this meeting.

The death of Hicks-Arnold, which occurred on Wednesday, January 28, removes one of New York's most prominent orchid lovers and purchasers. It is said of him that he would lay aside any business he happened to be doing to stop and examine a new orchid.

Henry Smith has given up his store at the corner of State and Court streets, Brooklyn. He will now devote all his attention to his main store in Court street. The partnership between Smith and F. Schworm, which has been in operation for about two months, has been dissolved.

To anyone desiring to enter the retail business there is a splendid chance open in Flatbush avenue, Brooklyn. Here is an old established store, near Sixth avenue, that Mr. Phillips purchased for his son, but, as the Fulton street store requires all the time and attention at his disposal, Mr. Phillips would like to dispose of the Flatbush avenue shop.

Henri Beaulieu, the Woodhaven florist and seedsman, has been quite sick for several weeks, but is again able to be out.

The new white carnation of Dailledouze Bros., the variety illustrated in these columns last week, is making a record for size. One flower brought to the city on Tuesday last measured 4¾ inches in diameter.

August Schraeder, the grower of smilax and adiantum of Newtown, N. Y., has recently purchased an automobile for his private use.

Robert Craig, Philadelphia, Pa., was a visitor on Wednesday of this week.

BALLSTON SPA, N. Y.—John Schafer is able to be up and around again after a long siege of illness.

SARATOGA, N. Y.—J. T. Totten is in Cuba for the benefit of his health. Dehm & Son are doing well. The coal question is all right here.

YORKVILLE, N. Y.—Geo. A. Benedict contemplates building two new greenhouses, each 35 x 200 ft.

Boston.

The Week's Happenings.

Mrs. Frederick L. Ames, of this city and North Easton, a notable patron of horticulture, died on Tuesday of last week. Mrs. Ames was an extensive exhibitor at the shows of the Massachusetts Horticultural Society, of which body she was a life member, and won prizes for her orchids very consistently. There was a wealth of floral tributes at the funeral on Thursday, which was held at North Easton.

Wilson's greenhouses at Wellesley were visited by fire Tuesday night. The fire destroyed the boiler-shed and about forty feet of one greenhouse.

S. J. Goddard, of South Framingham, met with quite a painful accident last week from a fall on the ice.

Elisha N. Peirce, of Waltham, left last Saturday, with a party, for Bermuda on a month's trip. He expects to return to New York in time for the Carnation Society's convention.

Mrs. Olden, who invented the now famous "Koral" letter, is working on another invention, with which she hopes to save time, trouble and expense for florists.

E. Sutermeister is now bringing in Von Sion narcissus and yellow tulips, in pans, of very good quality.

Well-flowered lilacs in pots are among the novelties Edgar is sending to the market these days.

F. J. NORTON.

Providence, R I.

Notes.

Who will start the ball a-rolling for a resolution against the increased tariff of the express companies? This is something that every grower and retailer ought to give immediate attention.

Maidenhair fern is very scarce and is cut clean down to the roots.

Mrs. Pollock is using some very nice roses in design work, for which she has enjoyed a good call this month.

Everybody has violets to sell just now. How different things are from last month's prices!

Leach, of Pawtucket, is enjoying the fame of being one of the few business houses using the new "Nernst Electric lamps." These lights may find their way to Providence in the near future. They are excellent for flower stores.

Carnations are retailing at from 50c. to 75c. per dozen, with a prospect of the first price prevailing for the bulk of the stock in the immediate future.

C. S. MACNAIR.

Hartford, Conn.

Club Meeting.

The Florists' Club held a well-attended meeting Tuesday evening, January 27, nearly all of the members being present. The subjects of taking off the tariff on glass and the reduction of express rates on cut flowers were freely discussed. The following resolutions in regard to express rates were adopted:

Whereas, It is the experience of growers in this section that the increased express rates on cut flowers has materially decreased the number of shipments; and

Whereas, The retail dealers are unable to raise prices in proportion to the excessive overcharge, the class of merchandise being extremely perishable, a luxury and not an absolute necessity, direct loss and failure is thereby invited; and

Whereas, Considering the increased price of all classes of merchandise necessarily connected with the production of cut flowers, this additional burden places the grower and retailer in an extremely dangerous position. Therefore be it

Resolved, That we, the Hartford Florists' Club, as a body and in the interest of our profession in general, do hereby protest against the unnecessary excessive express rates on cut flowers as being discriminating in their nature, firmly believing that the express companies, after due consideration of the matter, will perceive their error in placing in danger a class of men engaged in a trade already so dependent on many ungovernable conditions.

Resolved further, That we pledge ourselves to furnish any express company, or its agent, on request, with such information as may be needed to show our position in the matter to be a true one from a commercial standpoint.

Notes.

Treasurer Theo. Wirth, who was taken sick with pneumonia while visiting his old home in Long Island, is now able to be around again.

L. H. Mead gave a very interesting talk on "The Centralization of Rural Schools, the benefit to both rural and urban children, especially in Nature's Study," which was followed by a discussion on the subject by many of the members present.

A. N. Pierson, of Cromwell, was a visitor the past week.

J. F. COOMBS.

Denver.

E. W. Davis, president of the Denver Floral Club, invited the florists of Denver to spend the evening of Friday, January 23, at his home. The gathering was mostly a social one, though Mr. Davis during the evening gave a talk on matters relative to the club. A very pleasant time was spent, and about twenty-five of the members enjoyed some good singing and music, and also a nice lunch.

I regret to state that the health of Mr. Valentine, president of Park Floral Co., is mending slowly. He is still unable to attend to business, although out for a little while every day.

High rents will cause some changes on Sixteenth street, our main thoroughfare, very shortly.

The Thiess Floral Co., for several years on Sixteenth street, will move to California street, while Miss Bessie Horlop, who is opposite the Thiess Floral Co., is contemplating the same kind of a move.

Franklin, Mass.

Walter Slade and family are now comfortably settled in their new and attractive cottage on Central street.

Cincinnati.

All Cincinnati mourns the death of our Chief of Police, Col. Philip Deitsch. His funeral occurred from the Scottish Rite Cathedral, Monday, January 26. The floral offerings consisted of about fifty designs and as many bunches, aggregating about $1,000 worth. Much of the work was of cape flowers, as it was simply impossible to get enough natural stock to fill the orders. All the retail stores had pieces, and some of the work was very good, indeed, while some was very bad.

John Lodder and daughter, of Hamilton, O., were in the city this week.

Business remains good, and stock very scarce. E. G. GILLETT.

Indianapolis, Ind.

News Notes.

The next monthly meeting of the State Florists' Association of Indiana will be held at the Commercial Club rooms Tuesday evening, February 3.

John Bertermann visited the several florist establishments at Richmond, Ind., last week. Grave's carnations are in fine shape, and the E. G. Hill Co. are getting ready for a large Spring business.

The business of the Vail Seed Co., which was offered for sale last week, remains unsold. Sealed bids were taken for the business, but none was received.

Huntington & Page shipped thirty-five carloads of onion sets the first week of January, and have several more which will soon be ready to start.

I. B.

Toledo, O.

The mild weather has helped the coal situation greatly, although many have a good supply on hand, others are depending upon the weather to escape great loss.

All florists here are astonished at the way trade keeps up, even with the high prices asked for blooms. Business throughout this section shows an increase over that of 1902. Roses are plentiful, bringing $1.50 to $8.00; carnations, good, realize 75c. to $1.00; violets, $1.50 to $2.50 per 100; narcissus, $1.50 to $5.00 per 100; Roman hyacinths, $1.50 to $4.00 per hundred.

Joseph Sigrist is forcing a large house of Lilium Harrisii, which will be ready for Easter trade.

The Henry Philipps Seed & Implement Company has been highly commended in a special report just sent to Congress by the Secretary of Agriculture descriptive of the governmental seed distribution for the past fiscal year, which ended July 1, last.

The Secretary explains for the benefit of Congress, that in order to properly handle the large quantities of seeds required in connection with the work it was essential that a building conveniently located and properly arranged should be secured, and this was secured by the Philipps Company, which erected in Washington a building according to plans satisfactory to the Secretary of Agriculture. The building is well lighted and heated and is declared to be in every way well adapted to the work. C. J. S. P.

Cleveland.

Club Meeting.

Monday evening was regular meeting night, with a good attendance on hand. Our secretary, who is vice-president of the S. A. F. for Northern Ohio, started the ball rolling by bringing before the members the new express rates on cut flowers. After much discussion the matter was laid over, and no doubt Cleveland will be heard from with a decisive movement.

Mr. Bartells, the manager of the J. M. Gasser's houses at Lake avenue, gave quite an interesting talk on subirrigation for carnations, which was much appreciated. The firm has installed this system on a large scale.

The long spell of cold weather has been broken at last, but the outlook is that we shall have more cold in a short time.

The coal situation here is unchanged, with the price on a gradual increase. If it keeps on going up by Spring the profits of a year's business will go into the boilers this season.

J. W. Wilson, of Glenville, whose place is almost entirely devoted to carnations, is sending in some fine blooms which command the highest market price. This gentleman intends to plant one house with Enchantress and one with Governor Wolcott the coming season, and should he have the same success with them as he is having with Mrs. Lawson, I daresay he will have the finest stock produced in this part of the country.

Some of the younger members of the profession got together and arranged for a trolley party to Painesville, O., Friday evening, January 30. Supper was served at the hotel and the private dance hall given up to them. A few from Mantor and Painesville joined on the way.

Adam Graham, Jr., is still on the sick list, but is progressing nicely.

G. W. S.

Osage, Ia.

The Perry Florists' Association held its meeting in Cresco January 21 and 22. A most profitable as well as enjoyable time was had. Fine exhibits came from the Chicago Carnation Company, also from C. C. Pollworth Company, of Milwaukee. The convention was entertained by W. B. Perry.

Mr. Perry's houses of carnations were looking their finest. Next season's meeting will be held in July at E. J. Springer's, of New Hampton. The association will go in a body to the Milwaukee convention of the S. A. F. in August.

The following protest regarding express rates was made:

We, the undersigned, emphatically protest against the increased express rate on cut flowers. It is a direct discrimination against our business, and one by which the express companies are no gainers. Flowers in small lots, which formerly went by express, will now be sent by mail, and the increased rate will curtail the shipping of cut flowers to a considerable extent. None of the undersigned can see any reason for the action of the companies in increasing their rate, and respectfully ask for a restoration of the old rate.

A. N. Kinsman, Austin, Minn.
M. H. Wetherbee, Charles City, Ia.
P. Clawsen & Son, Albert Lea, Minn.
W. T. Symonds, Decorah, Ia.
W. B. Perry, Cresco, Ia.
E. J. Springer, New Hampton, Ia.
W. S. Hall, Osage, Ia.
C. G. Kruger, Mason City, Ia.
Members of the Perry Florists' Association.

Kalamazoo, Mich.

Here and There.

The fuel question is still the chief topic, no great relief in price being in sight, and, just now, coal is worth as much or more than the value of flowers cut, the present quotations being from $5.50 upwards. Perhaps the worst part of this is the very inferior quality of coal supplied, even at the exorbitant prices asked.

The Central Nursery Company banquetted their employees to the number of nearly 150 at the Auditorium on January 20, which the local papers reported at length, one paper devoting nearly a page to the speeches, etc. From what I hear a good time was had and it was a great success and clinched the good feeling already enjoyed between the corporation and its employees. The company recently reëlected the officers and directors.

Mr. Kyle, of the Dunkley Company, recently visited Chicago, and speaks highly of the new carnations he saw while there, being especially enthusiastic over Enchantress.

John Calder was the lucky man who laid in a sufficient stock of coal to last the Winter. He says his new coil boiler is all right.

Some of us have sent on a protest individually about the express rates, but the writer is pleased to note a disposition to get together with a unanimous protest from the combined trade.

S. B.

York, Pa.

Chas. Schaeffer, corner of Jefferson and West streets, has a pure white seedling carnation, of which he is expecting great things. The first flower measured 2¾ inches in diameter; the calyx and stem are strong and the growth rapid.

Newburg, N. Y.

The Coldwell lawn mower manufacturers have a thoroughly equipped factory for turning out their improved machines, for which they find a heavy demand from all parts of the country.

The Chadborn Manufacturing Company is contemplating an increase in its manufactory space, owing to the pressing demands for the concern's automatic ventilators.

The florist and seed business of the late J. A. Schaefer is now carried on under the firm name of J. A. Schaefer's Sons, with F. H. Schaefer manager. At the time of our visit, the latter gentleman was busy with funeral work, occasioned by the death of Governor Odell's sister.

There are about 40,000 feet of glass on the premises and the product is consumed in their own retail trade.

E. M. Peattie has a store on Broadway, with greenhouses located at the corner of Miller street. Business has been good all season, though the price of coal has been a great drawback; at times $10 per ton has been paid for soft coal, which is certainly a high figure, considering the price of flowers could not be advanced in proportion.

Butte, Mont.

The Montana Florists' Club has been organized and the following officers elected: President, O. A. C. Oehmler; vice-president, Victor Siegel; secretary, Elmer Law; treasurer, Everton Law. It is believed that by following correct methods of culture and by securing plants that are adapted to the climate and situation, most surprising and gratifying results will be attained. A study will also be made of the native wild flowers of Montana. It is the design to have an essay dealing with these topics read at each meeting of the club.

Omaha, Neb.

Lewis Henderson, florist, was held up on Saturday night, January 17, by three masked highwaymen, and robbed of $65 in cash and a gold watch valued at $100. The thieves overlooked $30 that Mr. Henderson had in another pocket.

THE FLORISTS' EXCHANGE

We are a straight shoot and aim to grow into a vigorous plant

A WEEKLY MEDIUM OF INTERCHANGE FOR FLORISTS, NURSERYMEN, SEEDSMEN AND THE TRADE IN GENERAL

Vol. XV. No. 6 NEW YORK, FEBRUARY 7, 1903 One Dollar Per Year

SPIRÆA FOR EASTER FORCING.

We offer a few cases each of the following sorts as below, as long as unsold. These can be shipped ely by freight, as it will not injure them in the slightest if frozen. There is plenty of time to get them for Easter, if wanted, and they also make good stock for Decoration Day. Now is the time to lay in a k before they are all sold.

PONICA and COMPACTA MULTIFLORA. Case of 250 clumps for $8.00; in less quantities, $4.00 per 100.

TILBOIDES FLORIBUNDA. Case of 250 clumps for $10.00; in less quantities, $5.00 per 100.

APANESE FERN BALLS

Best Quality, $25.00 per 100.

The surplus bulb stock recently offered has sold fast, but we can still supply the following, in first-class shape, as long as unsold, at prices named below:

ALL SIZED NAMED HYACINTHS.

hese are splendid for Easter forcing, and are for growing in pans or pots. Nothing is more dily salable. Price is very low, and the bulbs are t-class—remarkably good for the low price at ich they are offered. They will throw almost as d flowers as the larger and higher-priced bulbs. you have never flowered these, try a thousand two. You will be pleased with the results. y cannot fail to make money for you.

he following pink varieties at **only $1.50 r 100; $12.00 per 1000** (worth $16 00 per 1000), Baron van Tuyll, Gen. Pelissier, Gertrude, antea, Robt. Steiger and Solfatara.

he following blue varieties at **only $1.50 per); $12.00 per 1000** (worth $16.00 per 1000), viz.: nd Maitre, King of the Blues, La Peyrouse, s. Dickens, Blondin, Czar Peter; also Tamerlan low).

he following white varieties at **only $2.00 per); $16.00 per 1000** (worth $22.00 per 1000), viz.: oness van Tuyll, Grandeur a Merveille, Blan- rd, L'Innocence, Mme. Van der Hoop, and Paix Europe.

NE NAMED HYACINTHS. Single and Double.

e offer a limited stock of the following varieties irst-sized bulbs, at $3.00 per 100; $25.00 per 1000 th $35.00 per 1000), viz.: La Peyrouse, Regulus, nerlan, Grand Lilas, La Pluie d'Or, Bouquet Tendre, Crown Prince of Sweden, Flevo, Garrick, Grootvorst, Gen. Antinck, King of Wurtemburg, La Tour d'Auvergne, La Virginite, Lord Anson, Lord Raglan, Othello, Prince of Orange, Prince of Saxe-Weimar and Princess Royal.

HYACINTHS IN SEPARATE COLORS.

We still have a few of these left in singles and doubles, which we offer as long as unsold at **$2.50 per 100; $20.00 per 1000** (worth $26 per 1000).

TULIPS.

SINGLE and DOUBLE.

Most of the varieties here offered are among the very best forcing varieties, especially for late or Easter forcing, viz.: Bizard Verdict, Couleur Ponceau, La Candeur, Yellow Rose, Lady Grandison, Duke of York, Rose Blanche and Count Leicester, at $5.00 per 1000; Cottage Maid, Joost van Vondel, Brutus, Pæony Red, at $6.00 per 1000; Tournesol, red and yellow, Gloria Solis, Le Blason and Rosine, at $7.00 per 1000; Duc van Tholl, scarlet, and Standard Royal Silver, at $7.50 per 1000; Mariage de ma Fille, at $10.00 per 1000; Proserpine, at $12.00 per 1000; White Joost van Vondel and Rose Luisante, at $20.00 per 1000.

SEED TRADE REPORT

PHILADELPHIA, PA.—The State of Delaware has granted a charter to the Henry F. Michell Company to deal in bulbs, seeds, etc. Capital, $15,000.

CLEVELAND, O.—A meeting for the purpose of organizing a Market Gardeners and Producers' Association has been called for to-day, February 7. Geo. A. Tilton, seedsman, is chairman.

DENVER, COL.—The Lee Pioneer Seed Company has been incorporated; capital stock, $10,000; to operate in Arapahoe county with principal office in Denver; H. M. Lee, M. S. Reed, J. A. Graham, incorporators.

WORCESTER, MASS.—John K. M. L. Farquhar, of Boston, delivered an instructive lecture, illustrated with stereopticon views, on the subject of "Seed Growing," before the Horticultural Society, on January 29. There was a large and interested audience. A local report attributes the following statements to Mr. Farquhar on crop conditions:

"On account of the unfavorable season, last year, for harvesting seeds, corn seeds would yield the coming year 20 per cent. less returns than usual from the very best seeds. We have had the past year one of the most unfavorable ever known for the harvesting of vegetable seeds. With regard to corn, wax beans and some of the more delicate peas, those seeds which ripened last

European Notes.

Hardly had the mail departed last week when a complete change landed us in a dangerous thaw and general break up; or, rather one should say, a tumble down, for we have had a perfect deluge ever since. As, however, our shipments are at last in view of completion, conditions such as these cannot damp our spirits, although they may dampen our seeds.

A brief reference was made in last week's notes to the inevitable delays attending the later shipments; for many of these Nature alone is responsible. Another cause is the complete disorganization of the rail and steamboat services which always occurs at this season of the year. It is no unusual thing for goods to be six or seven weeks on the road from one country to another, and in these cases they are

DREER'S SUPERB ASTERS

---

lost sight of as completely as if they had no existence at all. Whole carloads have disappeared in this way, and have eventually turned up at places many miles away from their destination. An even more difficult matter is to adjust shipments so that they may comply with special freight arrangements made by the purchasers on your side. It seems not to be generally understood that the tempting freight rates quoted by keenly competing transportation companies are based upon slow and, in many cases, very second rate lines of steamers; and these are often very irregular in sailing. As a consequence, shipments are delayed from ten to fifteen days and sometimes longer; and the shipper gets the blame.

During the present week a notice has been sent round by a well-known company, that because a certain ship will not unload at a certain wharf in America no goods are to be sent by her, neither are they to be sent by either of the other steamship lines trading to the same port. Thus our friends in America will have to put up with another long wait, and we shall have to bear the blame.

All reasonable efforts to economise out of pocket expenses are justly to be commended, but when, as always happens, it works in this way, the policy can only be described as "penny wise and pound foolish." Verb. sap. sat.

Something to Be Pushed Along.

Editor Florists' Exchange:

I have just been reading a beautiful story about poems and thrushes and nightingales in a western trade paper that comes to my place, and, as I got to the end of the story, I noticed the writer says that he only wrote the eulogy because he likes to push a good thing along.

It occurred to me that if the western trade paper is good enough to print recommendations about poems and things of that kind, you yourself might like to print a testimonial from me about a friend of a friend of mine, who has a friend that has made a new mouse trap. This mouse trap is the greatest invention you ever heard of; and often, while crawling on my hands and knees under the benches of the greenhouse, trying to find the trap (for every time I set it the mice take it away and hide it), I have thought, what a beautiful trap it was. It cannot be compared to either a steam trap, a one-horse trap, or a Satrap. You might think that florists are not interested in traps in general and claptrap in particular. Well, perhaps not so much; but I think a mouse trap is as useful as a poem to a florist like me, and I guess I'm a fair average specimen.

A. RALIA, author.

P. S.—If you can't print this, send it back, and I'll try to have the other paper print it.

A Fellow Feeling, Etc.

The following courteous correspondence recently passed between a large Fifth avenue (New York) retail florist and the grower who furnishes him with large supplies of stock:

Dear Mr. ———

Camellia plants just received. Some have flowers and no buds; others have buds and no flowers—all soft and drooping and liable to fall off at any moment. And still we are not supposed to kick!

I suppose we have just to grin and bear it, as the Dutchman did with the toothache.

YOUR LONG-SUFFERING RETAIL FLORIST.

My Suffering Friend:

Your cry has been heard as regards camellias, and I hasten to relieve your sufferings as quickly as possible. If the flowers drooped, and plants were not O. K., keep them till the wagon calls and we will allow full value. All just claims will always be promptly satisfied.

Your half-starved, day-and-night-working WHOLESALE FLORIST.

Express Rates.

At a meeting of the Buffalo Florists' Club, held January 20, the following was unanimously adopted:

Resolved, That we protest against the large increase of express charges on packages of flowers carried by the express companies, and adopted, we believe by all the companies of the country.

Resolved, That we respectfully petition the several companies doing business in our cities to restore the old rates. We believe it unjust that our business should have to bear this burden, for those it most affects cannot afford it.

Our reasons for believing that this great increase in express charges is not warranted are as follows:

Our packages of flowers are invariably delivered to the express office because it is necessary to delay packing them to the last possible moment, and they are not called for as are other packages of merchandise.

A large proportion of the business of the florists with the express companies is from the grower in country towns shipping to the commission house, or to his own retail establishment in the larger cities. These shipments are, with but few exceptions, delivered to the railroad stations, and in many cases they are called for at the city express office by the commission man or retailer.

On the two most important seasons of the year to the florists—Christmas and Easter—when the express companies are also crowded with business, we seldom ask the express companies to do anything but transport our packages on their railroad cars. We deliver them to the car and receive them at the city depot and carry them to our places of business.

For our own interest our boxes are made as strong and compact as possible and most convenient to handle. Half a dozen boxes can be placed one on top of the other without any damage to the flowers.

The box of flowers sent by the retailer to some other city is but a small part of the business, and the increased rate will not be felt to any extent by the florist, but this additional tax will be a hardship on the grower who is your liberal and constant patron.

Hoping for a favorable consideration of our petition,

WM. F. KASTING,
WM. SCOTT,
C. H. KEITSCH,
Committee.

A Quaint Old House and Garden.

The Bartram house of Philadelphia, a unique memorial of pre-Revolutionary days, is described and illustrated in a paper in the March Delineator. John Bartram, the builder, was a farmer who turned his attention to botany, and eventually become the most famous American botanist of his day. His house was frequented by illustrious men, among them the founders of the Republic. It is an excellent example of Colonial architecture, of good proportion and homelike appearance. The interior arrangements exhibit the quaintness and simplicity of the times. As would be expected, the garden is of especial interest, containing rare varieties of flowers, shrubs and trees, some of the latter having attained a great height and age.

Salmon King is the name of a new California canna, described as being a very large salmon red variety. F. A. Miller Plant and Seed Company, of San Francisco, are the originators.

Nursery Department

AMERICAN ASSOCIATION OF NURSERYMEN

Charles A. Ilgenfritz, Monroe, Mich., President; D. S. Lake, Shenandoah, Ia., Vice President; eorge C. Seager, Rochester, N. Y., Secretary; L. Yates, Rochester, N. Y., Treasurer.

BURLINGTON, IA.—J. J. Gravatte, a nurseryman, died suddenly here on February 2. A widow and one daughter survive him.

FRANKLIN, MASS.—The Continental Nurseries have been established here to conduct a general business, also doing landscape work. A. von Leeuwen, father and son, are the proprietors.

DANSVILLE, N. Y.—Thomas Maloney & Sons, nurserymen, have bought the William J. Roberts farm in Sparta, two and one-half miles from this place, and will use all the tillable land for nursery stock.

ROCHESTER, N. Y.—The Western N. Y. Horticultural Society elected the following officers: President, W. C. Barry, Rochester; vice-presidents, S. D. Willard, Geneva; J. S. Woodward, Lockport; Albert Wood, Carlton Station, and S. Wright McCollum, Lockport; secretary-treasurer, John Hall, Rochester; executive committee, C. N. Hooker, Rochester; H. S. Wiley, Cayuga; Henry L. White, Oswego; Wing R. Smith, Syracuse, and E. M. Moody, Lockport.

Chase Brothers, nurserymen, have purchased the entire business of the late Thomas W. Bowman & Son, whose offices have been on the Culver road. The Bowman nurseries will be run in addition to the industry already directed by Chase Brothers.

The Alabama State Horticultural Society was organized January 27 under the most favorable auspices and with considerable enthusiasm. W. S. Heikes was elected president and R. S. Mackintosh, of Auburn, secretary and treasurer. The constitution provides for nine vice-presidents, one from each congressional district in the State, but their selection was left with the executive committee, which was chosen as follows: Paul Hoffman, John Wallace, and M. C. Scott.

The most important committee of the organization is that on legislation, in whose hands was left the steering of bills through the present legislature having in view the protection of fruit growers and the elimination of destructive diseases. This committee consists of Robert Chase, Prof. R. S. Mackintosh, Dr. Wilcox, John Wallace, and Hon. L. R. Wheless, member of the legislature.

The officers and members of all the local horticulturists societies throughout the State were invited to ally themselves with the larger State organization and attend the meeting at Montgomery, whenever same may be called.

Selecting Grafting Wood.

Though late cut wood for grafting purposes is better than none at all, and it is much better to cut it now while the wood is dormant. Select medium-sized shoots, of last season's growth, that have nice, clean, healthy wood. Tie them in bundles, correctly labeled, and bury them in soil, in a quite cool place, until wanted for use.

While not prepared to say that wood from bearing trees will give trees which will bear sooner than those from wood from young trees when grafted on seedlings, it is a belief of many. When it is vice versa—that is, a graft from a seedling placed on a bearing tree—there is no question that bearing is hastened thereby.

Desirability of Douglas Spruce.

In the line of Mr. Braunton's notes on Douglas spruce and other trees of California, I would like to add that in my opinion nurserymen who fail to stock up with the Douglas spruce will regret it. The Colorado one is the sort for the North, the Pacific coast one the variety for the South. Botanists, some of them, term the Colorado one blue, but both have been grown here; and though the Colorado one is not as dark a green, perhaps, as the other, to call it blue requires a great stretch of imagination. But it's a grand evergreen, as hardy as can be, coming as it does from the Rockies, and makes a handsome evergreen for parks and gardens. It transplants well; and, depend on it, there will be a great call for it in a few years.

Subsoiling.

Following Mr. McNaughton's well-timed remarks on subsoiling, I would say that as a lad in England I well remember working all one Winter under a foreman subsoiling a tract of ground. This work is far more common in England than it is here, apparently, because its benefits are better recognized and there seems more call there for the exercise of all the talent possessed to get the most possible from the land. In nurseries here subsoiling is done to a great extent; but not in the orthodox way. It occurs through the necessity of digging deep to get out large trees. In this way nurseries that I could name have been subsoiled many times over, as, with large trees, the digger has to penetrate two to three feet, yes, even four feet, for some extra large cases. It is principally because of this ever recurring deep digging that the same land will produce crop after crop of trees, and without a very large application of manure.

Herbaceous plants quickly display a generous growth when in trenched ground. In hard soil many of them disappear; but deepen the soil and they find in the coolness and moisture resulting that which they require in the Summer heat.

Referring again to nursery trees, they grow twice as fast when in deep soil, and when with it a little manure is added the block of trees is ready for selling in a very short time.

Outlook for Fruit Stocks, Seeds and Fruit Trees.

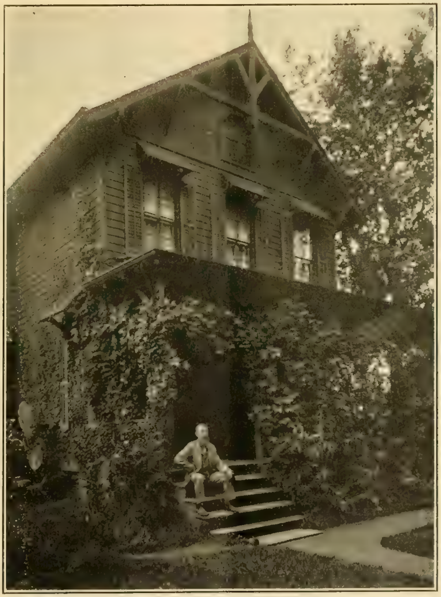
Inquiries among those interested in the matter indicate that in the way of fruit stocks pear and apple stocks are in short supply, while almost all other kinds are fair or ample. In detail, the supply may be given this way: Pear, French, short; pear, Kieffer, usual; apple, French, usual; apple, home, short; cherry, Mazzard, fair; cherry, Mahaleb, fair; quince, usual; plum, Myrobolan, usual; plum, Mariana, not known; peach, very short.

From the foregoing it will be seen that aside from pear, home-grown apple stock and peach there appears enough on hand to supply the usual wants of nurserymen.

As regards seedlings for the season following, there is quite a shortage of apple seeds and of peach. Apple is very scarce, which may cause a short supply of stock for next Autumn. And the same is true of peach stones, which seems curious in view of the fact that in the peach belts of the border States peach fruit was plentiful. But so many look for peach stones from districts supposed to be entirely free from any disease.

Of fruit trees and nursery stock in general the supply of good stock was pretty well cleaned up in Autumn, and there will be no great stock of large trees. Though not always the best thing to do, so many customers demand large-sized fruit and ornamental trees, and these are the sizes nurseries do not have. When it comes to medium sizes, there is a good stock of nearly all kinds of ornamental and fruit trees. Nurserymen have set themselves the task of getting together stock, both by propagating and importing; and, as a rule, a visit to any of their grounds will show every foot occupied by trees, not large, but of good planting size.

JOSEPH MEEHAN.



GARDENER'S COTTAGE ON ESTATE OF WILLIAM WALTER PHELPS, TEANECK, N. J.

The Gardener, Donald Matheson, is seen sitting on the steps.

The Tree Tomato.

Editor Florists' Exchange:

It is very probable that the tree tomato inquired for by Mr. Joseph Meehan's correspondent in South Africa (vide page 6 of your issue of January 3) is the Cyphomandra betacea (synonyms, Solanum betaceum and S. fragrans) of South Brazil. This plant has been known since 1836 and was probably introduced into the East at a comparatively early date, for it is said to be extensively grown for food in India and Ceylon where it is known as "the poor man's fruit." About a dozen years ago it was introduced into Southern California and occasioned considerable interest among horticulturists. Both seeds and plants are offered by California nurseries, and the plant has been offered within a few years at least in the eastern and southern States.

It grows in the form of an erect, arborescent, perennial shrub, with spreading branches, large and handsome foliage which is not at all tomato-like, and in its native country finally attains a height of 12 to 14 feet. It comes into bearing in about 18 months from the seed, and in Southern California ripens from Christmas to the middle of February. The fruit, which hangs pendant in clusters below the foliage, is of the size and shape of a large egg, of a beautiful orange-salmon color when ripe. It has a sub-acid flavor, slightly resembling the tomato, for which it is said to make an excellent substitute. It may be eaten either raw or cooked, and owing to its tough skin and the solid nature of the meat which covers the seeds the matured fruits will keep for a long time. It is said to be delicious served raw with cream and sugar, to be fine for jelly and jam, or for pickling while green, and that it can be cooked in a multitude of ways.

It has been tried in Florida, but for some reason it does not thrive there in the open ground; but in the tropical fruit sheds now coming into use in that State it might prove a success. In the dryer climate of the frostless portions of South Africa it would very likely do well, in which case it would seem that it might prove a highly desirable addition to the list of fruits produced there. Being a handsome shrub, both in foliage and fruit, and an evergreen, it makes a very desirable plant for conservatories having the necessary room to spare.

OB SERVER.

Donald Matheson and His Cottage.

The Florists' Exchange has been favored with some beautiful photographs of fine trees and charming scenes taken on the estate of the late Mr. William Walter Phelps. These it proposes to place before its readers from time to time. With this issue, however, we present an illustration of the gardener's cottage, and a portrait of the gardener himself, Donald Matheson.

The Phelps estate is a very large one, situated at Teaneck, Englewood, New Jersey, and extends to Hackensack on the one side to the Hudson River on the other. The place is famed far and wide for the many prominent horticultural features it possesses, as well as for its great extent. Because of this, it is a pleasure to present a likeness of the man who has done so much to make the estate so renowned, with a few notes relating to him and his work.

A feature on this vast estate is the thirty miles of fine drives, winding through the woods and fields, all carefully laid out by Mr. Matheson, who has been on the estate for thirty-three years, and during that period has planted over a million trees.

Donald Matheson is a Scotchman by birth. He served his apprenticeship on the Connan estate of Sir Kenneth McKenzie, Rossshire, Scotland, being afterward five years foreman on the estate of Lord Carlyle at Castle Howard, Yorkshire, England, where the thought struck him to try his luck in America. Three days after his arrival in the United States he accidentally met and entered into conversation with Mr. Phelps, which ended in Mr. Matheson accepting an offer to take hold of a newly purchased country place that was in a very rough and wild condition, and he has ever since been at work improving and beautifying it.

Mr. Phelps, late United States Ambassador to Germany and Austria, was passionately fond of trees, and never had too many. As Mr. Matheson turned out such a wonderfully successful planter the number of trees increased until the present immense collection has been planted.

Right among the trees, on the public highway, and in one of the prettiest spots on the estate, stands the cozy, comfortable cottage occupied by Mr. Matheson. And what a pretty cottage it is, embowered in vines and plants! Mr. Matheson, as our readers will glean, presents the appearance of the ideal gardener, just the one we would wish to accompany around the estate, feeling assured of his practical knowledge in every detail of gardening from A to Z.

JOSEPH MEEHAN.

THE FLORISTS' EXCHANGE

A Weekly Medium of Interchange for Florists, Nurserymen, Seedsmen and the Trade in general

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter

Published EVERY SATURDAY by

A. T. DE LA MARE PTG. AND PUB. CO. LTD.
2, 4, 6 and 8 Duane St. New York.
P. O. Box 1697. Telephone 3765 John.

REGISTERED CABLE ADDRESS:
Florex, New York.

YEARLY SUBSCRIPTIONS.

To United States, Canada and Mexico, $1.00. To foreign countries in postal union, $2.00. Payable in advance. Remit by Express Money Order, draft on New York, Post Office Money Order or Registered Letter. The date on the address label indicates when subscription expires.

BINDERS.

The publishers can supply binders which will hold the papers for one complete volume, keeping them in perfect order for ready reference. Price, postpaid, $1.00.

ADVERTISING RATES.

Per inch, $1.25. Special positions extra. Send for Rate Card, showing discounts on continuous advertising.

For rates on Wants, etc., see column for classified advertisements.

Copy must reach this office not later than Thursday to secure insertion in issue of following Saturday.

Orders from unknown parties must be accompanied with cash or satisfactory references.

ILLUSTRATIONS.

Electrotypes of the illustrations used in this paper can usually be supplied by the publishers. Prices on application.

BOOKS.

The publishers of The Florists' Exchange are headquarters for all standard books pertaining to the Florist, Nursery and Seed Interests. Send 2c. stamp for complete descriptive catalogue.

CORRESPONDENTS.

The following staff of writers are regular contributors to the columns of The Florists' Exchange.

Any item of news, subscriptions, or advertisements handed to our representatives will at once be forwarded to this office, and receive full attention.

Employer and Employee.

The discussion of the relations that should exist between employer and employee are at all times topics of absorbing interest, and just now seem to be getting more than their ordinary share of attention, both at home and abroad. Some views on the subject, as these have appeared in recent literature both in the United States and England, are considered timely, having in mind the strikes among greenhouse operatives and nursery employees in this country last year and the effort obtaining in the Dominion of Canada to establish a union for the purpose of regulating hours of labor, wages and other matters.

In a recent issue of The Gardening World, of London, F. W. Burbidge makes the following sensible statements:

> "All things considered, I am not so sure that the isolated and unorganized condition of gardeners is not in many ways an advantage to them. As a gardener myself, I should shudder to think of gardeners belonging to an organization, or craft union, the paid and, to some extent, irresponsible secretary of which should decree a general strike on any named date. To gardeners themselves I leave the picturing in their mind's eye of the result! No; a strike is bad enough when men engaged in working up dead materials and machinery take part in it. Even then a strike is like a battle or a lawsuit; to win it is nearly as bad as to lose. But one cannot imagine men who are growing or managing beautiful, living things—be it animals or plants—leaving them in a body to their fate, or, at best, to the hands of people who do not understand them. And yet I believe in all good gardeners being organized for their mutual good, which will also prove to be for the good of their employers. We may co-operate, but how best to do so must be left for a future paper. Without co-operation, organization and co-relation the world's business would come to a standstill, and the energy and work of centuries would end in chaos and be lost."

At the banquet tendered to its officers and employees by the Central Michigan Nursery last month, F. W. Remington, one of those who responded to a toast, remarked in part as under:

> "Employer and employee form the two important parts of every successful business enterprise. The employer sitting in his comfortable office in his leather cushioned chair dictating a half dozen letters at once to his stenographer and drawing a salary greater than any of his workmen is often regarded with envy and jealousy by his employees. The head of a large business enterprise certainly carries great responsibilities, and if successful has great opportunities at his command. It must be confessed that sometimes his position is envied by those in less conspicuous places. But there is an under or inner side, if you please, to his position. Great burdens and perplexities often rest upon him. In many cases he is managing the property not alone of himself, but of many others who have placed confidence in him which confidence his sense of manhood and honor compel him not to disappoint if possible.
>
> "The duties of an employer to his employees are numerous. I can only mention two of them: First, to pay good wages and these promptly and often. The employee, as a rule, has no capital and little credit. Hence, frequent payment of wages is very desirable. Second, a kindly consideration. While the primary object of employing men is for the purpose of making good dividends for the individual firm, or corporation, yet the higher law demands that the employer should not regard his employees as so many figure heads or hands, but as men with hearts and souls and brains, men of like passions, feelings and sentiments. Men who have others in many cases depending upon them who are as dear to them as the employer's loved ones are to him.
>
> "That there is often such kindness manifested by American employers to American employees may be the reason why America is leading the nations of the world in commercial enterprises.
>
> "The employee also has his duties and responsibilities and upon his faithfulness and loyalty much of the success of this or any other enterprise depends. Most men must work for others. It is stated that more than 90 per cent of men sooner or later fail in business. Hence it is that those successful often secure great rewards.
>
> "The relation of employee to employer is one of trust and confidence; of trust as regards his employee's honesty and fidelity; of confidence as regards his ability. An employee should make his employer's interests his own. He is employed by his employer and represents him in all his business relations with the world. The employee should deal honestly with his employer, making an exact and honest account of all monies that pass through his hands belonging to his employer, not only this but all goods, chattels, merchandise or property of any nature belonging to his employer should be so used as to preserve them from waste or destruction and to make them yield the largest returns to his employer. All of the business secrets or knowledge of the business of his employer which may come to him either directly or indirectly from his employer should be regarded by him as a sacred trust. The employee should also remember that while he may do the larger share of the work, the great burden of caring for the enterprise is borne by his employer, neither is it possible or wise for him to know all the "ins and outs" of the business enterprise.
>
> "There should not and need not be any conflict between capital and labor since both are necessary for the public good, and the one depends upon the co-operation of the other. While the employer represents the brains that plan, the employee may represent the hands that execute.
>
> "Whoever tries to sow discord between employer and employee is an enemy of social order. Whoever tries to improve the friendly relations between employer and employee is a benefactor to the community. Strikes and lock-outs are generally ill-advised and very expensive."

There is presented in the foregoing extracts much food for thought, both by those who employ and those who serve. A little kindly consideration on the part of each will be mutually advantageous. As Mr. Burbidge wisely remarks in another part of his communication: "Half the disputes—I might almost say the lion's share, which has been estimated at a half and two-quarters—between gardeners and their employers are due to misapprehensions or misunderstandings that a smattering of logic would clear away. There is one simple rule that all gardeners may follow with advantage to themselves, and that is, whenever they feel aggrieved they should turn the case round and imagine that they are the master and the master is the gardener! Then let them honestly ask themselves what they, as masters, would do in such a case."

The Carnation League.

This organization is receiving the endorsement of the lay press generally. Particularly enthusiastic on the subject are some of the papers of Buffalo, in which city the late President McKinley met his untimely death at the hands of the assassin. The superintendent of the Department of Public Instruction in that city requested the teachers in the public schools to take up the matter, and urged the wearing of a carnation on January 29. The Enquirer comments as follows:

> "The plan of the movement is a simple, inexpensive and attractive one, and can be taken part in by the old and the young of either sex. A beautiful fragrant flower worn in the lapel of the coat, or at the throat, or in the hair, in silent memory of a past public servant, whose life was forfeited because he was our servant, is what is contemplated by this movement. The fact that the carnation was President McKinley's favorite flower and was always found in his buttonhole, is the reason for its choice as a league symbol. No idea was had of making it the national flower, neither was it arbitrarily taken as a symbol. The President himself made the selection and the league will merely continue its use for the purpose set forth. On all other days of the year it will be what it is to-day, the common people's flower of all the highly cultivated varieties, but on January 29 of each year it becomes, especially, the President's flower and will be worn in silent tribute to his memory.
>
> "If the matter were to go on farther than it already has, there will be hundreds of thousands of people who will wear and display the carnation upon the designated day, so long as they live."

Another daily paper thus rhapsodizes on the divine flower:

> "Simple carnation, growing close to the soil from which all races spring and on which all the works they build must rest, close to the earth from which all things rise, typical of the wealth that comes only of planting and preserving, striving and holding, and of the glory that is created from the great, plain masses of the people, as the common dust has wrought its marvels; modest carnation, proclaiming virtues only by their actual, living presence; sweet carnation, gathering from the storehouse of Nature the honey of the air and guiding human aspirations with the incense of the stars; radiant carnation, seizing gladdest color of the fickle sunshine and holding it to cheer the clouded day as treasured hopes and joys illumine the darkest night; placed on our breasts by a departed martyr to national duty, whose love you shared with the whole people and the entire republic, we hail you as the national flower—a flower symbolical of patriotism, and gratitude for those who serve us!

New York Florists' Club Dinner.

The sixteenth annual dinner of the New York Florists' Club was held in the St. Denis Hotel on Saturday night last, and the event went off smoothly and enjoyably, from the oysters to the cigars. The dinner itself was all that could be desired and was much enjoyed. Fifty-one plates were set, and all branches of the craft were represented. The tables were gracefully adorned with choice flowers that had been donated by various growers. Lager & Hurrell, Summit, N. J., sent a beautiful bunch of Lælia autumnalis; W. H. Siebrecht, Astoria, N. Y., tulips and jonquils; John N. May, Summit, N. J., a bunch of white carnations; Robert Craig & Sons, Philadelphia, donated a bunch of Adonis carnations; C. W. Ward sent two vases of Mrs. Theodore Roosevelt carnations, and Anton Zvolanek, clusters of sweet peas of a superior quality.

The entertainment was furnished by T. Baker, a prominent topical vocal artist, and W. C. Kelly, humorist, assisted by an orchestra of three pieces, piano, violin and flute. The vocal music and the story-telling were highly appreciated, and the committee on management received many compliments for providing an entertainment that furnished such an abundance of "fun without vulgarity."

President Troy acted as toastmaster. He congratulated the club on the grand showing made at the sixteenth annual or anniversary dinner, and introduced John H. Taylor, of Bay Side, N. Y., who responded to the toast "Our Night." Mr. Taylor referred to the early days of the club's history, mentioning several of the gentlemen who had been active in its work in the past. He was glad to see the younger element trying to maintain the status which the club has reached through the efforts of its members in former days. Later in the evening Mr. Taylor deprecated the poor showing made by the rose growers in the vicinity of New York at the recent exhibition at Madison Square Garden. He was the only grower who exhibited Bridesmaid. He spoke reminiscently of his beginning in the business, adding that he first began selling roses about the year 1864.

John G. Esler, of Saddle River, N. J., responded to the toast "Our Sister Societies," having particular reference to the Society of American Florists. Mr. Esler touched more on the future of the S. A. F. He stated that if the florists of the country had an eye to patriotism they would go to Milwaukee next August ten thousand strong. There was no reason why the Society of American Florists should not keep abreast of the industry, so far as the numerical strength of the association's membership was concerned. If the secretary of the Society of American Florists could go to the Ways and Means Committee at Washington, representing a body ten thousand strong, it would show the committee that the florist's was an industry the interests of which must be considered. He touched on the value of the medals of the Society of American Florists. There was no need of any alarm about closer relations; the auxiliary societies have grown up to that stage where they can stand alone. It should be more a question of co-operation. Every club and florists' society should co-operate with the Society of American Florists. He advised all to be loyal to the club in which their greatest interest was centered, but above all to be loyal to the S. A. F.

Alexander Wallace, of the Florists' Exchange, responded for the horticultural press. He referred to the power exerted by the press in connection with the industry which it represented. The press was trying to keep pace with the development of the trade. He spoke of the willingness of all the trade papers to help the florist to a better knowledge of his business; also to assist him in obtaining redress for wrongs that were heaped upon him. He closed his remarks with the statement that the florists would at all times find in the horticultural press a willing listener to grievances of all kinds that may materialize. A few stories were introduced by the speaker, having reference to particular phases of the industry.

Treasurer Weathered was introduced by the toastmaster as "a man who was known not only in the United States and Canada, but all over Europe." The treasurer was particularly eloquent and strong in his denunciation of the antipathy shown by the public of New York ı the endeavor of the Florists' Club to rovide them with magnificent flower hows. A very pleasant event connectd with the treasurer's speech was the resentation to Ex-President Sheridan f a gold scarf pin, containing a ruby et in diamonds, as a slight token of ppreciation of the members of the 'lorists' Club for the hard and earest work of Mr. Sheridan, both as a residing officer and in connection with ower shows and other matters taken p by the club.

Mr. Sheridan feelingly replied and isclaimed having done other than his uty. Much of the good accomplished, e stated, was due to the aid given him y the other officers of the Florists' 'lub, as well as by the exhibition comnittee of which Mr. O'Mara was chairnan.

J. Austin Shaw read his annual poem." It took the form this year of parody on "The Raven" of Edgar llan Poe, and his customary dream afted him heavenward where, amidst elestial glory, he pictured the scenes uched upon in his verses.

During the evening songs were renered by Messrs. Schultheis, Butterld and Wallace.

The dinner was voted a grand sucess, reflecting great credit on the comnittee, Messrs. Weathered, Hafner, 'raendly, Sheridan and Butterfield.

eterioration of New Carnations.

The various communications appearng in our columns setting forth the act that certain varieties of carnaions have developed specific defects ufficient to preclude the disseminaion of such varieties, is a hopeful sign f the times. It shows a disposition on he part of introducers to carry out he well-worn advice of Polonius: "To hine own self be true, and it must folow as does the night the day, thou anst not then be false to any man." n making these announcements, the rower is not only safeguarding his wn reputation, but performing a duty those to whom he caters. It is ifficult to give a man praise for that hich duty compels him to perform, ut one cannot help commending the ction in question, just a little.

The practice is by no means a new ne; it has been in vogue among honst plant growers and distributers in eneral from time immemorial, and mong carnation growers in particular ver since the divine flower became an mportant factor in the commerce of orticulture. We know of one firm at east that has cultivated carnation eedlings for the past eight or ten ears, yet not one of the varieties obained has been introduced into comnerce, because at some period of their arly existence they developed defects ebarring them from dissemination. The information concerning such sorts as never made public by the concern tself, it was not necessary to do so, ecause care had been exercised to see o it that the real worth of the varities had been determined before pubicity should be given of their existnce.

This leads to the thought of the useulness of certificates and other honrs awarded to seedling carnations as guide to their subsequent value for eneral cultivation. There is no quesion that awards of this nature influnce the sale of such varieties placed n the market, but this is one of the nevitable accompaniments of plant inroduction for which the introducer is ot wholly to blame. It should be orne in mind that the variety winning n award has been brought to the necssary state of perfection demanded by he society giving such award; that pon the future conduct of that variety he honors obtained can have no posible bearing. Some carnations mainain the degree of perfection and even ttain a greater degree after disseminaion and certification; others go back, s has been seen, even in the hands of hose by whom they were originated. Yet we must have some incentive to he obtaining of new varieties, and hose growers will be their own best riends, as well as the friends of the rade in general, who satisfy themelves of the actual value of a carnaion seedling by several years' test, revious to even placing the variety before an organization for certification or other recognition; and if, perchance, an error of judgment on the grower's part enters into the matter, rectify it at the earliest possible moment by public announcement, so that a brother florist may not be allowed to suffer financial loss. The purchaser of a new carnation should never be permitted to discover weak points in it which prior careful observation and honesty of purpose would reveal to the party responsible for its introduction.

Reflections on Current Topics.

MR. EDITOR: Again, that alleged "S. A. F. Peony Association." What a wealth of wisdom and Baconian philosophy are reflected in the written words of the secretary of that fatuous body. The occultism of the reasoning exemplified in transforming a committee into an "association" is a gem. Summarized, it looks to me like this: The narrow part, or neck, is a committee; the wide part, or trunk, is an "association." Does this so-called "association" actually know what it is? If properly organized, why those changes in the manner of its operation? At first it claimed to be the whole thing, with the S. A. F. a mere nonentity, membership in which was flung in as a "sop" as you rightly termed it, to further the alleged peony "association's" prospects. Now, the "association" is the nonentity; and I guess that designation just about fits it. The wonderful necromancy of the secretary of the alleged "association" reminds me of a little experience I once had. A friend and myself were standing talking at a street corner one evening when an official of the law with more bumptiousness than good manners, ejaculated in his choicest Hibernian: "Moove an, ye crowd." On being advised there were only two of us. that his eyesight might be defective, he immediately retorted: "G'wan, Oi saay; wan's a crowd if Oi saay so." One can never account for the optical delusions that materialize before those unfortunate individuals, who "dressed in a little brief authority," suffer thereby from an enlargement under the hat, and "cut such fantastic tricks before high Heaven as would make the angels weep."

There appears in last week's Florists' Review a statement that interests me. Speaking of the secretary's "explanation," the Review says "there would be no serious objection to the turn given the matter were it not an evident effort to head off the gentlemen who had already begun the formation of a national peony society." Here then, thought I, is the milk in the cocoanut—the reason for haste in the report of the so-called "association" appearing a year before it was wanted. But what causes reflection is, why are the names of the other members of the committee withheld from publication? Who were present at the committee's meeting of organization, and why is such an irregular report of the proceedings of that meeting permitted to appear in the official records of the S. A. F.?

It appears to me as if it were "up to the president and secretary of the S. A. F." to put themselves right on this subject. The president is charged with granting the peony committee he appointed "power to add to its numbers." Under what ruling of the society was he invested with that authority? I can scarcely credit that the president would be a party to any action instituted to "head off" any effort to form a national peony or other society. He has more good sense than to create antagonism to the body that has twice honored him with the position he holds. Nor would he be made the "tool" of misguided individuals, guilty of such a short-sighted policy. Probably he will give an explanation that "explains" something; at least, I, for one, think he should.

All of us desire to see the S. A. F. respected and looked up to as a body acting at all times on the square for the benefit of all constituting its membership. Heretofore, it has wisely avoided complications tending to belittle or beget the belief that petty meanness formed any part of the make-up of those in charge of its affairs. The rectification of peony nomenclature, the avowed object leading to the formation of "the committee of nine," is too puny a matter about which to hazard the fair name of the S. A. F. or to throw suspicion of intrigue on its officers. Men who condescend to "peanut politics" in order to gain their end, using the S. A. F. as a convenient instrument in the furtherance of their designs, whether that end be a justifiable one or otherwise, are no friends of the society nor of the trade it represents. It is a mistake to trust any part of the society's work in such hands. That, Mr. Editor, is the candid opinion of

CARNATIONS

Cutting and Packing.

Where there is a large local trade and the entire cut is used in filling retail orders, the handling of the blooms is comparatively easy; but it becomes a difficult problem when the grower must ship his cut to a distant market. I wish to confine the following remarks to the latter case, and I shall endeavor to give you our method of handling the flowers.

We may not be entirely up-to-date in this, but we have, at least, very fair success with our shipments and few complaints of wilted or damaged blooms. First, let us take the condition of the flower as it leaves the plant; and if it is at the right stage of development we should be able to handle it and keep it without its being injured. I do not like a bloom to be fully developed, although many favor its being so, with the general run of varieties. With the flower a little short of perfect development, we get better results, when it must be shipped. Then, too, in the case of Mrs. Thomas W. Lawson, for instance, we get a better color. This is not true always in the case of white varieties, as they usually have a yellowish shade which they lose with development; but it is the general rule to cut before our blooms get fully developed.

In the Fall of the year and during the Winter the latter part of the afternoon is the best time for cutting, but as the sunny days of Spring come along the flowers should be in the cooler before the sun has had a chance to take the stiffening from them. Morning cutting in the Spring saves a great deal of shading, and keeps the color of the blooms nearer the standard.

There is no secret about cutting carnation flowers, but there are a few points which are very noticeable. In the first place, a bloom that is broken will not, in nine cases out of ten, keep as long as one that is cut. The old method of tearing off the flowers is a thing of the past, and with it has gone the old story of sleepy carnations.

There are two things to be considered when cutting: the first is "the bloom" and the second is "the plant." Or, perhaps, I should give the plant more prominence, for in the Fall and early Winter it is of far greater importance. We make it a rule to take for stem no more than is necessary during the first of the year. For a saleable flower a good length of stem is a necessity, but that does not mean you must rob the plant of the young growth to furnish this. Then, too, the varieties differ, and I quote a few examples to show this. Mrs. Lawson at first came so that it was necessary to cut below the cuttings, and it has broken from eyes then dormant, or practically so. At this present writing, however, we get plenty of stem without depriving the plant of this growth, which is in reality flowering wood. Genevieve Lord we are cutting very long in order that the flowering shoots already running up may have a chance as the plants need thinning out. Governor Wolcott and Norway give plenty of stem without going below the cuttings, while General Maceo and Governor Roosevelt must be severed below these cuttings or, at least, below part of them. It is especially noticeable in the case of Mrs. Lawson that the break from the lower eyes, while requiring a little more time, is much stronger and, as a rule, produces a better bloom. Then, again, if care is taken the flower can be cut just above a cutting as easily as below it, or directly through it, as is often the case.

In speaking of leaving this young growth, or cuttings, I want to make a distinction between the soft upper cuttings and the hard lower ones, for these soft cuttings are valueless, and are not considered in this case.

Considering, then, that the bloom has been cut with a proper length of stem and that the plant has been left in some sort of shape, let us discuss the flower entirely. The first work is grading, and this also depends on the market. A carnation has ceased to be a carnation in one sense of the word; now the varieties are sold under their varietal names; and, to-day, we see them sold instead of simply fancies as Mrs. Lawson, G. H. Crane, etc. This is no doubt a step forward and yet the title alone is not enough, for a named variety on the market is usually a fancy and yet it must be up to the standard or the name means nothing. A second-rate flower will bring no more money because it happens to be a Mrs. Lawson than if it were a Wm. Scott of equal quality, and carnations should be sorted with this in mind. Keep up the standard of the varieties, even if all of your blooms cannot come up to it.

PHŒNIX CANARIENSIS, GROWING IN THE OPEN GROUND AT SANTA BARBARA, CAL.

The sorting should be done in a room the temperature of which is not over the temperature from which the flowers were taken. That is the safe side, and a carnation needs at least twelve hours in water before shipment. We try to keep them in a room which is from 10 to 15 degrees cooler than the temperature at which they were grown. This brings the temperature down to from 40 to 45 degrees, and with the stems in a good depth of fresh water and with plenty of air, the flowers should be in excellent shape for shipment.

Air is, without doubt, the most important thing in connection with carnations. Give them plenty of fresh air in the houses while they are growing and they will be healthy. Blooms from healthy, vigorous plants keep the best. But they must also have plenty of air after they are cut; and a close ice-box is death to the keeping qualities of any carnation. They despise an ice-box on principle, and a room cooled with the outside air, and plenty of it, is the only fit place for them. If more retailers realized this, they would find it money in their pockets, and if more wholesalers would provide these conditions there would be less fault found with their returns.

I believe that florists generally are realizing the importance of fresh air for cut flowers, and the fewer complaints of keeping qualities is a testimonial to the truth of this.

Packing carnation flowers is merely a matter of carefulness, and there is very little to be said on the subject. We use light, flat boxes and pack fancy blooms singly, putting strips across the stems to hold them in place. With ordinary varieties, which are bunched, twenty-five in a bunch, for convenience, the bunches are packed as single blooms, and the strip used to fasten the ends of the bunches. If securely fastened and not crowded, and thus smashed out of shape, the flowers should carry well and be received in good condition.

Mixed Stock.

On general principles I object to mixed stock, and yet in buying stock one often gets a mixture. In many cases this is accidental, and the many standard dealers in carnation stock are very careful not to send it out. I have a mixture this year, however, of one plant in a batch of Governor Wolcott, and I am taking this opportunity to bring the name of the guilty party before the public. Peter Fisher, of Ellis, Mass., is the man; but he has been kind enough to identify the beautiful variety for me and it is now labeled Mrs. M. A. Patten instead of Governor Wolcott sport. In habit it is very similar to Governor Wolcott, and the flower is all that could be desired, with a stem to match. Before I made certain that it was this seedling of Mr. Fisher's, I had the idea that I had a valuable sport, but I now congratulate myself that I have an increasing stock of a variety which will be heard of in 1904, and one which will, unless I am mistaken, replace the doubtful Mrs. George M. Bradt in popular favor. I take this opportunity of thanking Mr. Fisher for his consideration in giving me the variety ahead of my contemporaries, and I wish to assure him that I shall not make any attempt to profit by his error from the standpoint of the stock market, but shall grow all I can propagate merely because I believe it to be the best variegated carnation I have seen.

W. R. PIERSON.

AMERICAN CARNATION SOCIETY.

Railroad Rates to Brooklyn Convention.

The Central Passenger Association, the Trunk Line and the New England, all will allow the rate of fare and one-third on the certificate plan for the meeting of the American Carnation Society in Brooklyn, N. Y., February 19 and 20.

This includes the southern half of Michigan, all but a small part of the northern part of Illinois, the whole of the States Indiana, Ohio, Pennsylvania, New York, Maryland, Maine, New Hampshire, Massachusetts, Rhode Island and Connecticut; also the northern half of West Virginia and Virginia, and that portion of Canada south of Toronto.

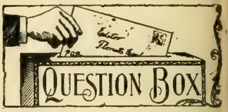
This plan lessens the expense of attendance considerably, and it is earnestly requested that all members in these localities buy their tickets on the certificate plan. Parties who intend becoming members at the meeting can buy these tickets, but if they do not join at the meeting they will not be able to get the return rate.

ALBERT M. HERR, Secretary.

Phoenix Canariensis at Santa Barbara, Cal.

The accompanying illustration shows a field of Phoenix canariensis in the grounds of the Southern California Acclimatizing Association at Santa Barbara, Cal. These were planted in the Summer of 1899, with only two seed leaves, and some of them have attained over eight feet at the present writing. No water was given to them after the first Summer, thus insuring a vigorous and sturdy natural growth.

The possibilities of Southern California also in this line are already attracting the attention of leading firms in the East who were used to purchase large-sized palms from Europe at very high prices.



Ficus Leaves Turning Yellow.

(23) The ficus leaves are turning yellow with old age and have, no doubt, been helped to that condition earlier than they would otherwise have been by the plant being watered too much since growing for the season ceased. If the discolored leaves are removed, and the plant kept somewhat dry until growth starts again, no serious injury to the plant will result.

Lilies for Easter.

(24) How can I hustle Lilium longiflorum multiflorum, size 5 x 7, into bloom for Easter? The bulbs were planted on November 27, and have made a growth of only three inches. I am running the house at a temperature of 60 degrees at night, and 70 to 75 degrees in the daytime. Would it be advisable to use sheep manure?

L. J. G.

—The lilies will need to be kept growing rapidly from now until the buds show, and the temperature should be raised from five to eight degrees at night. That is the only method to employ. The manure would not help towards forcing.

Freesias for Easter.

(25) I have some Freesia refracta alba which I desire to bring into flower for Easter. The bulbs were planted in flats on December 23, and the plantlets are now about half an inch in height. How should I treat them?

SUBSCRIBER.

—The freesias should bloom for Easter if kept growing in a warm house, with, say, a night temperature of 58 degrees, and a rise of ten degrees in the daytime.

Violets.

(26) We have an old greenhouse, one of the side benches of which we thought would suit double violets. We planted them about October 1 out of three-inch pots. The plants have been in bud a long time, but the blossoms do not seem to mature. The temperature nights runs from 50 to 40 degrees, the latter only in very cold zero weather. The greenhouse is an ideal one for callas, azaleas, cinerarias, ericas, primulas, freesias, and at the cool end for stocks, snapdragons, cool country ferns, etc.; but, alas, for the violets. The leaves curl up and some of the lower ones decay and perish. What is the trouble; and will the plants flower by-and-by?

CANADIAN.

—Violets cannot be grown successfully in a house when among other plants. The syringing and watering of the general stock has no doubt created an uncongenial atmosphere in the present instance, and the violets have, of course, been at a disadvantage. The plants will no doubt commence to develop their buds as the Spring aproaches, but to grow violets at all satisfactorily it is necessary to have them in a house by themselves.

Fir Tree Oil.

(27) Please tell me how to mix Fir Tree Oil with water, and in what proportions for spraying tender plants. I have the oil, but do not know how to combine it with water.

M. G.

—Fir tree oil is best when mixed with warm water. Allow the mixture to stand an hour or two and skim off the "cream" that forms. For Aphis, use half a pint of the oil to five gallons of water; for Mealy Bug and scale, use half a pint of oil to one gallon of water.

Asparagus Sprengeri.

(28) I send you under separate cover some Asparagus Sprengeri. The outside is green, but the seed is hard and black. Is not this ripe enough to pick? It would save lots of work if the whole crop could be gathered now. CAL.

—All the seeds of the asparagus were ripe enough, and may be picked at any time.

Manure.

(29) I want to get a good soil for potting and bedding palms, sword ferns, ornamental asparagus, etc., and can get the following materials at prices given:

	Per yard.
Street sweepings, as per sample..	$0 75
Cow manure, semi-green..........	1 25
Barnyard manure, green..........	40
Ordinary soil........................	75
Sand	75
Leaf mould..........................	2 50

Pleast tell me what combination would be best, taking price into consideration. Are these prices above or below the average?

Is leaf mould in general use yet, or has a substitute been found at less cost?

Could fresh sawdust be used to any advantage in making porous soil for ferns, etc.? CAL.

—The prices of the compost materials are, we think, very reasonable. We would cut out the leaf mould, the sand and the barnyard manure, and would compost the remainder in the following proportions: Soil, four yards; cow manure, one yard; street sweepings, one yard. Sawdust is no good for mixing in any soil.

Forcing Dielytra and Amygdalus for Easter.

(30) H. L. A.—The dielytra, or dicentra plants are, we suppose, already potted, and under a bench in a cool house. To have them in time for Easter, they will need to be put in the full light the last week of this month, and, with a night temperature of about 58 degrees, should flower all right for Easter.

The amygdalus needs but a similar treatment as is given to prunus and deutzias. Put them in the greenhouse the first of March, or, to be on the safe side, a few days earlier; maintain a temperature ranging from 55 degrees at night to 65 degrees in the daytime, giving full light and all the air possible.

Cuttings of Gardenia.

(31) Please inform me when is the best time to make cuttings of gardenia, what kind of wood must I use, and what temperature must I keep them day time and night? F. B.

—To propagate gardenias use the ripened wood, and put the cuttings in sand with a bottom heat of 75 or 80 degrees. They may be put in at any time during January and February, and if that part of the sand bench is enclosed with a portable frame, so much the better. Keep rather close until they are rooted, then give plenty of air. Pot when necessary, and grow in a house where the temperature is 65 or 70 degrees at night and 75 to 80 degrees during the day.

MRS. THOS. GOULD, PETUNIA SPECIALIST, VENTURA, CAL.

Photo Surrounded by Her Favorite Blossoms.

GLIMPSE OF VENTURA-BY-THE-SEA, CAL.

BRIEFS FOR BUSY FLORISTS.

DAHLIAS.—If one has a few roots of some choice kind and desires to increase the stock as much as possible before time to plant outdoors, the roots should be started into growth about this time. All that is necessary is to lay the tubers on the bench, where there is an inch or two of soil or sand (without separating the tubers at all), then spread a little light soil over them, and keep them moist. There they will soon send out shoots that should be made into cuttings, and rooted in the usual manner, potting them along as required until the time to plant outside arrives. By this means a goodly stock can be raised from a very small number of tubers.

GRAFTING ROSES.—As the present month is the time when this operation is usually performed, a few words on the subject here will not be out of place. The stocks should be potted up several weeks previous, and remain in a temperature of about 40 degrees. What would make a good cutting is about right to use as the cion, and the side grafting method is as good as the best. Make a clean slanting cut through the cion, running about three-quarters of an inch, and a similar cut through the stock, as near to the soil as possible, cutting upwards from the base. Put the cut pieces together and bind firmly, but not too tight. The grafts should then be placed in a closed frame that has been prepared on one of the benches; and a temperature ranging about 80 degrees should be maintained. The bottom of the frame should have a good thickness of sand laid over it, and this being thoroughly saturated when the newly grafted plants are put in, will supply moisture enough to make it unnecessary to open the frame for the first two or three days, as air playing on the plants is to be avoided at this time. Should any of the plants get dry, however, these must be watered, but not a drop should reach the grafted part of the plants. When the two parts become united, which is easily told by observation, commence to give a little air; an hour or two daily will be long enough at first; increasing gradually, so that in about two weeks they are fully exposed to the temperature of the house in which the frame is located. The tying material should be taken off when the union is perfected, and after the hardening off process is finished, they need only the same treatment as is given rooted cuttings.

Petunias in California.

We inclose a few photos (herewith reproduced) which may give your readers some idea of two of our new strains of petunias, viz., the new "Century Prize" and our "Snowball," double. The blossoms, of course, are all of reduced size. The spray of three flowers is an absolutely pure white, with an intense yellow throat, one of the most perfect petunia flowers ever seen or conceived. The others are in varying shades of crimson pink, blue and white. The "Snowball" double is accurately described by the name.

I think you will find this little glimpse of a portion of our town interesting. MRS. THOS. GOULD.

NEW CENTURY PRIZE PETUNIAS, WHITE, WITH YELLOW THROAT.

Originated by Mrs. Thos. Gould, Ventura, Cal.

Review of the Market

NEW YORK.—There is a general langor about the cut flower business that seems almost unaccountable for this season of the year. Whether it is that flower buyers are economizing on account of the higher prices of the necessaries of life, or that the spirit of entertaining is dormant among the wealthy classes, we cannot say, but there does seem to be a dearth of events at which cut flowers are used at all lavishly, consequently the wholesale business is not what we would expect, considering the cost of producing flowers at the present time.

Bride and Bridesmaid roses have dropped a few points this week and, in fact, the white variety is quite difficult to dispose of and will average a much lower figure than the pink one. American Beauty, not being so plentiful, have remained fairly stiff all through the week, with no change in values.

Violets have settled down to ordinary figures, and 60c. per 100 for specials is a common price, very few reaching the 75c. mark. Ordinary grades accumulate heavily at times, and job lots are unloaded occasionally at extremely low figures.

There is a plentiful supply of cattleyas, with a general weakening in values. Good-sized flowers can be had at 60c. each. Of Dendrobium formosum there is also a regular supply, selling at 25c. each. In bulbous flowers the supply is more than ample for the demand, and some cutting has to be done in certain lines. Narcissus Paper White are selling at $2.00; N. Poeticus, $2.00; N. Von Sion, $3.00; N. Campernelle, $1.00; N. Golden Spur, $4.00; N. Trumpet Major, $2.00 and $3.00; N. Princeps, $3.00 to $4.00 per 100. Roman hyacinths bring from $1.50 to $2.00, according to the quantity sold. Tulips, single white and yellow, are bringing $2.00 and $2.50, according to quality, some fine varieties reaching as high as 60c. per dozen.

Among the lilies now coming in are some showing unmistakable signs of disease, and for these the prices realized are beneath the regular quoted rates.

There is not much change in carnation values among the ordinary grades, but there is some weakening in the fancy lines. The supply is adequate for all demands, but if the thieves who are at work among the Long Island growers are not captured soon, we may look for a shortage in the supply for this market.

There are plenty of sweet peas, lilac and freesias on hand, for which there is a fairly good demand. Lily of the valley is selling quite slowly and low figures are the rule.

BOSTON. During the latter part of last week business held up fairly well, but this week it has fallen flat again, owing, no doubt to the dull, disagreeable weather of Monday and Wednesday. The market is in about the same condition as last reported, with white carnations and white roses of the small to medium grades scarce and in very good demand.

American Beauty are very much as stated last week, and prices range about the same. Bride are selling very well, especially the medium grades and the smaller ones, and many more might be disposed of at prices ranging from $5.00 to $12.50 per 100. The better grades make from $16.00 to $25.00 per 100, but such do not move so rapidly, though cleaning out daily. Bridesmaid are a little more plentiful and do not sell quite so readily as the white roses. Good red roses are in demand at figures that would ordinarily be considered exorbitant. Special Liberty have reached $6.00 per dozen and are in limited supply, though $4.00 rules the sale for many very good ones. The best of the Meteor have reached $3.00 per dozen, with smaller grades down to $10.00 per 100.

Carnations during the latter part of last week were very scarce and eagerly sought for; and though not much more plentiful this week, the flowers are not in quite such demand. Prices range from $2.50 to $4.00 for the ordinary sorts with fancy stock of these kinds at $5.00 and novelties up to $8.00 per 100. Good white carnations make $3.00 and $4.00 easily, and extra stock $5.00 and $6.00.

Bulbous stock is now in good variety and, as a rule, cleans up pretty well. Jonquils and Von Sion narcissus are not very plentiful, clearing out daily at $3.00 to $4.00 per 100. Golden Spur has reached as high as $6.00 per 100. Tulips are improving rapidly and do well at $3.00 to $4.00 per 100. Roman hyacinths make $1.50 and $2.00, and Paper White narcissus, $2.00 to $3.00 per 100. Lily of the valley is druggy. Lilies are in good supply, and meet with a very fair demand; prices range from $8.00 to $12.50 per 100. Violets have now become very druggy and prices are only maintained with difficulty. The ordinary grade of violets makes 50c. to 60c. per 100 with extras at 75c.

Mignonette is only fairly good and not very plentiful, and prices hold up well. Smilax sells very well at $18.00 and $20.00 per 100, and all greens are only in fair supply.

Pans of bulbous stock, Roman and Dutch hyacinths, von Sion narcissus and tulips in variety are now coming in regularly, and sell very well at 60c. a pan, either singly or by the dozen. Azaleas, too, are plentiful now, selling at average prices. Genistas and lilacs in pots have appeared, and a few early rhododendrons are coming in. F. J. N.

INDIANAPOLIS. The past week has been one of the steadiest and best experienced by the trade this Winter. Funeral work, especially, is more abundant than for some time past. Stocks of all kinds have been scarce, and many orders have remained unfilled because of the scarcity. As is natural, the prices have advanced all along the line, but, as a general thing, the public is more willing to pay top notch figures. Plants have sold well, the demand being mostly for good azaleas, shrubs and bulbous stock in pots and pans.

Roses especially have been scarce. They are hardly up to the standard in quality. Bridesmaid and Bride have sold wholesale at 6c. to 10c. and 12c. Liberty at $3.00 per dozen, wholesale; $4.00 to $5.00, retail. Meteor are fair at 6c. and 8c., wholesale, $1.50 to $2.00, retail.

Carnations have sold well, and it has been somewhat easier to obtain them than roses, $2.00 to $4.00 wholesale, and 75c. to $1.00 retail, are the prevailing prices for carnations.

Happily there is an abundant violet crop at this time. Bunches of twenty-five, double, sell at 35c. to 50c.; single at 25c. for the same number. I. B.

ST. PAUL, MINN. The scarcity of good stock is daily becoming more apparent. Roses have not at any time been half a crop. Carnations are but little better, while American Beauty are really out of the question. Violets are also in the short list. Bulbous stock is being used in large quantities to take the place of other stock, so that there is little or nothing left to show customers after 3 p. m. each day. Coal indications have not improved; in fact, are worse than they have been and everybody—coal dealers included—is praying for release from Winter's icy fetters. Trade has been good, considering the scarcity of stock, and January sales were fully up to the average of former years.

Retail prices range as follows: Roses, $2.00 per dozen; carnations, 75c. to $1.50; tulips, paper whites, narcissus, Roman, hyacinths, freesias, daffodils and lily of the valley, 50c. to 75c. per dozen.

Shipping trade has been good, though there has been general complaint all along the line on account of excessive express charges. VERITAS.

PITTSBURG.—The cut flower trade is holding up well; always something doing. The only complaint one hears now is about scarcity of stock and rather high prices. Roses are still scarce and for good stock about $15.00 per hundred is demanded. At retail they sell from $3.00 to $5.00 per dozen. Very few American Beauty are to be had. Carnations are not any too plentiful yet; fair blooms bring from 75c. per dozen and better. Violets are in good demand. Von Sion, Trumpet Major and a few other sorts of narcissus sell pretty well, but are not abundant yet. Good tulips are also scarce.

Plant sales are somewhat slow at present, although the weather is rather favorable, the thermometer registering in the sixties for several days. L. I. Neff has a fine lot of single primulas in his store window. E. C. R.

BUFFALO. A general quietness now seems to pervade the stores, though what is doing seems to use all the stock now obtainable, which in general is still scarce, with prices a bit stiff, for this date. A decided spurt in the demand for carnations was the order on McKinley Day last week, everything obtainable being sold. Palmer claimed the disposal over the counter, at retail, of fully three thousand blooms. The prices to the consumer ranged from 10c. upward, each flower. Some would-be buyers demurred, somewhat naturally, and at lower prices no doubt the number of carnations called for on this day would be largely increased. Such a new applying method for the use of blooms would seem to open further possibilities that the craft may foster with interest. VIDI.

GRAND RAPIDS, MICH.—The dark weather is proving very detrimental to stock. Flowers come out slowly and are inclined to be soft, in spite of every effort to give all the air possible and the proper heat. Stock is very scarce, particularly carnations. Violets are plentiful. There is not much call for the single ones. Lady Hume Campbell sell fairly well, but the darker colored violets are preferred. Carnations bring 50c. to 75c. per dozen, although some poor flowers sell as low as 35c. Lily of the valley is plentiful. Paper White narcissus and Roman hyacinths realize 50c. to 75c., callas, $2.00; American Beauty roses, $2.00 to $6.00 per dozen; violets, light colors, 35c. per bunch of 25; dark, 25c. per dozen. G. F. C.

CHICAGO.—The condition of the market is about the same as last week, with same prices ruling as prevailed then. The supply of carnations is on the increase and as a consequence the market is a trifle easier than a week ago, although the values realized are the same, $1.50 to $4.00 per 100, with Prosperity and other fancy varieties bringing from $6.00 to $8.00 per 100.

Violets sell at from 60c. to $2.00 per 100. The supply of most all kinds of bulbous stock is increasing, especially of tulips. The price for the latter ranges from $2.00 to $5.00 per 100. R. J.

CINCINNATI, O.—There is plenty of business, but a scarcity of good stock. Prices remain the same as last week. Dark and dismal weather is the cause of all our trouble. Carnations are, on an average, better than roses. Violets are the only flowers that are equal to the market; they are coming in plentifully, and the price has dropped in consequence. They are selling now at $1.00 for the best, but 50c. is the ruling price. Prosperity carnations are bringing 8c., but are very scarce.

E. G. G.

CLEVELAND.—Trade is about the same as last reported, and as the heavy demand for funeral flowers is still in evidence, blooms of all kinds are eagerly sought for. Carnations seem to have the call, and all the wholesalers are sold out early. Prices remain about the same as quoted last week. Some very good long-stemmed tulips are coming in now, and this grade is bringing $4.00 per hundred. The supply of violets is steadily increasing, but as yet no overstock has taken place.

G. W. S.

DENVER.—Nearly every day has showed a clean-up in the stores the past week, and on two or three days it was particularly hard to get stock enough to fill orders. While trade has picked up handsomely, growers report plants off crop, especially roses. We had the pleasure to-day of taking a peep at Enchantress carnation, and that it is a grand variety is all we can say. The time can't come too quickly when we shall see the flowers on the counter. S.

DETROIT, MICH.—The prevailing scarcity of all flowers can only be attributed to the very long spell of dark days. The Government reports only two half bright days in January. Then again, an unusual call from outside cities has been experienced for funeral work. Anything goes, as well as any color. Bulbous flowers will relieve the situation somewhat, but there will not be enough of them until we get settled weather and more solar light.

DILGER.

SYRACUSE, N. Y.—The long continued dull weather has seriously affected the production of flowers. In December we had only two clear days and last month five. The numerous large functions and many funeral orders have compelled the florists to buy largely from out-of-town. Trade has been remarkably good all through, and the prospects are bright up to Lent, when society events will be fewer.

Park Superintendent Campbell has recovered sufficiently to be out on mild days.

Florist Morris, who was taken ill just before Christmas, has had a long seige of it, and is only now recovering. H. Y.

FIRMS WHO ARE BUILDING.

HEMPSTEAD, N. Y.—George Weston is building a greenhouse, 25 x 150 feet, for carnations.

LEXINGTON, KY.—Honaker, the florist, is increasing the capacity of his greenhouse.

BUCYRUS, O.—F. J. Norton has torn down his old houses and built five new ones, respectively, 84 x 12 feet, 84 x 23 feet, 84 x 18 feet, 140 x 12 feet, 140 x 18 feet, for roses, carnations and miscellaneous plants. Also, a boiler room, potting shed and coal cellar, although for the latter there is not much use, as he burns natural gas. Between the office and workroom is a cooling vault, 6 x 8 feet, made of hollow, glazed building blocks, with 2-inch stone corner. The Standard ventilating machine is used by Mr. Norton.

Denver.

At the meeting of the State Horticultural Society, held in the Chamber of Commerce on the 27th, 28th and 29th ultimo, a paper was prepared and read by Adam Kohankie, of the City Park Greenhouses, on the cultivation of hardy roses. The paper was very practical, and was much appreciated by those present.

Mr. Kohankie was followed by Mr. Pierce, a new aspirant in Colorado in landscape architecture, with an illustrated lecture on "Landscape Work," showing some pretty views of Central Park, New York; Fairmont Park, Philadelphia, and the parks of Buffalo. As work of this kind is in its infancy in Colorado, the illustrations showing what could be done by judicious planting were much appreciated. P. S.

Washington, D. C.

The Senate has just concurred in the bill which recently passed the House, providing for the erection of a new building for the Department of Agriculture, although the amount of the appropriation has been cut down. As originally presented, the bill carried an appropriation of $2,500,000, but has been amended to $1,500,000. The amendment furthermore specifically states that the new building shall be constructed in one certain spot—just immediately to the rear of the present Agricultural Building; and that no contract shall be entered into or any expenditure authorized in excess of the amount above mentioned. While the amount originally proposed would have enabled the Department to carry out some plans for increased and much better facilities, still it is thought that with the $1,500,000 there can be erected a building which will at least keep out the cold and the rain; and perhaps some other day Congress will open the purse strings a little bit further.

During the discussion of the Agricultural Department appropriation bill in the House of Representatives last week a whole lot of questions were asked about the Department and its various bureaus. Some of these questions were right to the point. The subject of tea culture was brought up and some of the Congressmen wanted to know a whole lot about the whys and the wherefores of many of the doings. Cotton, beet sugar, land surveys, soil analysis and many other things got tangled up in the arguments and, while there were a few bouquets thrown at the various bureaus, it was really unsafe to throw so many brick-bats at a department having so many "glass houses." They talked the time away until—the bill passed. Thus endeth the lesson till this time next year.

The Washington florists have been getting pretty good prices and the market does not seem to have been overstocked. There have been a number of musicales and dinners on hand recently and good stock has been scarce. Especially have single violets been difficult to get hold of, and it doesn't take very much of an American Beauty to bring $4.00 per dozen over the counter. There was a good call for carnations on January 29, and the favorite flower of the lamented President McKinley was very much in evidence here upon that day.

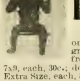
The familiar conservatories of the White House, which were torn down to make room for the Administration Office Building, are now located over on the Mall, and are well filled with plants, including some choice orchids.

The decorations for the Gridiron dinner last Saturday night were in the hands of Small. The arrangement for the ceiling was particularly attractive and quite a number of colored lights were used in the work.

A group of German scientists are coming to Washington in May next to learn something of the work of the Department of Agriculture, experiment stations, etc. Preparations are being made for their reception, and it is possible that they will visit a number of other points of interest in the country before returning to the Vaterland.

Blythedale, Md.

BLYTHEDALE, MD.—Frank W. Sempers, proprietor of the Blythedale Seed Laboratory, has been dangerously ill for some days past. As the testing of seeds was carried on under his personal supervision, all work has been discontinued.



Fern Balls

Finest long-leaved stock. Grown one year in Japan; starts them in growth four weeks sooner than fresh imported.

FOR SALE, a greenhouse plant of 4,000 square feet of glass, stocked with carnations and smilax, on a place of 24 acres; 10 in fruit. A good business and can easily be enlarged; near good markets. Address T. V. Peirson, Brockport, N. Y.

FOR SALE On easy terms, one of the best florist businesses in Northern New York; about 50,000 feet of glass, fine stock for wholesale and retail; 25,000 inhabitants and large surrounding territory; reason for selling, poor health. J. F. Greene, 110 Flower Ave. E., Watertown, N. Y.

FOR SALE, large range greenhouses, Chicago. Or would exchange for small range—East preferred Parties who could run wholesale store would find it advantageous. Two or three might join; business is large enough. Terms easy. Address Mulford Jefferson Park, Chicago, Ill.

FOR SALE—Old established florist business, 4½ acres of ground, 10 greenhouses, cold frames, 7-room house, barn, etc. Large cemetery opposite. Thirty minutes from New York City. Trolley cars pass place; 36 years in present location. Entire property and business. Large field for wholesale and retail trade. Call and inspect, or address Mrs. C. M. Hutchinson, Elizabeth, N. J.

FLORIST BUSINESS, established 33 years, for sale cheap to quick buyer; stock, fixtures, good-will and lease; plate glass front; marble top counter; four living rooms and brick greenhouse; at trolley station, corner two avenues, three car lines, two blocks from "L" station; good trade; reason for selling, sickness and death; must be sold within ten days; price $750, worth $3,000; a snap for quick buyer. Address E. G., care Florists' Exchange.

MISCELLANEOUS WANTS

WANTED to rent, greenhouses in Massachusetts; near Boston preferred. Address F. H., care Florists' Exchange.

WANTED to lease or buy, from 10,000 to 20,000 feet of good glass for rose growing, near Philadelphia. Wm. A. Leonard, Model Farm Greenhouses, Philadelphia, Pa.

MISCELLANEOUS

FOR SALE—One hot water boiler, No. 5; Weathered; good as new; also one Furman No. 5 steam boiler, good condition; $50 each, f. o. b., Burlington, N. J. Apply Samuel Marks, Burlington, N. J.

Boston.

News of the Week.

Plant trade, principally in tulips, hyacinths and Von Sion narcissus in pans, and azaleas, is fairly good, but the cut flower business is quiet. Dinners, receptions, weddings, etc., at which elaborate decorations are done, are very scarce indeed.

Welch Bros. are receiving some of the finest Bride and Bridemaid roses now coming into this market, from George B. Anderson, of Hyde Park.

George A. Sutherland reports that his salesman, Jack Doherty, now in Maine, finds the supply business very good in that section. He is sending in substantial orders.

Among the exhibits to be staged at the Brooklyn exhibition of the American Carnation Society by growers for the Boston Market will be: S. J. Goddard's The Queen, A. Roper's Fair Maid, S. J. Reuter's Lillian Pond and Peter Fisher's Governor Wolcott and Boston Market.

At Horticultural Hall on Saturday was shown what orchid specialists proclaim one of the most remarkable plants of its kind ever staged there, in a fine specimen Oncidium ungluiculatum, exhibited by George Melvin, gardener to Colonel Charles Pfaff, of South Framingham. The plant, in an 8-inch pan, had two spikes, each six feet in length, one bearing fifty-six and the other fifty-eight flowers, in perfect bloom. The committee awarded Mr. Melvin a silver medal for superior cultivation—a well merited prize.

F. J. NORTON.

Pittsburg.

Rose Night at the Club.

It was "rose night" at the February meeting of the Florists' Club, and among the blooms on exhibition some fine specimens were to be seen. The principal exhibitors were local members of the club, a few from other points, and several from the East, whose letters stated that they had sent on some stock, but it did not arrive at time of meeting, although several days on the road.

Fred Burki, from his place at Bakerstown, exhibited fine Bride and Bridesmaid, and the opinion of all the growers present was, that these two sorts were the best to grow from every standpoint. Queen of Edgely does not take a hold with our florists; very few favor it at all, and no one would think of substituting it for American Beauty. Liberty is finding more favor among the people, and will crowd out Meteor in time. A few Mme. Cusin were shown, but his rose does not sell any too well, although it is one that keeps remarkably when cut. The color of Helen Gould does not please, and Golden Gate is a poor grower in Winter and would hardly pay.

Ernst Asmus, of West Hoboken, N. J., sent some novelties from his European importations, showing the great superiority of American roses over those of European growers. There was not one among the lot of about a dozen varieties that any of our growers would touch. Mr. Asmus' descriptions of the roses were very amusing.

E. C. Ludwig showed some fine blooms sent by the Philadelphia Floral Exchange; G. & J. W. Ludwig exhibited roses and freesia grown by E. Fisher, of Castle Shannon. David Fraser, gardener to Henry C. Frick, showed plants of primulas, lily of the valley clumps well bloomed and a fine plant of Azalea mollis covered with flowers, also some cut blooms of cyclamen, cinerarias, Italian hyacinths and a few other sorts.

Excessive express rates and other troubles with express companies were discussed for a while and the matter is still in the hands of a committee which expects to give a report at the next meeting in March.

The carnation convention in Brooklyn will likely be attended by about ten of our florists. Those intending to go should notify T. P. Laughans so that all can travel together. The fare will be on the certificate plan, full fare going and one-third returning, making it a little over $14, ticket good for a week.

The Central Nursery Company is drawing plans for the erection of five more houses to be put up the coming Summer, a large violet house being included. The company has had remarkable success with violets this season. One house for American Beauty roses is also decided on, there always being a shortage of these. The company reports business as improving in most gratifying proportions.

Van Bochove and Brother also find it necessary to expand their already large establishment, and are planning to add five more houses to their plant this Summer. Their business has increased considerably, each year seeing additions go up, till now close upon 100,000 feet of glass are owned by them. Two gentlemen from Chicago are looking the ground over with a view of locating here, on Battle Creek. They had reached no decision at present writing.

PITTSBURG, PA.

Buffalo.

A few minutes' look into C. F. Christensen's houses at Eggertsville, demonstrated that carnations have been cut freely this season. Space that has been given to Harrisii lilies, and even some carnations, too, will here directly be devoted to Spring bedding stock.

Arthur Beyer, of Palmer's staff, visited the metropolis last week.

S. S. Skidlesky, traveler, was here this week. He takes a rosy view of the coming conditions of the Brooklyn meeting, presaging it a "breaker of records" in more senses than one.

Butte, Mont.

The newly organized Montana Floral Society will hold a banquet at the Columbia gardens on March 7. At the last meeting a committee was appointed to draft a constitution and by-laws.

Canadian News

C. H. A. Executive Committee.

There will be a meeting of the above at Toronto on the morning of the 6th March (the exact time will be given later), at the establishment of John H. Dunlop, corner of Bloor St. and Lansdowne Ave., Toronto. It is to be hoped that every member of the committee will put forth extra efforts to be present, as there will be much very important business to discuss. The C. H. A., thanks to the energy of the Hamilton men last year, has now got the swing of success, and is recognized as the National Society of Florists and Allied Trades. It is, therefore, especially desirable that adequate arrangements be devised for not only keeping up the swing already attained, but to give it increased impetus. Bear in mind that on the success of the C. H. A. depends, to a great extent, the development and advancement of the trade in Canada.

The Toronto carnation show will be held on the 5th March, so that members of the committee will have the chance of viewing the latest introductions in that line as well as many of the older kinds as produced by other growers. There are rumors also of an additional inducement, but I will leave your Toronto correspondent to announce that.
A. H. EWING.

Montreal.

A New Trade Journal.

Number 1 of Volume I. of the Canadian Florist, to be published at Toronto on the first and fifteenth of each month, is to hand. It is apparently to be devoted exclusively to the trade. The item of most interest to our city is a paragraph in the editorial section, announcing that "The Quebec Government will give a grant to the Quebec Provincial Chrysanthemum Show providing the schedule embraces vegetables," and that "the show will be held in Montreal in the Fall." I notice the editor "imagines chrysanthemums and turnips on the same table." We are well aware that our Toronto friends consider our artistic taste not of a very high order of excellence. I have not the least idea under whose auspices the "Quebec Provincial Chrysanthemum Show" is to be held, but I am quite sure that the "Habitants" of the Province of Quebec have sufficient discernment to keep two such utterly incongruous subjects as "chrysanthemums and turnips" apart.

Club Notes.

The meeting Monday night was another success scored by the executive committee. The attendance was excellent, and a large number of new faces were seen.

The paper read by C. Craig, gardener to A. Joyce, Esq., Outremont, on Begonia Gloire de Lorraine was a treat. The success achieved by the writer of the paper in growing the subject treated on during the Winter, shows conclusively that he is quite familiar with the matter of cultivation. The older members of the Society were treated to a discussion by the new men, who, by the way, are all graduates of the big British nurseries, on the begonia as grown on the other side of the water. The opinion was unanimous that the poor success attending the cultivation of Begonia Gloire de Lorraine on this side was due to the fact that the plants' constitution had been enfeebled by over propagation before it was disseminated. This view was very favorably received, as it is noticed that the plants grow more freely each year. Mr. Craig said that in Britain it was considered a sign of health to see a tinge of yellow in the leaves.

The Chrysanthemum Show.

The advance sheets of the schedule were read and adopted with a couple of minor additions. The schedule contains 102 sections, about 30 of which are devoted to fruit and vegetables. The executive committee will this year guarantee the first prizes on the section calling for six specimen plants (chrysanthemums) and 24 specimen blooms, and the club will give the same guarantee for the group of 35 feet of space. A donation toward the prize fund was received from the Dale estate.

The Carnation Show.

To be held Monday, March 2, was reported on. Consignments of flowers from outside points intended for the exhibition should be addressed "Montreal Gardeners' and Florists' Club's Carnation Exhibition, care Joseph Bennett, 136 Peel street, Montreal." Arrangements have been made with the custom authorities to release without delay any flowers that arrive before closing time (1 p.m.) on Saturday, February 28. Shippers will please inclose an invoice with each consignment. The club will pay any custom charges there may happen to be.

Joseph Bennett has the most modern facilities for keeping the flowers, which will remain in his charge until taken to the exhibition hall.

An Unfair Competition.

The following resolution was handed in and adopted:

Resolved, That this club considers it very unjust on the part of the corporation of the city of Montreal to interfere with the florists' trade in furnishing floral decorations at political and private banquets.

That copies of the resolution be sent to the corporation of Montreal and to the press.

An Elaborate Progressive Euchre.

At an early date, probably the third Monday in February, the club will hold a progressive euchre party, to which the ladies are to be invited. A special hall will be rented for the occasion.

A committee was appointed to look for another club room.
E.

Hamilton, Ont.

Local News.

The weather man has given us two decided thaws during January. On the last occasion we had a showery Spring rain and thunder, a barn in the vicinity was struck by lightning and during that time and before it we notice that Winnipeg was being treated to 20 to 24 below zero. Well, they are better able to stand it out there, for they have coal mines not far off—Canadian mines that are not yet in the grip of monopolies. By the way, won't some Buffalo boys tell us why we have to pay $11 and $12 for hard coal while they get all they want for $6.25 a ton? Our coal dealers blame the grasping dealers of the Bison City.

The back of the coal famine seems about to break; there is talk on all sides of a weakening in prices and full supplies of coal.

Alf. Bailey has been having considerable trouble with burning soft coal. He heats by a combination of flues and hot water and thinks flues about the worst thing yet for using soft coal.

The city intends to open a street across Walter Holt's property; as it will cramp him for room for further building he is looking for suitable remuneration.

Ed Walker will in a few days move into the store just vacated by F. G. Foster & Son. This will give him more room than at his present stand.

Other News.

Number 1 of Volume I. of the Canadian Florist, published at Toronto, has been distributed to everyone in the trade in Canada. We understand that it is a sample copy to secure the feeling of the trade upon the subject. If it is to be ably edited and sufficiently backed it should receive the thoughtful attention of Canadians.

I see that the C. H. A. Executive is to meet on March 6, the day after the carnation show. It is a good idea to hold the meeting apart from counter attractions, and I hope it will be productive of lively and well-attended sessions and that arrangements will be made for a splendid convention. Special efforts should be made in view of the fact that Toronto is next Fall to turn the provincial exhibition into a Dominion one, and as the convention will likely be held during show time the reduced rates that will obtain from all parts will make a very large convention possible.

I forgot to mention that the prominence given to Violet Day here was largely due to the efforts of the Daughters of the Empire through the medium of the school children.

Gardeners and Florists' Club.

The regular club meeting was held on Tuesday 3d inst. There was a very good attendance though it consisted mostly of the younger members. Sickness prevented President Turner from attending and Vice President Townsend took the chair. Robert Potter read a paper on Pandanus Veitchii. The other business was rushed through in quick time and the rest of the evening was spent playing chess, checkers and pedro.

A special effort is to be made to have a full attendance at the next meeting, as there will be a discussion on prices and an effort will be made to put some plan in operation whereby higher and more uniform rates can be obtained. This effort should have the support of everyone eligible for membership in the club. As A. H. Ewing says, "organization is of the greatest importance," and it is time for local members of the craft to bury the hatchet and turn their attention to the doing of better business.
BEAVER.

Toronto.

A Carnation Show.

Arrangements are about completed for the carnation meeting which is to be held here on March 5. A great many producers of novelties have promised exhibits. All intending exhibitors should send their names to the secretary, E. H. Collins, Allen Gardens, Toronto, and they will be provided with instructions and addressed shipping tags for use, which will make the delivery in the city more certain and easier for all. G. H. Mills will be superintendent, and he will see that all exhibits are properly staged. The association has ordered 500 new vases for the show and has access to 1,000 more. The exhibition will be open free to the public on the evening of March 5.

The executive meeting of the C. H. A. will be held on the morning of March 6, and if satisfactory arrangements can be made, the annual dinner of the Gardeners and Florists' Association will take place in the evening. The new secretary of the association is getting right down to his work and will soon have that institution in good working order again. The coming convention is putting new life in our association, and, as we are likely to have a Dominion exhibition here this year, this will probably be a banner year in our history.
THOS. MANTON.

THE MARKET

OTTAWA.—The weather has been milder, but dark, therefore it does not help the shortage in flowers. Roses are very scarce with all, and it seems impossible to import them, even at the fancy prices. Carnations are good and in crop, still not in sufficient numbers owing to the scarcity of other flowers. Carnations are fetching $1.00 per dozen for the best.

Graham Bros., whose place I visited, have a house of violets that are fine and producing enough blooms to keep us all going. Trade has been very good. Bulbous stock is now coming in and will help the shortage. Daffodils are in demand. Roman hyacinths have been very poor with all growers here.

The coal question here remains at a standstill, so we have to hunt up from day to day for a supply of wood. Now the severe spell is gone, it is not quite so heartbreaking.

By notices received we are daily looking for the first issue of a "Canadian Florist."
E.

MONTREAL.—Trade has improved slightly this week owing largely to an increased demand for funeral work. Flowers, especially white ones, are as scarce as ever, and the quality is not of the best. Prices continue at the Christmas level.

The advent of the "Canadian Florist" and the announcement in its editorial column that a chrysanthemum show under the auspices of a hitherto unknown society will be held here in the Fall are the events of the week.
E.

TORONTO.—Business continues very good, with roses in short supply. Good white flowers have been scarce, the death of several prominent citizens having called for nearly all the white stock offered.

In several funeral designs lately I noticed how very useful were the bronze galax leaves, they are so effective and make the flowers go so much farther. Tulips, both single and double, are now coming in freely. Violets and carnations are fairly plentiful.

We have had a week of soft and generally dull weather, and I am pleased to say the coal situation is much easier; although a good many growers have had a very close run, they are all, I think, getting through somehow.
T. M.

Canadian Cut Flower Prices.

TORONTO, ONT.—American Beauty, No. 1, $30.00 to $40.00; culls and ordinary, $10.00 to $20.00. Bride and Bridesmaid, No. 1, $10.00 to $15.00, No. 2, $3.00 to $8.00. Mme. Cusin, $2.00 to $15.00; Meteor, $3.00 to $15.00; Mrs. Pierpont Morgan, $2.00 to $15.00; Perle des Jardins, $2.00 to $12.00, cattleyas, $25.00 to $35.00; cypripediums, $15.00 to $25.00. Carnations, inferior grades, all colors, $2.00; standard varieties, $2.00 to $4.00; fancy varieties, $4.00 to $6.00; adiantum, $1.00; asparagus, $20.00 to $75.00; callas, $6.00 to 10.00; daffodils, $2.00 to $4.00; daisies, 50c.; freesia, $2.00 to $4.00, galax leaves, 15c. to 20c.; Harrisii lilies, $10.00 to $12.00; lily of the valley, $2.00 to $4.00; mignonette, $1.50 to $4.00; narcissus, $2.00 to $4.00, tulips, $2.00 to $5.00; violets, 50c. to $2.00.

LONDON, ONT.—Bride and Bridesmaid $6.00 to $12.00; Golden Gate, $6.00 to $12.00. Carnations, inferior grades, all colors, $2.00; standard varieties, $3.00 to $4.00; hyacinths, $3.00; lily of the valley, $3.00; smilax, $15.00; tulips, $3.00; violets, $1.50.

The demand is brisk; supply short on everything; white very short. There is a constant call for high grade flowers for which the supply is wholly inadequate.

New York.

The Week's News.

The Fifth avenue retail stores never looked better than they have done this week. The abundance of orchids and other choice flowers seen in the windows on this avenue are marvelous, and while they all go to make a grand display they also give evidence that there is not much business doing.

Albert Wadley, of Wadley & Smythe, has so far recovered from his injury in the railroad wreck a year ago that he has been able to visit the store once or twice, and his complete recovery is looked for.

Alex. McConnell recently executed a decoration for a bridge whist party that was the occasion of much complimentary comment. The principal feature of the decoration was an immense bridge (suggestive of the game) composed entirely of lily of the valley, and reaching over the table used.

W. C. Krick, Broadway, Brooklyn, is furnishing his customers with some Roman hyacinths of a delicate blue shade of color which is artificial, but seems to take well.

Thos. Young, Jr., will open another retail store, to be located at 503 Fifth avenue.

At the funeral of Hon. Patrick Divver, a downtown politician, which occurred on Saturday last, there was an unusual display of large floral designs. The Bowery florists say that never before were so many flowers seen at a funeral in that district.

Siebrecht & Sons, 409 Fifth avenue, were defendants in a suit brought by Elbridge T. Gerry, owner of the Windsor Terrace, where their store and conservatory are located. The defendants claimed that owing to the premises not being ready for occupancy in time and that icicles had fallen and broken glass in the conservatory the sum of $1,100 for rent was excessive, but Judge Fitzsimmons, of the City Court, could not see it that way and granted a verdict in favor of the plaintiff for the full amount.

John J. Perkins has bought the wholesale business of Purdy Brothers, at 48 West Thirtieth street, and will operate the same in addition to his present store at 115 West Thirtieth street. The deal was made on Wednesday, and Mr. Perkins took possession Thursday morning, putting his son in charge of the new branch. We understand that Purdy Brothers have retired from the flower business entirely.

The Siegel-Cooper department store has decided to run its own plant department, hence Louis Schmutz has not been furnishing plants for that firm since the first of the month. C. W. Herman, a former employee of Mr. Schmutz, has been retained as buyer for the Siegel-Cooper Company.

The venerable Samuel B. Parsons, nurseryman, of Flushing, N. Y., met with a severe accident on Thursday of last week. Mr. Parsons, who is in his 85th year, is at present making his home with Mrs. Hopkins, on Jamaica avenue, had left his room, which is on the second floor of the house, and was about to go down stairs when he slipped and fell the full length of the stairs. He was rendered unconscious by the fall. A physician was called in and Mr. Parsons regained consciousness in a short time, and luckily escaped serious injury.

Henry A. Molatsch, whose greenhouses are located at Bay Ridge, Brooklyn, is contemplating starting another establishment in or near Chatham, N. J. The Bay Ridge property is becoming more valuable each year, owing to the demand for building lots, and it is thought that if sold for such purposes Mr. Molatsch will get better returns than would be possible from the growing of plants and flowers.

Signs of Spring are here, though these are not the proverbial swallows, but the bulb drummers from Holland. The steamer Amsterdam, two days overdue, landed last Saturday, having on board J. H. Bockman, of the firm of Zyp & Co., and H. Vlasveld, of G. Vlasveld & Sons, Sassenheim, Holland.

Chiers & Boddington Company report a very heavy demand for flower seeds, etc. This firm recently sold a large importation of Central American orchids to S. Butterworth, South Framingham, Mass. The latter gentleman is an orchid enthusiast, and is rapidly accumulating a very extensive collection suitable for florists' purposes.

On the morning of January 31 the flower store of Charles Klingelbeck, Middle Village, L. I., was burned down. The fire originated through too much draught on the furnace and the damage done is estimated at $500.

Flower thieves are still at work on Long Island and greenhouse owners will do well to keep a strict watch over their premises. The establishment of J. J. Bechamps, State street, Flushing, was visited by flower thieves on Thursday night, January 29, and his entire stock of carnation flowers was stolen. The thieves gained entrance to the greenhouse by removing several panes of glass; and, in addition to making off with the flowers, did a lot of damage to the growing plants. Mr. Bechamps estimates his loss at one hundred dollars.

The greenhouses of Henry Hession, Clarkson street, Brooklyn, were entered by thieves on Sunday night last, and about $150 worth of carnations stolen. The thieves gained an entrance by breaking the glass.

On Monday night the greenhouses of C. Pesenecker & Son, Audubon avenue, Jersey City, were also entered by thieves and the mode of entrance was similar. All the carnations, flowers and buds were taken from the plants.

The February meeting of the New York Florists' Club will occur on Monday evening, the 9th, in the club rooms, 128 East 28th street. An interesting gathering is promised.

The Brooklyn Horticultural Society held a very enthusiastic meeting on Monday evening last in the Germania Club house, President C. W. Ward in the chair. Over forty members were present, and the arrangements for entertaining the American Carnation Society in Brooklyn are now about completed. Another meeting of the Society will be held on the 16th inst., two days before the Carnation Society convenes.

The entertainment fund is increasing satisfactorily. Ex-Lieutenant Governor Woodruff has consented to officiate as toastmaster at the banquet, and Park Commissioner Young will be among the speakers.

The notice of a bowling tournament at Flatbush was premature.

Richard B. Gee is again in charge of the books at Hicks & Crawbuck's wholesale commission house in Brooklyn.

The annual dinner of the New Jersey Floricultural Society was held in the Society's rooms, Orange, N. J., on Wednesday. About thirty-five members and friends enjoyed the spread and a very enjoyable evening was spent.

W. H. Elliott, Brighton, Mass., and Arthur Cowee, Berlin, N. Y., were visitors this week.

Philadelphia.

Florists' Club and Express Rates.

The discussion of excessive express rates brought out a large attendance at the meeting on Tuesday evening last. The resolutions adopted were a reproduction of those adopted at Boston (see page 96, Florists' Exchange of January 24), and the committee instructed to confer with the express companies to ascertain what concessions could be obtained. Mr. Elliott, of Boston, was present and he made a very pleasing and able address, setting forth what had been done in that city, and adding that the agents there had agreed to present a petition to their superior officers recommending a restoration of the old rate on cut flowers between grower and dealer, and between dealers. The speaker suggested that this would be the proper line for our club to proceed on: First, see the highest officer of the companies in your city—the higher this official is the better treatment you will get. Approach him in a friendly spirit and lay your complaints before him in a clear, but firm manner, and you will get consideration. He did not think it always advisable to present such resolutions as were passed.

A long discussion took place on the subject, various growers and dealers giving their experience in express matters as to damages, delays and such like.

John Burton said that in his opinion resolutions did not count with the express companies, but they no doubt did good by being published in the trade papers, as it stirred up the trade in all parts of the country, thereby causing concerted action. Any concessions secured from the companies would only be obtained by careful diplomacy, approaching them in a quiet business manner. We must also consider that the damages sustained in shipping cut flowers are not always the result of the fault of the express company; very often damage is caused by bad packing, etc.

W. K. Harris stated he had been informed that at the same time as rates on cut flowers were increased rates on milliners' supplies, such as dried flowers, feathers, etc., were advanced; but the rates on these goods had already been restored to the former figures.

All the retailers present stated that they had no complaint to make as to increased rates. What the retailer wanted was double rates, if such would guarantee to them a special service, such as the post office gives on special delivery letters.

Therefore, as the subject now stands, the case has two aspects: a restoration of the old rate for grower and dealer, and a special rate for the retailer for special service guaranteed.

The committee met C. G. Rust, general agent of the United States Express Company, on Thursday, and laid their protest before him. He treated the committee most cordially, and said the reason given for the increase was that the company concluded that it was carrying out flowers at a loss, on account of the special care necessary, and the many claims for damages on account of delays, etc. He stated that the matter of a special rate for the retail florist had been previously taken up, but the company could not see how such service could be given. He consented to take up the subject of restoration of the old rate, as relating to grower and dealer, and would write his superior officers on this matter.

The committee will not be able to meet the general manager of the Adams Express Company for this district for a few days, as he is absent just now from his office. An appointment will be made immediately on his return.

DAVID RUST.

Chicago.

The Week's News.

The heaviest snow storm of the season is with us, and it is still snowing. It is hard to predict what will be the consequences to the trade if a severe cold snap should follow in the wake of the storm, as there are quite a number who have a very limited supply of coal.

At the Florists' Club meeting on Wednesday night, February 4, E. C. Amling, F. F. Benthey and E. F. Winterson were appointed a committee to use the club's influence in the matter of express rates.

On account of not being able to secure a hall large enough for the carnation display for "carnation night," the meeting will now be held on Tuesday, February 10, on the sixth floor of Handel Hall. The following premiums will be competed for: $10.00 for the best vase of 50 blooms, any variety; $5.00 for the best vase of 25 blooms, any variety; $5.00 for the best general display. A large exhibition and attendance are anticipated. Those desiring to exhibit should notify the committee, and exhibits should be sent in care of any member of the committee, who will see to the proper staging of the flowers.

Arrangements have been made with the Lake Shore and Michigan Southern Railroad whereby the florists have been granted a one-and-one-third fare from Chicago, on the certificate plan, to the Carnation Society meeting at Brooklyn. Round trip from here will cost $26.70. Tickets are good leaving Chicago on the following days: February 16, 17 and 18, and returning not later than February 24. The florists from this locality propose to leave February 17 at 2 p. m., arriving in New York February 18 at 6 p. m. All those intending to make the trip should communicate with Mr. L. F. Vosburgh, of the Lake Shore and Michigan Southern Railroad, so that necessary sleeping car reservations may be made. Those from the West and Northwest who contemplate attending the convention should also communicate with Mr. Vosburgh. It is to be hoped they will join the Chicago contingent; delegates from St. Louis, Indianapolis, Cincinnati, Louisville, and other Southern cities will be able to connect with the Chicago party at different points along the route. The equipment comprises buffet, library, smoker, sleeping car, and dining car.

A party composed of J. Pollworth, W. A. Kennedy, P. J. Foley, W. J. Johnstone, L. Coatesworth and your scribe visited Joliet recently, and took in the places of the Chicago Carnation Co. and the J. D. Thompson Carnation Co. Everything was found in first-class condition. Manager Hartshorne, of the Chicago Carnation Co., states that the trade in rooted cuttings is far ahead of that of any previous year, and that the concern's shipping business in cut flowers is in excess of anything ever before experienced.

The J. D. Thompson Carnation Co have up to the present time shipped over 150,000 rooted cuttings of Enchantress, and find they are giving entire satisfaction to the buyers. That firm's shipping trade in cut blooms is also on the increase. The company contemplates the erection of five new houses in the Spring, to be devoted to the fine varieties of carnations.

The nursery business of the late P. S Peterson will be continued as Peterson Nursery, Wm. A. Peterson, proprietor

ROBERT JOHNSTONE.

Bowling.

FLATBUSH, N. Y.—Quite a numbe of visitors called at the alleys of th Flatbush Club on Thursday evening and participated in the bowling. Th following are some of the scores tha resulted:

D. Y. Mellis		17
P. Riley	167	16
T. J. Lang	178	16
A. H. Langjahr	112	10
P. Dailledouze	147	15
E. Dailledouze	119	12
F. H. Traendly		9
C. Lechner		8
W. J. Stewart		7
C. Wocker	125	10
J. Thielmann	147	16
R. Irwin	196	13
H. Dailledouze	122	13
A. Zeller	141	12
S. S. Butterfield	106	11

Wednesday night on the Boylesto alleys the following scores were mad at candle pins. In the absence of Nich olson, Gilson captained his team:

CHARNOCK'S TEAM.

	1.	2.	3.	Totals
Harrigan	84	99	96	27
Charnock	91	90	67	24
Barrett	76	72	76	22
Keefe	45	69	84	19
Norton	86	62	77	22
	382	392	400	1,17

GILSON'S TEAM.

	1.	2.	3.	Totals
Gilson	77	94	81	25
Twombly	82	73	88	24
Robrts	49	63	83	19
Brady	58	69	63	19
Edgar	66	87	74	22
	332	386	389	1,10

Charnock's team won three straigh strings, and won the total by sixty seven pins.

Cleveland.

Among Growers.

A visit to the establishment of S. N. Pentecost in the east end found everything in good shape, especially his carnations, which have done very well so far and give prospects of continued cuts of good flowers. This gentleman reports trade this season as being the best on record, and, taken as a whole, the most promising season since he has been in business.

A neighboring firm, D. Charlesworth & Son, are doing a nice business, mostly in the plant line. This firm has, besides a good retail trade, the contract for all the planting in the Monumental Park.

Following in the steps of the florists of Cleveland the market gardeners and producers have taken steps toward organizing an association, and a meeting has been called for Saturday morning, February 7. The committee consists of Messrs. T. W. James, M. L. Rutenik, C. B. Hinkley, H. J. Pease and G. A. Tilton, chairman. No doubt an organization of this sort will prove beneficial to the market gardeners.

George Schuman, foreman at "The Essex Greenhouses," will resign from his position about the 15th inst. George is talking about going back to Chicago, but has not as yet made up his mind. We wish he could stay with us, as we shall miss him, especially on the alleys, where his scores have always averaged high.

Robert C. Whitehill and Harry A. Bunyard were visitors this week and spent an evening at the club Monday night. They report things as "booming" all along the line.

Charlie Gibson, at the Union passenger station, sprang a pleasant surprise on the boys Monday night by giving each one a large map of the United States showing all the principal railroad routes and cities, which will be a handy article for the average florist. Anyone who did not receive a map can do so by asking Mr. Gibson.

Leonard E. Loomis, formerly with Storrs & Harrison Company in the greenhouse department, has accepted a position with James Eddy.

McKinley Day here created such a demand for carnations that everyone was sold out early in the forenoon and as a result carnations have been very scarce since. Why could we not have a day of this sort about two months later?

A. Graham, Jr., is up and around again, having almost entirely recovered from his sickness. G. W. S.

Grand Rapids.

ews of the Week.

Efforts are making to galvanize the slumbering florists' club into life again, a meeting with that end in view being called at Henry Smith's for Wednesday night.

A petition is being circulated for signatures, remonstrating against the excessive express rates.

The glass question is also claiming a share of our attention, with a strong possibility that if the florists of the country take prompt hold and each city does its share the tax of $1.37 per box may be removed. George F. Crabb had an interview with our local representative in Congress, Hon. Wm. Alden Smith, in which that gentleman said: "I am personally favorable to removing the tax on glass, and will do what I can to remove it." He holds out little hopes of anything being accomplished at this present short session; but send in your petitions and they will be presented, and at the next session something will likely be done. We feel confident that with Hon. Wm. Alden Smith as our champion, coupled with the fact that he is certain to be on the tariff revision committee next session, or rather the committee having that matter in charge, we shall win.

It looks as if no one from here will attend the Carnation Society meeting at Brooklyn, N. Y., no one having positively declared himself. All are too busy to take the necessary time to go that far this year. We have strong hopes of getting a chance to attend Detroit in 1904. G. F. CRABB.

Detroit, Mich.

The Detroit Florists' Club held a carnation and rose meeting on February 4 at Harmonie Hall. Full particulars of the exhibits will be given in our next report. DILGER.

Cincinnati.

News of the Week.

McKinley Day soon cleaned the market of carnations, and added one more holiday during the year for the florists of the United States to look forward to and prepare for.

Saturday afternoon, February 14, the Cincinnati Florists' Society will hold its rose meeting. The following prizes are offered:

For 12 blooms American Beauty roses, $10.00, $6.00 and $4.00; for 25 blooms Bride, Bridesmaid, Meteor, Perle des Jardins, Golden Gate and Liberty, $4.00, $3.00 and $2.00, respectively. For best display of violets, $6.00, $4.00 and $3.00; best general display, $10.00. The S. A. F. medal will be given for any new plant or flower of American origin.

We should like to have some of our rose growers make exhibits. The prizes are well worth competing for.

White Dutch hyacinths have made their appearance and sell at 6c. Von Sion narcissus, in limited quantities, are in and bring 5c.

E. G. GILLETT.

St. Louis.

J. Horace McFarland, the horticultural printer and horticulturist of Harrisburg, Pa., lectured before the St. Louis Branch of the Civic Improvement League Tuesday, January 27, at the Mercantile Club.

Jas W. Begbie, representing Clucas & Boddington Company, New York, and Chas. F. Meyer, of the same city, were callers on the trade recently.

Among Growers.

On a recent visit to Young & Sons Company's establishment what impressed me most favorably were the beautiful orchids; they were the largest flowered of any I have seen.

Two large houses were filled with many thousand cuttings in sand and little plants in thumb pots. Much of this stock was no doubt for mail orders, of which this firm enjoys a large trade.

Poinsettias were arrayed in their most vivid shade of color. Several thousand Easter lillies, from three to five inches high, looked healthv and strong. Spiræas, in six-inch pots, on an adjoining bench, were not yet starting up. A few beautiful Begonia Gloire de Lorraine were the prettiest pink things in sight, unless it be several fine plants of Azalea Simon Mardner. Plenty of good Asparagus Sprengeri, and plumosus and smilax were around, and here and there were small groups of Roman hyacinths, of narcissus and Dutch hyacinths.

The palm house is well stocked and presents a most inviting appearance. It's a great convenience to customers to see every palm labeled with the selling price, as is done here. There were plenty of fine ferns, and all the other miscellaneous lot of goods which the Youngs grow. F. W. M.

Providence, R. I.

News Notes.

Nichols, of Barrington, had a house of Wild Rose frozen this Winter; but the plants are now coming out of their lethargy and producing half-blown, short stem flowers, which are useful for design.

The local florists report a slightly increased trade for Carnation Day, and feel that next year will find a decided recognition of that day.

Appleton reports a good season thus far. He finds an able assistant in his oldest son.

Clark, of Tockwotton street, also has a gratifying increase of business.

Schuyler & Gay, of Pawtucket, are two of the younger men in our trade who are endeavoring to build up a call for flowers in the suburban neighborhood.

James Crawshaw has matured plans for branching out at an early date.

O'Connor has added new drop curtains to his show window.

No change in business conditions since last week. Flowers are in active demand and short crop.

C. S. MACNAIR.

Indianapolis, Ind.

Jottings.

Frank Harriett is cutting a nice lot of callas. His pink seedling carnation is in fine shape, and good results are expected from it.

E. J. Bertermann is at home nursing a vaccinated arm.

Henry Rieman was unable to take care of all his business last week because of a scarcity of stock, and turned some of his trade over to his brother florists.

The market has been quiet, few of the florists having any surplus to take there.

John Bertermann invited several of the florists, including E. G. Hill, Fred Dorner, Jr., Henry Rieman, A. Baur, J. Hartje, and H. Junge, to take dinner with him Tuesday, February 3. The same gentlemen were also appointed a committee by the directors of the coming chrysanthemum show, to prepare a premium list and discuss other matters pertaining to the exhibition.

I. B.

ELMIRA, N. Y.—There is nothing new or startling from Elmira. The coal question is not so bad here. Business could be a little better. Robert M. Leavitt keeps quite busy with funeral work. G. P. Rawson is certainly not behind the band wagon. H. N. Hoffman contemplates a visit to the carnation show in Brooklyn. Fred La-France is quite busy among his carnations.

Cromwell, Conn.

The indications now are that Connecticut will be well represented at the Brooklyn meeting of the American Carnation Society. Leading florists everywhere throughout the State, so far as heard from, express their intention to be present. A. N. Pierson, his son, W. R. Pierson, and W. A. Dawson, of Cromwell, expect to be there.

The suggestion of The Florists' Exchange to bring a pressure to bear on the express companies that will touch their receipts is the best I have seen yet. Nothing else will have any weight. They seem perfectly indifferent to all appeals of justice. While no concerted action has yet been taken by the florists of Connecticut, many individual protests have been made against the recent advance in rates, but of course, without effect. The reply from those in authority has been the same; that cut flowers were among the most troublesome goods the companies were called upon to handle, as they required protection from both heat and cold, and involved subsequent trouble, in claims for damages, when not delivered on time, or in good condition. Anyone who has ever attempted to recover anything from an express company for damages caused by the neglect of one of its agents knows how little there is to this last claim. If something in the way of retaliation can be brought to bear, by which the companies can be made to see that they are in danger of sustaining a loss in traffic and receipts, they will no doubt come to terms. Theodore Wirth, Vice-President of the Society of American Florists, is making an effort to obtain an expression of opinion from the florists of Connecticut on this subject, with a view to some concerted action later. The Hartford Florists' Club at its last meeting also protested vigorously against the excessive rate. But it will take something more than written protests to move the express companies. As long as the present high rates are paid, protests will count for nothing. When the florists get together in Brooklyn at the meeting of the American Carnation Society they may be able to evolve a way out of their present difficulties that will be effective.

A WEEKLY MEDIUM OF INTERCHANGE FOR FLORISTS, NURSERYMEN, SEEDSMEN AND THE TRADE IN GENERAL

Vol. XV. No. 7 NEW YORK, FEBRUARY 14, 1903 One Dollar Per Year

NOVELTIES IN CARNATIONS

We Offer Strong Rooted Cuttings of the Following Leading Varieties, Viz.:

Enchantress Having placed a very large order for this exceedingly valuable new variety very early last year, we are in position to make immediate and early delivery. **$12.00 per 100; $100.00 per 1000.**

Adonis This sensational new scarlet is meeting with a tremendous sale. **$14.00 per 100; $120.00 per 1000.**

Harlowarden A very free-blooming new crimson variety, very highly regarded. **$12.00 per 100; $100.00 per 1000.**

Fragrance The sweetest carnation ever grown, hence, its name. Winner of the Craig Cup at Philadelphia, 1902, for the best seedling of American origin. This has been a great favorite in the New York market for the past three years, where it has been known as "Blush Seedling." **$12.00 per 100; $100.00 per 1000.**

White Bradt A white sport from **Mrs. Geo. M. Bradt,** with which it is identical in every way except color, which is pure white. **$12.00 per 100; $100 per 1000.**

Boston Market This new white variety, raised by Peter Fisher, has attracted a great deal of attention around Boston—where it has been tested by a few of the leading growers—on account of its free-blooming qualities. We can recommend it very highly. **$5.00 per 100; $40.00 per 1000.**

The Queen Another fine new white sort, also very highly thought of in the vicinity of Boston, where it originated. Exceedingly prolific, grand stem, exceedingly free bloomer, fine keeper and shipper. **$10.00 per 100; $75.00 per 1000.**

Lillian Pond Very large and of fine form. Very free and continuous bloomer. **$10.00 per 100; $75.00 per 1000.**

Fair Maid This has proved exceedingly profitable. Fine silvery pink. A grand Spring and Fall bloomer. Awarded silver medal Mass. Horticultural Society. **$6.00 per 100; $50.00 per 1000.**

Marshall Field Variegated. **$12.00 per 100; $100.00 per 1000.**

Her Majesty White. **$10.00 per 100; $80.00 per 1000.**

JAPANESE FERN BALLS.

We have a fine lot of these in first-class shape. Extra sized balls about 8 inches in diameter. **$3.50 per doz.; $25.00 per 100.**

FICUS ELASTICA (Rubber Plant).

We have a grand stock of these plants in splendid shape, grown cool, with large perfect leaves right to the pot. Extra good value.

Extra strong plants in 6-in. pots, 1½ to 2 ft. high	$6.00	per doz
" " " " " 2½ "	9.00	"
" " " " " 3½ "	12.00	"

Very large bushy specimens, 3 plants in a pot, fine for decorating, hotels, etc., 4 to 5 ft. high $5.00 each.

Established 1802.

Thorburn's Seeds

For over a hundred years have been universally recognized as the standard of excellence.

Our Catalogue for 1903 is now ready and will be mailed free on application. We handle only the very highest class seeds, making a specialty of choice flower seeds for florists, and selected vegetable seeds for market gardeners. For nurserymen we have a very full line of native and foreign tree and shrub seeds and full lines of hybrid French Gladioli, Japan Lilies and Irises, etc. Our general descriptive catalogue, the handsomest, most complete and most reliable published, will also be mailed free to parties interested.

NEW WHITE CANNA MONT BLANC

The Greatest Novelty in Cannas

MONT BLANC will become one of the most popular Cannas for bedding purposes; it contrasts so beautifully with the crimson varieties, and grows so even in beds. It has ample bright green foliage; the flowers have fine form, the spikes are large, entirely erect and are borne just the right distance above the foliage.

Potted Plants, ready for delivery in March, 75c. each $7.50 per Dozen; $50.00 per 100. Stock limited.

NEW CRIMSON RAMBLER, "PHILADELPHIA"

Flowers larger, more double, do not fade white, more durable, brighter color, not subject to mildew as Crimson Rambler is. 2½ in., **$12.00** per 100; one year field plants, **$30.00** per 100.

SEED TRADE REPORT

AMERICAN SEED TRADE ASSOCIATION

Walter P. Stokes, Philadelphia, President; C N. Page, Des Moines, Iowa, Vice-President; C. S Burge, Toledo, Ohio, Second Vice-President S. F. Willard, Wethersfield, Conn., Secretary and Treasurer; A. N. Clark, Milford, Conn., Assistan Secretary

SHENANDOAH, IA.—The Sentinel o February 4 contains a three-column illustrated article on the development of th business of Henry Field, the "new idea" seedsman. He is a graduate of the establishment of A. W. Livingston & Son of Des Moines, Ia., and has been in th seed business for himself since 1892. Hi specialties are garden seeds and potatoes Mr. Field was born in this city in 1871, an is considered one of its most progressiv business men.

DES MOINES, IOWA.—Trade wit us is starting in very nicely, althoug we were greatly delayed by the lithographer in getting out our catalogue this year so that they were not maile until about ten days to two weeks late than usual. Still our January ma order trade fell only 5 per cent. below that of last year. A very large number of inquiries are coming in and indications point to an especially good business this year. Seed sweet cor in extremely scarce, and is now selling in a jobbing way at about double th price at which we catalogued it. The part of our catalogue listing seed cor went to press in November, before i was fully known how short the cro was.

The demand for farm seeds seems t be decidedly on the increase, a fa greater proportion of increase than fo garden seed. We were fortunately in a favored spot with our field seed crop this year. The quality is excellent while the crop in many other parts o the West is almost an entire failure

IOWA SEED CO.

Dill and Parsley Seeds Aromatic.

By a decision of the General Appraisers at New York, handed down on January 29, 1903, dill and parsley seeds are each found to be "seeds aromatic," and to be used chiefly as drugs, and are therefore free of duty under paragraph 548, tariff act of 1897, specially enumerating "seeds aromatic, . . . which are drugs and not edible," etc., and are not dutiable under paragraph 254 of said act, as "seeds of all kinds."

In his opinion the General Appraiser (Somerville) says:

FLOWERS AND PLANTS

136 pages and cover, a valuable collection for catalogue makers, will be mailed, postpaid, on receipt of 50 cents, which amount will be deducted from first order received for cuts.

A. T. DELAMARE PTG. & PUB. CO., Ltd.
P. O. Box 1697 New York.

There is nothing in the testimony taken n these cases which conflicts with the lescription and uses of these seeds as ound in the United States Dispensatory 18th ed., pp. 1570, 174 and 922). It is here stated as to parsley seeds (p. 1570) hat, while they are planted in gardens, hey have a strong terebinthinate odor and a warm aromatic taste; that the herb tself contains a volatile oil, to which it owes its odor and mainly its taste, as well as its use in seasoning, and that there is extracted from the seed an oily liquid known as apiol, sometimes called oil of parsley seed, not volatile, heavier than water, of a peculiar and tenacious odor distinct from that of the plant and of an acrid, pungent taste. It is further stated hat parsley root is said to be aperient and diuretic, and is occasionally used in nephritic and dropsical affections, and hat the juice of the fresh herb and the seeds have been used as intermittents. This description, taken in connection with he testimony, justifies the conclusion that parsley seeds are aromatic seeds and fall under the category of drugs, notwithstanding the fact that they may be used o a limited extent for sowing in gardens.

While the dill plant has been introduced into our gardens, it is cultivated chiefly, if not wholly, for the use of the seed. It is said in the dispensatory (p. .74) as to dill seeds:

"The odor is strong and aromatic, but ess agreeable than that of fennel seed; heir taste, moderately warm and pungent. These properties depend on a volatile oil."

On page 922 of the same work oil of dill, made from the seed, is described as being of a pale yellow color, with the odor of the fruit, and hot, sweetish, acrid and aromatic taste. The oil is sometimes used in preparing dill water, which is prescribed as a medicine.

These seeds are manifestly drugs. As we have said, both parsley and dill seeds are sometimes planted in gardens, but the larger quantity of them is probably raised n fields.

The fact that this parsley seed is used as a condiment, as distinguished from food, would not render it edible. Cruikshank v. United States, 59 Fed. Rep., 446; C. C. A., 171; in re Oppenheimer, G. A. 5266 (T. D. 24173).

"Seeds aromatic," which are drugs, are specially provided for in said paragraph 548, tariff act of 1897, when not edible, etc. As we have seen, this provision is an amendment of the drug paragraphs of previous tariff acts, which enumerated "seeds aromatic, not garden seeds." The fact that seeds are planted in gardens would not necessarily make them garden seeds. The expression "garden seeds" was construed by the Supreme Court in Ferry v. Livingston (115 U. S. 542) as belonging to a variety planted in gardens with the intention to raise vegetables or other edible products to be consumed by man as distinguished from other uses. This construction was followed by the circuit court for the southern district of New York in Clay v. Magone (40 Fed. Rep., 230), where it was held that such variety of celery seed as was not intended to be sown or planted to raise celery to be consumed by man was an aromatic seed not edible, and was therefore not dutiable under the provision for "garden seeds" in paragraph 465, tariff act of 1883, but was free of duty as "seeds aromatic" under paragraph 636 of said act.

We accordingly find that both dill and parsley seeds are seeds aromatic, "which are drugs and not edible and are in a crude state, and not advanced in value or condition by refining or grinding, or by other process," and hold that they are free of duty under said paragraph 548, tariff act of 1897, as claimed by the protestants.

BRIEFS FOR BUSY FLORISTS.

CHRYSANTHEMUMS.—For specimen pot plants the middle of this month is a good time to take the cuttings. Plants that are to be grown for commercial purposes need not be propagated for some time yet, though the stock plants should not be neglected at all in the meantime, or there will be but a poor supply of cuttings when the time to take them arrives. A cool, light house is where the stock plants should be placed, until the cuttings are taken, and while the old plants do not require a great deal of attention, they must not be kept too much on the dry side from now on.

CYCLAMEN.—The young plants are now about ready for their first potting. If leaf soil is obtainable, use it with a little sand added. If such soil cannot be had, then the lightest possible is the best, provided it is well enriched with thoroughly decomposed stable manure that has been run through a quarter-inch sieve. Give the newly potted plants a place where they will receive plenty of light and air, and avoid over-watering at all times.

LILIES.—These will not need the hard forcing that was necessary a year ago, as Easter is somewhat later. To have the bulk of the stock flower too early is as unfortunate as having it too late. Try to have the buds in sight by the first week in March, and there will be no trouble in bringing them in nicely for Easter time.

New Bedford, Mass.

At a meeting of florists, gardeners, and others interested in horticulture and floriculture, held on February 3, a society was organized, to be known as the New Bedford Horticultural Society. William Keith was elected temporary chairman and Peter Murray temporary secretary.

The chair appointed a committee of five to draw up a constitution and by-laws to be presented at the next meeting. The committee is composed of William F. Turner, R. H. Woodhouse, Thomas White, James Garthley, and A. J. Fish. It was voted to add Chairman Keith to this committee. After an informal discussion of various points connected with the constitution and by-laws, the meeting adjourned, subject to the call of the committee.

Those present were R. H. Woodhouse, William Keith, James Garthley, A. J. Fish, Peter Murray, Samuel S. Peckham, A. B. Hathaway, Richard E. Nofftz, Mortimer Searles, Charles A. Tuell, William A. Johnson, Thomas White, Peter Priaulx, Charles P. Emerson, William F. Turner, Samuel J. Donaghy, James M. Ricketson, John W. Frasier, James C. McNutt, George N. Borden, Eliot T. Sabine, Edward J. Lawrence, E. A. Munson.

CEDARHURST, N. Y.—At a meeting of the Lawrence-Cedarhurst Horticultural Society, the following officers were elected and installed: President, John J. Reilly; vice-president, Michael O'Hara; secretary, Herbert Entwistle; treasurer, William Mitchell.

The Tree Tomato Again.

Editor Florists' Exchange:

There is indeed a tree tomato, which is not a true tomato, but belongs to a different genus, Cyphomandra betacea, a native of Peru and other parts of South America. It forms a medium-sized, soft-wooded, much-branched tree, with broad ornamental foliage, reddish brown when young, like beets, from which its varietal name. Flowers are of good size, pinkish white, and exhale a much-pronounced fragrance like that of tea roses. The fruits, produced in large clusters on very long peduncles, are egg-shaped, and about 1x2 inches. Their bright orange color makes them very ornamental, as they hang on the plant all Winter. Some people eat them raw, but if stewed with sugar they make a delicious dessert dish. The fruits are occasionally found on the market in Southern California, but not as often as they deserve.

The tree tomato can easily be grown and fruited in pots, and will make a striking ornament of any conservatory.

DR. F. FRANCESCHI.

Peaches from Seed.

In a private letter I am asked by a reader what I think of his setting out a lot of peach seedlings in his orchard instead of named sorts. I would not advise it. Nothing is known of what the seedlings will be, and they may be the opposite of what is wanted. Very often superior kinds result, but when setting out an orchard it should be with a definite object in view, such as the obtaining of the best kinds of fruits for family use or for market, and having a kind, or several sorts, to ripen at a given time. Seedlings wont do this. It's very well to have a seedling or two, an interest always attaching itself to the unknown, which is what a seedling is; but for the orchard itself, set out named sorts. One, two or more named kinds are said to come true from seed, the Smock and the Wagner are two, and there may be more. I have had the former come true myself.

Nurserymen sow peach stones in a bed, transplanting the seedlings to nursery rows as soon as they are well above ground, and by September these seedlings are large enough to bud. These buds make plants large enough to sell by the September following.

If more attention were given to feeding peach trees well, they would last much longer than they do. As it is, in poor soil and overloaded with fruit as they often are, how can a long life be expected of them!

Painting Wounds of Trees.

The advice to paint wounds of tree, to prevent decay is quite common, bu the Journal of the Royal Horticultura Society of England calls attention t the numerous destructive fungi whic enter trees to their injury throug scars made by sawing limbs, or throug wounds. Many of these fungi ar harmless so long as the trunk is intac only becoming injurious when throug wounds or scars an opening is give them to enter the tree. The pamphle referred to recommends that as soo as a limb is severed the scar should b coated with gas tar at once, whic advice is heartily endorsed, and a fungi laden branches and fruit shoul be burned.

Spanish Chestnuts in England.

Mr. Thiselton Dyer, of the Roy Gardens, Kew, writes to the Gardener Chronicle of the success of Spanis chestnuts in England "in favorable sea sons." It may be that our native sp cies would succeed better than th Spanish; at any rate it is worth try ing, if not already done. Our's is much sweeter nut, though of a small size.

It is a wonder that among so mar persons interested in the chestnut que tion there is not more attempt made look up a variety of our own speci with large nuts. Most every boy wh hunts chestnuts knows of a tree wi larger nuts than others.

Glyptostrobus Pendulus.

The very beautiful tree grown nurseries under the name of Glypt strobus pendulus is no longer reco nized as distinct from Taxodium, for a long time it was thought to b It is but a variety of the common d ciduous cypress, and in some works now known as Taxodium, var. micr phyllum. Almost all large collectio have a specimen or two of this tre It differs mainly from the normal for of taxodium in having its leaves su rounding the branchlets, and n spread out in two rows as the comm cypress has. It was in collections f some time under the supposition of i being a Chinese tree; but nurseries the North have had it to appear beds of seedlings of the deciduous c press.

In "Forestry of North Carolina" it said this form, glyptostrobus, is n uncommon South, especially in the w savannas near Wilmington. It is singular looking tree and one w adapted to damp soil.

Its propagation is by grafting it the common deciduous cypress. You stock lifted in Autumn can be graft indoors, and stocks in the open air April.

English Ivy for Edgings.

In this vicinity English ivy is much used for edgings to flower beds and marking boundaries. When close to he ground it survives cold, which it would not do when on a building or any elevation much above the ground. In several of our cemeteries, particuarily that of Laurel Hill, it is much in evidence. In most all cases graves which are wholly covered with green have ivy for the plant, where in other cemeteries grass, periwinkle, sedum or some other plant would be used. These graves in the Summer season present a mass of green from the ivy which I have never seen equalled by any other plant. The boundaries of the lots are often outlined by ivy. In this case, litle by little, as one shoot rests on the other, the height is increased, forming n a few years, with the assistance of he caretaker, a little wall of green a foot or so in height. Here and there are seen little clumps, or shrubs, of vy. These are formed by keeping a stake to a plant for a few years until t has a stiff shoot of its own, after which it supports itself and becomes a shrub.

No doubt the ivy would thrive much further north than is supposed when creeping close to the ground, its Winer protection being better secured.

Defensive Hedges.

When a hedge of a defensive nature s required—and there is often a necessity for one—there is no plant as good as the hardy orange, Citrus trifoliata, where it is hardy enough to stand the Winter, and this may be as far as Connecticut, along the coast. I have seen its immature tips hurt in the vicinity of Philadelphia occasionally, but rarely, and only when the plants are but in heir seedling stages. When hardwood has formed there is no more damage done. Even should there be, such as he freezing of a few inches of top growth, it would but tend to make the plant still more bushy.

There are some large bushes of this orange in the Zoological Garden, Philadelphia, which are as bushy as they can be, and all through a natural process. Not only are the thorns spiry and rigid, but the branches are also of a stiff, unyielding nature. I do not hink any animal would go through a mature hedge of it.

It takes but a few years for a plant o bear its oranges, after which propagation is easy. The oranges are full of seeds, which grow readily preserved n a slightly damp state and sown in Spring. Where a large number of oranges are on hand place them outdoors to freeze and rot, then wash the seeds free.

This orange is all right whether as an ornamental or hedge plant.

Berry Bearing Aucubas.

Plants with green leaves and red berries have always been in demand at Christmas time and, no doubt, there would be a call for them as well at Easter. Among plants of this kind more to be seen to-day than heretofore, is the aucuba, a Japanese evergreen, hardy in sheltered places in the vicinity of Philadelphia. It is a plant which bears the male and female flowers on separate plants. Of the merits of the plant and its production, Gardening Illustrated has this to say:

"Small, compact plants of the various forms of aucuba, when well furnished with berries, are much valued in London during Winter for window decoration. The way in which they are hiefly obtained is by fertilizing, when in flower, old-established plants with male pollen, and then layering in light, andy soil, good-sized branches with bushy heads being selected for the purpose and pegged down. In a short time hey strike root, when they are severed rom the old plant, and in Autumn are ifted, potted and placed indoors to olor their berries. Standard plants are obtained by grafting on the common ucuba."

By having a lot of plants of both sexes in pots flowering at the same ime, proper fertilization could be effected, and in this way berried plants f large size obtained for decorative purposes.

To succeed with the aucuba outoors in Winter the plants need setting in a shady, sheltered place. I ave seen them on the south side of house, which gave them warmth, and n their north side was a group of large deciduous trees, which kept the sun from them. The plants went through Winter after Winter with not a leaf hurt. Though better when the temperature is regular at about the freezing point, heat is not so objectionable to the aucuba as is bright sunlight.

JOSEPH MEEHAN.

Chicago.

A Carnation Show.

The carnation exhibit at the club meeting on Tuesday night last was hardly compatible with the large glass area devoted to this flower in the vicinity of Chicago, a fact that proved a great disappointment to the promoters of the exhibition.

The J. D. Thompson Co. showed fine vases of their Enchantress, Apollo, Governor Wolcott, Mrs. E. A. Nelson, Mrs. Thos. W. Lawson, Estelle, Harry Fenn, Nelson Fisher, Mrs. M. A. Patten and Guardian Angel. W. N. Rudd sent The Marquis, Governor Roosevelt, Phyllis, and a white seedling, No. 15. J. F. Anthony staged a sport from Evanston, and a pink seedling named Alice C. Kennicott. Sinner Bros. had a vase of fifty of each of the following varieties: Sport, Mrs. Thos. W. Lawson and America. F. Dorner & Sons Co. exhibited several vases of seedlings, some of which were named and others only numbered. C. J. Reardon sent a vase of a seedling, No. 38. The Heller Bros., of New Castle, had a fine vase of their new rose, Franz Deegen.

W. N. Rudd carried off the prize for the best vase of fifty blooms with Phyllis, which scored, as judged here, 91 points. The J. D. Thompson Co. took the premium for the best vase of twenty-five blooms with Governor Wolcott; also the prize for the best collection of blooms.

The seedlings, as judged, scored as follows: W. N. Rudd's No. 15, a white, 87 points; J. T. Anthony's Alice C. Kennicott, 80 points; F. Dorner & Sons Co.'s No. 130, 90 points; No. 193, pink, 87 points. C. J. Reardon's No. 38, 70 points. The judges were F. F. Benthey and F. W. Timme.

At the club meeting the express rates matter was again considered, and a resolution passed that the S. A. F. be requested to take up and thoroughly investigate the legality of the express companies doing business in the United States. The secretary was ordered to send a copy of the resolutions to the secretary of the S. A. F., to be acted upon at the coming executive meeting.

W. N. Rudd requested that the money awarded him for premiums be used to go toward the starting of a special fund to have an open club room, with bowling alleys attached. Several other donations for such a purpose were made and a committee, composed of the following members, was appointed to take up the matter and solicit funds from those in the trade: W. N. Rudd, P. Foley, M. Barker, E. F. Winterson and F. F. Benthey.

The wholesalers report trade for the past month better than has ever been experienced before as regards prices obtained for stock. Christmas figures have been ruling for almost all fancy stock, with the exception of American Beauty.

Visitors in town: Fred. Breitmeyer, Detroit, Mich.; J. Bock, Burlington, Iowa; J. T. Anthony, Geneva, Ill., and Geo. A. Kuhl, Pekin, Ill.

THE AMERICAN CARNATION

Now on press. Write for particulars

THE FLORISTS' EXCHANGE, 2 Duane St., N. Y.

CHANGES IN BUSINESS.

MANAYUNK, PA.—Albert Schmitz has opened a greenhouse on Main street, this city.

LANSING, MICH.—Miss Agnes Talmadge has accepted a position in the florist establishment of J. A. Bissinger.

JENKINTOWN, PA.—Harry R. Rorer has taken charge of his greenhouses on Hillside avenue and Walnut street. The business will be run under the name or Rorer & Son.

LEWISTON, PA.—J. J. Hunt has completed his new store on the main street and will move into it at once. The store is equipped with all modern conveniences, with greenhouse and plant beds in the rear and dwelling house adjoining.

HARTFORD, CONN.—F. B. Fountain, who has for some time conducted a greenhouse on Court street, has purchased the business conducted by his father on Main street for 35 years in a similar line and will continue it in connection with his present place.

GREENVILLE, TEX.—The Greenville Floral and Nursery Company has been chartered with a capital stock of $5,000. The stockholders have elected the following officers: M. L. B. Seaman, president; R. L. Taylor, vice-president; R. H. Long, secretary and treasurer; Edwin Barlow, general manager. A. P. C.

COLORADO SPRINGS, COL.—W. H. Evans, carrying on a florist's business on Pike's Peak avenue, has purchased control of the Colorado Springs Floral Company and announces that the capital stock of the concern will be increased at once, and that important additions will be made to the company's greenhouses on Columbia street. The exact nature of the additions and improvements has not been determined, although it has been definitely decided that among them will be the erection of a show house 90 by 30 feet.

FIRES.

MELROSE, MASS.—Fire in the building in which the florist store of Justus Geist is located did damage to the extent of $1,000.

WANTED, by March, sober, experienced, practical landscape gardener; one who understands handling men; must be a worker. Steady place for the right man. References required as to ability. State wages. Address W. G. Eisele, West End, N. J.

WANTED, a young or middle-aged man of first-class ability and correct habits, as foreman in commercial nursery. One who thoroughly understands general nursery work. American preferred. Address, stating wages and previous experience, C. B., care Florists' Exchange.

WANTED AT ONCE, an all-around florist, understanding propagating of bedding plants, carnations, violets and general stock; must be active and sober. Starting salary $25.00 per month, with room and board. Apply with references, K. D. L. Niven, Monticello, N. Y.

WANTED, a good practical florist, married or single, on commercial place near Philadelphia; must be thoroughly experienced in the growing of general line of cut flowers and plants and furnish good reference as to character and ability. Address, with particulars, G. G., care Florists' Exchange.

WANTED, a grower of roses, including American Beauty, one who has unquestioned reputation and endorsements, to take charge of a new range of glass (100,000 sq. ft.) near Boston. A first-class opening for the right man. All applications will be treated in strict confidence. G. H., care Florists' Exchange.

WANTED at once, working foreman on commercial place. One who understands growing carnations, chrysanthemums, Easter and bedding stock; none but those with best of references as to ability and character need apply. Wages $50 to $60 a month, according to ability shown. Call on A. N. Towell, 1893 Amsterdam Ave., New York.

WANTED, by March 15, sober, industrious man, who understands growing ferns from seed; also filling dishes. No one else need apply. State wages expected. Also want at once good all-around man with correct habits; one who understands watering; must be a good potter; steady work. Address A. Leuthy, Florist, Perkins St., Rosindale, Boston, Moss.

$75.00 per month will be paid for a competent and successful propagator, especially of clematis, roses and soft wood shrubbery.

Also same wages to a man who has had long experience in grading nursery stock, filling orders and packing. Must be a No. 1 budder and grafter and with some experience in making soft wood shrub cuttings. Reasonable advance over these wages after ability is demonstrated. First-class commercial place.

Address F. G., care Florists' Exchange.

Wages $12.00. Address with references,

ROSE GROWER

Welch Bros., 15 Province St., Boston, Mass.

BUSINESS OPPORTUNITIES

FOR SALE, 5½ acres of fine land, with good buildings, etc., in a thriving village. Francis Brill, Hempstead, L. I., N. Y.

FOR SALE, new twelve-room residence, windmill, water tank, hothouse, barn and 14 lots; 30 minutes out; near station. Cheap. Call or address Thomsen, 231 Central Ave., Jersey City Heights, N. J.

FOR SALE OR RENT, first-class retail business, well established trade; store and greenhouses. Situated at one of the leading seaside resorts. For particulars inquire from S. S. Pennock, 1612 Ludlow street, Philadelphia.

FOR SALE—Well-paying florist establishment, at Grand View on Hudson, N. Y.; greenhouses and residence, several acres of land; well stocked; hot water heating; everything in fine condition. Address E. H., care Florists' Exchange.

FOR SALE, large range greenhouses, Chicago. Or would exchange for small range—East preferred. Parties who could run wholesale store would find it advantageous. Two or three might join; business is large enough. Terms easy. Address Mulford, Jefferson Park, Chicago, Ill.

FOR SALE—On easy terms, one of the best florist businesses in Northern New York; about 50,000 feet of glass; fine stock for wholesale and retail; 25,000 inhabitants and large surrounding territory; reason for selling, poor health. J. F. Greene, 110 Flower Ave. E., Watertown, N. Y.

FOR SALE, greenhouses, stock, and fixtures, invoiced $2,250.00. Good retail cut flower and funeral trade. Population 16,000. No competition. One of the oldest towns in Colorado. Coal enough to run all Winter; trade increasing. $1,500 cash takes it if bought at once. Good reasons for selling. Address F. A., care Florists' Exchange.

FOR SALE, a most desirable property consisting of two separate buildings, thoroughly equipped for floral culture. Also beautiful residence, and lot 200 feet front by 1000 feet deep. The entire property remodeled two years ago. Situated on Wethersfield Avenue, about 1½ miles from the center of the city of Hartford, Conn. Enquire of Thos. H. Bissell, 95 Ann St., Hartford, Conn.

FOR SALE—Old established florist business, 4⅛ acres of ground, 10 greenhouses, cold frames, 7-room house, barn, etc. Large cemetery opposite. Thirty minutes from New York City Trolley cars pass place; 36 years in present location. Entire property and business. Large field for wholesale and retail trade. Call and inspect, or address Mrs. C. M. Hutchinson, Elizabeth, N. J.

FOR SALE—Greenhouse plant within three miles of Chicago city limits; less than one-half mile from R. R. depot; 38,000 feet of glass; four acres of land; fully equipped; steam heated; well stocked. Growing fancy carnations and roses; half acre planted to peonies. Good wholesale trade, established direct with A1 retail florists within 300 miles of Chicago. Owner engaged in another business which forces him to move from city. Easy terms to responsible parties. For further particulars, apply to Box 1134, Milwaukee, Wis.

ENGLEWOOD, N. J.

MANHATTAN SUPPLY CO., 29 Park St., **New York**

Mention the Florists' Exchange when writing.

LILLIAN POND

THE grand new white Carnation. Far ahead of any white yet introduced. Large, heavily built flowers, very fragrant and an exceptionally good keeper.

It has given us thus far this Winter more flowers to the plant than White Cloud or Queen Louise and is bringing, in the Boston wholesale market, $5.00 and $6.00 per 100.

An early and continuous bloomer, strong grower, and lifts well from the field.

We shall show at the Brooklyn Meeting only average-sized flowers the same as we are picking and shipping every day and such as any grower will be able to produce with ordinary care. We have put this variety under no special teatment for this occasion.

Our large stock of 24,000 plants enables us to send out nothing but strong healthy cuttings.

All orders filled at short notice.

PRICES: 12, $1.50; 25, $3.00; 50, $5.00; 100, $10.00; 250, $23.00; 500, $37.50; 1,000, $75.00

FOUNDED IN 1888.

THE FLORISTS' EXCHANGE

A Weekly Medium of Interchange for Florists, Nurserymen, Seedsmen and the Trade in general

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter

Published EVERY SATURDAY by

A. T. DE LA MARE PTG. AND PUB. CO. LTD.

2, 4, 6 and 8 Duane St. New York.

P. O. Box 1697. Telephone 3765 John.

REGISTERED CABLE ADDRESS:
Florex, New York.

YEARLY SUBSCRIPTIONS.

To United States, Canada and Mexico, $1.00. To foreign countries in postal union, $2.00. Payable in advance. Remit by Express Money Order, draft on New York, Post Office Money Order or Registered Letter. The date on the address label indicates when subscription expires.

BINDERS.

The publishers can supply binders which will hold the papers for one complete volume, keeping them in perfect order for ready reference. Price, postpaid, $1.00.

ADVERTISING RATES.

Per inch, $1.25. Special positions extra. Send for Rate Card, showing discounts on continuous advertising.

For rates on Wants, etc., see column for classified advertisements.

Copy must reach this office not later than Thursday to secure insertion in issue of following Saturday.

Orders from unknown parties must be accompanied with cash or satisfactory references.

ILLUSTRATIONS.

Electrotypes of the illustrations used in this paper can usually be supplied by the publishers. Prices on application.

BOOKS.

The publishers of The Florists' Exchange are headquarters for all standard books pertaining to the Florist, Nursery and Seed Interests. Send 2c. stamp for complete descriptive catalogue.

FIRMS WHO ARE BUILDING.

NEW LONDON, CONN.—Lord & Burham Company will build for Morton F. Plant eight greenhouses with potting rooms and office.

SEATTLE, WASH.—Alfred Peterson will erect six greenhouses at 7014 North Fiftieth street.

The Lord & Burnham Co., Irvington, N. Y., and New York City, have contracted for the erection of new greenhouses for the following firms: Louis C. Pilat, Ossining, N. Y.; Mulroy Brothers, Rhinebeck, N. Y.; Chas. Buenning and Horn Brothers, Allentown, Pa.; W. L. Lewis, Marlboro, Mass.; John Burton, Philadelphia, Pa.; the Philadelphia Carnation Company, Philadelphia, Pa.; A. Fahrenwold, Roslyn, Pa.; C. Backer, Boston, Mass.; George H. Arnold, Bainbridge, Mass.; Edwin Gould, Jekyll Island, Ga.

Carnation Number.

The Florists' Exchange will, as usual, publish a complete report of the convention and exhibition of the American Carnation Society, which this year will be held in Brooklyn, N. Y., February 19 and 20. This full report will appear in next week's issue.

On account of the great interest always taken in this report, that issue will be an extra valuable one in which to advertise.

"Copy" must be in hand not later than February 19. No increase in advertising rates.

The Florists' Exchange,
Nos. 2 to 8 Duane Street,
P. O. Box 1697. New York.

COLORADO SPRINGS, COL.—The Broadmoor Floral Company announce that the consolidation which existed between the Broadmoor Floral Company and the Farm Greenhouses has been dissolved by mutual consent. The Broadmood Floral Company has again resumed business at the old stand, Broadmoor.

THIS WEEK'S SUPPLEMENT.

Acer Pseudo-Platanus.

Among planters the family of maples occupies a very prominent place, as it contains so many useful species. In nurseries the demand for maples is a continuous one, more of them being disposed of than of any other genus of trees. The taste for the different species varies. Time was when the A. pseudo-platanus, the European sycamore, was the most largely planted; then the sugar maple had its turn, while at the present time the Norway maple is the favorite.

The one we illustrate, A. pseudo-platanus, goes under the common name of sycamore maple. As usually seen, it has a broader spread than the one pictured; very much broader-topped when standing by itself, clear of other trees. As the picture shows, it is a grand shade tree, and really deserves more planting than it receives to-day. The Norway maple seems to have supplanted it to a great extent. What is considered by many an objection to the sycamore maple, is the persistency of the seeds on the tree all Winter. These seeds are in clusters, twenty-five or more in a bunch, and these clusters are rarely shed before Spring. When trees are young and growing vigorously few seeds are produced, but with age seeding is more pronounced.

The tree the photograph represents is one of many fine ones on the estate of the late William Walter Phelps, Esq., Teaneck, N. J. It is about 35 feet in height, and has been planted almost 30 years.

Like almost all maples, the sycamore has clean, smooth bark, and it is certainly nicely fitted for situations such as the one illustrated occupies.

In our own country the sycamore maple has a close representative in the Oregon species, A. macrophyllum. It has the same large leaves, larger, indeed, the same clusters of seeds, and much of the general habit of growth, being of a more round-headed outline—much more so than is the A. pseudo-platanus in the picture before us.

There are certain trees that prefer Spring planting, but the maples may be set either in Spring or Autumn.

JOSEPH MEEHAN.

AMERICAN CARNATION SOCIETY.

Varieties Registered.

PEERLESS.—Color, a most pleasing light pink, one shade lighter than that of The Marquis. Blooms measure never less than 3½ inches, and when fully developed 4½ inches in diameter; borne on long, stiff stems from 30 to 32 inches, holding the flower perfectly erect, of ideal form and substance. An exceptionally strong and healthy grower, and a splendid keeper.

ALBERT M. HERR, Secretary.

The American Carnation Society.

This year the American Carnation Society will hold its exhibition and meeting as an incorporated body. The show will take place in the Art Rooms, 174 Montague street, February 19 and 20, and the convention will assemble in the Germania Club, 120 Schermerhorn street, Brooklyn, N. Y., on Thursday evening, February 19, 1903.

It may be well to state the arrangements relative to admission to the exhibition made with the Brooklyn Institute of Arts and Sciences, under the auspices of the botanical section of which the show will take place.

On Thursday forenoon it is probable that most of the time will be occupied in staging the exhibits. On the afternoon of that day the members of the American Carnation Society and the trade generally will have the opportunity of viewing the display, the evening of Thursday being given up entirely to the members and friends of the Brooklyn Institute, who have decided to make a social full-dress function of the affair. This fact will also tend to stricter attention being given to the business meeting of the Carnation Society, which begins at 6 p. m. on Thursday, February 19.

On Friday, February 20, the exhibition will be open free to the general public. On the forenoon of that day, also, any unfinished business carried over from the previous evening will be disposed of.

As has been previously announced, no essays or papers will be read before the Society this year. It is expected that matters pertaining to the incorporation of the association, the formulation of a constitution and by-laws, and kindred subjects will consume most of the time of the session; and any special information desired on any particular subject can be secured through the medium of the Question Box.

A lecture on "The Carnation," illustrated by stereopticon views, many of them in color, will be delivered by President C. W. Ward, before the members of the Brooklyn Institute, on Wednesday evening, February 18, at 8:15 o'clock, in Association Hall, 502 Fulton street, Brooklyn. Delegates and others in the trade desiring to attend that lecture will secure tickets of admission in the building named.

Then, on Friday evening, February 20, at 7 o'clock, will occur the banquet to be tendered the visiting members of The American Carnation Society by the Brooklyn Horticultural Society, a body composed of Brooklyn and Long Island florists, who have carried out the preparatory work consequent upon the forthcoming meeting and exhibition. At this banquet ex-Lieutenant-Governor Timothy L. Woodruff, a resident of Brooklyn, will preside and officiate as toastmaster, and among the speakers will be gentlemen prominent in civic circles, as well as some well-known members of the trade, whose oratorical efforts have proved so acceptably enjoyable on previous similar occasions.

It may be well to remind intending exhibitors that all exhibits should be addressed to "William Plumb, Manager Carnation Exhibition, Art Gallery, 174 Montague street, Brooklyn, N. Y." Express charges on all exhibits must be prepaid.

Special tables will be provided for exhibits not intended for competition. New varieties may be displayed without charge by members of the Society. Non-members may exhibit varieties of their own origination by payment of an entrance fee of $2.00.

A very enticing list of premiums has been prepared, and all indications point to the best exhibition ever given by the American Carnation Society, which is saying a good deal.

The brethren in Brooklyn will make it as pleasant as possible for the delegates during their stay in the City of Churches, and expect to be the hosts of a large number at the banquet.

As to the next convention city, it is a foregone conclusion that Detroit will be chosen, as it deserves to be, having in mind the generous action of its delegates last year, in foregoing their claims in favor of Brooklyn. The next president will, of course, come out of the West; and we hear a worthy representative of the carnation industry in that locality is being talked of for that high honor.

Carnation Society's Show.

With the annual exhibition at the meeting of the American Carnation Society in view, there are a few points I wish to bring to your attention. In the first place, it will pay you to be present, and it will be only doing right to become a member of the society and by doing so help financially and otherwise to forward the interests of the American carnation.

The work of the Society has been very creditable, and yet that work is but just begun. The Brooklyn florists, with the assistance of their brothers "across the bridge," will do all in their power to make the meeting a success; and the exhibition will be worth a long journey. Such a display of bloom should be an inspiration to all, and we shall go home with the feeling that the field is large and there is room at the top.

Because your flowers at home, in many cases, do not compare favorably with those you have seen, do not be discouraged, for the blooms shown at the exhibition will be the result of a great deal of attention; and remember that they are the choicest among thousands and that they represent the possibilities of the various varieties rather than the general run. We very rarely find the quality of these exhibition blooms on the counter at the store; this is but natural, for the production of commercial carnations, where quantity as well as quality is a consideration is decidedly different from "babying" a few specimen flowers. Let the exhibition be an inspiration rather than a discouragement.

What we shall see is a matter of conjecture in many cases, but we shall meet a grand collection and no doubt make many new acquaintances.

In conclusion, yet me request Messrs. Dailledouze not to bring in blooms over six and one-half inches in diameter, and ask Mr. Ward if he cannot, among his many grand specimens, show us a good commercial scarlet, something we can all grow for quantity as well as quality.

W. R. PIERSON.

The S. A. F. Peony Association and Its Critics.

The following communication has been forwarded to us:

Editor Florists' Exchange:

Regarding the point raised as to the exact wording of Mr. O'Mara's motion which was made to give force to President Burton's recommendation that "the committee should have power to add to its numbers where desirable and to raise funds for the furtherance of the work under the sanction of the executive officers of the Society," Mr. O'Mara writes from St. Augustine, Fla., where he has been for the past few weeks: "I have forgotten the exact wording of my motion, but my intent was to have it so phrased that the committee then appointed would have powers to take all the necessary steps to fully and adequately carry out the intent and purpose of President Burton's recommendation. Personally, I am for whatever best conserves the general welfare of the S. A. F., and I cannot see any reason why the policy and plan of the Peony Association will not do that. If the Association does nothing worse than develop the peony and incidentally get members for the S. A. F., it should have little to fear from the executive board of the Society, or from the Society in convention assembled."

The printed proceedings of the Society did not appear until some time about Thanksgiving, and the committee had organized a month before that on the president's plan. Whether the intent of Mr. O'Mara's motion got confused in passing through the medium of the stenographer and printer is a question; but in any event it can easily be rectified at the executive meeting or at the convention.

The committee and its associated members have every reason to feel gratified at the cordial support and encouragement extended to them from all parts of the country, and they are sure they will be able to give a good account of themselves in Milwaukee.

Meantime a cordial invitation is again extended to every S. A. F. member and every peony enthusiast to do what they can to forward the interests of the peony and the Society. Secretary Stewart, or the undersigned, will cheerfully enroll any member of the Society in the peony ranks, free of charge, and also any outsider; provided, of course, that they first join the S. A. F.

GEORGE C. WATSON,
Sec'y S. A. F. Peony Assn.

That Ex-President O'Mara's motion in reference to the creation of a peony committee is correctly reported by the stenographer, as well as correctly published in the official report of the Proceedings of the S. A. F. for 1902, we ourselves can vouch for. It makes no difference what the intent of the mover of that motion was.

The stenographic record of the Proceedings was in the hands of the secretary of the S. A. F. long before it materialized in printed form. Each individual member of the Peony Committee must have been notified of his appointment on that committee before any "organization" of the committee could have been effected, and the extent and nature of the work of that committee, if the secretary did his duty, must have been communicated to the members thereof. That work to be regular must of necessity be in accord with the terms of the motion voted upon and passed by the Society in convention assembled. Therefore, any irregularities, the result of that committee exceeding the powers conferred upon it, must be repudiated by the Society when that committee makes its report.

It makes no difference whether each and every individual member of the S. A. F. should endorse, join in, and be a party to the proceedings of the alleged "Peony Association"; still, beyond all dispute and cavil, the "committee of nine" appointed by President Burton, in compliance with the motion introduced by Mr. O'Mara, and correctly reported in the official minutes of the proceedings of the S. A. F. convention held at Asheville, N. C., in August, 1902, had its duty to perform as "a committee of nine," and it has no right or authority, implied or expressed, to do other than the work which the motion set forth it should do. There is nothing, in fact, written or implied, nor any precedent which can establish the legality of any such association as the alleged "Peony Association of the S. A. F." born out of the committee of nine appointed by President Burton.

At Milwaukee this committee must report as a committee of nine, be recognized as a committee of nine, and its duties discharged as a committee of nine.

Nothing more, nothing less, and in no other form and in no other guise will its report be accepted and received.

The members of the Society of American Florists, when they meet in convention at Milwaukee in August, 1903, will, we doubt not, view this whole matter in its proper light and dispose of it in the manner in which it deserves to be, and must be, disposed of, individual opinions and futile attempts at condonation of a high-handed and unwarranted action to the contrary notwithstanding.

American Peony Society.

A meeting of the American Peony Society will be held in the Art Rooms, 174 Montague street, Brooklyn, N. Y., on Wednesday afternoon, February 18, at 2 o'clock, to complete organization and take up for consideration other important matters. All those interested in the peony are cordially invited to attend this meeting.

ALEX. WALLACE,
Secretary, pro tem.

Pandanus Sanderi.

Pandanus Sanderi was awarded a silver medal by the Newport (R. I.) Horticultural Society on February 4. This is the highest award in the gift of the Society, the secretary of which writes Henry A. Dreer, Philadelphia, the exhibitor, to the effect that the award committee considered Pandanus Sanderi a great acquisition.

Obituary

Andrew Jepson.

Andrew Jepson, a florist of Westfield, N. J., died at his home on January 30, 1903. Deceased was born in Denmark on September 13, 1848, and came to this country in 1872. He entered the florist business in 1884, which he continued until the time of his death. He leaves a widow and three children, the oldest of which is 6 years old; also his aged mother, now over 80 years, who was his constant companion in his greenhouses.

Mr. Jepson had been in poor health for the past year and a half, but the immediate cause of death was heart failure.

BUSINESS DIFFICULTIES.

BOSTON.—M. B. Faxon, seedsman, filed a petition in bankruptcy February 12.

New York Florists' Club.

The meeting on Monday evening, February 9, was rather sparsely attended. President Troy occupied the chair. Mr. Weathered reported the success of the annual dinner. Mr. Sheridan read resolutions of condolence on the death of Miss O'Mara, sister of ex-President O'Mara. He also explained in regard to express rates that Mr. May was preparing materials necessary to present the case to the representatives of the express companies, which would be done next month.

The treasurer intimated that a speedy clearing up of the Guarantee Fund matters would facilitate the paying of the premiums awarded at the last show.

Two new members were elected and one proposed.

Mr. O'Mara being absent, his motion to abolish what has been facetiously termed "the canteen," except on special occasions, was laid over. However, the feelings of several of the members on the subject were ventilated. John Birnie quoted from Solomon and Robert Burns in favor of the use of stimulants, and John Morris also tendered some fatherly advice on the desirability of sociability in the club, as well as in the home circle.

The club decided to have an outing to Witzel's Point Grove (the place where the last enjoyable similar affair was held) in the "good old Summer time," probably in the early part of July. A committee consisting of Wm. Elliott, John Birnie, Frank H. Traendly, D. Y. Mellis, H. A. Bunyard, S. S. Butterfield, and Jos. A. Manda, was appointed to make the necessary arrangements.

The president appointed Messrs. Butterfield, Stewart and Young as a committee to draw up resolutions on the death of Mrs. Hafner, mother of Lawrence Hafner.

President A. Herrington, of the Chrysanthemum Society of America, brought to the attention of the club the fact that that society would hold a show in conjunction with the American Institute of New York, in November, the date to be fixed later. He stated it was the desire of the society to have the finest exhibition of chrysanthemums ever given in this country, and to that end the co-operation of the various societies, such as the Morris County, Monmouth County, and Lawrence Cedarhurst, within easy distance of New York, had been solicited. It had been suggested, and in the case of the Tarrytown Horticultural Society the suggestion had been acted upon, that each local society offer prizes at the show, to be competed for by members of that particular society only. The Tarrytown Horticultural Society had offered premiums for 25 blooms in 25 varieties, for 12 blooms in 12 varieties, and Mr. Herrington thought it would be well for the other societies intending to co-operate to offer similar premiums, the object being that a sweepstake prize might be offered to be competed for by all of the societies. The subject was discussed by Messrs. Scott, Duckham, Butterfield, and others. A motion was passed that a committee be appointed to draw up classes with suggested amounts for prizes, and to present same at the next meeting. The president appointed on that committee: Wm. Duckham, John N May, and Eugene Dailledouze.

Mr. Morris called attention to a case of poisoning from Primula obconica, which had happened to himself, and asked for an antidote. Sugar of lead was recommended, as well as applications of hot water, as hot as could be endured, followed by an application of cold water.

Begonia Gloire de Lorraine.

Paper read before the Montreal Gardeners' and Florists' Club by C. Craig, gardener to A. Joyce, Esq.

The floriferousness and fine color of this gem of Winter begonias make it a general favorite; but, unfortunately, as is generally the case, when we get an extra-good flowering plant, its cultivation is not properly understood. To be successful with the plant, it must be grown rapidly, sustaining no check at any period.

Sturdy and healthy cuttings are the first essentials to successful cultivation. Some growers use leaf cuttings, but my opinion is that they grow too slowly. I prefer the young growths that spring from the base of the old plants. The cuttings should be about two inches in length. The best time to take these cuttings is between the middle of March and the middle of April.

As cuttings taken from the flowering plants at this time of the year will greatly detract from the beautv of the specimens, it is a good plan to strike some cuttings in July or August, and grow them on in boxes or in a shallow bench. These will produce an abundant supply of excellent material at the desired period. If, however, the grower has no other resource than his flowering plants, he must cut down some of these about the beginning of February and keep them on the dry side until the desired cuttings spring from the base of the plants. In the cutting-down operation care must be taken to leave at least 5 inches of stem, for, when the plants are cut back harder, the roots suffer such a sever check that they can never recover, consequently the plant dies.

Clean the propagating bench thoroughly; put in fresh sand, and use every other precaution known to you to destroy any fungus that may be lurking around.

A good and regular bottom heat in the propagating bed is a necessity. When the plants are well rooted pot them into 2-inch pots, using a soil composed of sand and leaf manure. Place them in a warm and moist atmosphere. The next potting should be into 3-inch pots, using the same kind of compost. Syringe lightly on fine days and shut the house down early, as the heat of the sun is much more beneficial to the plants than artificial heat.

If a suitable greenhouse is not at the disposal of the grower, a hot bed sufficiently strong to keep the atmosphere warm and moist during the night will answer the purpose equally well.

When the plants are well rooted in 3-inch pots, plant them out in a shallow and well-drained bench. Syringe lightly twice a day to keep the atmosphere moist. The plants must be exposed to no sudden chills or rapid changes of temperature. At no period of their growth should they be exposed to the unopposed rays of the sun. If these directions have been followed, the plants will be ready to lift by the end of August. This operation is a delicate one and must be performed with great care. The plants should be lifted with as little disturbance of the roots as possible; potted into 7 or 8-inch pots, or half pots by preference, as this begonia has a tendency to root near the surface. Use a compost composed of one-half good fibrous loam, one-quarter rough leaf soil, one-eighth dry cow manure, and one-eighth coarse sand. Don't pot too firmly, as hard potting is often the cause of the stunted growth so commonly seen. See that the pots are thoroughly well drained.

After potting, plunge the pots to their rims in a gentle hot bed, and shade heavily for a few days to give the roots a chance to regain their activity.

Some growers pinch the tops out of the shoots in the belief that they will get bushy plants thereby; this is an operation I don't believe in. If the plants have been properly grown, they will break naturally and will be in no way benefited by pinching. A plant that does not break from the base is a poorly grown plant; it will be weak and spindly, and pinching will probably kill it. My advice is: Don't pinch such plants; dump them, and grow better ones next year.

Another method much practised, that I don't believe in, is that of putting several plants together in the same pot. For the florist this may answer; several indifferent plants put together will sometimes make a salable specimen. For the private gardener this is a very poor practice, and is conclusive evidence that his plants are of an inferior quality.

We hear lots of growers complain that their plants flower so much during the Summer that they make little growth, and many resort to pinching off the flowers, in the hope that they may start away stronger. If the plants are in good condition, very few flowers will appear during the growing season. When staking is required, small wire stakes are much preferable to the ugly wooden ones so often seen.

When the plants are well rooted in their flowering pots, feeding should begin. Contrary to the generally accepted theory, when I start to feed I keep it up regularly, using a very weak solution each time, and water the plants. When using cow manure or night soil, the water should not be higher colored than brandy; other fertilizers in a like proportion.

If at any time the grower finds his plants are not drying out as quickly as he considers necessary, a dose of weak lime water will be very beneficial. When the plants have attained their full growth, or the desired blooming period is reached, feeding should nearly cease; a small quantity at intervals to keep the foliage in good condition is all that will be required.

The use of fertilizers on plants in pots is a most important question, and one with which every young grower who ever expects to rise in his profession, must familiarize himself. The young gardener who has been fortunate enough to have had the facilities to study agricultural chemistry is incomparably better qualified to undertake the responsibilities of a position as head gardener, with credit both to himself and to his employer, than the young man who is contented with saying, "Oh! Mr. So and So says this compost or fertilizer is all right, and if it is all right for him, it's good enough for me."

I would again impress upon the young gardener the importance of this part of his work. He must recollect that no two species of plants require the same treatment. If he has not the advantages that accrue from a knowledge of agricultural chemistry, let him lose no time in making himself familiar with at least the rudiments of this science, and he will be in a position to act intelligently, when he discovers that some of the plants under his charge are lacking in one or more of the elements essential to successful cultivation.

HAWARDEN CASTLE, SEAT OF THE LATE HON. W. E. GLADSTONE.

Practical Pollenation.

A writer says, in an English Exchange: "I have adopted a method of economizing pollen, the ordinary camel's-hair brush being very wasteful. If a stick of sealing-wax be rubbed briskly on the coat sleeve, as for electrical experiment, and then presented to the flower, the pollen flies to it and adheres. Every particle can thus be utilized far more easily than with a brush."

Fumigating Sweet Peas.

It has been said that no plant growing under conditions and in surroundings just right for its well-being will ever be preyed upon by insects. This no doubt is true, but it must not be supposed that plants growing under glass and made to produce flowers at a time when the sun stands low and the days are short, could ever artificially be placed in a situation demanded by its real nature. If the grower had it in his power to adjust and regulate altitude of sun and length of day as readily as degree of temperature and moisture, or condition of soil and amount of air, he would probably have no trouble with insects, and gardening, freed of this burden, would at once become an occupation delightful to the extent of perfect bliss. But, as it is, all plants grown in a glasshouse will suffer from the attacks of insect enemies under certain conditions—and the sweet pea furnishes no exception to the rule. To simplify the manner of imparting information I shall confine myself to the sweet pea as representing a class of plants easily injured by fumigation.

On sweet peas sown in February in the greenhouse and making and completing their most vigorous growth at a time when the days are getting perceptibly longer, I have never had any insects of any kind. But those sown in the Fall and blooming in Midwinter are invariably attacked and often entirely ruined, if not seen to. The green fly in this case does the most harm, although the black fly and even the red spider are occasionally bad. The principal causes are: too dry an atmosphere, sudden cold draught or too great a difference between night and day temperature.

If the sweet peas are grown around posts or in isolated places in a greenhouse devoted to carnations or other stock they would then be subjected to the same regular tobacco fumigation that is applied to carnations as a precautionary measure. This, of course, would kill the lice or keep them away from the peas, also; but the fumes of the tobacco will shrivel the foliage, discolor the flowers and destroy their odor. This may in some measure be attributed to the circumstance that the tender growth and flowers of these plants are far up close to the glass, receiving in that position the fumes directly from the fire, and so heated that it would hurt any plant, when by cooling it gradually sinks down and fulfils its mission, doing then no harm to plants.

To prevent this "burning" of the sweet peas I have found a thorough sprinkling of the vines just before fumigating to answer best, if tobacco is used—and nothing else should be used where sweet peas are grown. For instance, the gas generated from cyanide of potassium used on some places for lice would bleach leaves and flowers of sweet peas if not sprinkled; and if wet, the gas would unite with the moisture, resulting in prussic acid, which would kill the plants. The process, as first described, is the safest and altogether the best. Should the vines be badly infested with lice, one mild dose at a time is not sufficient to kill them, and fumigating must be repeated the next day and not discontinued until upon close examination of the surface of the soil under the vines it is found that every aphis is dead.

I also advise instead of fumigation the application of strong tobacco tea, a decoction made by pouring boiling water on a sufficient quantity of tobacco to give a dark brown, almost black color, to the tea, after standing about ten minutes. It should then be strained through a cloth and applied at once, hot as it is, through a sprinkling can. Wherever and whenever I made use of this it killed the lice and did not do any harm to the plants, but rather appeared to act as a stimulant. Hot soapsuds used in a similar manner are also effective, but cannot be used on sweet peas when in bloom. Many other insecticides I have tried, none as simple or as good as those just recommended, and some seemed rather to aggravate than to relieve the trouble.

FRED. W. TIMME.

Commercial Notes on Dahlias.

The dahlia has become a popular flower, and for decorative effects it is one of the best on account of its endless variety of color. It is also useful as a cut flower, and in my trade I have calls for fancy, show, and cactus varieties, as well as for pompons. The cactus sorts are the most popular of all.

The dahlia should. have plenty of room to grow in order to produce best results. I plant them 4 x 6 feet and change the location every year, as I have plenty of ground; but in cities where space is limited, it is impossible to do this. In the latter case, however, if the soil be made rich it will help matters considerably.

Never plant two hills of the same variety in proximity. In my experience when this has been done I found one would produce nothing but poor flowers. For example, plant Duke of Fife, dark red, which throws a perfect bloom, then Mrs. W. E. Gladstone, a delicate pink, and both will come perfect. This may seem strange, but it has occurred often in my experience of thirty years with the dahlia.

A poor variety may be improved if planted alongside of a perfect sort. This is on account of fertilization by bees.

Most of my varieties are imported from Europe every year. I find there is quite a call for good reds. I never make a display for exhibition of under a thousand flowers. The stems should be cut of good length and the foliage should be left upon them, as they look better and the flowers keep longer. The blooms should be cut two days before they are fully open; then they will not shed their petals so soon.

In shipping dahlias always use paper boxes. Place a little wet moss on the bottom of the box, pack the flowers one layer above the other until the box is filled; sprinkling each layer in the process of packing.

Out of a very large collection I have found the following among the best show varieties: Mrs. Morgan, pale ground, tinted purple; William Powell, primrose, yellow large; Golden Gem, rich golden yellow, edged with chestnut; William Rawlings, rich crimson purple; Florence Tranter, blush white, edged rosy purple; Defiance, dark scarlet; Goldfinder, yellow, tipped red; Nugget, orange, tipped scarlet; Penelope, fawn, shaded amber, tinted yellow; J. Cocker, dark purple; Duke of Fife, cardinal red; Constancy, yellow, tinged red; Mrs. W. E. Gladstone, lovely blonde; John Wyatt, crimson scarlet; Mrs. Kendall, white ground, tipped purple; Eclipse, scarlet; John Walker, white; H. Weir, yellow, tinted pink; J. T. West, yellow, tipped purple; H. W. Ward, yellow ground, edged and shaded with crimson; R. Dean, deep purple; W. Jackson, rosy purple; Miss Fox, blush ground, edged lake; Mr. Chamberlain, deep maroon.

In the fancy class, the best I consider are: Comedian, orange ground, flaked crimson; Lottie Eckford, white, striped purple; F. Pearce, rose, striped crimson; M. Campbell, buff, or apricot, striped crimson; G. Barnes, lilac, striped with crimson; Magnet, lilac, striped purple; Stanley, yellow, striped scarlet; Peacock, purple, tipped white; General Grant, orange and chocolate striped; Miss Browning, yellow, tipped white; Goldsmith, yellow, striped crimson.

Among the best cactus sorts are: Mrs. G. Sloane, pinkish terra cotta; Cinderella, bright purple, velvety shade; Cyle, rich ruby red, pale at tip; Flossie, pale coral pink, tinted with primrose; Ensign, bright crimson or crimson lake; Captain Broad, bright crimson or scarlet; Countess of Lonsdale, rich salmon, apricot, carmine pink; Mrs. L. Seymour, golden yellow, shading to pale rose; Delicata, delicate pink; Island Queen, pale mauve; Fantasy, brick red, curious shape; Laverstock Beauty, soft red or vermilion; Night, dark maroon; Standard Bearer, bright fiery scarlet; M. Stredwich, rich velvety maroon.

A beautiful new cactus variety is Progenitor, crimson lake; the ends of the petals shaped like a stag's horn. A very good decorative variety is Grand Duke Alexis, white with lilac tips. Black Prince is one of the best of the darker kinds. W. H. TARBOX.

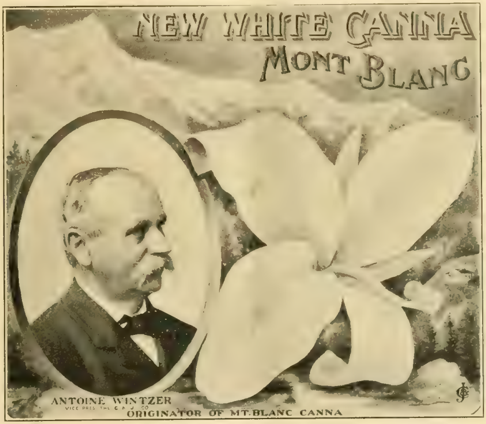
Conn.

Canna Mont Blanc.

We present herewith an illustration of the new white canna, Mont Blanc, with a portrait of Antoine Wintzer, of the firm of Conard & Jones, of West Grove, Pa., the originator. Mr. Wintzer describes the new canna as follows:

"This magnificent new canna is the result of eight years careful hybridizing, and is undoubtedly the finest white canna in existence to-day. Mont Blanc has a vigorous constitution and produces beautiful large spikes of lovely white flowers on strong branching stalks borne well above the foliage. It blooms early and continuously in the greatest profusion during the whole growing season until stopped by freezing weather. The foliage is bright glossy green, very large and handsome, and so thick and leathery that it is not often injured by rain or wind, while many of the weaker kinds are almost destroyed by Autumn storms. Mont Blanc is a strong, vigorous variety, producing fifteen to twenty flower stalks in season, and its great masses of snowy blossoms contrast so finely with the splendid crimson, pink and yellow varieties that it will be indispensable in all fine canna collections as soon as known and for many years to come."

Mr. Wintzer is also the originator of Buttercup, perhaps the finest pure yellow canna in cultivation. Also Philadelphia, Duke of Marlboro, Black Prince and other of the finest crimsons, now leading sorts. He has been equally fortunate with the highly valued pink varieties, and must also be credited with Maiden's Blush, Rosemawr, Martha Washington, Betsy Ross, etc. And later on Niagara, probably the grandest of all golden-edged cannas. Cherokee, a royal beauty, the most intense dazzling maroon ever seen. Queen of Holland, deep rich orange, the national color of Holland; Evolution, a wonderful combination of golden yellow, pink and rose, and many others almost equally beautiful, now catalogued by the leading houses in this country and Europe.



Asters.

Up to three or four years ago but very little business was done in cut flowers in Midsummer and early Autumn; the time from the first of July to the end of September being termed the "dead season" as far as that part of the florists' trade was concerned. This has changed greatly in the last few years; the dead season has become a very lively one, and the inevitable aster keeps grower, wholesaler and storeman busy indeed.

It is hard to say whether the increased demand for cut flowers at that time called out the aster to relieve the shortage of supply, or whether the aster created that demand; anyway, asters are raised and sold by the tens of thousands now, and at a time, too, when most of our best flower buyers are out of town, and those of the people not away have themselves front and back lots full of asters. The growing of some kinds of roses and carnations for Summer blooming as now practiced largely and which might reasonably be expected to lessen the demand for asters, has not had that effect.

Notwithstanding the fact that the aster as a cut flower is looked upon with derision and contempt in some quarters, as a source of profit the aster is not to be despised. However, the money which finds its way into the pocket of the aster grower is well earned nowadays. There was a time, and not long ago either, when it was no trick at all to obtain good seeds, raise a lot of sturdy plants, and have a field of fine asters. That is not so now. I know of no other plant, which in so short a time has been attacked by and been made a prey of fatal diseases and various insect enemies to such an extent as the aster. Many growers, after a hard fight for a year or two, have quit aster growing, while others, more patient and not so easily discouraged, have successfully overcome part or all of these troubles.

There are many points in favor of raising this flower. If well done, it meets a ready market and brings a fair price. The plant is very productive and the blooms last a long while after being cut and are produced at a time when returns without them would be meager, and when high-priced coal is not required to bring them out.

Of the different varieties of asters generally grown for their flowers, Queen of the Market is the earliest, and begins to bloom about the second week in July, after which come the following principal kinds, in the order here named: Comet, Daybreak, Purity, Truffaut's, Victoria, Upright. The latest is Semple's Branching, which comes into bloom from the 5th to the 10th of August and continues flowering until the end of September, but can be had later, if sown in June, which involves the risk of losing the flowers by early frosts, or by being crowded out of the market by the early chrysanthemums.

Queen of the Market may be sown now. For all other varieties it is time enough at the end of this month. Asters will bloom later than their regular time, if sown very late in the season, but you cannot make them flower earlier. There is nothing gained by very early sowing; they will bloom at their regular time, whether sown early or late. For instance, Semple's Branching, if sown in January, will not flower any sooner than those of the same kind sown in April; both will commence to bloom in the beginning of August. You can not coax and hurry up an aster. Besides saving a deal of extra labor by sowing the seeds of asters in March instead of January, we obtain plants that are not so liable to be cut off by stem-rot, and if my observations in this direction prove to be founded on fact, much is gained right at the start toward lessening the damage done annually by this scourge.

Stem-rot is the most troublesome of all the diseases that befall asters and defeats the best-laid plans of the grower, rendering his pursuit vexatious and often unprofitable. There are at least two distinct kinds of stem-rot. One is an infection of a local character, the decay of the main stem directly above the roots, caused by prolonged and too much moisture around the plant, sometimes by a worm, one-half to one inch long, light green in color (the aster borer), and often by an injury to the outer bark (skinning). Plants in all stages of their growth, small and large alike, may be carried off by this kind of stem-rot.

The other, far more serious, is the so-called dry-rot, a constitutional disease, said to be of a fungoid nature, though my examination, microscopical and otherwise, has never revealed any such growth. The process of decay begins with a drying and shriveling of a short length of side branch or main stem, and on examination we find that the tissue throughout that part has hardened and contracted, thus closing the cells and interrupting the flow of sap to the parts above this place, which are generally in perfect health, so much so that when cut off above the rot and put into water the stems will grow and live long enough to expand their flowers. This disease destroys the plants just at the time when they are full of fine buds, and likely it is identical with the stem-rot of carnations and many other plants.

As an experiment I planted 100 plants of carnation G. H. Crane on a small piece of garden, where asters had suffered badly from stem-rot the year previous. The carnations came from a batch of plants in the house, which, after rooting the cuttings, showed unmistakable signs of the plague, sufficiently so to make me care very little for these cuttings. But contrary to expectations, they grew to be fine plants, and when bringing them in in September I planted half of them as they should be planted and the other fifty, by way of further experimentation, I planted into the same bench, but very deep, their roots clear down to within an inch or so of the bottom of the bench. These last yielded a lot of splendid flowers all Winter. I lost not a single plant of them, while the other fifty brought inferior flowers and half of the plants died from stem-rot. Whatever inference is to be drawn from this ought not to be taken as conclusive until more trials on the same lines have been made.

A cure for dry-rot has not as yet been found, but as a preventive I have tried, and not entirely without success, the application of air-slacked lime, also gypsum (land plaster) on the surface of the land before planting, and once or twice afterwards, in a quantity sufficient to evenly cover the soil to the thickness of a knife-blade. The first kind of stem-rot in asters was thus overcome entirely and the other kept in check to a considerable extent. There may be other kinds of stem-rot. I am perfectly satisfied with the two.

Young seedling asters, when an inch in height, should be planted into 2 inch pots and planted out as soon as the land is dry enough to be worked in April about 14 inches apart in the row and rows about two feet apart. Asters do not care much for heavy manured land. An ordinary good garden soil on which other crops were grown in preceding years is the best for them. In newly broken sod land stem-rot and cut-worms combine to render aster growing a very troublesome undertaking. Asters are also cultivated under glass, but nothing is gained thereby. They do not bloom any earlier than those grown outdoors, nor are the flowers any better, if as good. The first or center bud should be pinched out as soon as formed; this increases the number of high-grade, long stemmed flowers.

The aster bug, which eats the petals of the flowers and, if allowed to, ruins the entire crop of a field in a few days, is worse in some seasons than in others, and sometimes bad in a field when none are to be found in a patch of asters not far away from the former. It often infests a certain spot in a field for days, then quits that and forages at some other corner of the same field, while the rest of the land remains clear of them. Much of this apparent caprice, however, depends upon natural causes, such as the vicinity of a neighboring aster bed, overrun with the bugs, or prevailing winds, etc. The only way to meet this trouble is to pick off the bugs and instantly kill them at their very first appearance. They are then in small numbers, and their destruction at the time is not a hard task. After patiently following this up for a few days you are generally entirely rid of them for that season. Merely shaking them off the flowers or plants does not avail anything; they will be at it again before your back is fairly turned. If the arrival of the advance guard is overlooked, or they are not attended to at once, the probability is that no salable flowers will be picked from that field.

There is no use trying to raise asters for cut flowers on a piece of land which cannot copiously and conveniently be watered. Last year asters were grown on any place and the market was flooded with all grades and shades of flowers, because it happened to be a very rainy season. The Summer before that was exceedingly dry, but it proved to be the very best season for those aster growers who were provided with sufficient means for watering their fields. A thorough deep hoeing around the plants during the Summer is necessary, commencing with this part of their culture as soon as the plants begin to grow fast, and sonoer if weeds have started.

Asters can be grown in shady places under trees and on the north side of buildings nearly as good as in locations exposed to the rays of the sun. The flowers of asters should be cut before fully expanded, or they will show the yellow center which excludes them from the first grade. In packing, they must be carefully handled, though they are not as easily bruised as chrysanthemums. Before shipping, they should invariably be kept standing in water for at least ten hours, and should always be stripped of the lower two or three leaves and nicely graded before being sent to market.

FRED. W. TIMME.

Ivory Soap for Red Spider.

Editor Florists' Exchange:

In your issue of January 24 there is an article by Mr. W. R. Pierson, in which he speaks of the use of ivory soap for red spider. We used the formula, as he gave it in the article in question, on our carnations, and there was no ill effects from it. But we also thought we would be on the safe side and use it on some other plants. The leaves of cineraria, calceolaria, smilax, Easter lilies and pelargoniums were badly damaged. It seemed to eat the tissue of the leaf, and skeletonize the part.

We do not by any means blame any one for this, but send the information to possibly prevent others from making a similar mistake. The work was done on our own responsibility entirely, as Mr. Pierson spoke only of using the soap on carnations. We will add, it was applied with a "Success" spray pump.

WATKIS & NICHOLSON.

Review of the Market

NEW YORK.—Business was anything but lively this week, and the fact of Thursday being a holiday—Lincoln's Birthday—did not seem to help matters much. Carnations are in excessive quantity, very considerably over the demand, not clearing out at all satisfactorily. The smaller grades particularly are being held over in numbers from day to day, and many of them get down to the dollar a hundred mark before they are finally disposed of. Fancy grade blooms do not, perhaps, lag quite so much as the others, though it is doubtful whether the average prices will be as good as they were a week ago, although the asking prices for small lots are about the same. While special American Beauty roses are far from being plentiful, they are in ample supply for all demands. It is getting quite difficult to dispose of all the short stemmed flowers of this variety that are coming in, however, and the prices on these grades are weaker than they were. Bridesmaid of the best grades are moving fairly well, better even than do the Bride; but in the number one and two grades, the latter variety is finding a better demand than the pink ones.

Bulbous flowers, such as Roman hyacinths, tulips and narcissus in varieties, are very plentiful, and although they do not clear out at all briskly, there has been no change in the asking prices. Lily of the valley is very much of a drug, and some have been sold at as low as one dollar per hundred. Lilies are of various grades of quality, and, while some will average $1.50 a dozen, there are others that do not bring more than eight cents each.

There is a regular supply of callas, for which there seems to be a fair demand, smaller blooms realize $1.00 per dozen, and the larger flowers $1.50 per dozen.

Lilac is not moving well at all, though the supply is plentiful and the quality is good. Violets are coming in in very heavy supplies and while the weather is reasonably mild, the bulk of them can always be disposed of, as the street men handle violets in great quantities, though of course the standard of prices is necessarily low. There are some days when the afternoon shipments approximate 250,000 flowers, and out of this vast number it is no wonder that there are many different grades. Young & Nugent had a bunch one day recently, in which all of the flowers were of immense size, twenty-five blooms making as large a bunch as would one hundred ordinary flowers. This particular lot of violets sold at five cents each, wholesale.

CHICAGO.—With an ever increasing supply the market is not so firm as at last writing, and, if bright weather should prevail for a few days, there is no doubt but there will be a further decline in prices. American Beauty roses are arriving in such limited quantities that the price is readily maintained for extra-fancy stock, $5.00 to $6.00 per dozen, while medium and shorts bring from $1.00 to $4.00 per dozen. Bride and Bridesmaid are more abundant than a week ago and the prices on these are not quite so stiff, although for extra fancy they run from $12.00 to $15.00 per 100, while other grades are selling at from $6.00 to $10.00 per 100. Golden Gate brings from $6.00 to $12.00, with a few extra fancy a shade higher. Meteor from $6.00 to $10.00, Liberty $6.00 to $25.00 per 100.

Carnations are arriving in larger quantities than at last report, and the supply is on the increase with all the growers. A break in the market may therefore be looked for at any time. Ordinary and inferior grades are sold at most any price the buyer will give, still there are not many sales reported below the $1.00 mark, while fancy stock is almost as high as at last writing, from $3.00 to $4.00 per 100. Standard varieties bring from $1.00 to $2.50 per 100, with $3.00 for white. Prosperity is selling at from $6.00 to $8.00 per 100.

Violets are in over abundance, and are hard to clean up at any price remunerative to the grower. From 60c. to $1.00 per 100 for ordinary and from $1.00 to $1.50 for fancy are the prices for violets. Some extra good stock is arriving on the market at the present time.

Bulbous flowers of all kinds are increasing in quantity, with prices not so firm as a week ago.

Daisies bring 60c. to $1.00 per 100, the latter price for Burbank's Shasta, which are coming in in limited quantities and are quickly bought up by the best retailers. Lilac is selling at from 75c. to $1.00 per dozen. R. J.

WASHINGTON, D. C.—Business has been very good the past two weeks. Lots of good roses are on the market. Azaleas lead in potted plants and bring a price from $1.00 to $15.00 each. American Beauty roses are scarce, at from $4.00 to $15.00 per dozen retail. Other roses realize $1.00 to $4.00 per dozen. [illegible] plants bring 75c. to $1.50 each; [illegible] roses 50c. each. Gude & Bro. have some nice lilac, which finds ready sale at $3.50 to $6.00. C. W. W.

BOSTON.—This week has witnessed no remarkable change in the market conditions. On Wednesday the demand seemed to fall flat, and there was more stock unsold than was the case for many weeks. The supply does not become much heavier except on bulbous stock. The conditions is entirely due to the lack of demand. Roses, though not much more plentiful than they were last week, did not sell quite so readily, though prices were held to those of the week previous. The demand for carnations fell off perceptibly and values dropped on an average about $1.00 per 100. It was difficult on Wednesday to obtain $3.00 per 100 for the same grade of stock which sold readily a week ago for $4.00.

Bulbous stock is much more plentiful, and has become druggy. Von Sion are selling at $2.50 to $3.00 per 100, and Trumpet Major and Princeps at from $2.00 to $3.00, with Golden Spur at $4.00. Tulips range from $2.00 per 100 for the short stemmed stock to $4.00 for the finest grade. Lilies are in good supply, at $7.00 to $10.00, and lily of the valley is druggy at $2.00 to $4.00.

Violets have become very plentiful, and are moving slowly at 50c. to 60c. per 100 for good stock, with inferior grade at 40c., while fancies reach 75c. per 100. Mignonette is only in fair supply, and is not especially good, fetching $3.00 to $4.00 per 100. Pansies sell well at 75c. to $1.00 per 100 and sweet peas do pretty well at $1.00 to $1.50 per 100. F. J. N.

MONTREAL.—The back of the coal strike seems to have been broken at last. Stocks are now coming in more freely. This, combined with milder weather, will no doubt, from now on, cause the price to keep on the downward move.

Flowers are still scarce; but, perhaps, white stock of the inferior kinds is a little more plentiful. Bulbous material is moving more freely than in past years, largely the result no doubt of the high price of the standard varieties. The quality both of tulips and daffodils is still below the average. Trade is quiet. For a couple of days the street cars were completely tied up, owing to a strike. This did not conduce to improve business conditions. B.

INDIANAPOLIS, IND.—Trade has not been quite so brisk during the past week and stock is still scarce. Bulbous flowers are coming in in quantities, and relieve the tension somewhat on carnations and roses. Both double and single violets are plentiful. As one large grower of violets expressed it, he wished single violets were out of existence, as just about the time his violet account rises to the right side of the ledger, single violets appear in every back-yard and are unfair competitors, both in quantity and price, to the double violets. Retail prices on roses are as follows: Bride and Bridesmaid, $1.50 to $2.00 per dozen; Liberty, $3.00 to $4.00 per dozen; Perle des Jardins, $1.50 per dozen; Meteor, $2.00 to $3.00 per dozen. American Beauty, $2.00 to $12.00 per dozen. Carnations are still rather scarce, good stock sells at $2.00 to $3.00 per 100 wholesale, 75c. to $1.00, retail. Tulips, daffodils, jonquils, Roman hyacinths, lily of the valley and narcissus sell at 75c. per dozen; freesia, 40c. per dozen; sweet peas, 50c. per bunch of 25. I. B.

CLEVELAND.—Trade is all that could be desired; flowers of all kinds are being sold out at good figures. St. Valentine's Day gives promise of a good demand, especially for violets. The week's quotations are: Roses, teas, select, $12.00 to $15.00, No. 1, $10.00; No. 2, $5.00 to $6.00, Meteor, $8.00 to $12.00; carnations, fancy, $4.00 to $6.00; good, $2.00 to $3.00; lilies, $15.00 to $18.00; violets, $1.00 to $2.00, lily of the valley, $3.00 to $4.00; tulips, $3.00 to $4.00; Double Von Sion narcissus, $3.00 to $4.00, Roman hyacinths and Paper White narcissus, $3.00 and $2.00; common ferns, $1.50 per 1000, adiantum, $1.00 per 100, galax leaves, $1.00 per 1000, asparagus, $50.00 per 100. Smilax is in good demand at $15.00 per 100.

G. W. S.

ST. LOUIS.—In the wholesale market stock is in fairly good supply and of good quality, the only marked shortage being in American Beauty, which are scarce and high in price, particularly those with long stems. Carnations and roses of the standard varieties are bringing respectively from $2.00 to $4.00 and $4.00 to $8.00. The average of good carnations can safely be put at 2c. to [illegible]. Violets are in good supply and demand. There is plenty of bulbous stock at usual prices. Some fine lily of the valley is seen, which goes for $4.00. There is nothing extra fine in sweet peas; $1.00 for these is the exception rather than the rule. All the commission houses report good trade, but they are not rushed. F. W. M.

DETROIT, MICH.—Stock is still very scarce, but all indications point to a better supply. Calls for roses and carnations have been very heavy, with not enough flowers to go around. White stock is still short. Lily of the valley and lilies are selling well. There is a big demand for greens. DILGER.

DENVER.—Trade is good despite the sudden change of weather to cold. Flowers are in fairly good supply, with the exception of roses, which keep very scarce. There is a good supply of tulips, daffodils, etc., which stock is meeting with very ready sale so far, and there is good reason to believe that these flowers will continue to be popular through the season. Lily of the valley is of good quality and generally sells well. The Park Floral Co. has some very pretty lilac bushes which make an attractive display at the store.

Potted plants are going well; pans of tulips, daffodils and hyacinths taking the lead. S.

New York.

The Carnation Show.

A meeting of the Brooklyn Horticultural Society will be held on Monday evening, February 16, in the Germania Club, 120 Schermerhorn street, Brooklyn. The coming meeting of the American Carnation Society, which occurs in Brooklyn next week, will probably be the largest affair that Society has ever had. It is estimated that about two hundred carnation men from distant points will be present, and there will also be a big attendance of home growers. The exhibition will no doubt be unprecedented, and under the careful management of Wm. Plumb the staging and arrangement of the exhibits are sure to be done to the best advantage.

News of the Week.

At the Florists' Club meeting on Monday night there was on exhibit an ardisia plant from the home of Mrs. J. H. Troy, New Rochelle, N. Y. While the plant was a fair specimen, carrying clusters of bright scarlet berries, and foliage of a healthy green color, the most interesting feature was the card that accompanied it. That card stated that the plant had been kept in the president's home since October, 1901, and had been a decided ornament ever since, with but little care.

Frank Weinberg, Woodside, Long Island, was also an exhibitor, showing two hybrid cypripediums and one plant of C. insigne. The committee awarded a cultural certificate in the case of the ardisia, and honorable mention to the orchids.

R. Shannon, a Brooklyn retail florist, was one of the passengers on board the Madiana, which was wrecked on the reefs off Bermuda coast, on Tuesday. The vessel was a total loss, but, happily, all the passengers were saved.

The Farmers' Club and Horticultural Section of the American Institute held their monthly meeting on Wednesday afternoon in the Berkeley Lyceum. James Wood addressed the members on the subject of "Forcing Vegetables for Home Use." Immediately after the meeting the Horticultural Society of New York convened and discussed "Plant Breeding at Present, and in the Future," the subject being introduced by C. L. Allen, of Floral Park, N. Y.

John Scott, wholesale grower, Keap street and Flatbush, Brooklyn, recently purchased an extensive collection of cannas from C. W. Ward, of the Cottage Gardens, Queens, N. Y.

Wallace Gomersall has resigned his position as gardener to Winthrop Sargent, Esq., Fishkill-on-Hudson, N. Y., and has accepted a similar position with Wm. D. Guthrie, Esq., Locust Valley, Long Island. F. E. Whitney, who has been the grower for F. & G. Traendly, Rowayton, Conn., has taken the position vacated by Mr. Gomersall.

The holiday on Thursday did not prove of any benefit to the flower business, there was very little doing. The weather was mild and genial, and flowers accumulated heavily in the hands of the dealers, so that when Friday morning came there was a general break in prices, and the top figures quoted elsewhere on American Beauty are not applicable to Friday's business, specials being offered freely at 50c. each on that day.

There is some talk among the prominent growers and wholesalers in the city of getting together and putting up a large building in which all of the city's wholesale flower business can be conducted.

Carl Jurgens, Newport, R. I., remained over in the city a day or two on his way home from Florida, where he ha been spending the last few weeks.

At the annual meeting of the Boar of Managers of the New York Botanical Garden, held January 12, 1903, provision was made for the establishmen of scholarships of the value of $50.00 a month to each person to whom such privileges may be granted. The scholarships are designed to meet the needs of professors or instructors in colleges officers of museums, or other botanists of equivalent training or experience who desire to utilize the facilities o the Garden for continuing investigations already commenced, or for carrying out investigations which require facilities additional to those at thei command at home.

Cleveland.

News Notes.

We are having very fine weathe for this season of the year, and the temperature is just below the freezing point. The bright, sunny days are telling on all flowers, and the quality and color are improving to a marked extent. The increased cut that the weather has a tendency to produce does no seem to be noticeable on the market, as all stocks are being sold out clean.

A wholesale flower market was the topic of much discussion at the club meeting last Monday night, and by the way things look at this writing a market will be a reality before long.

Isaac Kennedy, vice-president of the S. A. F., is laboring diligently with the express rate problem, and as this gentleman is an enthusiastic worker, his efforts should be crowned with success before long. Should any one in this locality have any suggestions to offer please address Mr. Kennedy.

It is reported that John Lauchner, of Rocky River, has closed part of his range of glass on account of the high price of fuel.

The Cleveland Market Gardeners and Producers' Association held a meeting on February 7. The association will be managed on a business basis, and while for the present it is simply aimed to procure better accommodations for market gardeners at the present market houses it is intended that funds be collected with a view to erecting a market house for the exclusive use of, and to meet the needs of, the market gardeners. A constitution and by-laws were read by G. A. Tilton, who drafted them, and after some discussion, during which a few amendments were offered, the laws of the association were adopted.

The officers elected were: S. B. Chester, South Brooklyn, president; L. Zeager, Rocky River, and T. W. James, Parma, vice-presidents; W. A. Potter, Rockport, secretary; T. Peterson, Rocky River, treasurer. An executive committee of five members will govern the affairs of the association. Meetings will be held once a month for the present, the next meeting being Saturday, March 7.

Ben. Hart is the happy father of a new daughter, and the first. Congratulations are in order.

D. T. Connor, representing Lord & Burnham Co., of New York, was in town this week looking after the wants of intending builders.

Mr. Hovarth, the forester of our park system, reports the arrival of a baby girl recently. Mother and daughter are both doing well.

J. M. Gasser has left for an extended trip for his health. G. W. S.

Hartford, Conn.

Club News.

The Florists' Club held a well attended meeting Monday evening in Treasurer Wirth's office, Bushnell Park. There was a long discussion on the question of the increased express rates on cut flowers; in fact, this subject has been the chief topic at the meetings lately. Peter Zuger, gardener at the Elizabeth Park greenhouses, showed twenty-five very fine carnations, among which were Elm City, Norway, Alba, Lucile, Lorna, J. H. Manley and Cressbrook. Two new members were elected. The following questions were taken from the question box and a lengthy discussion followed: What is the best method of growing asters for outdoor display, and which varieties are best adapted for the purpose? Which palms are available for sub-tropical effect outdoors, considering the fact that said palms would have to be kept over Winter in a moderately lighted building in a low temperature of from 40 to 50 degrees? It was voted that both questions be referred to Mr. Huss to be answered in writing at the next meeting.

Canadian News

Hamilton, Ont.

Not much has occurred worthy of ention this week excepting the arrival f the advance guard of the ever-in- reasing flock of Holland bulb men

Prospects are very bright for a brisk emand for plants of all kinds. Cut owers are keeping up very well in rice and the supply seldom equals the emand in any line—an unusual state f affairs from the growers' point of iew.

Taking advantage of the mild weath- r in the early part of the week, a few f the market men were at their stands n Tuesday. They made quite a dis- lay and a fair amount of business was one, though the ground was coated ith snow—rather chilly surroundings r greenhouse plants.

John H. Tilden is chairman of the 'arks Board this year. He is a public- pirited citizen, and will no doubt do istice to the Hamilton parks.

At the next meeting of the Florists' lub, which will be held on Tuesday, he 17 inst., the matter of the advisa- ility of raising retail prices and the iethods of maintaining them will be ully discussed. President Fred. Turner xtends an invitation to every member f the local trade to attend, whether iembers of the club or not. This is a uestion in which every one should urely be interested. The meeting will egin promptly at 8 o'clock.

Dave McLeod has a fine stock of bed- ing plants, every available foot of ouse room being well filled.

orticultural Society Meeting

On the 10th inst. the Horticul- ural Society was addressed by Frank . Shutt, the chemist at the Central xperimental Farm, Ottawa. The topic 'as "Plant Foods." Several members f the Florists' Club were present. Mr. hutt handled the subject in a way hat showed he was on well-known round. His views are practical in very way, and the lecture was, I think, ppreciated by every florist present.

Montreal.

uebec Provincial Chrysanthemum Show

There is much speculation as to vho are the parties interested in this ffair. The majority are of the opinion hat no such a show is, or has been, ontemplated.

issolution of Partnership.

Messrs. Lucas & Burrows, florists, f Montreal and Lachine, have dis- olved partnership, and the Guy street tore has been closed. Mr. Lucas will perate the greenhouse alone.

he Club's Euchre Party.

This social affair is progressing ery favorably, and a banner crowd is ssured.

orticultural Lecture at Lachine.

Professor Coard, of the Dominion epartment of Agriculture, lectured on Soils and Fertilizers" at the Town all on the 6th inst. The lecture, al- hough containing much splendid mat- er, was altogether too technical. Hopes re entertained of getting the depart- nent to issue the lecture in bulletin orm; the many formulae, etc., will e very valuable, especially to the rade. The second lecture of the series vill be held on the 20th, when James McKenna will give an essay on "A Few ood Perennials," and A. Wilshire one n "The Window Garden." The secre- ary one on "Seeds and Seedlings."

B.

Toronto.

The industrial exhibition has appoint- d Dr. J. O. Orr as manager in the place f Mr. Hill, who has resigned on ac- ount of ill health. The doctor is emi- ently fitted for the position. The board f the exhibition has recommended that wo delegates from the Canadian Horti- ultural Association be acepted as dele- ates to the board. John H. Dunlop nd Herman Simmers have been ap- ointed to the position.

The meeting of the executive commit- e of the C. H. A. will be held on the norning of March 6. A large repre- entation is requested, as considerable mportant business will be taken up. he session will be held in Mr. Dunlop's tore.

T. M.

Halifax, N. S.

We have had a pretty cold spell for the past week or so, which, of course, had made it very hard on our coal bills. Business has been good considering the bad weather. White stock is pretty scarce, owing to the deaths of a few well-known citizens. Our people down here haven't got used to color in their designs yet, but we are bringing them to it a little at a time. Prices remain about the same as at Christmas. Freesia, daffodils, hyacinths, azaleas and primulas are selling well, also small palms, rubber plants and Boston ferns, which bring good prices. It comes hard on some of the small dealers in not being able to get coal, but outside of that things are as good as can be expected. We are all looking forward to a big Easter trade. Christmas business was the best we have ever had here—away ahead of that of other years.

F. H. B.

THE MARKET

TORONTO.—Business continues good, with roses and carnations rather scarce. Medium carnations and violets are plentiful and bulbous stock is becoming very abundant. Flowering plants are selling fairly well at retail, but the wholesale price is often very low. Palms, also, are sold at such a low rate that one wonders whether the European grower ever gets anything for them. Our department stores have several times this Winter sold palms for lower prices than they are quoted at in Europe at wholesale. Some of our retailers are complaining about the price of roses, but they are the only flowers that are dearer than in former years, and the values on them will come down when we get some fine bright weather.

The worst of the coal trouble is over here. Hard coal can now be bought for $8.00 per ton, delivered, and there appears to be plenty of it in town. The weather is soft and warm, but not generally bright. All feel that the worst is over.

T. M.

MONTREAL.—American Beauty, extra $50.00 to $60.00; No. 1, $40.00 to $50.00. Bride and Bridesmaid, fancy special, $10.00 to $15.00; No. 1, $6.00 to $8.00; Golden Gate, $10.00 to $15.00; Liberty, $12.00 to $15.00; Meteor, $8.00 to $15.00; Mrs. Pierpont Morgan, $10.00 to $15.00; Perle des Jardins, $7.00 to $10.00. Carnations, standard varieties, white and pink, $3.00 to $5.00; red, $4.00 to $5.00; fancy $6.00. Asparagus, $25.00 to $75.00; callas, $10.00 to $12.00; daffodils, $2.00 to $4.00; freesia, $2.00 to $3.00; hyacinths, $2.00 to $3.00; lily of the valley, $3.00 to $4.00; mignonette, 3.00 to $5.00; narcissus, $3.00 to $4.00; smilax, $25.00; tulips, $3.00 to $5.00, violets, $1.00 to $2.00.

B.

Cincinnati.

The Week's News.

At last we are having a few days of sunshine, which will no doubt increase the supply of cut flowers in all lines. The demand still remains good, and stock of all kinds is scarce. Roses and carnations have both been at a standstill for a long time, and with the high prices of coal and heavy express charges this condition has not been very encouraging to the grower, although prices have held up well all during the season.

As the time draws near for the annual meeting of the American Carnation Society, more interest seems to be manifesting itself. We shall have two or three representatives from Cincinnati. They will probably travel over the B. & O., as this line goes through Oakland; and Messrs. Weber & Sons' greenhouses always have an attraction to the Cincinnati contingent.

Last week a party of Cincinnati florists visited Richmond, New Castle and Lafayette, Ind., and they give some glowing accounts of what they saw, and especially of the new carnation, President McKinley.

Meyer Heller was a caller last week, and says his firm is booking lots of orders for the new yellow rose, Franz Deegen. He also says their American Beauty roses never looked better, and will be in good crop again in a week or so.

Fred. Weltz, of Wilmington, O., was in the city, also a representative of Benjamin Hammond, the slug shot man.

E. G. GILLETT.

Philadelphia.

Tone of Trade Improved.

A much brighter tone has prevailed throughout the trade the past week. The grower is practically on the safe side now as to coal, in fact, the dealers are already hunting orders. The rose grower is cutting a good many more flowers with longer stems than last week. The retailer has a good, steady transient business, with, daily, a greater variety of cut flowers and blooming plants. The seedsman is getting a heavier mail every day, and already commencing to work later.

General News.

Henry F. Michell is now installing seed bins, compartments for packets of seeds, etc., on the third floor of his store, utilizing a space of 120 feet deep. This is for a general order filling department. There is a packing counter, with spaces in front of it, for all sizes of bags, cartoons, etc., the remainder of the space is fitted with bins at the bottom, each with spring hinges, so that they are self-closing. Above are spaces for pint and quart packages, and, above these, compartments for packets. Each kind of seeds has such space allowed as the number of varieties require, the whole being made up very compact and convenient, so as to greatly facilitate the rapidity and correctness of filling of orders. This department will be in operation next week and will greatly relieve the general store floor, allowing more space for display and utility of handling the daily increased transient trade.

Pennock Bros. had a very pretty church wedding decoration the other day at Wissahickon Heights. It was composed chiefly of genistas and white lilacs, which harmonized very well with the natural brick walls of the church.

The number of stall renters at the flower market is still increasing. Two more growers have lately joined the ranks. All stocks of flowers are selling well here. A good supply of long-stemmed American Beauty and tea roses was on hand Thursday, and among the novelties a vase of pink chrysanthemums, which sold quickly.

There appears to be too much lily of the valley in this market; this stock has been on the street every day this week.

Both growers and commission men assert that narcissus have sold better the last six weeks than for several years past.

DAVID RUST

Boston.

Massachusetts Horticultural Society.

The orchid displays were the features of the exhibition at Horticultural Hall on Saturday. Two very fine exhibits were staged, one by J. E. Rockwell, the other by Col. Chas. Pfaff. Both were extensive and varied. Col. Pfaff won the first prize, a silver gilt medal, and Mr. Rockwell received a silver medal as the second prize. Col. Pfaff showed a few very fine pots of freesias, and Mrs. Gill staged a bunch of freesias. Norris F. Comley exhibited quite a nice collection of violets, including Lady Hume Campbell, Marie Louise, Neapolitan, Imperial, Princess of Wales, California and La France, and easily won first prize. There were no entries in the class for carnations.

The Gardeners' and Florists' Club was again unable to get a quorum for the meeting called for Tuesday last.

Hans R. Werdmuller, foreman for two years for W. W. Edgar, will shortly take a trip to England for a few weeks.

The Lillian Pond carnation continues to be one of the best white varieties coming into the Boston market.

Lawrence Cotter has worked up a fine lot of Mrs. Lawson cuttings.

The Boston delegation to the American Carnation Society's convention will leave Wednesday of next week, though from present indications quite a party will go on Thursday night and spend Friday in New York.

Denver.

News of the Week.

Our beautiful Summer weather, of which we were bragging about a couple of weeks ago, suddenly turned to Winter, and we have had a pretty cold week, the thermometer reaching zero every morning. The sudden change has had no material effect on trade.

Mrs. R. Mauff, of Capitol Hill, is adding a new range of glass at her Harmon place, to be devoted to American Beauty roses. The range will be 100 feet long by 45 feet wide, and open right through, instead of making separate houses.

For the past few years Al. Mauff who has charge of the place, has been very successful with American Beauty, and thinks now, with things more up-to-date, he can do better.

There are a good many flowers of this rose grown in and around Denver, but the market for them here is very good, nearly all the time, so that the home product does not meet the demand, a good many coming in from Council Bluffs.

Nearly all the carnation growers have come to the conclusion that Enchantress is a good thing, for it will be liberally planted this coming season. Gus Benson and the Park Floral Co. will grow it quite heavily, but from what we have seen of it, they won't miss the mark very much.

Mr. Benson will also go back to Prosperity. Last year he planted a big batch of this variety, but like others, found it did not produce profitably, and this year, rather than discard it, he grew only a dozen plants, which he finds have done so well that his faith in Prosperity will prompt him to plant up fifteen hundred. He says he thinks he can do it right now, but must have a good price for the flowers.

Adonis will be another one of his leaders, discarding G. H. Crane. For white he will grow Governor Wolcott and White Cloud. The latter, he says, is too good to discard when done well. Mrs. Lawson continues in favor with him and will be grown in about the same quantity as this season.

Arnold Ringier, representing W. W. Barnard & Co.; C. F. Meyer, of New York, and Mr. Ward, representing [illegible] of New York, were recent visitors calling on the trade.

S.

SALT LAKE CITY, UTAH.—Schwarz & Heinecke have opened a flower and seed store at 61 East Second street.

HOOPESTON, ILL.—J. Sexstrom has bought a tract of land in Momence on which he will [illegible] greenhouses and enter the florist [illegible]. Mr. Sexstrom was formerly [illegible] landscape gardener [illegible] the E. I. H. I. at Kankakee, then entered into partnership with Peterson at Hoopeston where he has remained the past two years.

A. P. C.

Horticulture, Old and New, in Brooklyn, N. Y.

From an article contributed by Alex. Wallace, editor of The Florists' Exchange, to the Brooklyn (N. Y.) Citizen of February 1, on the subject of old-time horticulture in the City of Churches, the meeting place of The American Carnation Society in February 19 and 20 next, we make the following extracts:

To old Brooklynites the coming carnation show will recall the magnificent exhibitions given by the original Brooklyn Horticultural Society under the presidency of that public-spirited citizen, Mr. John W. Degrauw. And by a strange coincidence the present flower show occurs in the same month in which that society was organized, almost half a century ago, that event having happened in February, 1854. The society was incorporated two years later. The two earliest exhibitions of the Brooklyn Horticultural Society were given at the Athenaeum in April and March of the same year, when grand displays of rare plants and flowers were made from the conservatories of the gentlemen connected with the association and by the local florists. Many exhibits also came from distant points, some from as far away as Albany, N. Y., an old-time florist of the Capital City competing here with his then but little known New Holland and Cape plants. Similar exhibitions were continued until the Civil war, when more weighty and absorbing matters occupied the attention of our citizens than the peaceful pursuit of growing and admiring beautiful plants and flowers. The society passed out of existence at the close of the war, since which time no extensive floral exhibition has been held in Brooklyn.

In 1878 the Brooklyn Botanical Society gave a flower show in the Thirteenth Armory, corner of Atlantic and Flatbush avenues, which was opened by the Rev. Henry Ward Beecher, who spoke of the then growing interest in horticulture among the people of Brooklyn, and predicted that every flat building in the city in the near future would have its conservatory attached, which would be the common property of the tenants to enjoy.

During its existence the Brooklyn Horticultural Society did some excellent work in fostering a love of plant and flower culture among our citizens. It chose as its motto the words of Temple, as follows: "As gardening has been the inclination of kings and the choice of philosophers, so it has been the favorite of public and private men; a pleasure of the greatest and the care of the meanest; indeed, an employment and profession for which no man is too high or too low." In its latter days the society had some 500 members on its roll. Through its instrumentality a botanical garden was created, known as "The Hunt Horticultural and Botanical Garden." It was "the cherished design of that society from the first to bring about the establishment, within or near the borders of our city, of an institution kindred in its nature and objects to their own, and by means of which the accomplishment of their department in the work of developing and perfecting the art of horticulture might be greatly facilitated."

The prime movers in the botanical garden matter were Mr. John W. Degrauw and Mr. William S. Dunham, president and treasurer of the Brooklyn Horticultural Society, and through the liberality of Messrs. Thomas Hunt, E. C. Langley and A. Kent, who together contributed sixteen acres of ground for the purpose besides subscribing largely to the stock of the institution, the garden finally materialized. It was located between Fifth and Sixth avenue, and Fifty-seventh and Sixtieth streets. Here the originators hoped to found a garden that would contribute its fair share to the cultivation of a love of the beautiful and confer enduring honor, not only on its projectors, but also on the city that gave it birth.

Unfortunately, the enterprise died aborning, as Mr. Degrauw states, "in consequence of a desire on the part of a donor of the land to erect a building thereon that would require a large part of the subscriptions. The project was abandoned and the land and money were returned to their givers."

The people of Brooklyn, from the earliest period of the city's history, have exhibited a fondness for the cultivation of garden products. The favorite flowers of the first settlers were roses and tulips, the latter more particularly among the Dutch farmers of Kings county, who carried with them from their native Holland to their adopted homes in the Western country their love of the popular bulb.

It is particularly interesting at this time, when the United States government is seeking to establish in some of the Pacific States the industry of growing flowers for perfumery purposes, to know that eighty years ago the cultivation of roses for distilling uses was carried on upon a small scale in Brooklyn. Judge Furman records in his notes that Mr. Rymer Suydam, of the town of Brooklyn, had sold during the Summer of 1823, up to June 20, 300 pounds of rose leaves from off his place, at 18¾ cents per pound, and expected to sell 100 pounds more before the close of the season. Mr. John Cowenhoeven, of the same town, had sold from his garden 30 pounds, but did not give any particular attention to the business.

The perfumery manufacturer at that remote period was one John Valentine Swertcope, a Hessian, who owned a large garden and orchard opposite the present Johnson street. He had been an armorer in the British service, and made a living repairing the guns and pistols of his neighbors in Brooklyn, where he had decided to locate. Swertcope was the inventor of the air gun. This canny Hessian "did a considerable business in the distilling of rose water. The proprietors of the gardens brought their crop of leaves to him. He returned half the yield of rose water, reserving the other half as payment for his services in distillation."

John Jackson, who purchased the Remsen estate in Wallabout, in 1791, developed a large taste in horticulture, and had an extensive greenhouse, probably among the first structures of its kind to be erected in Brooklyn.

Another notable garden of the olden time was that of Hezekiah B. Pierrepont, located where Clinton and Joralemon streets are to-day. This garden had been extensively planted with fruit trees and flowers by the former owner, an Englishman, and as Mr. Pierrepont was an enthusiast in horticulture, the garden and orchard were continued and well cared for. Many rare and valuable plants were cultivated and acquired by exchange with gentlemen of similar tastes in all parts of the country. It is related that James Wilson, Mr. Pierrepont's gardener, was the first to cultivate the dahlia in American gardens, he having surreptitiously secured the seeds of the plant at an agricultural fair in England before coming to this country. The first appearance of this now popular Mexican plant in Mr. Pierrepont's garden robbed Dr. Hosack of a good deal of pleasure in his possession of the dahlia in his famous Elgin Botanical Garden, in New York, the doctor having up to that time considered that the first specimen of the plant in the United States had been grown and flowered by himself.

To a Brooklyn gardener, also, must be ascribed the credit for having grown in this city the first garden strawberries sold in the New York market. This was Bob DeBevoise, who operated a market garden on the ground where Columbia street now is, at the beginning of the last century. Previous to that time the cultivated strawberries had been supplied to New York from points in New Jersey; but about 1800 to 1802 DeBevoise commenced their systematic cultivation, sending the berries to market in crockery bowls. These sold at the rate of two shillings per pint bowl. He was in himself a cultivated strawberry trust, enjoying the monopoly of the market for this luscious fruit for about three years, when he gave some of his plants to Swertcope, who had purchased an adjoining farm, and that individual, too, with characteristic industry, soon made strawberry growing a paying business.

It was in Brooklyn also where lived the man who was primarily responsible for the inception of the seed business in New York City. His name was George Inglis. He sold the plants and flowers cultivated by him in the Fly market in New York, where he made the acquaintance of Grant Thorburn, then working at his trade of a nailer. Thorburn entered into an arrangement with Inglis that the latter should grow and supply him with flower seeds, which he did, Grant Thorburn, starting as a retail seedsman in 1802, at Nassau street, being the first to engage in that business in New York.

Brooklyn has also the credit of having had as one of its citizens a gentleman who may rightfully have claimed the honor of having been the first landscape gardener in America, in the person of M. Parmentier. He operated a nursery and garden establishment on a tract of twenty-five acres lying between Jamaica and Flatbush roads (present Atlantic avenue and Elliott place). Parmentier came from a noble French family. He emigrated to this country in 1824. He was a relative of the Parmentier who, during the time of Louis XVI., introduced the potato into France. Parmentier had discovered the nutritious qualities of the tuber, but his countrymen would have none of it, believing that it was poisonous, in which respect it shared the fate of the old "love apple" (tomato) of more recent times. The persevering Frenchman secured a statement from the Faculty of Medicine to the contrary. Permission to grow the plants was granted by the king, who placed at the disposal of Parmentier ground on the plain of Sablons. Here he planted his potatoes, and when they came into blossom he culled a number of the precious flowers and ran with them to the palace at Versailles, where he handed them to his obliging monarch, who, contrary to imperial conventionalities and regardless of the remonstrances of his courtiers, wore the potato flowers in his coat as a boutonniere.

The potato at once became popular in France, and Parmentier published a book on how to grow it. This act of Louis XVI. in wearing a potato blossom as a "button hole" somewhat antedates the fad, and takes away from the credit of the late lamented Citizen George Francis Train, who, in his recently published work, claims to have been the first to introduce the wearing of a flower as a boutonniere into Paris, in 1857.

The late Mr. Andrew Jackson Downing, the father of the park systems in America, writing in 1849, said of M. Parmentier, of Brooklyn: "In the nurseries which he established he gave a specimen of the natural style of laying out grounds, combined with the scientific arrangement of plants, which excited public curiosity and contributed not a little to the dissemination of a taste for the natural mode of landscape gardening. He was employed in laying out gardens in various parts of this country and Canada as well. In many cases he not only surveyed the demesne, but he furnished the plants and trees necessary to carry out his designs.

In his periodical catalogue he arranged the hardy trees and shrubs that flourished in this latitude in classes, according to their height, etc., and published a short treatise on the superior claims of the natural over the formal or geometric style of laying out grounds. In short, we consider M. Parmentier's labors and examples as having effected, directly, far more for landscape gardens in America than those of any individual whatever." He died in November, 1830.

Another noted garden of the olden time was that of Samuel Jackson, adjoining Swertcope's—"a walk to Clover hill, and Jackson's garden being a favorite with both sexes." Mr. Jackson, who had many beautiful and costly plants and flowers, always accompanied his visitors through the garden, and in his absence a man was on hand to see that none of his favorites was disturbed. He cultivated several cotton plants in his garden; in fact, in the year 1825 several balls of cotton were distributed in Brooklyn and almost everybody had a plant in his garden, but the cold weather soon killed them.

A most enthusiastic devotee of the garden craft was Mr. Noel J. Becar, whose greenhouse and grounds were located on the corner of Henry and Warren streets. Mr. Becar's favorite flower was the Camelia japonica. He raised several seedlings of this, at that time, very popular plant, which again is coming into fashion among flower buyers and lovers. One of these seedlings he named the City of Brooklyn, another Wilderii, in compliment to Mrs. Wilder, wife of the president of the Massachusetts Horticultural Society of the period.

Mr. Becar and Mr. James A. Perry organized about 1840, in South Brooklyn, a horticultural society, anterior to the date of the formation of the association presided over by Mr. Degrauw, but owing to adverse circumstances its life was of short duration. And although the enthusiasm of Mr. Becar in gardening matters and flower shows continued as formerly, he could never be induced to take any active part in the horticultural society created subsequent to his, because of the treatment he had received in his own endeavor to establish a similar association.

Mr. Perry's grounds were quoted by Downing as having been models of taste in landscape work in their day.

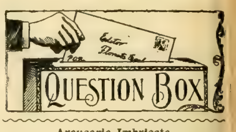
Not only among the laity did this love of the "purest of human pleasures" exist, but likewise among the clergy. One of the once famous gardens in the neighborhood of Brooklyn was that of the Rev. Peter Lowe, of Flatbush, who ornamented his grounds with shrubbery and trees, of which he was extremely fond. His garden was "his favorite place of meditation, from which he was wont to go to his lectures."

Mr. Beecher's love of flowers, shrubs and trees is well known. His speeches and sermons abound in many beautiful references and metaphors concerning them. He inaugurated the inspiring and now universal custom of having a vase of pretty flowers placed on the preacher's desk every Sabbath morning. Mr. James Park, an old-time florist, whose store was on Court street, this borough, supplied the first bouquet so used in Mr. Beecher's church.

The taste for well kept grounds, beautiful gardens and conservatories rich in floral treasures has descended as a goodly heritage to Brooklyn's sons and daughters of the present day. As examples of the love of gardening existing among our citizens may be mentioned the spacious grounds and glass houses of E. F. Bliss, Esq., of Bay Ridge; of William Brown, Esq., of Flatbush, and of Mrs. Charles Pratt, of Vanderbilt avenue.

A magnificent collection of orchids is owned by George Schlegel, Esq., of Bay Ridge, and many other Brooklyn gentlemen and ladies maintain well kept gardens and lawns.

In the Borough of Brooklyn alone over half a million square feet of greenhouse glass are devoted to commercial floriculture, a very large majority being given up to the cultivation of the carnation. Extensive areas of glass on Long Island are also set apart for carnation growing. Brooklyn boasts of over 150 retail florists' stores, two wholesale flower stores, and among the cut flowers handled by them the carnation plays a prominent part.



Araucaria Imbricata.

(32) I should like to ask Mr. Meehan through your valuable paper about the following: The other day I saw a large avenue of Araucaria imbricata. I learn that the trees had been planted about 26 years, so that I should think they were about 30 years old. I noticed that a great many of them were losing their branches entirely; they seem to start dying near the trunk first. What is the cause of this? The soil is of a loamy nature, with a well drained bottom. On inquiring I learn that the soil had been heavily manured every year. Would that be the cause of the trouble?
H. H. Y. B.

—As the branches are dying out here and there only and not the whole tree it points to a fungus trouble of some kind, and I would suggest that a good spraying of Bordeaux mixture would surely help them. Our sequoias suffer in a similar manner.

It is not probable the manure has anything to do with the trouble, otherwise the injury would be to the whole tree and not to a portion of the branches only.

The araucaria will stand a little frost, but not as much as we get here, so I have no practical knowledge of the subject from having the trees before me. But I have seen them growing beautifully in the south of England and have admired the fine avenue of them in Veitch's nursery, London. In California and British Columbia this plant is quite at home. A few degrees of frost does not hurt it, say 10 to 15 degrees, as its record in England shows; but with our clear skies in Winter it might not stand that much here.

I think spraying with Bordeaux mixture twice a year—in early Spring and Midsummer—would help the trees in question. JOSEPH MEEHAN.

Forcing Viburnum for Easter.

(33) Presuming Japanese viburnum Viburnum plicatum, is meant, it requires about six weeks to bring them into flower. A temperature of about from 55 to 60 degrees does to start them on, increasing it as the plants push into growth. Out-of-doors it takes about eight weeks before they flower but less time will accomplish the result indoors. The common snowball V. opulus sterilis, requires a week's less time than the Japanese.

The young shoots made last season must be preserved as far as possible as it is from these the flowers come.
J. M.

Carnations.

(34) We fertilized our carnations with chicken manure, and we find it is full of little red bugs. We have tried kerosene emulsion, soap suds, lime, and tobacco dust as remedies. The bugs come up at night and spoil the blooms by leaving spots on them. Do you know of any remedy? M. BROS.

—Is there not some mistake as to what is causing the spots on the carnations? The leaves sent here for inspection were spotted with carnation rust and showed no evidence of being punctured by insects. As for the bugs in the manure, a good watering of the soil with lime water, repeated in three or four days, will no doubt rid the soil of them.

Araucaria Excelsa.

(35) In handling Araucaria excelsa in a commercial way under glass during Winter, what is the lowest temperature that will enable the plants to do their best? How high a temperature could be maintained without making them weak or unhealthy? J. C.

—The araucarias do not thrive best where the extremes of temperature are so great, and from 58 degrees at night to 68 degrees through the daytime is a good guide to go by. They will, of course, stand a much higher temperature; but if such were long maintained, a spindly growth would result.

Boston Ferns.

(36) Would Boston ferns succeed if

benched in May, in a rather warm house in which palms and ficus are grown? The object is to increase them for young plants. What is the highest temperature that suits these ferns?
C. M.

—Boston ferns will succeed well if planted on the benches in May and grown on through the Summer. There is no better method of handling them. Give them plenty of air during the hottest days, and enough shade to keep them from burning, and they will thrive in the hottest weather if regularly supplied with moisture. Just how high a temperature they will stand, and still grow well, we are unable to say; but we never saw them suffer from heat, however hot the weather. There will be no danger in keeping them in the same house as the palms and ficus.

A Sport of Governor Roosevelt Carnation.

(37) A plant of Governor Roosevelt carnation has thrown a flower almost white, slightly penciled lilac. What will be the result of propagating from the stem bearing that bloom?
E. J. B.

—The white penciled flower occurring on the plant of Governor Roosevelt carnation is a sport, or bud variation, as it is usually termed, and it is certainly worth saving if the bloom is an improvement over existing types. Cuttings taken from the stem that threw the sport will probably yield similar flowers; but this is not positive. We would advise trying them, at all events.

Ardisia Crenulata.

(39) Is Ardisia crenulata propagated from seed? What treatment do the plants require?
E. E. I.

—Ardisias are grown both from seeds and cuttings. They are, naturally, warm house plants, and the seed should be sown as fresh as possible, in a house where the night temperature is about 60 degrees. When the seedlings are large enough to handle, transplant into pans, and from these, pot off, when necessary. Keep them in a warm growing atmosphere at all times, and by the third year they should make salable plants. A light, well-enriched soil is the best for them, one that drains readily and dries out easily. Frequent syringing of the young plants is also necessary, as they are liable to attacks of mealy bug and scale if the foliage is at all neglected in this matter.

Geraniums.

(40) When shall I stop pinching the buds of geraniums to have the plants in bloom the last week in May?
C. M.

—If the geraniums are kept growing in good shape, the buds may be kept down until the first week in April.

H. P. Roses.

(41) I received some H. P. roses the first week in January. Not having the right place to store them, I potted and started them growing in a cool house. As I have a number ordered for the second and last week in May, can I by pinching out the buds have them in bloom at that time; if so, when shall I stop pinching the buds?
C. M.

—The H. P. roses will be sure to be a failure, so far as flowering is concerned, if the buds are pinched out; as they would not throw any more buds until late in the season. The only thing to do, in the present instance, is to keep the plants back as much as possible by growing them cool. They cannot have made much headway yet, if they have been kept in a cool house.

Wood Ashes.

(42) How much wood ashes should be mixed with a load of soil, to be used next year in which to plant roses and carnations?
B. L. H.

—To answer this question intelligently, we should have been advised as to what other manures had been incorporated with the soil proposed to be used. We will assume, however, that one-fifth of a load of manure has been added to the soil; in that case, the ashes may be used in a ratio of one-eighth to the bulk of manure.

Dr. Arthur, of the Purdue University, Ind., spent January in the New York Botanical Garden in some work upon the plant rusts which he had under way for several years.

To Clean a Boiler.

(43) Can you advise me of some remedy to clean a No. 2 Lord & Burnham hot water boiler? Owing to the lack of hard coal we had to burn soft coal, with the result that the boiler became completely choked with coal tar, although I tried in every way I could to keep it clean. I had it soaked with kerosene and tried to burn out the dirt in that way; also scraped it after being soaked a couple of hours with coal oil, but to no effect. As it is, the house has already been frozen solid and a crop of violets injured.
COAL TAR.

—The writer has been using a No. 2 Lord & Burnham Company's boiler of the same construction as referred to by "Coal Tar" for the past fourteen years for heating his residence, using anthracite coal until the present Winter, when anthracite was impossible to get. This Winter I used soft coal and coke in about equal proportions, and the boiler has been running very satisfactorily. It has not clogged up to any extent, neither has there been any appearance of gas tar. In "Coal Tar's" case, it is possible that there is some trouble with the chimney, or the chimney flue is too large for the capacity of the boiler, and therefore does not get warm. If the flue is too large, in cold weather there would be slow draught and poor combustion, which would cause the gas to condense upon the surface of the boiler, thus producing the tar referred to. I think this tar could be removed by using a strong lye, and then having the surfaces carefully scraped. After this it would be well to investigate the chimney and see if the flue is of the proper diameter.
A. ELDER.

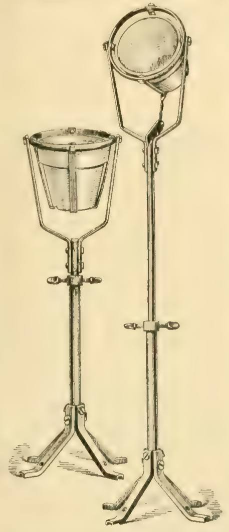
Outdoor Work for Women.

"Remunerative Outdoor Occupations for Women" was the subject of the lecture delivered before the Massachusetts Horticultural Society, January 10, by Miss Mary E. Cutler, Winthrop Gardens, Holliston. She spoke in part as follows:

"Raising flowers in greenhouses for market is a profession for which women are proving themselves especially adapted. It is a business that has to be learned like any other, but with a little experience added to natural qualifications, such as perseverance, energy, and common sense, one is sure to succeed. The plant I own and am running at the present time was started on $250 and I have built up a large, well-paying business. Given an acre of land, the first requisite, of course, is a greenhouse. A modest one can be built for $100 and a rough heating apparatus put in for $50. The cost of plants and seeds is slight, and other expenses, such as tools, fertilizers, cold frames for starting the plants, etc., would amount to little on so small a scale. The secret of success is to utilize every inch of space. In a vegetable house the tables can be filled with lettuce, cucumbers or tomatoes, while rhubarb and mushrooms can be grown on the ground underneath. A good head for planning is a necessity, and no time must be wasted between crops.

"The best location for such a venture as this is a small town or community of prosperous people. In a prosperous community you do not have to market flowers; customers will come to you for them. I sell all my flowers at my greenhouses. The profit is in decorating and set pieces rather than in cut flowers. A great advantage in this profession is that there is so much room in it for originality and taste. A branch in which a great deal of money can be made is in the sale of plants. All kinds of bedding plants are wanted in May and June for lawns, parks, cemeteries, cottages at the seashore, vases and wayside nooks. Pots filled with two or three California violet plants in bloom brought seventy-five cents in this city last Winter. Pansies are in demand in their season. Ferns, palms, and orchids grace your dining-rooms, churches, etc. The filling of window-boxes, designing new effects in jardinieres and hanging baskets is a line in which a woman can be very successful. The rose in all its colors is one of the most profitable flowers to grow under glass. The demand is great and people must have them.

"The raising of roses is a difficult branch of the business and should be taken up only after a certain amount of experience. When this is gained considerable money may be made in it. Did you ever stop to think where and how the beautiful flowers were grown? The flower business has great prizes to offer if one is of an investigating turn of mind. The large amount of money received for the Mrs. Lawson carnation is inspiring to one thinking of going into the business. It is wonderfully interesting to create new flowers; to make those bloom double that have heretofore been single, and to paint the lily a new color; it is really scientific work. It is adapted to women, and so profitable has it proved that it is strange that so few have taken it up. If a woman decides to take up flower and vegetable culture as a profession she ought, if it be possible, to fit herself for it by a previous course of study in some agricultural college; she should be familiar with botany and chemistry. If she has a chance to travel and study the flora of other countries, she has the greater chance of making a name for herself. Miss Myra Dock, of Philadelphia, is an illustration. She was sent by the Park Commissioners to study the park system in Europe. Trees should be studied as well as landscape gardening. Perhaps some day women may be park commissioners, and parks to-day show the need of some new element in that department of civic life.



Reed & Keller's New Extension Pot Holder

"The demand and supply for carnations was never so great as at the present time. Women all over the country are raising these with great success. I am engaged in growing carnations and grow them for profit as well as pleasure. Miss Taylor, a florist of Milford, Mass., has two carnation houses, one 19 by 37 feet, another 87 by 26 feet. She gives all her time to the work, propagating and growing her own stock and caring for the houses. She has found a market for everything in her own town, which is much more profitable than selling on commission. She has perfect health, enjoys her work, and supports her father and mother. In these progressive times the handle of the agricultural tool is coming to know the grasp of the woman's hand almost as well as the needle or the broom and many women are making reputations as farmers of progress.

"It was a good idea conceived by this Massachusetts Horticultural Society in offering prizes to scholars for school gardens and school herbariums. The cultivation and observation of plants in school grounds and instruction upon them are of high educational value. Native plants, such as ferns, grasses, asters, goldenrod, violets, native shrubs and economic plants, grains, vegetable roots and leguminous plants, must be the stock of the gardens. The children are approaching the coming season with unbounded zeal and enthusiasm. This tends to cultivate a higher taste for the beautiful. One essential to success in gardening is a love for it. Given this and intelligence to first plan carefully and afterward carry out the plans with perseverance, gardening will be found a successful, pleasant, and congenial occupation for women. Many of them could do much better at floriculture than to work for the very low wages paid for woman's work in the cities. It is not so much labor and muscle, nowadays, as brains and machinery. Don't do your work first and your thinking afterward, but think and plan first and then work.

"It is hoped that women will be led to realize that an existence spent in healthy, honest, out-of-door work is an existence which will enable soul and body to expand, as well as the mind. Let me urge the women of this society and city to engage in more out-of-door work, and bask in heaven's sunlight. Fewer headaches would be heard of and nervous prostration would be unknown. Have a flower or vegetable garden, take care of it yourself and don't neglect it. I hope it is no egotism to state that both in the floral and vegetable departments of horticulture, in which I have been engaged for the past seventeen years, I have been entirely successful. I was brought up in the business of market gardening. My father followed it before me, and being led to it both by circumstances and inclination, I naturally took it up. My home of sixty-eight acres is located in Holliston, Mass., on the Boston & Albany Railroad, twenty-five miles from Boston. The land slopes gently to the southeast and northwest, so that I can get two crops of early vegetables on the southeast slope, and peach orchards and later crops on the northwest. The branches that I am most interested and engaged in are flowers, vegetables and fruits. Peach orchards occupy a large corner of my farm, and have been a source of profit. When the trees are young, vegetables and small fruits can be grown by the rows, thus using all the available land. Apples, pears, plums and small fruits I also grow for profit.

New Extension Pot Holder.

Our illustrations show the new pot holder patented by Reed & Keller, New York City. This holder can be extended to various heights; and the part holding the pot can be angled in any position, making a very effective display where potted plants are used. The stand is made of malleable iron, is very strong and durable, and also very light. Its effectiveness will make it an indispensable article for all florists and growers.

Detroit.

A Carnation Show.

Instead of holding the last regular meeting at the club rooms, Harmonie Hall was engaged. On unusual short notice many carnations and roses were brought together, novelties as well as standard kinds being on exhibition.

The largest exhibit was made by the Chicago Carnation Company, Joliet, Ill. The most conspicuous of all their flowers was a grand vase of one hundred blooms of Harlowarden, standing erect with stems 40 inches long. Nearby were Marshall Field, Mrs. Higinbotham, Her Majesty and Mrs. Potter Palmer.

J. Breitmeyer & Sons showed a vase each of well-grown stiff-stemmed Dorothy, Mrs. Lawson, G. H. Crane and Bonne Homme Richard.

B. Schroter staged Cressbrook, Mrs. E. A. Nelson and The Marquis of excellent growth and quality.

Groman Bros. of Saginaw Mich., showed Ethel Crocker, Mrs. Lawson, G. H. Crane and Genevieve Lord. Ethel Crocker seems to be grown to perfection by this firm. C. W. Ward, Queens, N. Y., sent a vase each of President Roosevelt, Mrs. Roosevelt and Alpine Glow. The flowers suffered a little from the long journey, but recuperated somewhat before the evening was over, and brought out many favorable comments. Mrs. E. T. Grave, of Richmond, Ind., had a vase of President McKinley, which created an after talk on color, stem and lasting quality of blooms. Henry Eichholz, Waynesboro, Pa., sent a vase of Tiger, a striped novel variety.

John B. Goetz, of Saginaw, Mich., exhibited two vases of seedlings, one white and one deep pink. Boehringer Bros., of Bay City, sent several vases of seedlings, and one vase of 50 flowers of their new Daybreak Perfection These are an exact counterpart of Enchantress.

Chas. Frueh & Sons, of Saginaw, Mich., displayed large vases of the new bright red seedling No. 115, with stems 40 inches in length, stiff and erect. It was pronounced a coming commercial red.

Wm. Murphy, of Cincinnati, showed Murphy's White, the coming commercial white. A. B. Lewis, of Pontiac, Mich., sent a small white prolific seedling, which he has named Pontiac. J. E. Smith, Wyandotte, Mich., staged a bright red seedling of 1900, which showed a marked strength of stem and a large open-crested flower; also a vase of The Marquis. J. E. Carey had a vase of Cressbrook. Fred Miesel & Son a vase each of Guardian Angel, Wm. Scott, Mrs. Lawson, G. H. Crane and The Marquis. Robert Klagge had a vase each of Dorothy, Mrs. Lawson, Estelle, Mrs. Potter Palmer, Bonne Homme Richard, Cerise Queen, Prosperity, Morning Glory, Cressbrook and a vase of special seedlings, 40 in number Beard Bros. sent a vase each of Guardian Angel, Mrs. Lawson, America, White Cloud, Mrs. Bradt, Mrs. Frances Joost and The Marquis. Robert Watson, a vase of Norway; George Kennedy, a vase of Genessee; Gutchow & Son, a vase each of Mrs. Lawson, Glacier and Morning Glory. James Taylor exhibited a special vase of 50 Mrs. Lawson.

Theodore Damerow had a vase each of Mrs. Lawson, Queen Louise, Mrs. E. A. Nelson, Cressbrook and The Marquis; Asman & Dunn, a vase each of G. H. Crane, Lorna and Prosperity; H. G. Flammer, a vase each of G. H. Crane and The Marquis; Frank Holznagel, a vase of 25 long-stemmed Armazindy; George Davis, a vase of General Gomez.

In roses, J. Breitmeyer & Sons showed a vase of Mrs. Pierpont Morgan, Mme. Cusin, Bon Silene, Isabella Sprunt, Perle des Jardins, Sunset, Meteor Bridesmaid and Bride.

Wm. J. Pearce, of Pontiac, Mich., showed some specially grown vases of Bridesmaid, Bride and Meteor roses on long, stiff stems.

Geo. Hupp, of Grand Rapids, showed a vase of a new seedling rose, with 40-inch stem, of a beautiful, pleasing shade of pink, large and full flower, foliage a deep green; bound to be a coming commercial variety.

James Taylor staged 50 Princess of Wales violet blooms, very large, with special long stems.

Invitations were sent to all florists and brought out a large attendance.

The features of the evening were inspecting the array of blooms, dancing by the young, card playing by the old foggies and all-day-suckers for the kids.

The E. G. Hill Company of Richmond, Ind., sent 25 blooms of Innocence, which to our sorrow arrived one day too late. Many viewed the blooms and pronounced them very fine.

J. D. Thompson Carnation Company, of Joliet, Ill., by mistake, sent Enchntress, Mrs. M. A. Patten and Governor Wolcott, just one week two early. Enchantress was missed very much by every one. We tried to save them, and, although the keeping qualities are first-class, the flowers were not fit for the bench.

Visitors to the show were: James Hartshorne, Joliet, Ill.; John Frueh, Saginaw, Mich.; Rudolph Boehringer, Bay City, Mich.; James Gordon, Mt. Clemens, Mich.; E. Dungey, Orien, Mich.; W. H. Watson, Lapeer.; A. B. Lewis, Pontiac, Mich., and C. R. Tuson, Windsor, Ont. DILGER.

St. Louis.

Club Notes.

The regular club meeting will have been held Thursday before the publication of these notes. On Saturday night, the 14th, the club will give an entertainment, dance, etc., to its members, friends and their families. Acceptances of the invitations are coming in briskly to Mr. Beneke, and an enjoyable evening is promised for all. The talent has been selected exclusively from those in the trade and their families.

Among Growers.

Edward Hicks has a very fine lot of blooming callas. He says it does not pay to buy small bulbs nor to carry your own bulbs over from year to year. He buys them fresh every year and has now the finest that he has had for twenty-five years. His Harrisii lilies look half of them sick, but those that are not affected promise to turn out fine plants for Easter.

At Henry Felter's was seen the best hydrangeas the writer has noticed this season. He is also growing a number of lilies for Easter, but there is the same mixture of the longiflorum and Harrisii, and disease as in former years, while, strange to say, other growers report but only from 5 to 15 per cent. diseased bulbs. Bentzen Floral Co., out of two hundred Harrisii, have only five which show signs of the disease.

Henry Braun, on Easton avenue, has experienced a very successful business for the first year. He is gradually improving his store and adding new stock as occasion demands.

The appointment of a superintendent of floriculture for the World's Fair, under Chief F. W. Taylor, has not yet been made. The drawings of the Horticultural Building will soon be completed and ready for publication.

Indianapolis, Ind.

News Notes.

Indianapolis is to have another Chrysanthemum Show the coming Fall. Although there have been larger exhibitions in the country, few of them have been superior in quality to those held in Indianapolis during the past fourteen years. The following are the officers for the coming show: President, F. S. Mayer; first vice-president, H. P. Wasson; second vice-president, Geo. Gay; secretary, Irwin Bertermann; treasurer, Wm. Milholland; manager, John Bertermann. The most of the gentlemen named are merchants who assume only the management of the show. This, with a good premium list and a lot of good growers in the immediate vicinity, ought to give Indianapolis an excellent exhibition. The secretary was instructed to write the following florists to prepare a premium list (which will be issued as soon as possible): E. G. Hill, J. A. E. Haugh, Fred. Dorner, A. Baur, Henry Rieman, John Hartje, E. A. Nelson, and H. Junge.

The State Florists' Association held its monthly meeting February 3, at which arrangements for the coming show were discussed. An advisory committee to the directors of The Indiana Floral Festival Chrysanthemum Show was chosen. The committee consists of the following: Fred. Dorner, Jr., J. S. Stuart, Fred. Lemon, H. W. Fieman, and John Hartje. Several of the florists thought the management ought to consist of direct representatives of the society. This was outvoiced by a large majority of themselves, and all are now ready to put away discussion and grow for another show. The new officers were installed at this meeting.

Charles Knopp was in Indianapolis this week. He is preparing for the company's range of houses at Richmond.

Several of the Indiana growers are preparing for the Carnation Society's convention. Had it not been for the long dark weather and scarcity of stock in this section, more growers would be willing to send flowers to the exhibition.

Our Dutch bulb friends are again making their annual appearance.

Visitors: E. G. Hill, Herbert Heller, J. A. E. Haugh, and Fred. Dorner.

I. B.

Tarrytown, N. Y.

The Tarrytown Horticultural Society held a meeting on January 29, 1903, President David McFarlane in the chair. The executive committee reported in favor of offering the following prizes for chrysanthemums, to be competed for at the next Fall exhibition of the Chrysanthemum Society of America, to be held in New York City: For 25 distinct varieties of cut blooms, first prize, $15.00; second prize, $10.00. For 12 distinct varieties of cut blooms, first prize, $10.00; second prize, $5.00.

It was recommended that all local societies be asked to offer similar prizes, and to compete for the same, and that this national society offer a sweepstake prize, for the local society making the best exhibit in competition for their own prizes, those making other exhibits from other societies not to count in competition for such sweepstake prize.

The following gentlemen were proposed for active membership: W. F. Connell, John B. Sackett, and George H. Martin.

A prize box of cigars will be given for the best exhibit of flowers of bulbous stock shown at the February meeting.

November 5 and 6, 1903, were fixed as the dates for the next annual flower show.

H. J. R.

Charlotte, N. C.

Busines since Christmas has kept up very well, occasioned by funeral work and decorations for receptions and parties. Flowers have been scarce. Weather conditions are very changeable, one day sunshine, two days cloudy, with rain and frost occasionally interspersed. Very little coal is in sight. Soft coal is selling at $5.50 per ton.

Worcester, Mass.

The Horticultural Society has arranged an unusually interesting and instructive series of meetings for the coming season. An increased attendance demands the best efforts of the committee in charge. Florists from all over the county are looking toward Worcester as the Athens of Floriculture.

Mr. and Mrs. E. F. Breed, of Clinton, have gone to Jamaica for the benefit of Mrs. Breed's health.

A visit to the new double carnation house of H. F. Littlefield showed us a handsome lot of plants. Mr. Littlefield expects to cut 100,000 flowers from this house. He also has about 5,000 lilies in good condition for his Easter trade.

Flowers have been somewhat scarce here for a few weeks, but they seem to be coming in more plentifully. Prices are high and about the same as Boston figures.

Worcester, with a population of about 125,000, has only two regular seed stores and one of these is quite small. Both of these houses issue catalogues, but have not as yet mailed them out for this season.

Farmers and market gardeners are very slow in placing their orders early, notwithstanding they were warned by Mr. Farquhar in his lecture a few weeks ago. The high prices of peas and some other garden seeds will raise havoc among the smaller dealers in this vicinity.

THE FLORISTS' EXCHANGE, 2 Duane Street, N. Y

Milwaukee.

The past week was an eventful one for the florists. Through the breaking of a carboy of nitric acid at the Schwaab Stamp & Seal Company the fire department was called out, and while the damage by fire was insignificant it cost the lives of our chief and three of his men. The effects of inhaling the acid fumes were not apparent until almost ten hours afterward, when some fifteen men were suddenly taken ill. Four have since died. The funeral was the largest ever held in the city. The bodies of the chief and three pipemen were lying in state in the rotunda of the City Hall, where thousands of people viewed the bodies and decorations. The entire lower floor had been draped in solid black from the second floor balcony. The entire length on both sides of the rotunda was decorated with palms and wild smilax, at the end of which stood a black disc from which there stood forth in shaded lights the words "The Last Call." Beneath this disc and toward the center of the hall stod four coffins with many beautiful floral tributes about them. At the head of the casket containing the remains of the chief was a large cross, about 8 feet in height, made of lily of the valley and lilies, festooned with ribbon. The cross was a tribute from the Common Council. The fire department contributed four large broken wheels and also four call boxes made of red carnations with the inscription "45," as this was the last call box. One of these was placed on each coffin. The Canadian Government sent a wreath, three feet in diameter, made of violets and lily of the valley, with the inscription "Canada's Sympathy for a Hero." The Board of Public Works sent a large gates ajar, the police department four large stars. Many societies and business houses sent floral tributes and a great many came from relatives and personal friends. Never before was there such a profusion of flowers seen in Milwaukee. They were literally banked about the caskets and around the sides of the rotunda. Jas. Chacona, Currie Brothers, and Wm. Edlefsen made up most of the larger pieces, but nearly all in the trade shared in a portion of the work.

C. C. P.

St. Paul.

Among Growers.

E. F. Lemke's range of houses, on University avenue, is not looking very well as everything was nipped by frost Christmas Day, owing to the carelessness of an employee in not keeping up fires. However, the stock is now on the road to recovery. For Easter he has coming on the usual batch of lilies and other bulbous flowers, as well as azaleas, hydrangeas, hybrid roses and some clematis, which, if brought into bloom for the occasion, will be quite a novelty for this city.

Chris. Bussjaeger is growing roses and carnations for Winter blooming. The plants are clean and healthy and he is cutting a fair crop considering the weather conditions.

Fred Franke, on Charles street, has a neat range of houses devoted to growing cut flowers exclusively for the wholesale trade. The roses here are in fine condition, but very few blooms are in evidence. Carnations are somewhat better, though the cut is very light at the present time. Violets are in bad shape, and will soon be thrown out to make room for Spring stock. A bench of sweet peas just coming into bloom gives promise of a nice crop in the near future. Mr. Franke's place consists of about 8,000 square feet of glass and is well kept, neat and tidy.

From there I walked to Fred Schultz's place a few blocks distant on Lafond street where the dark weather has played havoc with carnations and violets. Plenty of foliage, but blasted buds tell the story of lack of sunshine more plainly than I can. These will be thrown out in a short time to make room for Spring bedding plants, which he grows in large numbers.

H. J. Puvogel, on Grand avenue, is another wholesale grower, his specialty being blooming plants. This place was moved and rebuilt in the Summer of 1901 and is therefore comparatively new. There are four houses, containing about 6,000 square feet. His stock of primroses, asparagus, ferns and smilax is very fine. One house planted to carnations has been a paying investment during the season. Mr. Puvogel is located in one of the best sections of the city and does a large Spring business in bedding plants. With six or seven sons to assist him he will most likely build up a fine trade.

I did not have time to visit Wm. Strehlow's place, several blocks distant from Puvogel's, but understand he is picking the finest violets in the State.

H. E. Philpott, of Winnipeg; Ralph M. Ward, of Wm. Hagemann & Co., and Chas. Schwake, representing C. F. Meyer & Co. of New York; C. W. Scott, of Vaughan's Seed Store, and A. L. Vaughan, with E. H. Hunt, of Chicago, were recent visitors.

VERITAS.

Orange, N. J.

Annual Dinner.

Combined with the usual "feast of reason" and "flow of soul" of the New Jersey Floricultural Society was a floral display which made amends for the loss of that last Fall. It evolved itself into a carnation show. Peter Fisher sent Enchantress, and the Chicago Carnation Company a variety. It was regretted that C. W. Ward's contribution did not arrive in time. Local growers contributed: Prosperity and Mrs. G. M. Bradt, by John Hayes, superintendent of the O. D. Munn estate in Llewellyn Park; Mrs. Thomas W. Lawson, by Peter Duff, of "Brighthurst"; a variety of blooms came from Vice-President William Bennett, gardener for Mr. Von Gasbeck. The Bride and Bridesmaid roses of the president, and the begonia Gloire de Lorraine of Treasurer Malcolm MacRorie were very much admired.

After the disappearance of the substantials and while the usual condiments, etc., were circulating, President Smith and ex-President John Hayes addressed the company. William Duckham responded to "The Carnation," Arthur Herrington to "The Chrysanthemum," asking that the sister societies offer prizes for that flower. C. H. Totty spoke for the Madison Gardeners and their bowling. J. Austin Shaw delivered an original ode upon the "Origin of Gardening," beginning with the Garden of Eden and ending with Orange. W. J. Stewart delivered himself in particularly happy vein, attributing the excellence of the floral display to the large representation of Boston "culture," not only in flowers, but in the men that grew them, claiming John Hayes, with whom he was associated twenty years ago in Boston, and W. A. Manda and Dave Rose, as having received their early and therefore lasting professional preparation upon the soil of—Boston.

In speaking for the "Gardening Profession," Dr. J. M. W. Kitchen claimed more for its influence on the man than any other professional or commercial line, drawing out the æsthetic as well as artistic traits in his development, and, while moulding and perfecting these, lost none of the social traits.

W. A. Manda, in pleading for a regular monthly display of flowers at the Society's meetings, praised the excellence there shown, comparing so favorably with anything he had seen this season, not excepting even metropolitan shows.

J. B. D.

Waseca, Minn.

The Radical, of this city, contains an appreciative article on Wm. Kemper's success as a florist. He erected his first building in this city about seven years ago. In size it was 32 x 40 feet. After a year he enlarged it to 32 x 65 feet. His business grew year by year and last Summer he decided that he must have more room. The old buildings were torn down and the present modern ones erected in their places. They are 32 x 95 feet in size and equipped throughout with modern appliances for heating and ventilating.

Poughkeepsie, N. Y.

It is reported that Wm. G. Saltford will vacate his present premises by the 1st of June next rather than submit to an increased rental which is proposed to be demanded. There is an intimation afloat that the owner of the ground on which Saltford's greenhouses are located may enter the florist business.

A. T. DE LA MARE PTG. & PUB. CO., Ltd
2 Duane Street, New York

CAUGHT ON THE FLY.

LITTLE FALLS, N. Y.—J. T. Graham has had quite a rush of funeral work.

CANOJOHARIE, N. Y.—Gates greenhouses suffered quite a loss by a boiler giving out.

GLOVERSVILLE, N. Y.—Locher will build two greenhouses, each 35 x 165 ft. He has had quite an amount of funeral work.

AMSTERDAM, N. Y.—F. Hotaling & Son have been quite busy with funeral work.

SCHENECTADY, N. Y.—Summer & Evans are busy with decorations. Grupe is also quite busy, as is W. C. Eger. Julius Eger has gone out of business. Coal is scarce here. Grupe allowed his greenhouses to freeze, and others had hard work to get along.

CORTLANDT, N. Y.—L. M. Hopkins reports business satisfactory; coal is plentiful with him.

SYRACUSE, N. Y.—Quinlan has all he can do, and Morris is working hard. Marquises is finding ready sale for his carnations.

OSWEGO, N. Y.—Business is quiet through here. N. W. Matoon and W. H. Workman report business fair. Coal is plentiful.

WATERTOWN, N. Y.—Greene & Underhill can hardly keep up to the demand for cut flowers. The firm is sending to New York market almost every day for goods. A. Stoeckle reports business brisk.

HERKIMER, N. Y.—James T. Barclay suffered through his greenhouses freezing, owing to carelessness of an employee.

G. W. GOLDNER.

Plate 47

ACER PSEUDO PLATANUS—European Sycamore Maple

On the grounds of the Estate of the late Mr. William Walter Phelps, Teaneck, N. J. Planted 30 years, the tree has attained a height of 35 feet. As the picture shows, it is a grand shade tree, and really deserves to be more extensively planted than it is to-day.

Carnation Society Meeting and Exhibition Number

THE FLORISTS' EXCHANGE

We are a straight shoot and aim to grow into a vigorous plant

A WEEKLY MEDIUM OF INTERCHANGE FOR FLORISTS, NURSERYMEN, SEEDSMEN AND THE TRADE IN GENERAL

Vol. XV. No. 8 NEW YORK, FEBRUARY 21, 1903 One Dollar Per Year

NOVELTIES IN CARNATIONS

We Offer Strong Rooted Cuttings of the Following Leading Varieties, Viz.:

Enchantress Having placed a very large order for this exceedingly valuable new variety very early last year, we are in position to make immediate and early delivery. **$12.00 per 100; $100.00 per 1000.**

Adonis This sensational new scarlet is meeting with a tremendous sale. **$14.00 per 100; $120.00 per 1000.**

Harlowarden A very free-blooming new crimson variety, very highly regarded. **$12.00 per 100; $100.00 per 1000.**

Fragrance The sweetest carnation ever grown; hence, its name. Winner of the Craig Cup at Philadelphia, 1902, for the best seedling of American origin. This has been a great favorite in the New York market for the past three years, where it has been known as "Blush Seedling." **$12.00 per 100; $100.00 per 1000.**

White Bradt A white sport from **Mrs. Geo. M. Bradt,** with which it is identical in every way except color, which is pure white. **$12.00 per 100; $100 per 1000.**

Boston Market This new white variety, raised by Peter Fisher has attracted a great deal of attention around Boston—where it has been tested by a few of the leading growers—on account of its free-blooming qualities. We can recommend it very highly. **$5.00 per 100; $40.00 per 1000.**

The Queen Another fine new white sort, also very highly thought of in the vicinity of Boston, where it originated. Exceedingly prolific, grand stem, exceedingly free bloomer, fine keeper and shipper. **$10.00 per 100; $75.00 per 1000.**

Lillian Pond Very large and of fine form. Very free and continuous bloomer. **$10.00 per 100; $75.00 per 1000.**

Fair Maid This has proved exceedingly profitable. Fine silvery pink. A grand Spring and Fall bloomer. Awarded silver medal Mass. Horticultural Society. **$6.00 per 100; $50.00 per 1000.**

Marshall Field Variegated. **$12.00 per 100; $100.00 per 1000.**

Her Majesty White. **$10.00 per 100; $80.00 per 1000.**

JAPANESE FERN BALLS.

We have a fine lot of these in first-class shape. Extra sized balls about 8 inches in diameter. **$3.50 per doz.; $25.00 per 100.**

FICUS ELASTICA (Rubber Plant).

We have a grand stock of these plants in splendid shape, grown cool, with large perfect leaves right to the pot. Extra good value.

Extra strong plants in 6-in. pots, 1½ to 2 ft. high	$6.00	per doz.
" " " " " 2½ "	9.00	"
" " " " " 3½ "	12.00	"

Very large bushy specimens, 3 plants in a pot, fine for decorating, hotels, etc., 4 to 5 ft. high. $5.00 each.

F. R. PIERSON CO., Tarrytown-on-Hudson, N. Y.

Asparagus Plumosus Nanus

CUT STRINGS, 50 CTS. EACH.
